R. 2 W. B. M.

T. 15

November 1974.

Administrator Director Operations Division

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

A hand-drawn diagram on graph paper. The diagram consists of a rectangular area filled with diagonal hatching. The hatching is composed of two parts: a top rectangle and a bottom rectangle. The top rectangle is labeled "R. 2W B.M." at its top center. The bottom rectangle is labeled "P.D. 2" on its left side and "T. 15" on its right side. The number "15" is also written below the bottom rectangle. The entire diagram is drawn on a grid of solid and dashed lines.

Scale: 2 inches equal 1 mile

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

John A. Van Noy

NOTICE OF APPLICATION FOR WATER PERMIT

Notice is hereby given that JOHN A. VAN WYCK, Box B, Melba, Idaho, has on June 19, 1973 submitted Application No. 63-7814 for a permit to appropriate 4 cubic feet per second of water from a groundwater source by means of well, pump and gravity within the SW 1/4 NW 1/4, Sec. 15, T. 1 S., R. 2 W., B.M., Canyon County to be used from Mar. 15 to Nov. 15 for the irrigation of 200 acres within the NE 1/4, NE 1/4 NW 1/4, Sec. 15, T. 1 S., R. 2 W., B.M.

If issued, this permit will be subject to all prior water rights. Protests against the granting of the permit must be filed with the Idaho Department of Water Administration, Statehouse, Boise, Idaho, 83707, on or before July 16, 1973.

NOTICE OF PROPOSED
AMENDING OF WATER
PERMIT

Notice is hereby given that permit No. 63-7814 in the name of JOHN A. VAN WYCK, P.O. Box B, Melba, ID was issued for the diversion of 0.8 cfs of water from a groundwater source with point of diversion within the SW¹/₄NW¹/₄, Sec. 15, T. 1 S, R. 2 W, B.M. Canyon County to be used from March 15 to Nov. 15 for irrigation of 200 acres within the NE¹/₄, NE¹/₄NW¹/₄, Sec. 15, T. 1 S, R. 2 W, B.M.

The permit holder now proposes to amend permit No. 63-7814 changing the place of use within SW¹/₄NW¹/₄, Sec. 15, T. 1 S, R. 2 W, B.M.

Any protests to this proposed amending of the permit must be filed with the Idaho Department of Water Resources, Statehouse, Boise, Idaho 83720, on or before Oct. 28, 1974.

**BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO**

IN THE MATTER OF APPLICATION FOR)	
TRANSFER NO. 5356 (WATER RIGHT NOS.)	PRELIMINARY ORDER
63-02712, 63-02955, 63-03099, & 63-07814))	
IN THE NAME OF TOM KASPER)	
_____)	

Tom Kasper filed application for transfer no. 5356 with the Idaho Department of Water Resources (IDWR). The application was protested by Ken Omundson, Kyle Winnicki, and Curt &/or Jerry Hensley. A hearing was conducted on April 27, 1998. Kyle Winnicki withdrew his protest prior to the hearing. Tom Kasper appeared at the hearing and was represented by Bruce M. Smith. Ken Omundson appeared and was represented by Chas. F. McDevitt. Curt & Jerry Hensley appeared representing themselves.

After reviewing data referred to in Tom Kasper's presentation of evidence, the hearing officer notified the parties he would consider data from AGRIMET stations located at Parma, Grand View, and Nampa. The hearing officer also notified the parties he would consider consumptive use data developed by Allen and Brockway. The hearing officer granted the parties until June 25, 1999, to submit additional information and granted until July 7, 1999, to request a hearing to augment the record. Bruce Smith, Tom Kasper's attorney, and Sherl Chapman, a consultant hired by Tom Kasper, submitted additional information. A hearing to augment the record was not requested.

IDWR finds, concludes, and orders as follows:

FINDINGS OF FACT

1. Tom Kasper (Kasper) filed application for transfer no. 5356 with IDWR, seeking to change the point of diversion, place of use, nature of use, and period of use for water right license nos. 63-02712, 63-02955, 63-03099, and 63-07814. Summaries of the water rights are attached to this decision as Attachment A.

