Department of Water Administration
LICENSE OF WATER RIGHT

License of Water Right No. 63-7119 Priority July 1, 1968 Amount 0.20 cfs

THIS IS TO CERTIFY, that CALVIN G. WELLS
of Boise, Idaho, has complied with the terms and conditions of Permit
No. 63-7119 issued pursuant to Application for Permit dated July 1, 1968,
and has submitted proof to the Department of Water Administration on June 22, 1972,
that he has applied water to a beneficial use; an examination by the Department indicates that the
works have a capacity of 0.256 cfs, and that the water has in fact been applied to a
beneficial use; a right to the use of water from Beaver Creek
tributary of Grimes Creek, is hereby confirmed in the following amounts:
Amount 0.20 cfs for Irrigation from May 1 to Oct. 30 (both dates inclusive)
Amount 0.01 cfs for Stockwater from Jan. 1 to Dec. 31 (both dates inclusive)
Amount _____ for _____ from _____ to _____ (both dates inclusive)
Subject, however, to the condition that no more than 0.20 cfs of water be diverted at
any one time, said waters to be diverted within the _____

SE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 19, Twp. 5 N, Rge. 4 E, B.M.

in the county of Boise; and that the amount of water so diverted and to which such
right is entitled and confirmed is for the purposes aforesaid and is limited to the amount which can
actually be beneficially used and shall not exceed 30.0 acre feet per year or _____
3.0 acre feet per acre. for irrigation use and 1.0 acre feet per year for
stockwater use with the total amount not to exceed 31.0 acre feet
Description and location of place of use: _____ per year.

ACTION OF STATE RECLAMATION ENGINEER

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-7119, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before September 1, 19 73.
- c. Other: Subject to control by the watermaster of State Water District 12A Boise River, if in the opinion of the Department of Reclamation that these sources are tributary to the Boise River system. The applicant shall permanently install a measuring device of a type approved by the department as part of the diverting works.

2. Denial of said application is for the following reasons: _____

Witness my hand this 16th day of September, 19 68.

Re: Permit No. 63-7119

Dear Mr. Wells:

We acknowledge receipt of your affidavit submitted as proof of beneficial use for the above referenced permit.

A representative of this Department has made an examination of the works covered by your Permit No. 63-7119 and has found the following:

Quantity of water diverted: 0.256 cfs

Amount of water that can be recognized as beneficially used under Idaho law: 0.20 cfs

The maximum quantity diverted shall not exceed 31.0 acre feet per year.

Beneficial use: Irrigation of 10 acres and stockwater purposes within the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 19, Twp. 5 N, Rge. 4 E, B.M.

Point of diversion: SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 19, Twp. 5 N, Rge. 4 E, B.M.

Priority date established: July 1, 1968

If you do not concur with these findings, please advise us within 10 days; otherwise, a license will be issued as set forth above.

Sincerely,

BOBBY D. FLEENOR
Assistant Director

Re: Permit No. 63-7119

Calvin G. Wells
4145 Mountain View Drive
Boise, Idaho

Dear Mr. Wells:

You have submitted an application to appropriate and store waters of the State of Idaho. As a reminder, I wish to bring to your attention the requirements of Idaho Code 42-1707 concerning the submission of plans and specifications to the Department of Reclamation for approval.

The Code requires that any person, association, or corporation, excepting the U. S. Bureau of Reclamation, who shall desire to construct any dam or dike, for the purpose of storing or appropriating or diverting any of the waters of this state, when the same is to be more than ten feet in height or have a storage capacity of more than one hundred acre-feet, shall submit duplicate plans, drawings, and specifications of the proposed work to the Department of Reclamation for approval. If approval is granted one approved copy of such plan, drawing, or specification will be returned to you.

Also provided in the Code is an inspection clause which requires the Department of Reclamation to inspect or cause to be inspected as often as it deems advisable, any such dam or dike, to be more than twenty feet in height during construction.

The plans and specifications should provide as a minimum the following information:

A. Drawings

1. Dam profile
2. Spillway profile
3. Outlet work profile
4. General plan view
5. Section of dam or dike
6. Section of spillway
7. Location map

B. Dimensions and Elevations

1. Conduits and gates, dimensions and elevations
2. Water surface elevations

63-7119

3. Slopes of embankment surface
4. Provide dimensions sufficient to determine if the design is adequate

C. Specifications

Specifications should provide standards of control to assure that construction is accomplished in such a manner as to provide a structure which will perform as designed. Spillway capacities and capacities of all water control structures shall be provided.

The Department of Reclamation purposely does not attempt to prescribe definite criteria for design and construction of dams or dikes. Codes cannot be made uniformly applicable to the widely varying conditions encountered at different dam sites, and such a code could inhibit advancement in the science of dam design and construction. Instead, the Department conducts an independent review of individual plans and specifications for each project, as submitted by the applicant's engineer to insure the use of sound engineering and construction principles.

Though it is not required by law, the Department of Reclamation suggests that you obtain the services of a licensed Professional Engineer to design the required structures and prepare plans and specifications. This will not only protect the public from an unsafe structure, but will also protect your investment by reducing the possibility of failure or damage to other parties.

Sincerely,

A. Kenneth Dunn
Assistant State Reclamation Engineer

AKD/jmb

Re: Permit Nos. 63-7115 and 63-7119

Calvin G. Wells
4145 Mountain View Drive
Boise, Idaho

Dear Mr. Wells:

We enclose copies of your approved applications for permit Nos. 63-7115 and 63-7119 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

You will note that the restriction has been placed upon your permit that whenever, in the opinion of the department, the source from which you wish to appropriate appears to be tributary to the Boise River or any of its tributaries you may be required to cease the use of the water until all prior rights have been satisfied. The basin from which you are attempting to appropriate water lies within State Water District 12A, Boise River, of the State of Idaho. The watermaster of that district will have authority to order you to cease using the water. You should be aware that the availability of water at your location is open to question and that you should take this into consideration in planning your development. We have decided to continue issuing permits in the area with the idea that if there is water available for even a portion of the early spring and summer months that new appropriators should have a chance to use that water.

If you have any questions or do not understand the above conditions, I would be most happy to discuss the situation with you.

Very truly yours,

C. Stephen Allred, Assistant
State Reclamation Engineer

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted assuming the notice is correct. If we have any corrections, we will notify you before the first publication date. If you can not publish the notice on the proposed dates please contact us immediately.

An affidavit of publication must be submitted to the Department of Reclamation, along with the publication bill. In order to receive payment, the following certification must appear on the bill:

I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of same has been paid.

Signature of claimant
