10. Remarks: We originally applied for a permit for the diversion of 6 c.f.s.
Daily readings taken by the watermaster during 1977 indicate extremes
of 3 c.f.s to 9 c.f.s. 1977 was a year of odd water management.
Initially, until return flow increased the river flow in our area,
we restricted our use. Later, the extreme flow of 9 c.f.s was
occasioned by the omission of the culvert control gate. 6 c.f.s is OK
The above information is a true statement of the extent to which the above numbered permit has been developed.

Dear Mr. Atwell:

One of the conditions of approval of your water Permit No. 63-7721 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before March 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Bob:

John Turner has asked that I address this letter to you so you will be informed that we - the Jolly Boys Club - are committed to the construction of water flow measuring device. All of this relates to our Permit No. 63-7721 to appropriate 6.0 ccf.s. from the Boise River.

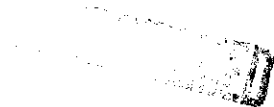

John is preparing a plan to guide our construction and installation of a treated wood structure with a submerged orifice. We will proceed with construction in the very near future.

Yours truly,

Ken:

In our Application for Permit which we have already submitted to you and to which you have assigned the identification number 637721, we have requested permission to divert 6.0 c.f.s. of water from the Boise River to an artificially created pond on our property for the purpose of propagating wildlife. Our request stipulated the need of the water for the entire year, January 1 to December 31.

We wish to append to this request the information that 6.0 c.f.s. of water will be used during the entire year, January 1 to December 31, to maintain a pond on our property that will be used for family recreation; namely; boating, bird-watching, photography, warm water fishing, year-around dog training and seasonal hunting.

Although we have mentioned the need of 6.0.c.f.s. of water twice, we wish it clearly understood that we are referring to the same diversion of water and our total need at any time will be 6.0 c.f.s. of water.

Yours very truly,

Ken Atwell

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

Dear Ken:

Your application for a water right numbered 63-7721 on the Boise River will be advertised in the News-Tribune, Caldwell, Idaho on February 22, 1973 and March 1, 1973. The final date for protests will be March 12, 1973.

You may begin construction at your own risk immediately. A protest, of course, would held up your permit and no use of water would be allowed without a valid permit. Therefore, construction timing would be your decision, but the actual use of the water would be governed by the Idaho Code.

If no protests are received, I would suggest April 2, 1973 as a possible date for you to receive your permit.

To further increase the value of your water right to your club in future years, I would suggest that your water use described under items 4 and 5 be changed to read as follows:

6.0 c.f.s. for wildlife propagation from Jan. 1 to Dec. 31
6.0 c.f.s. for recreation from Jan. 1 to Dec. 31.
Total quantity to be appropriated: 6.0 c.f.s.

By doing this, we feel you would have greater flexibility in your uses.

Please notify me by letter of your decision concerning this change.

Sincerely,

KENNETH H. FOIT, P. E.

Ken:

I am enclosing the Application for Permit signed and with the application fee of \$ 75.00 attached.

I want to express my sincere appreciation of the help and time you gave me.

One thing I neglected to ask: what must we anticipate in time for the permit to be advertised, etc.?

Early release of great quantities of water would really wreck us, but a normal release of water for irrigation would give us until about April 1 to complete our inlet structure.

Will you be kind enough to drop me a note and let me know if you visualize that the April 1 date might be possible?

Thank you again,

Yours very truly,

Ken Atwell