2. The application for transfer proposes to retire 50 acres from irrigation to compensate for delivery of water to a dairy owned by Kasper. The land proposed to be retired from irrigation is located in the SWNW¹ (20 acres); NESW (20 acres); NWSW (5 acres); and SESW (5 acres); all

¹ Absence of the quadrant fraction implies the fraction "1/4."

located in Section 15, T01S, R02W, B.M.² Only water right nos. 63-02712, 63-02955, and 63-07814 describe these lands as a place of use. The application for transfer proposes a change from irrigation to stockwater and commercial water uses for the dairy from these three water rights. The transfer does not propose a change in the irrigation use of water right no. 63-03099.

3. In 1996, Kasper built a dairy in the NENE of Section 27, T01S, R02W. The dairy was approved by Canyon County without objection. The nearest subdivision is over three miles away. Kasper employs ten people and buys local feed and other products. Kasper testified his dairy is approved as a Grade A dairy.

4. At the present time, Kasper milks approximately 600 cows. Kasper intends to increase the number of dairy cows to 2,000 milking stock, 1,000 replacement stock, and 200 beef cattle.

5. The existing 600 cow dairy is presently served by wells on the Kasper property near the dairy. Several domestic and stockwater claims, now in the name of Kasper, were filed claiming a beneficial use of water from wells located near the Kasper dairy. Kasper has been unable to increase his dairy herd because the existing wells will not produce sufficient quantity or quality of water. As a result, Kasper seeks to divert water from a well located in the SENW of Section 15, T01S, R02W. The proposed point of diversion is located 1½ to 2 miles north of the dairy facility. This well is referred to in the testimony and the application for transfer as well no. one. Well no. one is located on property owned by Ken Omundson (Omundson). Kasper has built and constructed a pipeline from his dairy to the property boundary with Omundson. Kasper has not connected the pipeline to the well.

6. The application for transfer proposes that all four water rights describe two points of diversion, well no. one and another well located in the SWNW, Section 15, T01S, R02W (well no. two). Sherl Chapman (Chapman), an expert witness hired by the applicant, testified that license no. 63-02955 authorized diversion from well no. one, and license nos. 63-03099 & 63-07814 authorized diversion from well no. two. The licenses do not describe the points of diversion in the same locations as the locations of well nos. one and two described by the application for transfer, however. License no. 63-02712 described a different well than well nos. one and two.

7. A 75 horsepower pump and motor diverted water from well no. one at the time Kasper acquired the property in 1992. The pumping capacity of the 75 horsepower pump was tested in December 1998 by Caron Pump Company. Applicant's Exhibit no. 1, an invoice from Caron Pump Company, contains information gathered during the test. The well was pumped for the first 24 hours at a rate of 400 gpm (0.89 cfs), and the pumping water level in the well did not change from the initial static water level. The pumping rate was increased to 1200 gpm (2.67 cfs) for an additional 24 hours, and the water level in the well declined four feet. Based on the information

² The abbreviation "B.M." stands for "Boise Meridian" and should be implied in subsequent public land survey descriptions.

written on the invoice, water levels were only measured twice, once at the end of each 24 hour period. Water levels in other wells were not measured during the pump test.

8. Chapman used the pumping rate and drawdown to estimate the characteristics of the aquifer. Chapman stated, however, that the test was not conducted as a standard pump test.

9. Ed Squires, Omundson's expert witness, testified that the data gathering by Caron Pump Company did not follow standard methods for conducting a pump test. He stated that the water producing zone, known as the "Mellin Formation," is highly variable, and that the zone is probably discontinuous. He testified that long term testing would be required to determine the characteristics of the aquifer. This testimony was not disputed in the record.

10. The testimony established that the test did not adhere to standard pump test procedures to determine characteristics of the aquifer, or to show that the effect of the well's drawdown had been fully established. Nonetheless, the test was sufficient to estimate the short term pumping capacity of the well.

11. Water from well number one has been the sole source of water to irrigate 55 acres located in Section 15, T01S, R02W, including the 50 acres proposed to be dried up by this application for transfer.

12. The cumulative acres listed for irrigation by the four water rights is 501 acres. All of the lands except the 55 acres located in Section 15, T01S, R02W, have been irrigated with surface water diverted from the Snake River.

13. Ground water diverted pursuant to water right nos. 63-02712, 63-02955, and 63-03099 was only delivered to lands in Sections 16, 26, & 27, T01S, R02W when surface water was not available. Ground water diverted pursuant to water right nos. 63-02712, 63-02955, and 63-03099 supplements surface water for all lands other than those in Section 15, T01S, R02W.

