Affidavit of Publication

NOTICE OF PROPOSED CHANGE OF WATER RIGHT NO. 63-3614 1SP

NOTICE IS HEREBY GIVEN that the United States of America, Bureau of Reclamation of Boise, Idaho has applied to the Department of Water Resources for a change in the nature of use of the water of the Boise River, South Fork.

The right sought to be changed is evidenced by Water Right License 63-3614 and is recorded as follows:

AMOUNT: 493,161 Acre Feet
PRIORITY: 12/9/1940
POINT OF DIVERSION: Lot 4 Sec. 1 T. 1S. R. 8E.

The water is used for 493,161 Acre Feet storage for irrigation from 1/1 to 12/31, 493,161 Acre Feet storage for power from 1/1 to 12/31, 493,161 Acre Feet irrigation from storage from 3/15 to 11/15 and 493,161 Acre Feet power from storage 1/1 to 12/31 upon lands of the Boise Federal Reclamation Project in Ada and Canyon Counties plus all contract lands under Federal Reclamation for storage in Anderson Ranch Reservoir.

TO BE CHANGED AS FOLLOWS

The water and amount will be used for 487,961 Acre Feet storage for irrigation from 1/1 to 12/31, 487,961 Acre Feet storage for power from 1/1 to 12/31, 5,200 Acre Feet storage for municipal from 1/1 to 12/31 and 5,200 Acre Feet storage for industrial from 1/1 to 12/31 and 487,961 Acre Feet irrigation from storage from 3/15 to 11/15, 487,961 Acre Feet power from storage from 1/1 to 12/31, 5,200 Acre Feet municipal from storage from 1/1 to 12/31 and 5,200 Acre Feet industrial from storage from 1/1 to 12/31, for a total of 493,161 Acre Feet, with a point of diversion within Lot 4 Sec. 1 T. 1S., R. 8E., to be used upon lands of the Boise Federal Reclamation Project in Ada and Canyon Counties, plus all contract lands under Federal Reclamation for storage in Anderson Ranch Reservoir.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Statehouse, Boise, ID 83720 on or before January 13, 1986.

T. 445

NOTICE OF PROPOSED CHANGE OF WATER RIGHT NO. 63-03614

Notice is hereby given that United States of America acting through the Bureau of Reclamation of Boise, ID has applied to the Department of Water Resources for Transfer No. 4457 for a Change in Nature of Use of the following described water right to be changed pursuant to Section 42-222 of Idaho Code:

WATER RIGHT AS RECORDED:

BASIS License

DATE OF PRIORITY 12-09-1940

SOURCE South Fork Boise River tributary to Snake River

AMOUNT 493,161 acre feet (af)

USE Irrigation and Power Storage & Irrigation and Power from storage (period of use unspecified in license)

POINT OF DIV Lot 4 (NWSE), S01, T01S, R08E, Elmore County (Dam for Anderson Ranch Reservoir)

PLACE OF USE Lands irrigated under Boise Federal Reclamation Project in Ada and Canyon Counties, ID and Malheur County, OR (approx. 276,000 acres)

WATER RIGHT AS CLAIMED IN SNAKE RIVER BASIN ADJUDICATION:

Same as above except that Storage periods defined as all year and Uses from Storage include Irrigation from 3-15 to 11-15 plus Power and Municipal all year. Claim also lists 30,000 more af reservoir capacity (bank storage) than recognized in license.

RIGHT NO. 63-03614 AND ADJUDICATION CLAIM NO. A63-03614 TO BE CHANGED AS FOLLOWS:

USE AND AMOUNT 493,161 af as follows: Power 493,161 af; Irrigation 487,961 af; Municipal 4,800 af; and Wildlife 400 af.

REMARKS Water Storage & Use from Storage clarified as all year except Irrigation from Storage from 3-15 to 11-15. Transfer will provide 400 af for wildlife mitigation to 90 acres in SE ¼, S26, T03N, R03W, Canyon County. Irrigation via project water has occurred on 51 of 90 acres and will continue but will decline as wildlife uses increase on site. Reservoir water delivered to Lake Lowell to be withdrawn from Lake Lowell for the 90 acres via Deer Flat Caldwell Canal (local diversions: Headgate Caldwell, No. 247 and No. 117 DFC # 2). Canal and its diversions are also located in SE ¼, S26, T03N, R03W.

