THIS IS TO CERTIFY, that CARNATION COMPANY
of Los Angeles, California, has complied with the terms and conditions of Permit
No. 63-7218 issued pursuant to Application for Permit dated April 18, 1969,
and has submitted proof to the Department of Water Resources on June 3, 1974,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 4.0 cfs of water from a ground water source,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Fire Protection	from <u>Jan. 1</u> to <u>Dec. 31</u>	at <u>3.40</u> cfs and	<u>n/a</u>

ACTION OF DEPARTMENT OF WATER RESOURCES

This Permit is

approved

If approved, this permit authorizes the construction of a well subject to the following conditions:

GENERAL CONDITIONS

1. The well must be constructed in compliance with the applicable statutes, specific conditions of approval shown on the water right permit, injection well permit, transfer or amendment and the rules and regulations of the Department for water appropriation, injection wells and well construction standards.
2. This drilling permit is valid for two (2) months from its date of issuance for the start of construction and is valid for one (1) year from the date of issuance for completion of the well unless an extension has been granted.
3. This permit does not constitute the approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well.
4. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
5. Issuance of this drilling permit does not authorize trespass on the land of another party.
6. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
7. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
8. If a bottom hole temperature of 85°F or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.

SPECIFIC CONDITIONS

9. THIS DRILLING PERMIT REPLACES A WELL WHICH IS LISTED AS A POINT OF DIVERSION UNDER LICENSE NO. 63-7218 AND PERMITS NOS. 63-10012 AND 63-10066. WATER SHALL NOT BE DIVERTED FROM THE WELL THAT IS REPLACED, EVEN AS A BACK-UP SOURCE, UNTIL A TRANSFER OR AMENDMENT IS APPROVED BY THE DEPARTMENT ADDING A POINT OF DIVERSION

Dated this 22nd day of may, 1989. TO THE ABOVE MENTIONED WATER RIGHTS

Gentlemen:

A representative of this Department has made an examination of the works covered by your Permit No. 63-7218 and has found the following:

Quantity of water diverted: 4.0 cfs Source: ground water

Amount of water that can be recognized as beneficially used under
Kiaho law: 3.40 cfs

Point of diversion: NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 8, Twp. 3 N, Rge. 2 W, B. M.,
Canyon County

Beneficial use: Fire protection & industrial purposes and the irrigation
of five acres in the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 8, Twp. 3 N, Rge. 2 W, B. M.

Priority date established: April 18, 1969

The maximum quantity diverted shall not exceed 22.5 acre feet per
year for irrigation use. (fire protection & industrial use n/a)

If you do not concur with these findings please contact us within 10 days, otherwise a
water license will be issued as set forth above.

IN THE MATTER OF REMOVAL OF THE MEASURING)
DEVICE REQUIREMENT FOR PERMIT NO. 63-7218) ORDER
IN THE NAME OF IDAHO POTATO GROWERS, DIV. OF W.F.A.)

WHEREAS, on April 18, 1969, Idaho Potato Growers, Div. of W.F.A. applied to the Department of Water Administration for a permit to appropriate 3.4 cubic feet per second of groundwater from a point within the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 8, Twp. 3N, Rge. 2W, B.M., Canyon County, to be used for fire protection, irrigation, and industrial processing purposes; and,

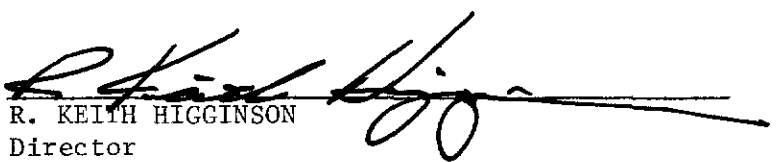

WHEREAS, on July 11, 1969, the Department approved said application and issued Permit No. 63-7218 with the condition that proof of construction of works and application of water to beneficial use be submitted to the Department on or before July 1, 1974, and that a measuring device of a type approved by the Department be permanently installed and maintained as part of the diverting works; and,

WHEREAS, on May 9, 1974, the Department received a request for removal of the measuring device requirement; and,

WHEREAS, it has been determined by the Department that a measuring device is not required at this time for a determination of the quantity of water appropriated under said permit;

IT IS, THEREFORE, HEREBY ORDERED that the condition of approval that a measuring device of a type approved by the Department be permanently installed and maintained as part of the diverting works, be and is, REMOVED from Permit No. 63-7218.