14. Omundson owns a domestic well located approximately 130 to 140 feet west of well number one. Omundson drilled his domestic well in 1995. The priority date of his domestic water right is later than the priority date of the licenses sought to be transferred by Kasper.

15. If this application for transfer is approved, Kasper will install two 50 horsepower pumps in well no. one. The combined design capacity for the two pumps will be 900 gallons per minute (2.00 cfs).

16. Chapman computed the water needs for a dairy of 2,000 milking stock and 1,000 dry stock. His computations are printed on a worksheet attached to the application for transfer. He did not include the 200 beef cattle in his computation. Using numbers consistent with IDWR guidelines, Chapman determined the dairy would consume 162 acre feet annually.

17. The additional information submitted after the hearing by Kasper's attorney and Chapman stated that the 200 beef cattle referred to in the application were not included in the computation because water is provided for the beef cattle from other water rights, and the beef cattle were included in the application for transfer "to provide for flexibility" for Kasper's "operation." Nonetheless, some water for the beef cattle would have to be retired from the irrigation portion of the right for the beef cattle to be included in the transfer.

18. The computation sheet attached to the application (Attachment B) states that the 50 acres were alfalfa ground, and that 3.25 acre feet/acre is the consumptive use that should be applied to determine the number of acres to be retired.

19. At the hearing, Chapman testified that the historical cropping pattern was 50% alfalfa and 50% grain. Chapman testified that 1996 evapotranspiration data from an AGRIMET station at Nampa were used to calculate an historical consumptive use of 3.25 acre feet/acre for the 50 acres proposed to be dried up.

20. In additional information submitted following the hearing, Chapman stated that he used the peak alfalfa consumption for 1996 rather than the mean value for 1996. Chapman also stated he included evaporation and delivery losses in determining consumptive use.

21. Peak alfalfa evapotranspiration reflects full consumption for mature alfalfa and does not take into account reductions attributable to cutting and harvest during the growing season. The mean values from the AGRIMET station more closely represent the historical consumptive use.

22. Chapman also discussed irrigation efficiencies in the additional information submitted. When water is applied inefficiently, water is lost to percolation and evaporation. Percolation losses are not part of consumptive use. Evaporation losses are a component of the AGRIMET evapotranspiration and should not be added in.

23. The mean evapotranspiration does not account for precipitation. If the computation was further refined, precipitation would be subtracted from evapotranspiration to determine consumptive irrigation requirement. In computing consumptive use for this transfer, the assumption will be made that all water consumed is diverted from ground water.

24. The mean alfalfa and spring grain evapotranspiration values were averaged (50% alfalfa, 50% spring grain) for each year of the period of record. The average evapotranspiration during the period of record (1996-1998) for the Nampa station is 2.68 acre feet/acre annually. Dividing the annual consumptive use of 162 acre feet by 2.68 acre feet/acre results in 60 acres, which is the number of acres that would need to be retired for the computed annual consumptive use.

25. The applicant only proposes to retire 50 acres from irrigation. IDWR should not expand the number of acres sought to be retired or try to guess which acres the applicant might want to retire. Assuming only 50 acres will be retired, recognition of 2.68 acre feet/acre for each of the 50 acres results in 134 acre feet annually that can be diverted for the dairy. MICROFILMED

26. The maximum annual diversion volume allowed by IDWR for irrigation of Kasper's property is 4.5 acre feet per acre.

27. Fifty of the 55 acres will no longer be irrigated, and the water transferred to the dairy will be fully consumed. This is the 134 acre feet referred to above. Kasper should be able to divert additional volume of water from well no. one for the remaining five acres at a rate of 4.50 acre feet per acre annually. This additional volume of water is 22.5 acre feet annually. After rounding up to the next whole number, the total annual volume diverted from well no. one should be limited to 157 acre feet annually.

CONCLUSIONS OF LAW

1. Idaho Code § 42-222 provides, in pertinent part:

The director of the department of water resources shall examine all the evidence and available information and shall approve the change in whole, or in part, or upon conditions, provided no other water rights are injured thereby, the change does not constitute an enlargement in use of the original right, and the change is consistent with the conservation of water resources within the state of Idaho and is in the local public interest as defined in section 42-203A(5), Idaho Code;

2. The applicant bears the burden of proof regarding all of the criteria contained in Idaho Code § 42-222.

3. Injury to Omundson can be prevented by limiting the flow rate and annual volume to the traditional quantities diverted/consumed from well no. one. The testimony shows that the 55 acres in Section 15, T01S, R02W were irrigated solely by well no. one.

