STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
Section 42-225a, Idaho Code

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. **The filing of this claim does not confirm the water right but will serve for information purposes only.** It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that KENNETH L. LISLE
(name of claimant)
of Route 1 Fruitland, ID 83619, claims a right to the diversion and beneficial use of
(mailing address)
the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water: (name of stream, lake, spring, etc., or ground water) Hurd Gulch, tributary to, Snake River
- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:
- | | | | | | | | |
|--------|-------------------|-----|----------------------------|---------------------|-------------|----|------------------------|
| Amount | <u>0.7 cfs</u> | Use | <u>irrigation</u> | Period of Use: From | <u>3-15</u> | To | <u>11-15</u> |
| Amount | <u>0.02 cfs</u> | Use | <u>stock</u> | Period of Use: From | <u>1-1</u> | To | <u>12-31</u> |
| Amount | | Use | | Period of Use: From | | To | |
| | (cfs, gpm or a/f) | | (dom., irri., stock, etc.) | | | | (both dates inclusive) |
- (3) Total quantity of water claimed: 0.72 cubic feet per second, or _____ acre feet per annum, and/or _____ gallons per minute.
- (4) Priority claimed: (the date water was first applied to beneficial use) March 15, 1943

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

- (5) A) Point of diversion: (give location of point where water is diverted from its source)
NW ¼ NW ¼, Sec. 22 Twp. 7N Rge. 5W B. M. County of Payette
Additional points of diversion: _____

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. diversion dam and ditches

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

T	R	SEC.	NE ¼				NW ¼				SW ¼				SE ¼				TOTAL
			NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	
7N	5W	21	12	18															30

Total No. of acres 30

B) If the water is used for other than irrigation, fully describe that use, being as specific as possible: 30 head of livestock

- (7) If you are claiming water as a member of an organization, list name of organization: _____

(8) Remarks Diversion rate shows 0.1 cfs for loss and evaporation.

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

NOTICE OF CLAIM TO A WATER RIGHT

No. 63-4544

Notice is hereby given that KENNETH L. LISLE Route 1 Fruitland, ID has filed a claim to a water right established by diversion and application to beneficial use of 0.72 cubic feet per second of water from Hurd Gulch trib. Snake River with the point of diversion in the NW¹/₄NW¹/₄ Sec. 22 T7N-R5W B.M., Payette County.

The water is claimed to be used from Jan 1 to Dec. 31 for stockwater and from 3-15 to Nov. 15 for irrigation of 30 acres with a priority date of March 15, 1943 the place of use is with in the N¹/₂NE¹/₄ Sec. 21 T7N-R5W B.M.

Any exception to this claim of water right may be filed with the Director of the Idaho Department of Water Resources, 92 South Cole Road, Boise, Idaho 83705.

Re: Claim to a Water Right No. 63-4544
(Kenneth L. Lisle)

Robert M. Henggeler
Whitley Drive
Fruitland, Idaho 83619

Dear Mr. Henggeler:

Pursuant to your letter of August 19, 1977, please be advised that your reference to water right 65-2416A must be incorrect since that does not pertain to Hurd Gulch. Water right license 20516/65-2496 was, however, issued to Clyde Hurd. The license was for the diversion of 1.74 cfs from Hurd Gulch and bears a priority of June 28, 1948. The license is appurtenant to 87 acres in Sec. 20, Twp. 7N, Rge. 5W.

With regard to claim to a water right #63-4544 in the name of Kenneth L. Lisle, please be advised that no permit is ever issued pursuant to a claim. There is no mechanism in the statutes to determine the validity of a claim. A claim which is submitted together with any protests and evidence filed against the claim are received and filed in the Department's records. No hearings are held by the Department on protested claims as would be the case on a protested application.

Your letter and the enclosures you sent will be filed in claim file 63-4544.

A petition to the Director of the Department of Water Resources for the adjudication of water rights on a stream system must be signed by five or more or a majority of the waterusers on a stream system. So your letter will not be considered as a request to adjudicate the waters of Hurd Gulch.

If this office may be of further assistance, please contact us.

Sincerely,

L. GLEN SAXTON, P.E.
Western Regional Supervisor

LGS:rf

August 19, 1977

C. Stephen Allred, Director
Idaho Department of Water Resources
92 South Cole Road
Boise, Idaho 83705

Re. Notice of Claim to Water Right # 63 4544

Dear Mr. Allred;

Before any permit is issued with a priority date of 1943, I would appreciate it if you would confirm that Water Right # 65-2416 A has the prior right in Hurd Gulch. The two enclosures will help substantiate this. If necessary, I will send two more depositions from eye witnesses of the development of Hurd Gulch.

