10. Remarks: We have had a problem this summer (1973). The water level was short and the water would disappear in the stream in the heat of the day. This started in July. At the point where the diversion dam was to be placed, there was no water. Water showed up in a small pool several feet above the dam, so a barrel was placed in this pool to ascertain the amount of water that would collect. This is the second time in 6 years the water has dropped this much.

The above information is a true statement of the extent to which the above numbered permit has been developed.

Dear Mr. & Mrs. Wood:

One of the conditions of approval of your water Permit No. 63-7663 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
