=====

Transfer 4998 adds points of diversion and identifies the municipal place of use under Rights 63-02500, 63-02874, 63-07067 & A63-19456. The nature of use under 63-07067 is also changed from domestic to reflect historical municipal use.

The transfer combines these rights in a common system diverted from three (3) existing and two (2) proposed wells that provide municipal use within Boise and the surrounding service area. The rights are changed to reflect their common municipal use, year long season of use and the standard common municipal place of use described in remarks only.

Recommended conditions include drilling permit requirements, future annual reporting, multiple points of diversion/measuring devices, non-confirmation of claim and standard transfer conditions.

Gentlemen:

One of the conditions of approval of your water Permit No. 63-7066 & 63-7067 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before April 1, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
