MEASUREMENT CALCULATION:

Badger meter well was pumping at 100 gal at

SYSTEM DESCRIPTION:

12" well 110ft deep with 20 HP sub pump in well into
buried main line then into sprinklers

REMARKS:

The reason I am recommending this amount of
water is that the system can only be operated
for short periods of time the park is utilized during the
day and on weekends so water is done early in the morning
and at odd times to facilitate park use so a larger
diversion rate is necessary

Gentlemen:

One of the conditions of approval of your water Permit No. 63-7523, 63-7524 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before March 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