Any protest against approval of the proposed water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705, together with a protest fee of $25.00 on or before November 7, 1994. The protestant must also send a copy of the protest to the applicant.

Affidavit of Publication

ST. OF IDAHO }
COUNTY OF TWIN FALLS } SS.

№ 26486

I, Linda Capps McBurnie being first duly sworn upon oath, depose and say that I am Legal Clerk of the TIMES-NEWS, published daily, at Twin Falls, Idaho, and do solemnly swear that a copy of the notice of advertisement, as per clipping attached, was published in the regular and entire issue of said newspaper, and not in any supplement thereof, for Two ~~consecutive~~ weeks,

commencing with the issue dated October 19, 19 94,

and ending with the issue dated October 26, 19 94.

And I do further certify that said newspaper is a consolidation, effective February 16, 1942, of the Idaho Evening Times, published theretofore daily except Sunday, and the Twin Falls News, published theretofore daily except Monday, both of which newspapers prior to consolidation had been published under said names in said city and county continuously and uninterruptedly during a period of more than twelve consecutive months, and said TIMES-NEWS, since such consolidation, has been published as a daily newspaper except Saturday, until July 31, 1978, at which time said newspaper began daily publication under said name in said city and county continuously and uninterruptedly.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week has been designated as the day on which legal notice by law or by order of any court of competent jurisdiction within the state of Idaho, to be published weekly, will be published; and that at the head of the editorial column of said combined newspapers, and in each issue thereof, Thursday is announced as the day on which said legal notices will be published.

STATE OF IDAHO
COUNTY OF TWIN FALLS

On this 27 day of Oct. in the year of 1994, before me,

a Notary Public, personally appeared Linda Capps McBurnie, known or identified to me to be the person whose name subscribed to the within instrument, and being by me first duly sworn, declared that the statements therein are true, and acknowledged to me that he executed the same.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT NO. 63-03614

Notice is hereby given that the United States of America, acting through the Bureau of Reclamation of Boise has applied to the Department of Water Resources for a change of nature, period, and place of use of the water of Boise River, South Fork. The right sought to be changed is evidenced by license and is recorded as follows:

Priority: 12/09/1940

Point(s) of Diversion: T01S R8E Sec. 1 Lot 4 (NWSE), Elmore County.

Amount (acre-feet)	Period	Purpose
487,961	1/01-12/31	Irrigation Storage
487,961	3/15-11/15	Irrigation from Storage
493,161	1/01-12/31	Power Storage
493,161	1/01-12/31	Power from Storage
5,200	1/01-12/31	Municipal & Industrial Storage
5,200	1/01-12/31	Municipal & Industrial from Storage

493,161 Acre-Feet Total for 277,000 acres in Ada and Canyon Counties as portions of the Boise Project.

WATER RIGHT AS CLAIMED IN THE SNAKE RIVER BASIN ADJUDICATION

WATER RIGHT NO.: A63-03614
NAME: United States acting through Bureau of Reclamation
BASIS OF RIGHT: License
SOURCE: Boise River, South Fork tributary to Snake River
PRIORITY: 12/09/1940

Amount (acre-feet)	Period	Purpose
487,961	1/01-12/31	Irrigation Storage
458,961	3/15-11/15	Irrigation from Storage
493,161	1/01-12/31	Power Storage
464,161	1/01-12/31	Power from Storage
5,200	1/01-12/31	Municipal Storage
5,200	1/01-12/31	Municipal from Storage

493,161 Acre-Feet Total for 277,000 acres within the service area of Arrowrock Division of Boise Federal Reclamation Project in Ada and Canyon Counties.

WATER RIGHT NO. 63-03614 AND ADJUDICATION CLAIM NO. A63-03614 TO BE CHANGED AS FOLLOWS:

Amount (acre-feet)	Period	Purpose
446,961	1/10-12/31	Irrigation Storage
446,961	3/15-11/15	Irrigation from Storage
452,161	1/01-12/31	Power Storage
452,161	1/01-12/31	Power from Storage
5,200	1/01-12/31	Municipal & Industrial Storage
5,200	1/01-12/31	Municipal & Industrial from Storage
41,000	1/01-12/31	Stream Flow Maintenance Storage
41,000	8/15-04/15	Stream Flow Maintenance from Storage

493,161 Acre-Feet Total used within same 277,000 acres in Ada and Canyon Counties.

