Dear Ms. Farrar:

I recently received 'Assignment of Permit' forms on the above referenced licensed water rights.

In Idaho, decreed, licensed, and claimed water rights are considered real property; therefore, proof of owning the land is proof of owning the water rights unless extenuating circumstances exist. Water right statute does not provide a means for changing owner of record for licensed water rights; although, I have placed your correspondence in each of the water right files.

Please note that these rights have been claimed in the Snake River Basin Adjudication. I have forwarded a copy of the assignment forms to the Adjudication Bureau for their review.

If you have any questions, please feel free to contact me directly at 327-7944.

63-3126 & 63-3167 are same lands as this license (only less).
For 460 acres they could have had up to 9.2 cfs, however, the total
capacity for this system is 7.88 cfs as meas. by Rick Morris
& therefore they can only be licensed for 2.76 cfs. The
condition that no more than 4.5 ac ft per acre can be used
needs to be attached.

Dear Mr. Yamamoto:

One of the conditions of approval of your water Permit No. 63-7286 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before February 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
