Re: Permit No. 63-7225

Dear Mr. Rader:

We enclose a copy of your approved application for permit 63-7225 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

You will note that the restriction has been placed upon your permit that whenever, in the opinion of the department, the source from which you wish to appropriate appears to be tributary to the Boise River or any of its tributaries you may be required to cease the use of the water until all prior rights have been satisfied. The basin from which you are attempting to appropriate water lies within State Water District 12A, Boise River, of the State of Idaho. The watermaster of that district will have authority to order you to cease using the water. You should be aware that the availability of water at your location is open to question and that you should take this into consideration in planning your development. We have decided to continue issuing permits in the area with the idea that if there is water available for even a portion of the early spring and summer months that new appropriators should have a chance to use that water.

If you have any questions or do not understand the above conditions, I would be most happy to discuss the situation with you.

Very truly yours,

C. Stephen Allred, Assistant  
State Reclamation Engineer
