Permit No. 63-7374

Ronald J. Pascoe of 514 Plymouth RR#1 Caldwell
(name) (address) Idaho 83605

State of Idaho, being first duly sworn, upon his oath deposes and says:

That he is the holder, or the duly authorized agent of the holder *, of Permit to
Appropriate the Public Waters of the State of Idaho No. 63-7374.

That under the terms and conditions of said permit, work thereunder was required
to be completed on or before February 1, 1976.

That he has heretofore performed the following work described under said permit:

<u>dug a 312 foot well</u>	<u>10,000</u>
<u>Installed a pump powered by a 100 horse turbine</u>	<u>17,500</u>
<u>Installed a sprinkler system</u>	<u>22,735.50</u>
<u>Purchased a 60 horse booster pump</u>	<u>5,200</u>
Costing \$ <u>52,435.50</u>	

That he is unable to complete the remainder of the work within the required time for
the following reasons, to-wit: The original 100 horse pump + turbine was supposedly
designed to pump and pressurize enough water to irrigate the land, but
after installation it proved to pump enough water but would
not pressurize enough to run all the sprinklers. Therefore I had to
purchase a booster pump which was not delivered until
the second week in Nov. at which time the weather was to wet
and freezing to install the booster pump.

Wherefore, he asks that the Department of Water Resources extend the time for the
completion of obligations under said permit to February 1, 1977.

COMMENTS: Nearly O.S. obs. well has shown either no change or increases in water levels from '68-'70 (W.I.B.'s 5, 11, & 18). Aquifer is a series of sand layers interfingered with clay. The depth to water ranges from 145 - 200+ feet. Static water level ranges very close to 200 feet, with one exception of 40 feet which may possibly be artesian.

Well development is light. Lowest specific capacity was 100. (3000 gpm / 300' draw down)

RECOMMENDED:

Expect large drawdown at 6.4 cfs.

Dear Mr. Yeager:

On June 18, 1970 the Boise District Manager issued an "Initial Decision" approving your desert land petition I-2877.

According to your plan of development, water for irrigation is to be obtained from a well to be drilled. You must submit evidence of your right to appropriate and use the water. The evidence should consist of a copy of a State water permit approved by the State Reclamation Director. Attached is an extra copy of this letter. The copy should be submitted to the Idaho Department of Water Administration at the time you apply for a permit. Unless they have knowledge that the land of the desert land application has been classified as suitable for entry, they may decline to issue the water permit. You should make arrangements with the State Reclamation Director to have a copy of the permit sent to this office.

We would appreciate receiving a copy of the permit as soon as possible. Also please advise us when you apply for the permit.