4. There is sufficient water for the purposes sought if diversion is limited to historic quantities.

5. The application is not filed for purposes of speculation and delay. The dairy is already constructed, and the delivery pipeline is also constructed.

6. The applicant has sufficient financial resources to complete the project.

7. In determining whether an application is in the local public interest, IDWR must consider the effect the project will have on the local economy, recreation, fish & wildlife resources, compliance with environmental laws and standards, compliance with zoning ordinances, and any other factors IDWR finds are appropriate to consider.

8. The application is in the local public interest because of approval by Canyon County, contributions to employment in the area, and economic benefits derived from other businesses in the area.

9. The use of water proposed is within IDWR guidelines for dairy use of water. The application is consistent with principals of conservation of the water of the state of Idaho.

ORDER

IT IS HEREBY ORDERED that application for transfer no. 5356 is APPROVED. Water right nos. 63-02712, 63-02955, 63-03099, and 63-07814 are subject to the following conditions:

1. Prior to diversion of water under this right, a measuring device and lockable controlling works of a type acceptable to the Department shall be permanently installed and maintained as part of the diverting works, including, if determined necessary by the Department, a separate measuring device and lockable controlling works for measurement and control of water delivered to the dairy.

2. The right holder shall annually report diversions of water under this right to the Department.

3. The issuance of this right does not grant any right-of-way or easement across the land of another.

4. Diversion from the well located in the SENW, Section 15, T01S, R02W, is limited to 2.00 cfs (900 gallons per minute) and 157 acre feet annually.

5. Ground water diverted under this right is the sole source of irrigation water for the five (5) acres located in the NWSW of Section 15, T01S, R02W. Ground water delivered to the remainder of the place of use supplements surface water irrigation.

6. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with ground water diverted under this right and shall only divert ground water under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.

7. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 acre-feet per acre at the field headgate for irrigation of the lands above.

8. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

9. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

10. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

11. Rights 63-02712, 63-02955, and 63-07814 when combined for dairy use shall not exceed a total diversion rate of 1.06 cfs, and or a combined total annual volume for both stockwater and commercial use of 134.0 acre-feet. Because the annual volume for commercial and stockwater use was reduced from the quantities sought by the application for transfer, the permit holder must determine the division of the 134 acre feet into the stockwater and commercial components.

12. Commercial use of the water is for a dairy located in the SWNW, S26 and NENE, S27, T01S, R02W.

13. The water used for commercial purposes under this approval may be applied to and irrigate land listed in the place of use to satisfy water quality requirements. Water shall not irrigate growing plants unless the water is first beneficially used in the dairy as authorized by these water rights.

14. Right 63-02712 is limited to the irrigation of 380.0 acres in the place of use described above in a single irrigation season.

15. Right 63-02955 is limited to the irrigation of 355.0 acres in the place of use described above in a single irrigation season.

16. Right 63-03099 is limited to the irrigation of 344.0 acres in the place of use described above in a single irrigation season.

17. Rights 63-02712, 63-02955, and 63-03099 when combined for irrigation purposes shall not exceed a total diversion rate of 9.76 cfs, a total annual maximum diversion volume of 2029.5 acre-feet at the field headgate, and the irrigation of 451.0 acres.

18. Rights 63-02712, 63-02955 and 63-03099 shall not be used for irrigation purposes if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use.

DATED this 15th day of July, 1999.

State of Idaho
Department of Water Resources

WATER RIGHT LICENSE

License of Water Right No. 63-7814 Priority June 19, 1973 Amount 0.32 cfs

THIS IS TO CERTIFY, that John A. Van Wyck
of Melba, Idaho, has complied with the terms and conditions of Permit
No. 63-7814 issued pursuant to Application for Permit dated June 19, 1973,
and has submitted proof to the Department of Water Resources on September 30, 1974,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 2.41 cfs of water from a groundwater source,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u>	from <u>March 15</u> to <u>November 15</u>	at <u>0.32</u> cfs and	<u>72</u> acre feet
	from _____ to _____	at _____ cfs and	_____
	from _____ to _____	at _____ cfs and	_____

(both dates inclusive)

Subject, however, to the condition that no more than 0.32 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
72 acre feet per year, said waters to be diverted within the SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 15, Twp. 1S,
Rge. 2W, B. M. in the County of Canyon

Description and location of place of use:

Twp.	Range	Sec.	NE $\frac{1}{4}$				NW $\frac{1}{4}$				SW $\frac{1}{4}$				SE $\frac{1}{4}$				Totals
			NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	NE $\frac{1}{4}$	NW $\frac{1}{4}$	SW $\frac{1}{4}$	SE $\frac{1}{4}$	
1S	2W	15							16										16

Total number of acres irrigated 16

NOTE: Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho
Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

The right to the use of the water hereby confirmed is restricted and appurtenant to the lands or place of use
herein described, as provided by the laws of Idaho.