Power is for Anderson Ranch Dam and Diversion Dam Powerplants.

Municipal and Industrial is for City of Boise.

Stream Flow Maintenance is for Boise River downstream from Lucky Peak Reservoir in the 1992-1993 and 1993-1994 non-irrigation seasons only.

The amount of water available for irrigation use under Bureau contract will not be reduced by this proposal.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705 on or before June 8, 1992.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

Denver, Colorado
February 13, 1941

To The Board of Directors of
Wilder Irrigation District,
Caldwell, Idaho.

Gentlemen:

The following certificate is furnished in accordance with your request.

I do hereby certify that the estimated cost of Anderson Ranch Reservoir is as follows:

Right of Way, Clearing and Road Relocation	$1,200,000
Dam	6,500,000
Outlet	800,000
Spillway	1,800,000
Power Plant	2,400,000
Arrowrock Outlets	400,000
	$13,100,000

I do hereby certify that the surveys and examinations of the Anderson Ranch Reservoir, together with the estimated cost of construction thereof as above set forth, and the maps and plans of said dam and reservoir were made by me or under my direction and that I believe the same to be true and correct.

S. O Harper

Chief Engineer
Bureau of Reclamation

R-698

RECEIVED
JAN 28 1941
Department of Reclamation

Estimated years costs and benefits to the Wilder Irrigation District from the Anderson Ranch Reservoir.

Average acre amount due the Bureau of Reclamation on the present construction cost of the Boise Project January 1941	$54.00
Amount due on Arrowrock Refacing.	3.60
Total	$57.60

Assuming that Anderson Ranch Reservoir payments will start in four years and that the payments on the present construction will average $1.40 each year and on the Arrowrock resurfacing $0.18 - then

$1.40 + $0.18 X 4	$ 6.32
Balance due per acre in 1945.	$ 51.28
If Anderson Ranch Reservoir is built this can be figured as if it were spread over 40 years or per acre per year. .	$ 1.28

On the present estimated cost of $10,300,000 for the Anderson Ranch Dam, the Wilder District's share will be $1,567,515 reduced by the Secretary's sale of 11.2% of Anderson Water. This amount will be. . . $1,391,953.

If these charges are spread over 54,000 acres, the charge per acre will be . . . . . $ 25.78

If spread over 56,600 acres, the charge per acre will be . . . . . $ 24.59

Average construction cost using higher cost will be each year per acre. . . . . $ .64

Average payment (40 years) as above . . . . . $ 1.28

Total construction payment per acre (40 years) . . . $ 1.92

R-698

Estimated construction costs for 40 year period without Anderson Ranch are tabulated below:

	1941 to 1961	1961 to 1979	1979 to 1982
Present construct. Repayment	$ 1.40	$ 1.40	$ 0
Arrowrock Refacing	.18	00	0
Total estimate per acre yearly	$ 1.58	$ 1.40	0

Estimated construction costs for 40 year period if Anderson Ranch Reservoir is built, are tabulated below:

	1941 to 1945	1945 to 1955	1955 to 1961	1961 to 1978	1978 to 1985
Present construction	$1.40	1.45	1.45	1.45	0
Arrowrock Refacing	.18	.18	.18	.0	0
Anderson Ranch Reservoir	0	.29	.29	.47	1.92
Total estimated per acre yearly	$1.58	1.92	1.92	1.92	1.92

Estimate of Extra Water from Anderson Ranch Reservoir taken from Anderson Ranch Reservoir - report of June 5, 1940.

Table 3 of the report shows the following:

YEARS	Present Shortage Acre Feet	Remaining Shortage 382,000 a.f. Effective Capacity	Gain a.f.	Boise Project Gain 90%	Wilder Dist. Gain 33.71%	Gain per A.
1895 to 1939 Average	62,000	5,000	47,000	42,300	14,300	.26
1932 to 1939 Average	119,000	14,000	105,000	94,500	32,000	.59

In the Anderson Ranch Reservoir report a value of $5.00 per acre foot is used to arrive at the benefits. Using this value and taking the 45 year period of 1895 to 1939 the yearly benefits to the Wilder District will be . . . . . 14,000 X $5.00 = $ 70,000

