Dear Mr. and Mrs. Johnson:

We have been reviewing the claim recently submitted for water use from Five Points Creek, tributary to Little Smokey Creek and have found that more information is necessary before processing can begin.

On Item #3 for period of use you have that it was from 1902 to 1943. If the water has not been used since 1943, it is possible the water right has been lost. If water is not used for more than five years and the wateruser decides to begin use again, another user of the same source can take them to court. If these users can prove non-use for more than a five year period, the old water right would be lost. Please be advised that you can still file for a new water use after June 30, 1983, if you decide to begin use of the water again. This form is an application for permit and the filing fee will not change after June 30.

You can file the claim as it is, however, if any problems arise in the future, the validity of the claim would have to be proven by you. If you still wish to file the claim, the legal description needs to be designated to the nearest quarter-quarter. We could not tell from the map you sent which quarter of the NW $\frac{1}{4}$ your pump or mines are located. I am enclosing a copy of the mapographic map for that area to help you locate your legal description. We are returning the claim and if you wish to continue the processing, please return it with the necessary changes. If not, just notify our office and the \$30 filing fee can be refunded.

Do not hesitate to contact us if you have any questions.

Sincerely,

JAN GROVER
