Dear Mr. Elfers:

On June 17, 1974, this office inspected the water diversion works and place of use as described in Permit No. 63-7361. Our examiner found no measuring device of a type approved by the Department installed as part of your diverting works. Such a measuring device is an express condition which must be met prior to approval of a license for your permit.

As you may be aware, your water right cannot be confirmed by the issuance of a license unless all of the conditions of approval are met. In the event that a license is not issued and the permit lapses, further diversion of water under the permit would be illegal.

You are, therefore, hereby ordered to show cause, if any there be, before the Director of the Department of Water Resources, State Capitol, Boise, Idaho, on or before August 29, 1974, as to why Permit No. 63-7361 should not be lapsed for failure to complete the requirements under said permit.

If you have any questions, please feel free to contact this office.

Very truly yours,

R. KEITH HIGGINSON
Director

Dear Mr. Elfers:

One of the conditions of approval of your water Permit No. 63-7361 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before October 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
