J. B. Eldridge. The Mayflower Mine had been operated on a small basis
for several years theretofore using the water from the West Fork of Gran-

In 1936 the Mine was leased to the Texas-Owyhee Mining and
Development Company. They operated same until October 15, 1940. One
hundred and two men were employed with about a \$268,000 production.

In 1941 (World War 2), President Roosevelt issued Executive
Order L-208 closing all gold mines. Mining in Boise Basin was at a stand-
still and has been ever since. Now, 1969 - 1970, with hopes of mining
once again, people are looking for mining property.

Since 1945, water has been used in prospecting and Placer Min-
ing.

In 1931, Mayflower Gold Mines was incorporated stock non assess-
able. No funds were received since 1941. Expenses were paid by J. B. and
Mildred A. Eldridge. On June 24, 1968, the property was sold at Sheriff's
sale, Mildred A. Eldridge being the only person interested in bidding at
sale. Deed number 73156 was issued by Sheriff John W. Williams with same

Dear Ms. Eldridge:

The Department of Reclamation has completed the processing of your claim to a water right, and no further action is authorized under Section 42-225 of the Idaho Code. Your claim will remain in our files and will be available at any time for your or the courts use.

As you are aware, the filing of your claim does not, in itself, guarantee you a water right; it only records and preserves the information and the evidence which you included in your claim.

If, at a later date, you find that you have additional information or evidence that you would like to have included in your claim file, you may add that information at any time. Please refer to your claim number when corresponding with this office.

We are enclosing, for your records, a copy of your claim. If you have any questions or if we can be of further assistance, please feel free to call upon us.

Very truly yours,

Donald W. McEldowney

Dear Mrs. Eldridge:

We have reviewed your original claim and supporting documents and the questions that we proposed in our previous correspondence are still of concern to us at this time.

Mr. Evans' conversation with one of our employees about your claim has led to the opinion that the claim you want to file is represented by the typed copy we are enclosing. We felt it necessary to retype your claim in that the original is now so incomprehensible that it is hard to distinguish the information. Therefore, we have taken the liberty to type another claim which we felt was representative of your efforts. We are enclosing a copy of the original claim for your review.

If the typed claim does represent your intentions, please sign it and have it notarized and return to us without a fee. If this does not represent your intentions, please make the necessary corrections on the form and return it for processing. We are holding your original claim, supporting affidavits and \$10.00 fee in our files.

If we may be of any further assistance in this matter, please do not hesitate to contact us.

Very truly yours,

Dear Ms. Eldridge:

We are returning your \$10 check and your claim to a water right. In reviewing the claim, we find that we do not have sufficient information; therefore, in order for the department to accept and process it, we must have the following information:

1. The point of diversion which has been listed will be very ineffective in as much as identifying your actual location. We should have under item 2, a 40-acre tract wherein your point of diversion is located such as the NW¹/₄NW¹/₄ Sec. 3, Twp. 7 N., Rge. 4 E., B.M. Otherwise, it will be difficult for anyone to evaluate where your claim is located within the 36-section area that you have listed.
2. Under item 3a, we must have the date of priority claimed, that is the day, month, and year that the water was first beneficially used. Also show any changes or increases since that time. We have made a pencil notation on your claim, as to what we think the claim is proposing. You list the quantity of water as "all". As far as we can determine, you are claiming the total flow of West Fork Creek. You should list a specific quantity such as 0.1 cubic feet per second. You are also required to list a specific beneficial use and a period during each year in which the water is used. We have entered mining, from Jan. 1 to Dec. 31, and domestic from Jan. 1 to Dec. 31. If these are the correct beneficial uses and their periods during each year when the water is used, please re-enter the proper information in your own hand.

If we can assist you any further, please contact us.

Very truly yours,

Donald W. McEldowney