Witness the seal and signature of the Director, affixed at Boise, Idaho, this 14 day of
February, 19 78.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER ADMINISTRATION

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-7814, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 1974.
- c. Other: A measuring device of a type approved by this Department shall be permanently installed and maintained as part of the diverting works.

2. Denial of said application is for the following reasons: _____

Witness my hand this 19th day of July, 1973.

A. Kenneth Quinn
 Deputy Director

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PERMIT NO. 63-7814)

in the name of JOHN A. VAN WYCK)

ORDER OF REINSTATEMENT

WHEREAS, on June 19, 1973, John A. Van Wyck applied to the Department of Water Resources (formerly the Department of Water Administration) for a permit to appropriate 4 cubic feet per second of groundwater within the SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 15, Twp. 1S, Rge. 2W, B.M., Canyon County, to be used for irrigation purposes; and,

WHEREAS, on July 19, 1973, the Department approved said application and issued Permit No. 63-7814 with the condition that proof of construction of works and application of water to beneficial use be submitted to the Department on or before August 1, 1974; and,

WHEREAS, on May 31, 1974, the Department notified the permit holder by certified mail that proof of beneficial use was due and instructed the permit holder as to the steps to be taken to make said proof; and,

WHEREAS, on August 7, 1974, the Department notified the permit holder that Permit No. 63-7814 had lapsed for failure to submit the proof of beneficial use; and,

WHEREAS, on September 30, 1974, the Department received the required proof of beneficial use; and,

WHEREAS, Section 42-218a of the Idaho Code provides that a permit may be reinstated upon a showing of reasonable cause within 60 days from the date of the notice of lapsing; and,

WHEREAS, the permit holder has provided a reasonable showing as to why said permit should be reinstated;

IT IS, THEREFORE, HEREBY ORDERED that Permit No. 63-7814 be REINSTATED and the priority advanced to August 18, 1973.

Dated this 5 day of October, 1974.

DIRK KEMPTHORNE
GOVERNOR

KARL J. DREHER
DIRECTOR

July 16, 1999

RE: In the matter of Application for Transfer No. 5356 of Water Right Nos. 63-02712, 63-02955, 63-03099 & 63-07814 in the name of Tom Kasper

Dear Interested Parties:

The accompanying order is a "**preliminary order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the department unless a party petitions for reconsideration within fourteen (14) days after issuance as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the hearing officer within fourteen (14) days of the service date of this order. The hearing officer will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding to the Director. Otherwise, this preliminary order will become a final order of the agency.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Director. The Director retains the right to review the preliminary order on his own motion.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one(21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,

- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Sincerely,

L. GLEN SAXTON, Chief
Water Allocation Bureau

Melba, ID 83641

Dear Mr. Van Wyck:

A representative of this Department made an examination of the works covered by your Permit No. 63-7814 on June 28, 1977, and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 0.32 cfs Source: groundwater

The maximum quantity diverted shall not exceed 72 acre feet per
year.

Point of diversion: SW 1/4, Sec. 15, Twp. 1S, Rge. 2W, B. M.

Beneficial use: Irrigation of 16 acres.

Priority date established: June 19, 1973

If you do not concur with these findings please contact us within 10 days, otherwise a water license will be issued as set forth above.

Sincerely,

JOY D. FLEENOR
Chief, Operations Bureau

John A. Van Wyck
P. O. Box B
Melba, ID 83641

Dear Mr. Van Wyck:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit. Enclosed is an Order of Reinstatement: please note that the priority has been advanced to August 18, 1973.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

If you have any questions concerning the field exam, please contact our District Office in Boise.

Sincerely,

BOBBY D. FLEENOR
Chief, Water Rights

Re: Permit No. 63-7814

John A. Van Wyck
Box B
Melba, ID 83641

Dear Mr. Van Wyck:

One of the conditions of approval of your water Permit No. 63-8814 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before August 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