If we take the period of 1923 to 1939, 17 years - the yearly benifits to the Wilder District will be 32,000 X $5.00 = $ 160,000

R-698

Estimated Operation and Maintenance Costs with Anderson Ranch Reservoir are as follows:

Bureau of Reclamation Costs at Dam yearly	$ 2,000
Extra Cost to Project due to longer irrigation season (Present time)	7,000
Total additional costs to Project	$ 9,000
Estimated costs per acre to Wilder District.	$ 0.05

R-698

Total irrigable area in T. 3 N., R. 1 W. 1579.83

There are excepted from the boundaries of the district and from the lands above described and the computation of irrigable areas therein all portions of the right of way of the Oregon Short Line (now Union Pacific) Railroad.

References to Main Canal, or Main South Side Canal, are to the so-called New York Canal, the main canal of the Boise Reclamation Project of the United States, in Ada County, Idaho.

R-698

NEW YORK IRRIGATION DISTRICT

-----:-----

Resolution

In Re Revised Description

of

District Boundaries and Irrigable Areas

-----:-----

The assistant secretary presented the following schedules prepared by him under the direction of the district's attorney:

Revised List of Lands Within the Boundaries of the New York Irrigation District -- July 1, 1941, containing:

1. A list of the lands within the boundaries of the said district, as originally declared by the Board of County Commissioners of Ada County, Idaho, on May 10, 1926, as shown by the said county commissioners' Minutes, Book M, page 65, and recorded in Book 10 of Miscellaneous at page 443 in the office of the recorder of said county.

2. A notation of all changes in said boundaries made by order of the board of directors of said district and confirmation decrees of the District Court of the Third Judicial District of the State of Idaho in and for Ada County.

3. Alternative and corrected descriptions to conform to the identifying designations shown on the public surveys and on recorded plats of subdivisions.

4. The gross area of the respective tracts of land.

5. The area of the respective tracts of land classified as irrigable, according to the determinations and official records of the said district.

After a careful examination of said list, the board unanimously adopted the following resolution:

R-698

BE IT RESOLVED BY THE BOARD OF DIRECTORS OF THE NEW YORK IRRIGATION DISTRICT, That the

Revised List of Lands within the Boundaries of the New York Irrigation District -- July 1, 1941,

heretofore prepared by order of the board and this day presented by the assistant secretary, be and the same is hereby approved as a revised and corrected description of all lands within the boundaries of the district and a correct statement of the areas therein now classified as irrigable on the records of the district and subject to the apportionment and assessments of benefits heretofore made under the Anderson Ranch Reservoir contract. All other areas within the district potentially irrigable are contingently assessable under said Anderson Ranch Reservoir contract under the following rule hereby adopted:

> Lands within the boundaries of the district not classified on said list as irrigable may upon request of the owners and approval of the board receive the benefits of the Anderson Ranch Reservoir contract, upon consenting to the apportionment of benefits under the said contract and paying or assuming the assessments thereunder upon the same acreage basis as lands now classified as irrigable.

R-698

NEW YORK IRRIGATION DISTRICT

STATE OF IDAHO,)
County of Ada.) ss.

I, W. J. ABBS, the duly appointed, qualified, and acting Assistant Secretary of the New York Irrigation District, do hereby certify that the attached

REVISED LIST OF LANDS
WITHIN THE BOUNDARIES OF THE NEW YORK IRRIGATION DISTRICT
July 1, 1941

contains:

1. A list of the lands within the boundaries of the said district, as originally declared by the Board of County Commissioners of Ada County, Idaho, on May 10, 1926, as shown by the said county commissioners' Minutes, Book M, page 65, and recorded in Book 10 of Miscellaneous at page 443 in the office of the recorder of said county.

2. A notation of all changes in said boundaries made by order of the board of directors of said district and confirmation decrees of the District Court of the Third Judicial District of the State of Idaho in and for Ada County.

3. Alternative and corrected descriptions to conform to the identifying designations shown on the public surveys and on recorded plats of subdivisions.

4. The gross area of the respective tracts of land.

5. The area of the respective tracts of land classified as irrigable, according to the determinations and official records of the said district.

I further certify that said list was presented to the board of directors of said district at its regular meeting on July 1, 1941, and was adopted and approved by said board as the official list of lands within the boundaries of said district, as shown by copy of resolution attached thereto, the same being a full, true, and correct copy of said resolution, as shown by the records of said

R-698

district (Book 8 of Minutes at page 89) in my custody.

