10. Remarks See Exhibit "A"

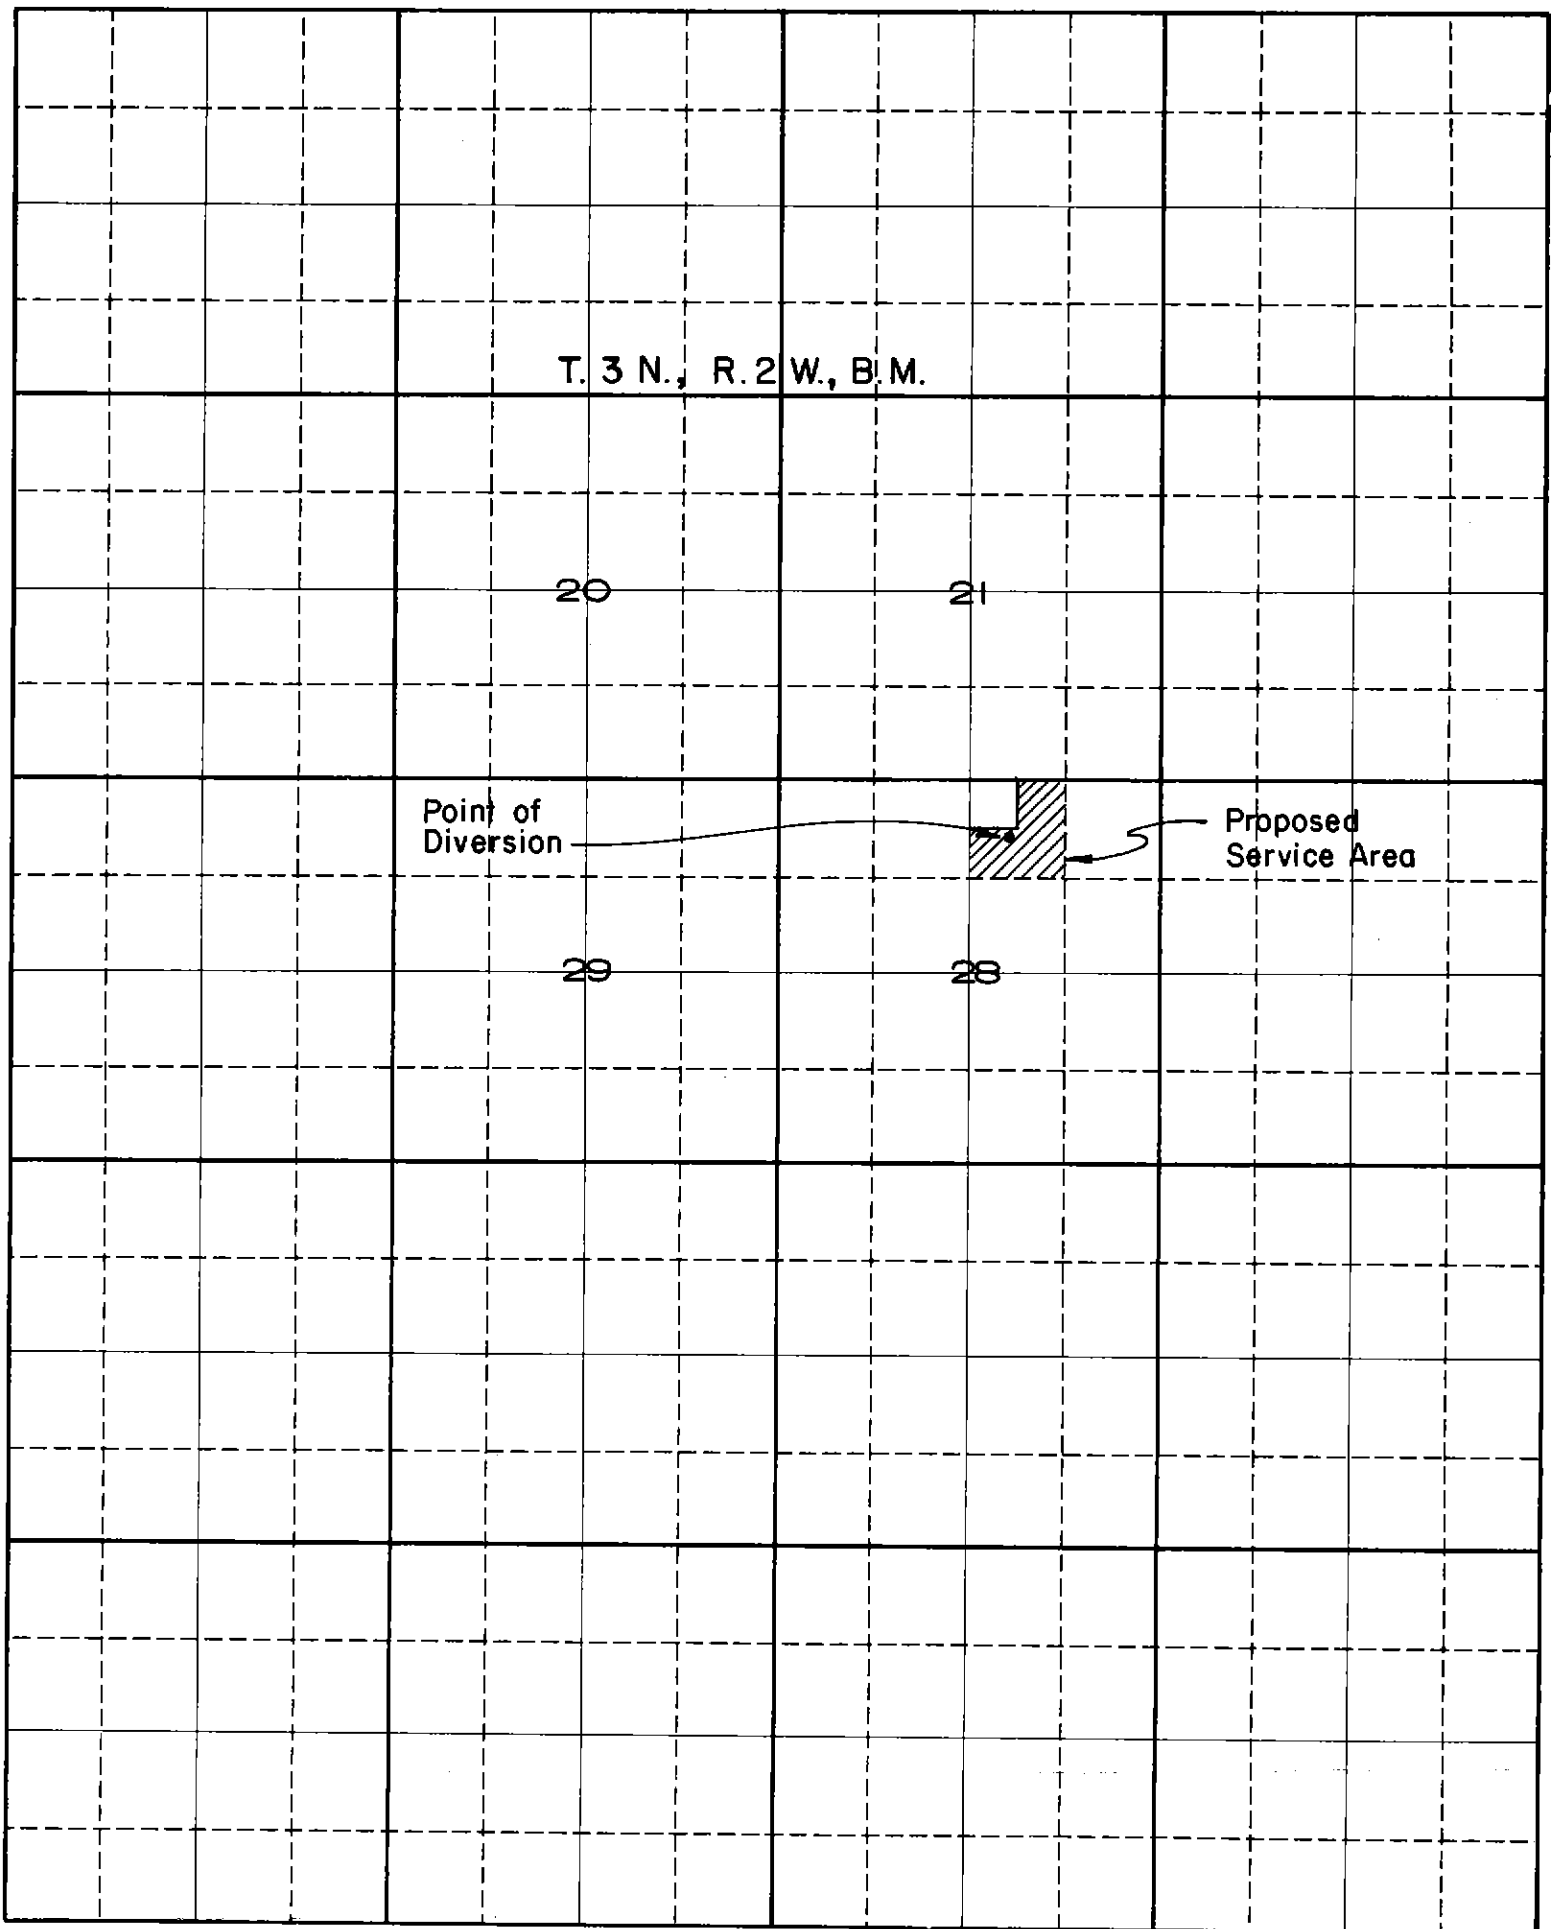

Exhibit "A"
Application for Permit
NW 1/4 of the NE 1/4, Section 28, T 3 N, R 2 W., B.M.

The proposed well as described in this permit will initially be used to supply sprinkler irrigation water to the 32 residential lots within Lloyd Second Addition to Nampa, Idaho. The service area for the proposed well will ultimately be expanded to include the Lloyd Addition and Grant Park Addition to Nampa which would result in an additional 56 residential lots to be served or a total of 88 residential lots to ultimately be served by this sprinkler irrigation system. The City of Nampa is providing this supplemental irrigation system in order to eliminate the use of the municipal water system for lawn irrigation purposes in this area. The present irrigation water available for this property from the Nampa and Meridian Irrigation District is not available in sufficient quantity or at close enough intervals to properly serve the residents within this area and therefore, the only adequate source of supply available for the irrigation system is a well.

