NOTICE OF APPLICATION
FOR WATER

Notice is hereby given that Dallas
H. Harris, 6203 Barber Road, Boise,
Idaho has on May 8, 1968 applied
for permit to divert 1.4 cubic feet
per second of water from a sub-
terranean source under application
No. 63-7403. Water will be diverted
by a well, pump, and sprinklers
within the SE 1/4, sec. 29, T. 3
N., R. 3 E., B.M., Ada County and
is to be used from May 1 to De-
cember 1 for irrigation in the
W 1/4, sec. 28; all of section
29, T. 3 N., R. 3 E., B.M.
Any protest against this applica-
tion must be filed with the De-
partment of Reclamation within ten
days from the last date of publi-
cation of this notice.

CONDITIONS OF APPROVAL AND REMARKS

1. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works for all authorized points of diversion. The means of measurement and controlling works must be suitable for control of the diversions and acceptable to the watermaster.

CONDITIONS OF APPROVAL AND REMARKS

5. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
- *** 6. Right 63-00184 is limited to the irrigation of 112 acres within the place of use described above in a single irrigation season.
- *** 7. Right 63-00365 is limited to the irrigation of 533 acres within the place of use described above in a single irrigation season.
- *** 8. Right 63-02973 is limited to the irrigation of 24 acres within the place of use described above in a single irrigation season.
- *** 9. Right 63-03261 is limited to the irrigation of 35 acres within the place of use described above in a single irrigation season.
- *** 10. Right 63-07103 is limited to the irrigation of 80.5 acres within the place of use described above in a single irrigation season.
11. Use of water under Right 63-00184 will be regulated by the watermaster of State Water District No. 63, Boise River.
12. Use of water under Right 63-00365 will be regulated by the watermaster of State Water District No. 63-T, Warm Springs Creek.
- * 13. Rights 63-02973, 63-03261 and 63-07103 when combined shall not exceed a total diversion rate of 2.32 cfs, a total annual maximum diversion volume of 627.8 af at the field headgate, and the irrigation of 139.5 acres.
14. The period of use for the irrigation described in this approval for Rights 63-03261 and 63-07103 may be extended to a beginning date of 3/1 and an ending date of 11/15 provided that beneficial use of the water can shown and other elements of the right are not exceeded. The use of water before 4/1 and after 11/1 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
15. The wells previously used under Rights 63-02973 and 63-03261 located in Section 28, Twp. 3N, Rge. 3E, shall be abandoned in a manner which complies with Department well abandonment rules.
- ** 16. The total instantaneous diversion of water from all points of diversion under Transfer 5577 shall not exceed 11.80 cfs, nor total combined annual volume of 2655.0 af, and the irrigation of 590 acres.

WATER RIGHT LICENSE

License of Water Right No. 63-7103 Priority June 25, 1968 Amount 1.20 cfs

THIS IS TO CERTIFY, that DALLAS H. HARRIS

of Boise, Idaho, has complied with the terms and conditions of Permit No. 63-7103 issued pursuant to Application for Permit dated May 8, 1968, and has submitted proof to the Department of Water Resources on December 19, 1974 (late proof), that he has applied water to a beneficial use; an examination by the Department indicates that the works have a capacity for the diversion of 1.20 cfs of water from a ground water source, tributary to _____, and that the permit holder has applied to a beneficial use and established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u>	from <u>April 1</u> to <u>Nov. 1</u>	at <u>1.20</u> cfs and	<u>363 acre feet or</u> <u>4.5 af per acre</u>
	from _____ to _____	at _____ cfs and	
	from _____ to _____	at _____ cfs and	

(both dates inclusive)

Subject, however, to the condition that no more than 1.20 cfs of water be diverted at any one time, and that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed 363 acre feet per year, said waters to be diverted within the SE¹₄NE¹₄ of Sec. 29, Twp. 3 N, Rge. 3 E, B.M. in the County of Ada

Description and location of place of use:

