ATTACHMENT TO APPLICATION FOR EXTENSION OF TIME
OF

JEROME C. SCHWARZHOFF, PERMIT NO. 63-7277

This application (No. 63-7277) must be considered with the State of Idaho License No. 63-7089. Applicant was the one who applied for and was issued license No. 63-7089, and at the time of filing his initial application, he applied for 120 inches of water which was to be put to beneficial use on the NE1/4NW1/4, Section 23, Township 2 North, Range 1 East, B.M.

After installation of the pump and while applicant was in the process of proving up on license No. 63-7089, a mechanical mistake was made in the operation of the pump resulting in a lesser amount of water being pumped. This lesser amount of water caused silting to occur and the sand in the water damaged the bowls of the pump. Due to the damage of the bowls of the pump, the pump was unable to operate at full capacity. When proof of application of water to beneficial use was made under 63-7089, the proof was 96 miners inches of water instead of the 120 inches applied for in the application. The license was issued for 96 inches for the 100 acres.

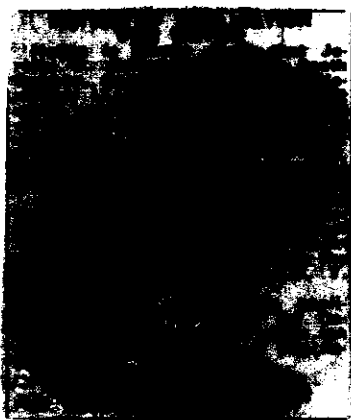

Applicant still desires to obtain water for the 20 acres for which he applied for initially and to do this, he filed the present application No. 63-7277. This 20 acres lies on a hillside with a grade of approximately 30%. Due to this grade, he was uncertain whether the water could be put to beneficial use on this 20 acre parcel. From the time of the filing of the application through the year 1974, his efforts have been devoted to development of this parcel. During the time from the filing of the application to date, sod was being established on the parcel, and he knows now that it is feasible to irrigate and continue with the development of it. This is the reason for the delay.

Applicant now needs an extension of time for the purpose of repairing the bowls to the pump or to install a new well to obtain the additional twenty inches of water. A determination has not been made as yet as to which method will be used and applicant needs additional time not only to accomplish the work, but to ascertain which method would be best under the circumstances.

During the years, work has been going forward each year in planting grass and applying water for the development of the parcel. The cost of doing this work is estimated to be \$1,000.00 plus the labor furnished by applicant.

Dear Mr. Gilmore,

RE: License No. 63-7277

Enclosed is a copy of the Water Right License issued on the above referenced Permit.

Please be advised that one of the conditions of your permit was that a measuring device be installed as part of your diversion works. That requirement has been waived with issuance of the enclosed license. However, in the event that water supply shortages become a problem installation of measuring devices may be required.

Dear Wateruser:

The enclosed Order removes the measuring device requirement as a condition of approval from your permit.

Dear Mr. Schwarzhoff:

One of the conditions of approval of your water Permit No. 63-7277 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