WITNESS, My hand and the seal of said district, this 2nd day of July, 1941.

(SEAL)

W. J. ARBS

Assistant Secretary.

NOTICE OF PROOF APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10:00 A. M. on the 21st day of February, 1956, Bureau of Reclamation Office at Fairview (U. S. Highway 30) at Orchard Avenue, County of Ada, State of Idaho, before R. H. Harris, Notary Public, proof will be submitted of the application to beneficial use of 493.161 acre feet of the waters of Boise River, as stored at Anderson Ranch Reservoir in accordance with the terms and conditions of Permit No. R-698 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are United States of America, acting through the Regional Director, Region 1, Bureau of Reclamation, P. O. Box 937, Boise, Idaho.

The use to which said water has been applied is irrigation and power.

The amount applied to beneficial use is 493.161 acre-feet.

The place where said water is used, Twps. 1, 2, 3, 4, 5, N., Rge. 1 E., B. M. Twps. 2, 3, 4, N., Rge. 2 E. B. M. Twps. 2 and 3 N. Rge. 3 E. B. M. Twp. 1 S., Rge. 1 W., B. M. Twps. 1, 2, 3, 4, 5, N., Rge. 1 W., B. M. Twp. 1 S., Rge. 2 W., B. M. Twps. 1, 2, 3, 4, N., Rge. 2 W., B. M. Twps. 2, 3, 4, 5 N., Rge. 3 W., B. M. Twps. 2, 3, 4, 5 N., Rge. 4 W., B. M. Twps. 3, 4, 5, 6 N., Rge. 5 W., B. M. Twps. 4, 5, 6 N., Rge. 6 W., B. M. Also Twps. 21 and 22 S., Rge. 46 E., and Twp. 21 S., Rge. 47 E., Willamette Meridian.

The name of the canal or ditch or other works by which said water is conducted to such place of use is various canals and ditches participating in the Boise Federal Reclamation Project.

The right to take water from such works is based upon Permit No. R-698.

The source of supply from which such water is diverted is Anderson Ranch Reservoir.

The date of priority which said user is prepared to establish is December 9, 1940.

MARK R. KULP,
State Reclamation Engineer.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Copy

Approved by the Board of Directors of Pioneer Irrigation District Oct 6th 1941 Fred L Evans Secretary

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

BOISE PROJECT, IDAHO

Approved June 20th 1941 W.C. Mendenhall Acting Assistant Secretary of the Interior

Contract with Pioneer Irrigation District concerning construction of Anderson Ranch Reservoir and related matters

THIS AGREEMENT, Made this _____ day of _____, 194__, under the provisions of the Act of Congress of June 17, 1902 (32 Stat. 388) and acts amendatory thereof or supplementary thereto, and particularly the Act of August 4, 1939 (53 Stat. 1187), known as the Reclamation Project Act of 1939, together hereinafter referred to as the Federal Reclamation Law, between the UNITED STATES OF AMERICA, hereinafter referred to as the United States, acting for this purpose through the Secretary of the Interior, hereinafter referred to as the Secretary, and the PIONEER IRRIGATION DISTRICT, an irrigation district organized under the laws of the State of Idaho and located in Canyon and Ada Counties, Idaho, hereinafter referred to as the District;

WITNESSETH:

Explanatory Recitals

2. WHEREAS, under the authority of the Federal Reclamation Law, The United States constructed that certain irrigation project in the State of Idaho commonly known as the Boise Project, and also known as the Boise Reclamation Project; and

3. WHEREAS, the United States and the District entered into a Warren Act contract under date of February 27, 1913, under which the United States agreed to furnish for the use of the District a propor-

tionate part of the stored water available from Arrowrock Reservoir, and also agreed to construct a drainage system for the District, and the District agreed to pay the United States for the same on the terms and conditions more fully set out therein; and, whereas, amendatory contracts were made by the United States and the District under dates of June 15, 1915 and November 30, 1926, which said contract of February 27, 1913 as amended by said contracts of June 15, 1915 and November 30, 1926 are hereinafter referred to as the Government-District contract; and

4. WHEREAS, the water users within the District have suffered a shortage of water during certain irrigation seasons in the past and, in order to improve their water supply, desire the construction of additional storage capacity; and