Twp.	Range	Sec.	NE ¹ ₄				NW ¹ ₄				SW ¹ ₄				SE ¹ ₄				Totals
			NE ¹ ₄	NW ¹ ₄	SW ¹ ₄	SE ¹ ₄	NE ¹ ₄	NW ¹ ₄	SW ¹ ₄	SE ¹ ₄	NE ¹ ₄	NW ¹ ₄	SW ¹ ₄	SE ¹ ₄	NE ¹ ₄	NW ¹ ₄	SW ¹ ₄	SE ¹ ₄

		28					3												3.0
		29	32	22.5	3	11.5													69.0

Total number of acres irrigated 80.5

A measuring device of a type approved by the Department shall be permanently maintained as part of the diverting works.

NOTE: Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

The right to the use of the water hereby confirmed is restricted and appurtenant to the lands or place of use herein described, as provided by the laws of Idaho.

Witness the seal and signature of the Director, affixed at Boise, Idaho, this 16 day of October, 19 76.

Witness my hand this 14 day of October, 19 76.

R. Keith Higgins
 Director

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PERMIT NO. 63-7103

in the name of DALLAS H. HARRIS

ORDER OF REINSTATEMENT

WHEREAS, on May 8, 1968, Dallas H. Harris applied to the Department of Water Resources (formerly the Dept. of Water Administration) for a permit to appropriate 1.4 cubic feet per second of groundwater within the SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 29, Twp. 3N, Rge. 3E, B.M., Ada County, to be used for irrigation purposes; and,

WHEREAS, on November 10, 1969, the Department approved said application and issued Permit No. 63-7103 with the condition that proof of construction of works and application of water to beneficial use be submitted to the Department on or before November 1, 1974; and,

WHEREAS, on August 30, 1974, the Department notified the permit holder by certified mail that proof of beneficial use was due and instructed the permit holder as to the steps to be taken to make said proof; and,

WHEREAS, on November 6, 1974, the Department notified the permit holder that Permit No. 63-7103 had lapsed for failure to submit proof of beneficial use; and,

WHEREAS, on December 19, 1974, the Department received the required proof of beneficial use; and,

WHEREAS, Section 42-218a of the Idaho Code provides that a permit may be reinstated upon a showing of reasonable cause within 60 days from the date of the notice of lapsing; and,

WHEREAS, the permit holder has provided a reasonable showing as to why said permit should be reinstated;

IT IS, THEREFORE, HEREBY ORDERED that Permit No. 63-7103 be REINSTATED and the priority advanced to June 25, 1968.

Dated this 10th day of January, 1975.

Department of Reclamation

Mr. R. Keith Higginson
State Reclamation Engineer
State House
Boise, Idaho

Dear Sir:

Re: OBJECTION TO DIVERSION OF WATER

You are hereby notified that Garth Eckert hereby objects to the application of Dallas H. Harris to divert 1.4 cubic feet per second of water from a subterranean source under application number 63-7103, said diversion to be made by well and pump as specified in the posted notice in connection with the application.

Protestant Garth Eckert owns adjoining land to that upon which the wells in question are located and has a water right for four wells located on adjoining property, all of which is long prior in right to any right which might be claimed by applicant Dallas H. Harris. The use of the water by Dallas Harris from the wells in question is at this time causing interference with the water right of Garth Eckert and your attention is directed to a letter dated May 31, 1968, and accompanying information, which fully explains and documents the interference which now exists.

Mr. Dallas Harris does not have a valid water right to divert, and his continued use of the water in the manner presently being used and in the manner applied

63-7103

2--Mr. R. Keith Higginson

June 20, 1968

for would seriously interfere and infringe upon the prior water rights of Garth Eckert.

This protest is made to the entire application and it is requested that an opportunity be afforded protestant to supplement the protest with additional facts prior to any consideration of the application.

Yours truly,

Garth Eckert

Dear Mr. Harris:

A representative of this Department has made an examination of the works covered by your Permit No. 63-7103 and has found the following:

Quantity of water diverted: 1.20 cfs Source: ground water

Amount of water that can be recognized as beneficially used under Idaho law: 1.20 cfs

The maximum quantity diverted shall not exceed 363 acre feet, or 4.5 af per acre, per year.

