July 18, 1974

Charles V. & Barbara W. Little
1980 Myers Road
Boise, Idaho 83706

Dear Mr. & Mrs. Little:

A representative of this Department has made an examination of the works covered by your Permit No. 63-7207 and has found the following:

Quantity of water diverted: 0.27 cfs Source: Beaver Creek

Amount of water that can be recognized as beneficially used under Idaho law: 0.18 cfs

The maximum quantity diverted shall not exceed 40.5 acre feet per year.

Beneficial use: For irrigation of 9 acres within the SW $\frac{1}{4}$ SW $\frac{1}{4}$,
Sec. 20, Twp. 5N, Rge. 4E

Point of diversion: SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 19, Twp. 5N, Rge. 4E, B.M.

Priority date established: March 21, 1969

If you do not concur with these findings, please advise us within 10 days; otherwise, a license will be issued as set forth in this letter.

Sincerely,

BOBBY D. FLEENOR
Chief, Water Rights

Re: Permit No. 63-7207-A

Charles W. &/or Barbara W. Little

Dear Mr. & Mrs. Little:

One of the conditions of approval of your water Permit No. 63-7207-A (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before June 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Re: Permit No. 63-7207-A

Charles W. &/or Barbara W. Little
1980 Myers Road

Dear Mr. & Mrs. Little:

We acknowledge receipt of the assignment from Mr. & Mrs. Wright in connection with Permit No. 63-7207. Please reference the above numbered permit number when corresponding with this office.

We are enclosing a copy of the permit for your records. We direct your attention to the conditions of approval as listed on the fourth page. Be sure to note that a special condition requiring the permit holder to install and maintain a measuring device at the point of diversion has been placed upon this permit. We are enclosing a letter describing different types of measuring devices accepted by this Department.

You will note that the restriction has been placed on this permit that whenever, in the opinion of the Department, the source from which you wish to appropriate appears to be tributary to the Boise River or any of its tributaries you may be required to cease the use of the water until all prior water rights have been satisfied. The basin from which you are attempting to appropriate water lies within State Water District 12A, Boise River, of the State of Idaho. The water-master of that district will have authority to order you to cease using the water. You should be aware that the availability of water at your location is open to question and that you should take this into consideration in planning your development. We have decided to continue issuing permits in the area with the idea that if there is water available for even a portion of the early spring and summer months that new appropriators should have a chance to use that water. If you have any questions or do not understand the above conditions, please contact us at any time.

Very truly yours,

Donald W. McEldowney
Appropriation Supervisor

Re: Permit No. 63-7207

George & Betty W. Wright
1714 North 23rd
Boise, Idaho 83702

Dear Mr. & Mrs. Wright:

One of the conditions of approval of your water Permit No. 63-7207 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before June 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. & Mrs. Wright:

We enclose a copy of your approved application for permit no. 63-7207 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

You will note that the restriction has been placed upon your permit that whenever, in the opinion of the department, the source from which you wish to appropriate appears to be tributary to the Boise River or any of its tributaries you may be required to cease the use of the water until all prior rights have been satisfied. The basin from which you are attempting to appropriate water lies within State Water District 12A, Boise River, of the State of Idaho. The watermaster of that district will have authority to order you to cease using the water. You should be aware that the availability of water at your location is open to question and that you should take this into consideration in planning your development. We have decided to continue issuing permits in the area with the idea that if there is water available for even a portion of the early spring and summer months that new appropriators should have a chance to use that water.

If you have any questions or do not understand the above conditions, I would be most happy to discuss the situation with you.

Very truly yours,

C. Stephen Allred, Assistant
State Reclamation Engineer
