Re: Permit No. 63-7083-
License # 63-3142

Gentlemen:

On May 1, 1970, the department conducted a field examination in connection with beneficial use submitted under Permit No. 63-7083. At the time proof was submitted, the only ground that could be irrigated under this permit, was T. 1 N, R. 3 W, B.M., Section 12, the SE $\frac{1}{4}$ and the E $\frac{1}{2}$ SW $\frac{1}{4}$, 240 acres. When evidence of beneficial use was submitted, the permit holder claimed that he was irrigating the entire S $\frac{1}{2}$ of Section 12, 320 acres. Our examiner failed to find any beneficial use upon the area in Section 13, or the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 12. If our findings are correct, there are two choices open to the department at this time.

- #1 to cancell permit No. 63-7083, for failure to apply the water to a beneficial use
- #2 to amend permit No. 63-7083 to irrigate 240 acres in Section 13

As you may be aware, Idaho is under a mandatory permit system for ground water. Therefore, the only authority to use ground water, is that covered by a valid permit or license. At present, you have a license to irrigate 240 acres in Section 13. We are enclosing a copy of Water License No. 63-3142, which will verify the lands you can irrigate. The water under your license can only be used for the grounds covered by the license. Therefore, you have no authority to irrigate grounds other than those covered by your permit.

Our examiners informed us that the entire Section 13, is being irrigated in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of said section. Therefore, with consideration to License No. 63-3142, and an amendment to permit No. 63-7083, the maximum area that could be irrigated in Section 13, would be 480 acres. If you are indeed requiring 640 acres in Section 13, then you must file a new permit or take the additional ground out of production. We will be glad to assist you in any manner possible.

Very truly yours,

Donald W. McEldowney
Appropriation Supervisor
