Re: Water Rights ~~63-07740~~ and 63-10971

Dear Mr. Smith:

License 63-07740 includes a 1973 twelve inch well for domestic use at 61 mobile home units. Application for Permit 63-10971 covers the same well and a 1986 ten inch well for 120 mobile home units and commercial use. Both rights are involved with the development in Section 9 near Eagle.

From the information in Application 63-10971, it appears that the ten inch well was added to the 61 unit system in 1986. The newer well needs to be added to License 63-07740 as an additional point of diversion. Two methods are available to update the license and comply with Idaho statutes.

One, an Application for Transfer may be filed to add a point of diversion to the water right. Two, an Adjudication Claim may be filed to show the right as it has existed. Adjudication Claims are required under the terms of the Snake River Basin Adjudication to maintain most water rights in a valid state. License 63-07740 is a right that requires such a Claim. Without filing a Claim, the right will be recommended as invalid by this department in its role as a technical advisor to the court in the adjudication.

Adjudication Claims may be filed to reflect differences that exist between the water right record and the actual water use practices. In other words, a Claim may be filed to add the newer well to the older license. Because a Claim should be filed as explained above and because the Claim may include the newer well for use at the 61 units, this alternative is preferable to the Transfer choice. One filing and one fee is involved with an Adjudication Claim.

Claims for Ada County should have been filed by September 8, 1989 to avoid late fees. A computer search did not reveal a claim for 63-07740, although one may have been filed but not data entered yet. If you filed a claim and identified both wells for use under the protection of the license, the record is clarified. However, if both wells were not identified or if a claim was not filed, immediate action is required to protect your water right and uses of ground water as defined by Idaho statutes.

Gentlemen:

One of the conditions of approval of your water Permit No. 63-7740 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before May 1, 1979. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended.
