License of Water Right No. 63-7834 Priority July 19, 1973 Amount 0.07 cfs

THIS IS TO CERTIFY, that WILLIAM S. HARRISON
of Caldwell, Idaho, has complied with the terms and conditions of Permit
No. 63-7834 issued pursuant to Application for Permit dated July 19, 1973,
and has submitted proof to the Department of Water Resources on January 8, 1975,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.07 cfs of water from a ground water source,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume

On this property, there is an existing, very old well with a very small artesian flow. It has a 4" casing. It is very difficult to use decreed water to properly irrigate this mobile home park.

I have pumped the sand from the well and attached a 2 hp motor and pump. To the pump I have attached aluminum irrigation pipe and sprinklers. This works out beautifully to irrigate this park and I would like file on this underground water for permanent use.

Gentlemen:

Along with your letter of February 25, 1974, you enclosed an approved application for a permit. In your letter you further directed my attention to Page 4 of this permit. About two-thirds of the way down on Page 4 of the permit, there is a notation that "Proof of construction of works and application of water to beneficial use shall be submitted on or before March 1, 1975".

Will you please advise me how I go about proving construction and application of the water? This past summer I installed a new pumping system and revamped the entire system and used the water during the irrigating season of 1974.

If there are further measured that I need to take to file on this water, will you please advise me. Thanks in advance for your very efficient help.

Dear Mr. Harrison:

One of the conditions of approval of your water Permit No. 63-7834 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before March 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

I recommend that this application be approved with the Mar 15 - Nov 15 irrigation season as is normal for irrigation applications.

Most likely the App should have been filed for domestic purposes

Jim

As an alternative we might approve the Jan 1 - Dec 31 season with the irrigation limitation (volume) remaining intact as if it retained the shorter ir season.

Re: Permit No. 63-7834

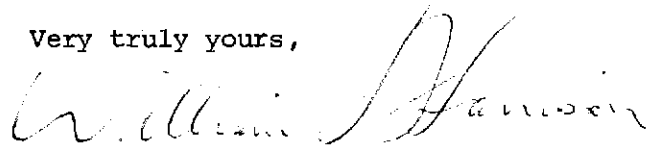

Dear Mr. Booker:

My reason for requesting the water right for the period January 1 through December 31 is that this water will be used to irrigate a mobile home park. It may be that sometime in the future I will want to start lawn grass prior to March 15. Also it has occurred to me that sometime in the future I might want to use this water for domestic use in the mobile home park on a year around basis. This is only in the event that domestic water should become short in the city of Caldwell at some far distant time in the future.

If under these circumstances it is not possible to get me the permit from January 1 through December 31, would you please go ahead and send the permit from March 15 through November 15.

I trust this will enable you to bring this matter to a completion. If you have further questions, please let me know.

Very truly yours,

O Re: Application for Permit No. 63-7834

Dear Mr. Harrison:

P During the final review of your application for water right, we have noted that you requested an excessive period of use.

The normal irrigation season in the area of your application is from March 15 to November 15. Your application requested January 1 to December 31. In order for this department to approve the application for irrigation usage, we must change the period of use to March thru November 15.

Y If you feel that you can in some way justify the extended season originally requested, please contact this office within 10 days. It is imperative that we complete this change as soon as possible in order that we can complete the processing of this permit.

Please feel free to contact this office if you should have any questions.

Sincerely,

JAMES E. BOOKER

Dear Mr. Hamilton:

Thank you for your letter of July 16, 1973 and also for retyping my previous application. Enclosed is a map of the City of Caldwell on which I have outlined the Golden Gate Addition and also Block 45 of the Addition. I trust this will be satisfactory; if not, I will be glad to go to the Court House and determine the 40 acres subdivision on which this Block is located.

My purpose in asking for point .1115 c.f.s. is because that is approximately the amount of water that this well will pump. If you can only allow 0.06 c.f.s. that will be satisfactory to me.

The reason I requested twelve months use rather than the usual nine months was because I felt that it is possible I might want to start some grass during the other three months. Also, possibly somewhere down the line in the future I might want to use the water for domestic purposes; that would be only in the event of Caldwell expanding and being unable to furnish enough water, and this would then be supplemental. If it is possible, I would like to have this permit for twelve months; if not, I will have to do with the nine months period.

The answer to your last question is: Yes, this water is supplemental to the Golden Gater water.

If you need any further information or if there is any way I can assist you in getting the necessary information, please let me know.

Very truly yours,

Mr. William S. Harrison

Dear Mr. Harrison:

We are returning your application for permit and check no. 92-51 in the amount of \$10.00. We are also enclosing a retyped application with some changes.

We do not have access to a map which shows the location of Block 45, Golden Gate Subdivision. If you can supply us with a map of the subdivision, we can locate the point of diversion and place of use. If a map is not available, we need to know the 40 acre subdivision in which the well is located and the map on page 3 must be completed.

You have asked for .1115 c.f.s. for the irrigation of these acres of land. We can allow only 0.06 c.f.s. Also, in item 4, we changed the period of use to March 1 to November 31 as this is the normal irrigating period in that area. In item 7a, we have changed the time required to one year. I also note that you have water from the Golden Gate Irrigation District. Will this water be supplemental to the district water?

Please sign the new application and return it to us along with the filing fee and we will proceed with processing your application. If you need further assistance, please do not hesitate to contact this office.

Sincerely,

ROBERT W. HAMILTON
Supervisor of Water Distribution