In conversation with Mr. Lyle, we would like to petition the Director to adjudicate the rights of Hurd Gulch.

Sincerely,

Robert M. Henggeler

BUREAU OF RECLAMATION
Central Snake River District
Payette Division O & M Office
Notus, Idaho
June 11, 1948

Mr Clyde Hurd
RFD # 1
Payette, Idaho

Dear Mr. Hurd:

In answer to your request for statement of the conditions of your irrigation system at the time of the construction of the wasteway through your farm by Government forces, and provisions made so that you would not be deprived of water due to that construction, I submit the following:

1. In 1939 Government forces straightened and excavated where necessary, a channel which had been caused by flash storms and spring run-off, to provide an emergency outlet to Snake River for water from the "A" Canal of the Payette Division. This wasteway headed at a check and turnout structure in mile 18 of the above canal approximately 4 miles east of where it enters Snake River at your farm.
2. In approaching your farm it was necessary to excavate to a depth of from 5 to 6 feet to go under your outlet road, and to more closely reach the average level of Snake River so that costly drop structures would not be necessary. In doing so your irrigation system which headed at some springs rising on and directly above your farm was destroyed. To offset this, and to provide for the continued irrigation of your farm, bolts were set in the inlet transition to the road crossing for check steps, and walls were constructed with adequate length to provide sufficient overflow area to accommodate any waste which may be necessary from the canal, after you had checked the inlet to sufficient height to raise the water so it would again flow in your ditch system. Further recognition and consideration was given to your irrigation system in the construction of two or three flumes across the wasteway channel between the road crossing and the river.
3. Since this construction took place most of the lands between your farm and the "A" Canal have been brought under irrigation, and the channel carries considerable return flow during the irrigation season. It is very doubtful that the Bureau of Reclamation or any land owner whose farm this channel crosses would ever divert and put to beneficial use enough of this water to diminish the supply so that you would not have sufficient

MICROFILMED

water^{is} irrigate your farm. Because of the possibility of its use as an emergency wasteway, operating forces would not permit diversion dikes or structures farther upstream in the channel, and the amount of water which could be taken out without such structures would be very small.

Hoping this covers the information you desired, and assuring you we shall be glad to give you any further information we may have in relation to clarify your water right, I am

Very truly yours,

Theodore Nelson

SS:

ED MERCNEY, residing at 1723 1/2 MARSHALL AV
CALDWELL IDAHO, Being first duly sworn upon his oath
deposes and says:

I Ed Meroney, age 78, worked for Payette County road Department from 1940 to 1944. I was appointed road overseer Jan 27, 1941. During the four years I worked for the county road Department we built the county roads in Black Canyon area between the city of Fruitland and Parma.

Through the building of the roads is how I first worked in Hurd Gulch. Two of the county roads built crossed Hurd Gulch.

Curley Manser (District road Manager) and I cleaned Hurd Gulch every year from 1940 to 1944. We cleaned from the main Black Canyon ditch to Clyde Hurds' diversion to prevent the road culverts from plugging up with silt, weeds and other trash. The process used to clean the gulch was pulling a patrol with a caterpillar. At that time there were not any ponds, check boxes or dams except for Clyde Hurds' water diversion.

When asked the question how much water was running in the gulch and where the water was coming from I remember that we had to put in a 10 in. tin whistle to carry the spring water. The spring would just about fill the 10 in. pipe to full capacity. The springs were running between highway 95 and Hurds' diversion dam. The first two years I worked for Payette County the only water in the draw was spring water because Black Canyon irrigation didn't start irrigating until 1941. The water started in 1940 but it was too late to irrigate.

Grant Hurd was the first ditch rider for Black Canyon ditch in this area.

Dear Mr. Lisle:

The Department of Water Resources has completed the advertising of your claim to a water right, and no further action is authorized under Section 42-225a and 42-225b, Idaho Code. Your claim will be retained in our files and will be available at any time for use by you or the court.

The filing and advertising of the claim does not confirm the water right claimed, but will serve to record and preserve the information and the evidence which you included in your claim.

If, at a later date, you find that you have additional information or supporting evidence that you would like to have included with the claim, you may have that information or evidence added at any time. Please refer to the claim identification number when corresponding with this office.

We are enclosing a copy of your claim for your records. If you have questions, or if this office may be of further assistance, please feel free to contact us.
