Dear Mr. & Mrs. Spencer:

The Department of Water Administration has conducted a field examination of the land and works covered by your above numbered permit. This examination indicated that you have not installed a measuring device, as required by your permit. Since you are diverting a small amount of water, if you will petition this office we will consider removing the measuring device requirement. We can not license your permit until this requirement has either been met or removed.

Our field examiner found that you are diverting 0.52 c.f.s. of water of which only 0.1 c.f.s. can be licensed at a rate of 22.5 acre feet per season for the irrigation of 5 acres within the NE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 35, T. 3 N., R. 2 E., B.M. The priority date established is March 7, 1969. If you disagree with the findings of our examiner, please advise us within ten days.

Mr. Frank Spencer
Spencer, Idaho

Dear Mr. Spencer:

It has been brought to our attention that on or about July 12, 1967, you had a well drilled. The well is reported to be located at a point in the NE $\frac{1}{4}$, NE $\frac{1}{4}$, sec. 35, T. 3 N., R. 2 E., B.M. for irrigation use.

A search of our records has failed to find your application or approved permit. Under existing Idaho Statutes, Sections 42-226, 42-229, and 42-230 of the Idaho Code, you are required to file and obtain an approved permit before you divert waters from a subterranean source, with the exception of domestic wells which are defined under Section 42-111 of the Idaho Code.

If we have overlooked your permit, please advise the department as to your permit number. However, if you have not yet filled out an application for permit, please use the instructions and the blank application form which we have enclosed.

We will be very happy to assist you with any questions you might have.

Very truly yours,

Donald W. McEldowney
