RECOMMENDATIONS: Moderately heavy well development in the area, mostly domestic. Water level records (W.I.B. 5 & 11) show no change or small increases in the area. Chief aquifer is a sand and gravel one that is quite permeable. Drawdowns are moderate. No well interference expected as long as well development does not increase out of bounds. Well spacing may be required in future. D/w = 6' - 42'.

Dear Mr. Ryther:

One of the conditions of approval of your water Permit No. 63-7310 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before May 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