Gentlemen:

Enclosed is an Order which removes the measuring device requirement from the above referenced permit.

We are returning the proof affidavit recently mailed to you so that you may complete it and return it to us on or before the date set for proof, July 1, 1974.

We were wondering whether or not you want to change the name of the permit holder for this permit from Idaho Potato Growers, Div. of W.F.A., to your present name. If so, please complete the enclosed assignment form and return it to us along with the proof affidavit.

If you have any questions concerning the above matters, please contact us.

Dear Mr. Higginson:

Your letter of May 6, 1974 in regards to permit No. 63-7218 we wish to ask for your consideration to be given in the matter of installing a flow meter at the point of diversion.

This well is used for Fire Protection line around the outside of our building. Although we do have lines that connect this well with plant facilities the valves are normally closed with a booster pump maintaining the fire line pressure when the well is not in use.

A drop in pressure in the fire line due to opening a valve at fire hydrant automatically, through the use of a pressure switch, starts the pump and maintains g.p.m. and pressure through out the fire line.

The lines connecting the fire well and the plant well do exist with the availability of using the fire well if for some reason the plant wells cease to function and consequently the plant would have to shut down.

We wish consideration in this matter as we feel a flow meter at this point would restrict the line flow and pressure in the event of a fire.

Your understanding and assistance in this matter would be greatly appreciated.

Sincerely,

Robert Gallup

Gentlemen:

One of the conditions of approval of your water Permit No. 63-7218 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before July 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. McEldowney:

In conjunction with your letter of May 21, 1969. We would like to have the maximum of .40 cubic feet per sec. because we do have a difficult area to irrigate.

Also item 2 of the letter would be changed to Industrial Processing. The only time this water in either case would be used is when our normal pumps are down for repair.

Thank you for your help and patience in working this out. If I can furnish anymore information please let me know.

Re: Application for Permit No. 63-7218

Idaho Potato Growers
Division of W. F. A.
Box 7
Pampa, Idaho

Gentlemen:

In reviewing your application for permit we find that the 200 cubicfeet per second listed in the application for irrigation must be in error. Is it possible that the quantity which you have requested could be 200 miner's inches for irrigation?

In either case, the quantity of water is excessive for your irrigation purposes. Under state law, the maximum legal rate of diversion that can be appropriated for irrigation is .02 cubic feet per second per irrigated acre. Inasmuch as you have ten (10) acres of ground the Department would normally consider .20 cubic feet per second. We realize that it is sometimes difficult to irrigate small tracts of ground with this rate of diversion; therefore, if you could supply some additional information, we could consider approving water in addition to the above amount. However, the largest quantity of water that would seem logical to be required for this tract of ground would be a maximum of .40 cubic feet per second.

The 2 cubic feet per second which you have requested for domestic purposes also appears to be somewhat excessive. If the 2 cubic feet per second is to be used for industrial processing, and not for domestic, then the description of this use will assist the Department in better evaluating the quantity you have requested. We consider for a normal single family domestic dwelling the maximum rate of .02 cubic feet per second per unit. In a case where a large number of employees will be using the water for drinking purposes, the total number of employees or the type of use will aid the Department in verifying your needs.

Your information will be greatly appreciated.

Donald W. McEldowney

Gentlemen:

The Department of Reclamation is returning your application for permit and your check in the amount of \$35.00. Before the Department can continue processing the application we will require some additional information.

Under Item 2 of the application, the Department will require that you list the source of water supply which you plan to appropriate. Under Item 8a(5) you mention a well so the Department assumes that this will be a ground water filing.

Item 3a requires that you indicate a 40-acre description. You have listed the NW $\frac{1}{4}$, sec. 8 which is a 160-acre description. Please advise us as to which 40 within the NW $\frac{1}{4}$ that the point of diversion will be located.

Item 6 of the application requires that you list the proposed diversion works. Please list such works as well, pump, motor, pipe, ditches, or sprinklers or etc. Item 6c asks for the dimensions of the well.

Item 8b requires that you list the lands to be irrigated by 40-acre descriptions and the amount of acres in each 40 acres that will actually be irrigated. Item 8c of the application must be answered.

Finally, have an elected official of the company sign the application and return it to the Department. If you need further assistance in preparing the application, please contact us.

Very truly yours,
