Re: Proof of Application of Water
to Beneficial Use
Permit No. 63-7287

Attached is the completed Proof of Application of Water to Beneficial Use covering Permit No. 63-7287.

In connection with the cited Permit we have installed a Badger Meter MDIM-6 totalizing meter at the diversion point on the river bank whereby we can obtain an accurate indication of the amount of water diverted from the river for operation of chillers which are located in the equipment room of the Library Learning Center and in the Business Building.

Inasmuch as this is a closed system, i.e. the water is diverted from the river through the chillers and discharged directly into the storm sewers, it is requested that we be granted a waiver from the requirement of providing measuring devices on the discharge side of each of these two chillers since there is no loss in water whatsoever under our use permit.

This request is also made in an effort to avoid the expense of installing two new meters including labor which would come to about \$500.00.

We would be most appreciative if you would favorably consider our request for a waiver in this regard.

Sincerely yours,

A handwritten signature in cursive script, appearing to read 'H. O. Mengel', written over a horizontal line.

Gentlemen:

One of the conditions of approval of your water Permit No. 63-7287 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before April 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