Point of diversion: SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 29, Twp. 3 N, Rge. 3 E, B. M.

Beneficial use: Irrigation of 80.5 acres within the S $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 20; NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 28; NE $\frac{1}{4}$, Sec. 29; Twp. 3 N, Rge. 3 E, B. M.

Priority date established: June 25, 1968

Our examiner found that the lands being irrigated differ from those lands as described under the permit. Therefore, it will be necessary to amend the permit before a water license is issued. Enclosed is a partially completed application for amendment for your use in this matter.

Please sign the amendment application and return it to this office along with a \$10.00 filing fee within 30 days in order that we might issue your license as set forth above. If you do not concur with these findings or have any questions, please contact us within the 30-day period.

Sincerely,

BOBBY D. FLEENOR
Chief, Water Rights

Boise, ID 83706

Dear Mr. Harris:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit. Enclosed is an Order of Reinstatement; please note that the priority has been advanced to June 25, 1968.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system.

If you have any questions concerning the field exam, please contact our Western District Office in Boise.

Sincerely,

BOBBY D. FLEENOR

Re: Permit No. 63-7103

Dallas H. Harris
6303 Barber Road
Boise, ID 83706

Dear Mr. Harris:

Your proof of application of water to beneficial use must again be rejected and returned to you, since you have not fulfilled the conditions of the permit.

A measuring device was required to be installed as a condition of approval of your permit back in 1969, and therefore, you have been pumping in violation of the permit since that time. You have been sent a list of the types of measuring devices that are approved by this office and given an opportunity to comply with the permit conditions, but have failed to do so.

Therefore, your permit has lapsed and will be of no further force or effect on January 5, 1975, unless you show reasonable cause why it should be reinstated before that date.

Sincerely,

BOBBY D. FLEENOR

Gentlemen:

I am this date returning the completed Proof of Application of Water to Beneficial Use for your approval to be issued a Permit No.

I do not feel it is necessary to install a measuring device for the following reasons: (1) The pump has been in operation since 1968 without a meter (2) The amount of flow of water can be determined by Horse Power of pump and by the setting of Bowls (3) It would be quite an added expense to install meter.

Thank you kindly for your attention to above.

Sincerely,

Dallas Harris

Dear Mr. Harris:

Once again we are returning your proof of application of water to beneficial use form.

One of the conditions of approval of your Permit No. 63-7103 was that a standard type measuring device, capable of providing information concerning your rate of diversion, be installed as part of your diverting works. This measuring device must be installed prior to November 1, 1974, or an extension of time must be requested before that date to prevent this permit from lapsing.

If you have any questions concerning this matter, please contact us.

Re: Permit No. 63-7103

Dallas H. Harris
6303 Barber Rd.
Boise, ID 83706

Dear Mr. Harris:

One of the conditions of approval of your water Permit No. 63-7103 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before November 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Dear Mr. Eckert:

In reviewing our files, we have found an unacted on application for permit in the name of Dallas H. Harris. On June 21, 1968, you submitted a protest against the issuance of this permit.

I believe that this application was being held pending the outcome of a proposed ground-water board. It is my understanding that that proposed board was never formed.

Is it still your intention to protest approval of application 63-7103? I would appreciate hearing from you as soon as possible.

Very truly yours,

C. Stephen Allred, Deputy
State Reclamation Engineer

March 22, 1968

Dalles Harris
Barbra Trailer Court
Boise, Idaho

Dear Mr. Harris:

It has been brought to our attention that on or about May 2, 1967, you had a well drilled. The well is reported to be located at a point in the NE $\frac{1}{4}$ NW $\frac{1}{4}$, sec. 29, T. 3 N, R. 3 E, B.M. for irrigation use.