5. WHEREAS, the Secretary has caused investigations to be made of a proposed reservoir on the South Fork of the Boise River at or near the Anderson Ranch site, of approximately Five Hundred Thousand (500,000) acre-feet capacity, hereinafter referred to as the Anderson Ranch Reservoir, and the District, together with the other irrigation districts of the Arrowrock Division of the Boise Project, has requested the construction thereof; and

6. WHEREAS, the total cost of the proposed Anderson Ranch Reservoir, of sufficient size to create a storage reservoir of approximately 500,000 acre-feet capacity, and appurtenant works including facilities for the generation of electrical power at Anderson Ranch Reservoir, and related flood control improvements at Arrowrock Reservoir, is estimated to be the sum of $13,100,000, of which $400,000 is the estimated cost of the

R-698

flood control improvements at Arrowrock Reservoir and $2,400,000 is the estimated cost of the power plant, and of which sum of $13,100,000 the proportionate allocation for the storage of water for irrigation is $4,650,000, the proportionate allocation for flood control is $5,050,000, and the proportionate allocation for the generation of electrical power (including the estimated cost of the power plant) is $3,400,000; and

7. WHEREAS, that portion of the actual cost of the Anderson Ranch Reservoir allocated to irrigation is the proportionate part of the Anderson Ranch Reservoir cost (exclusive of the cost of the power plant and of the Arrowrock flood control improvements) that $4,650,000 is of $10,300,000; and

8. WHEREAS, the District desires to enter into a contract with the United States for certain additional storage water to be made available by said Anderson Ranch Reservoir;

NOW, THEREFORE, In consideration of the mutual and dependent stipulations and covenants herein contained, it is hereby mutually agreed by and between the parties hereto as follows:

Works To Be Constructed

9. The United States, subject to article 37 and article 40 of this contract, will construct, on the South Fork of the Boise River at or near the Anderson Ranch site, a dam and reservoir (to be known as the Anderson Ranch Dam and Anderson Ranch Reservoir) designed to provide a storage capacity of approximately Five Hundred

Thousand (500,000) acre-feet, and, at its option, may enlarge the outlet gates at Arrowrock Dam with a view to providing improved flood control facilities, and may construct a power plant in connection with the said Anderson Ranch Dam.

General Repayment Obligation of the District

10. As its general repayment obligation under this contract, the District shall pay to the United States, in the installments hereinafter provided, the following amount:

Should the actual cost of the Anderson Ranch Reservoir (exclusive of the power plant and of Arrowrock flood control improvements) as determined and stated by the Secretary in the notice and statement provided for in Article 11 (a) hereof, be the same as the estimated cost of $10,300,000, the general repayment obligation of the District shall be $284,580.

Should the said actual cost exceed or be less than the said estimated cost, then the general repayment obligation of the District shall be that percentage of said actual cost which $284,580 is of said estimated cost of $10,300,000, as said actual cost is conclusively determined by the Secretary in accordance with the provisions of article 18 hereof, subject, however, to the limitation, that the maximum general repayment obligation of the District under this contract shall not exceed $313,038.

Terms of Payment of Construction Installments

11. (a) Whenever the construction of Anderson Ranch Reservoir is substantially completed, or is advanced to a point where storage water

R-698

in an amount exceeding 275,000 acre-feet becomes available for irrigation use from said storage reservoir, the Secretary shall so announce, and shall give to the District notice thereof, hereinafter referred to as the tentative construction cost notice. Said notice shall be given prior to September 1 of the year in which given and shall include a statement of the cost of the Anderson Ranch Reservoir, as then estimated, and of the District's general repayment obligation under Article 10 of this contract, based on said statement of cost. Said tentative construction cost notice shall govern the amount of repayment obligation installments until such time as the cost and the District's general repayment obligation based thereon can be determined by the Secretary, and the statement thereof submitted to the District in a final construction cost notice. Any difference between the District's general repayment obligation as stated in the tentative construction cost notice and said obligation as stated in the final construction cost notice shall be spread in such a manner as to maintain approximately equal overall annual payments as hereinafter provided for in this article, as increases or decreases as the case may be, in the installments on account of Anderson Ranch Reservoir coming due after said final construction cost notice has been given to the District.