In reference to item 3.b of this permit, it is not anticipated that there will ever be any water supplied by this system which will not be utilized and consumed for irrigation purposes. The only time any water would be discharged to the Elijah Drain would be when the system is drained at the end of the irrigation system.

In reference to item 5 of this permit, the 1.0 cfs was based upon the City of Nampa requirement that for large service areas, each lot served by the pressure irrigation system shall be supplied with 5 gpm at a pressure of 45 psi. The 182 acre feet per annum as listed under item 5.b. was based upon the system being operated 12 hours per day every day during the 184 day irrigation season at a maximum flow of 450 gpm. This would be a maximum amount that could be used and is obviously unrealistically high. However, the actual acre feet per annum which would be utilized by this sprinkler irrigation system would be difficult to determine until after the system has been placed in operation.

Dear Sir:

It has come to my attention that the metering device for the above water use permit has not been installed as it was intended to be done by November 1, 1974.

The equipment is on hand and this is to assure you that it will be installed as soon as weather permits and with a minimum of delay.

Thank you for your past consideration.

Very truly yours,

Nampa, ID 83651

Dear Mr. Huckabee:

One of the conditions of approval of your water Permit No. 63-7708 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before August 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen:

P
During the final processing of your application, we have developed a question regarding one item.

Y
It is not necessary for you to list the 182 acre feet per annum in item number 5b, as this department will have to determine the annual use figure. This item is included on the application form for use in the case of storage reservoirs and has no bearing on regular filings.

We wish to delete this figure, but must have your approval before changing the application. Please notify us as soon as possible.

If we can be of any further assistance in this matter, please feel free to contact this Department.