A search of our records has failed to find your application or approved permit. Under existing Idaho Statutes, Sections 42-226, 42-229, and 42-230 of the Idaho Code, you are required to file and obtain an approved permit before you divert waters from a subterranean source, with the exception of domestic wells which are defined under Section 42-111 of the Idaho Code.

If we have overlooked your permit, please advise the department as to your permit number. However, if you have not yet filled out an application for permit, please use the instructions and the blank application form which we have enclosed.

We will be very happy to assist you with any questions you might have.

Very truly yours,

Re: Conference held in connection with Application No. 63-7013

Date: July 30, 1968

On July 29, 1968 a conference was held by the Department of Reclamation to review and discuss the protests filed against Application No. 63-7013. In attendance was Dallas Harris, John S. Smith, Keith E. Anderson, Garth G. Eckert, Robert Ceppele, and C. Burke, all of Boise. In attendance from the department was Jack Barnett, Steve Allred, and Sheryl Chapman.

The conference was held to determine how we might best proceed with the above referenced application and the protests that were filed upon it. After discussing many of the alternatives, the parties determined that they wished to request the forming of a ground water board to consider all of the facts of the possible water interference. They indicated that within 20 days the request for the ground water board would be submitted. The applicant indicated that there would be no objection to the department holding this application in abeyance.

The applicant also indicated that in the interim they intended to file an application to cover an additional existing well which was originally drilled under Permit No. G-30512 which has since been cancelled.

BEFORE THE STATE RECLAMATION ENGINEER

OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATION FOR PERMIT
NO. 63-7103 in the name of DALLAS H. HARRIS

NOTICE OF CONFERENCE
FOR PROTEST

On May 8, 1968, the Department of Reclamation received an application for permit filed by Dallas H. Harris. On June 21, 1968, the Department of Reclamation received a protest filed by Garth Eckert.

Please be advised that the Department of Reclamation has set the matter of the protest for a conference to be held on July 29, 1968 at 10:00 a.m. in Annex 2 - Statehouse, Boise, Idaho.

Opportunity shall be afforded all parties to respond and present evidence and argument on all issues. The burden of proof is with the protestant. The informal conference, however, will serve to consolidate issues and to determine if any further administrative action is required.

The applicant, protestant, and any legal counsel are requested to attend.

Dated this 17 day of July, 1968.

C. Stephen Allred
Assistant State Reclamation Engineer

MEMORANDUM
JOB FILE #354
October 6, 1965

Bob Copple brought Garth Eckert into the office during the week of September 27 to discuss a potential well interference problem east of Boise near Barber, Idaho.

Eckert formerly owned the property on which the Barber Trailer Court is located but it was sold to another party some time ago. A well was drilled on that property to serve the trailer court, approximately 90 ft. deep, which had pumped a small amount of water and had been satisfactory for all purposes.

In recent years (about a year ago) this well at the trailer court was enlarged and deepened to 150 ft. or more and it now being pumped heavily for irrigation.

Eckert has also drilled two wells to the north of the trailer court well, one of which is a small well for domestic use and the other for stock watering. He is also in the process of drilling a larger well for irrigation. All three of the Eckert wells have been filed on with the State Department of Reclamation and have a priority date which goes back before any work in enlarging or deepening the trailer court well.

The two small diameter wells of Eckerts are also drilled to a depth of approximately 90 ft. He reports that they are cased to the bottom or near the bottom where the casing is seated in rock.

Recently one of the two small diameter wells is experiencing difficulty in pumping sand and having an insufficient supply of water. The other well is apparently unaffected although it is about the same distance from the trailer court well. He wondered whether or not there may be interference to his wells and possibly will be to his irrigation which is being drilled as a result of the increased pumping for the irrigation at the trailer court.

He stated that the trailer court well did not have a permit--insofar as the enlargement or deepening and increased pumping was concerned.

One of the small diameter wells he is using was drilled by Lukehart.

He said that the pumps in his wells were operating satisfactorily and did not feel that it was due to any pump difficulty. Both are equipped with jet pumps, one a Jacuzzi and the other a Peerless. It is the well in which the Peerless pump is installed is having the difficulty although this pump was removed only a year ago and checked completely.

He said it was possible to get into the two wells of his to measure water levels and I suggested that he first make a check of the water level in his two wells and also of the total depth. In addition

65-7103

Memorandum
Job File #354
October 6, 1965
-2-

he was going to try to determine whether or not fluctuations in the water level occurred after the irrigation well at the trailer court was stopped--it still was being pumped at the time of his visit.

After he obtains this information he will contact me and we may be able to evaluate at that point whether or not interference is occurring or at least establish what additional tests or information would need to be gathered in order to establish any interference.

I measured the water levels in the three wells on the afternoon of April 30 (the static level in Well No. 1 was measured at 56½ feet at 4:30 p.m. with the pump not running). The static level in Well No. 2 was measured at 67 ft. 11 inches at 4:45 p.m. April 30. The pumping water level in Well No. 4 (irrigation well) was measured by airline at 55 ft. at 4:35 p.m. April 30. The static level was reported to be 47 feet before starting the pump at 2:55 p.m. April 30 which was the first operation in the 1968 irrigation season for this irrigation well.

The static level in the No. 2 well at the house was also measured at 58 ft. 9 inches on April 29, 1968 by Mayne Pump Company at the time the additional pump column was added.

63-7103

Memorandum
Job File #354
May 17, 1968
-3-

Mr. Eckert feels that the noticeable drop in water level in his small wells during the month of April is attributable to the pumping for irrigation from the wells immediately to the south operated by Dallas Harris or Harris Brothers. The coincidence of drop in water levels with the operation of the Harris pumps would appear to substantiate this. The difficulty in pumping sand and the inability to obtain sufficient water from the No. 2 well at the Eckert residence is probably due to the low water level which is near the bottom of this small diameter well.

Irrigation from the Harris wells is used on approximately 160 acres of land. Much of the land being irrigated from the two Harris irrigation wells is reportedly available for irrigation under a 12 cubic feet per second water right out of the penitentiary ditch canal. This canal crosses through the area being irrigated by Harris.

incorrect amt.

The No. 1 Harris well was originally about 76 feet in depth. This well, 8 inches in diameter, was reportedly deepened in the spring of 1962 to a total depth of approximately 90 feet. The original well, according to records with the State Department of Reclamation was drilled by Harden in June 1950 to a total depth of 77 feet with a static water level of 32 feet. After deepening in 1962, the well was tested by B & M Equipment at a rate of approximately 225 gpm.

The Harris No. 1 well, or its deepening, was apparently covered by Permit G-30512 which was issued to Harris Brothers in the amount of 0.67 cubic feet per second with priority date May 28, 1962. This permit was subsequently canceled by the State Reclamation Engineer on October 5, 1967 since they had failed to comply with the requirements for filing proof of completion of works in application to beneficial use and had failed to present any reason as to why the permit should be extended rather than canceled.

The principal source of irrigation water on the Harris property, for sprinkler irrigation, is apparently from the Harris well No. 2. This well was drilled in the spring of 1967 by Drake Plumbing Company to a total depth of 101 feet with a 12-inch diameter. The well was tested by B & M Equipment Company but the amount of water produced at the time of testing is not known. There appears

63-7103

Memorandum
Job File #354
May 17, 1968

-4-

to be no application for permit for this well on file with the State Department of Reclamation as required by law.

Originally the irrigation from the Harris wells was by sprinklers using 6 hour sets. It is reported that the method of application has been changed so that two 12-hr. sets are now used with continuous operation of the irrigation system.

The Eckert irrigable land is being sprinkled with a total of about 35 acres being irrigated from well No. 4.

The Eckert well No. 3 was drilled to a total depth of 400 feet, producing somewhat warm water but with very small yield. This well is not presently being pumped.

All four of the Eckert wells are covered by Permit G-30216 which has gone to license with a priority date of September 28, 1961.

Water for all of the wells in the area appears to come from the same sand and gravel deposits which are encountered above a depth of approximately 100 feet. The behavior of water levels in the area according to the measurements made by Mr. Eckert, supported by his description of the difficulties with the water levels and his wells and the coincidence in timing with operation of the Harris wells for irrigation, would support the conclusion that pumping from the Harris wells has produced interference at the Eckert wells. The immediate result of such interference has been the necessity for deepening the number 2 well at the residence which supplies domestic water.

Following the examination on April 30, it was recommended that the No. 2 well be deepened into additional water-bearing sand and gravel deposits. A drilling contractor moved on to the location shortly after that time and carried the well down an additional 12 ft. to a new total depth of 90 feet. The casing was extended to the new total depth. The additional drilling encountered water-bearing sands and gravels and the well was thoroughly cleaned out with an air compressor and bailer and the pump reinstalled with an additional 10 feet of column.

63-7103

Memorandum
Job File #354
May 17, 1968
-5-

The pump in well No. 2 is now set with 76 feet of pipe plus the jet. Water is being produced from the well at a rate of about 10 gallons per minute, without sand, and the water system has been hooked back into the house. At the time that the pump was removed by the driller prior to deepening the static level was reportedly 68 to 69 feet below ground. After the deepening and development the static level was reportedly 60 feet below ground.

In order to establish definitely the amount of interference between wells it would be necessary to shut down the Harris wells long enough to observe recoveries of water level at the Eckert wells--assuming that the water supply in the area is sufficient to produce a noticeable recovery in a short period of time. It was recommended that the matter be referred to the State Department of Reclamation for an investigation; since neither of the Harris wells appear to be covered by permit it might, therefore, be possible for the State Department to order them shut down long enough to make some field observations.

63-7103

MEMORANDUM
JOB FILE #354
May 17, 1968

This memorandum will summarize recent developments at the Garth Eckert wells near Barber, Idaho.

On Tuesday, April 30, 1968 I visited the Garth Eckert property near Barber, Idaho, accompanied by R. H. Copple, attorney. The reason for the inspection was that Mr. Eckert reported that his house well which provides domestic water for the residence (well No. 2) had gone "dry" on Saturday, April 27. This well was originally drilled to a depth of about 80 feet and at the present time has a total depth of 78 feet. On Monday, April 29, the pump had an additional 12 feet of suction pipe added to the existing Jacuzzi jet pump. The static water level in the well is reportedly at about 60 feet and the pump has a reported capacity of 1200 gallons per hour with 40 lbs. discharge pressure. After installing the additional suction pipe, the pump was able to produce water but there was a large amount of sand also being developed and the well was unusable. Even the addition of suction pipe did not appear to provide an adequate supply for the residence.

This is the first time that this well has given any trouble at all. In 1965 there was some similar trouble with sand and lowering of water level at well No. 1 near the corral.

The record of depths to water in the various wells on the Eckert property, as measured in recent years by Mr. Garth Eckert, is as follows (see also attached sketch):

Well No. 1 (corral)

<u>Date</u>	<u>Depth to Water</u>
October 15, 1965	50 ft.
December 15, 1965	40
January 15, 1966	38
February 15, 1966	38
May 15, 1966	38
June 8, 1966	38
May 15, 1967	38
June 8, 1967	38
April 1, 1968	39
April 30, 1968 (AM)	58 ft. 9 in.

Department of Reclamation

Mr. R. Keith Higginson
State Reclamation Engineer
Capitol Building
Boise, Idaho

Dear Sir:

Re: Garth Eckert wells
Permit No. G 30216

This office represents Garth Eckert who owns property near the old townsite of Barber, the street address of which is 2700 Warm Springs Avenue, Boise, Idaho. I believe you will find a full description of the property contained in Permit No. G 30216 issued by your office.

Mr. Eckert has four wells with the priority date of September 1961, for both domestic and irrigation purposes. Recent difficulties with his wells caused Mr. Eckert to seek our assistance in an effort to solve his problems, and we in turn retained the services of Anderson & Kelly in an effort to determine the cause and best method of correction of Mr. Eckert's problems.

From the investigations conducted by Keith Anderson, it appears that the water levels on the Eckert wells have dropped particularly in the spring of 1968, after a neighbor, Dallas Harris, started operating and pumping from a well located near the Eckert property. I enclose a plat which Mr. Anderson has drawn showing the location of the wells on the Eckert property, and also the wells on the Harris property. You will

notice from the legend on the plat that the Harris wells are identified by the letter "H" and the Eckert wells by the letter "E." You will also notice the close proximity of the wells to each other.

The drop in the water level of the well supplying domestic water to the Eckert home was so severe that it was necessary to obtain a substitute temporary source of water (from one of the other wells), and to then deepen the well identified as "E2" at the Eckert house and add approximately another 12 feet of casing. The Harris well number 1 has been deepened and the Harris well number 2 has been drilled and placed in operation without any water right permit as required by law. Apparently there was an original permit issued to Harris (G 30512), but this permit was cancelled in the fall of 1967 because of failure to comply with the requirements of the Permit or to show cause why the Permit should be extended. We believe that the pumping from the Harris wells is the direct cause of the loss of water experienced by our client in his well number 2 and the lowering of the water level in his well E1.

The land being irrigated by the neighbor Harris from his wells has an existing water right in the Penitentiary Canal Ditch which crosses the property. We believe that application of this water by sprinkler methods which he is using with his well water would result in sufficient saving in water that his existing water right in the ditch would be adequate to irrigate all of the land which is now being served by the Harris wells, and if neighbor Harris would use this water right instead of letting it waste and instead of pumping the water out of the wells, in violation of the rights our client Eckert has under his water rights and permits, then the interference which has occurred would be eliminated.

63-7103

3--Mr. R. Keith Higginson

May 31, 1968

For your information, I am enclosing two memorandums from Engineer Anderson's files which will show you some of the history of the wells in question and the problem encountered. You will notice that it is Mr. Anderson's belief that all of the water in the area appears to come from the same sand and gravel deposits, with the result that the pumping of the Harris wells is causing interference with the prior rights of the Eckert wells.

The purpose of this letter is to request that you make an investigation of the situation to see if some satisfactory solution can be reached for the benefit of all parties concerned. It would be our intention, in the event such a solution cannot be obtained, to proceed with the statutory hearing to prevent further encroachment of our client's water rights, but it is our hope that such a hearing can be avoided and the problem solved with your assistance.

If there is anything we can do to aid you in making your investigation, we will of course cooperate in every way. We shall appreciate your earliest convenient investigation of this problem.

Yours truly,

DAVISON, DAVISON & COPPLE

Re: Application No. 63-7003
Dallas H. Harris

Idaho Daily Statesman
300 North 6th Street
Boise, Idaho 83702

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted assuming the notice is correct. If we have any corrections, we will notify you before the first publication date. If you can not publish the notice on the proposed dates please contact us immediately.

An affidavit of publication must be submitted to the Department of Reclamation, along with the publication bill. In order to receive payment, the following certification must appear on the bill:

I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of same has been paid.

(Do not sign this letter)

Signature of claimant

Very truly yours,

Donald W. McElldowney
Appropriation Examiner

Enclosure: legal notice

NOTICE OF APPLICATION FOR WATER

Notice is hereby given that Dallas H. Harris, 6303 Barber Road,
Boise, Idaho has on May 8, 1968
applied for permit to divert ~~store~~ 1.4 cubic feet per second ~~approx~~
of water from a subterranean source
under application No. 63-7103. Water will be diverted by a well pump,
and sprinklers within the SE 1/4, sec. 29, T. 3 N., R.
3 E, B.M., Ada County
and is to be used from May 1 to December 1 for irrigation
in the W 1/2 NE 1/4, sec, 28; all of section 29, T. 3 N, R. 3 E, B.M.

Any protest against this application must be filed with the Department of
Reclamation within ten days from the last date of publication of this notice.

R. KEITH HIGGINSON
State Reclamation Engineer