The Secretary's determinations of cost and of the District's general repayment obligation in each of said notices shall be conclusive.

(b) At the time the Secretary gives to the District the tentative construction cost notice provided in (a) of this article, stating the District's general repayment obligation, the Secretary shall determine

R-698

the respective amounts of the first ten (10) successive annual installments of said obligation. The respective amounts of said first ten (10) installments shall be determined so that the annual installments, including the then estimate of those following the tenth, on account of Anderson Ranch Reservoir, when combined with the then unaccrued installments to be paid by the District for the repair, resurfacing, improvement and enlargement of Arrowrock Dam (hereinafter referred to as Arrowrock repairs), and the Secretary's then estimate of the probable annual construction installments to be paid by the District under the Government-District contract, form a combined, overall schedule of approximately equal annual installments throughout the forty (40) year repayment period within which the District's general repayment obligation under this contract shall be paid. In the year in which the tenth annual installment due from the District on account of Anderson Ranch Reservoir accrues, the Secretary shall determine the respective amounts of the remaining thirty (30) installments of the District's general repayment obligation under this contract in the same manner as provided above for the first ten installments, excepting that the determination in said tenth installment year shall be made upon consideration of the then unaccrued installments on account of Arrowrock repairs and the Secretary's then estimate of probable annual construction installments to be paid by the District under the Government-District contract. In no event, however, shall any annual installment to be paid by the District, on account of Anderson Ranch Reservoir be less than $3,000.

(c) The District agrees to pay the general repayment obligation, in the forty (40) successive annual installments, scheduled under (b) of this article; and there being no irrigation block designated by the Secretary and no development period fixed by him, the first installment shall become due and payable in the calendar year following immediately after the one in which the Secretary gives the tentative construction cost notice provided for in (a) of this article. Each year's installment on account of Anderson Ranch reservoir shall become due and payable from the District to the United States one-half on July 1 and one-half on December 31 of the year in question.

(d) Each year the installment of the District's general repayment obligation scheduled for such year shall be the construction charges due and payable by the District for such year, and the normal and percentage plan of payment shall not apply thereto unless such normal and percentage plan shall be hereafter adopted and provided for by supplemental contract, as authorized in Article 39 hereof.

District's Percentage of Stored Water from Anderson Ranch Reservoir

12. Subject to the holdover rights provided for in Article 16 hereof, and the allowance of similar holdover rights provided for by contracts with other contracting districts and companies entitled to receive stored water from Anderson Ranch reservoir, the United States, in the manner and subject to the conditions provided in this contract, will release for the use of the District each year (as ordered by the District as nearly as is reasonably practi-

R-698

cable six and twelve hundredths per cent (6.12%) of the stored water actually available from said reservoir that year for irrigation purposes, as determined by the Secretary.

Optional With Secretary to Measure and Deliver Anderson Storage Either at Outlets of Anderson Ranch Reservoir or at Outlets of Arrowrock Reservoir

13. At the option of the Secretary, the Anderson Ranch Reservoir stored water to which the District is entitled may be measured and delivered to or for the District either at the outlets of the Anderson Ranch Reservoir or at the outlets of the Arrowrock Reservoir.

Secretary Authorized to Determine the Administration of the Reservoirs and the Holding of Water Therein

14. In all matters not expressly covered by the provisions of this contract, the Secretary is authorized to determine the proper administration of the said Anderson Ranch Reservoir and Arrowrock Reservoir and the water supply therefrom, and his authority shall include but not be limited to the authority to determine the length of time and the extent to which the stored water belonging to either of said reservoirs may be held in the other without injury to the holders of rights to water therefrom.

All Rights in Reservoir of Equal Priority

15. It is agreed that all parties contracting with the United States for stored water for irrigation purposes from said Anderson Reservoir shall be entitled to proportionate rights to stored water available for irrigation purposes from said reservoir and that the rights of the District under this contract shall be in all respects on a par as to priority and dignity of rights with the rights of the other contracting parties, except as to holdover rights, which holdover rights shall be as provided for in Article 16 hereof.

R-698

Holdover Rights and Reservations For
Power and Flood Control and Temporary Holding
In One Reservoir of Water Belonging to Another

16. The rights provided for in this article will be referred to as the District's holdover rights. The District will be allowed to hold over in Anderson Ranch Reservoir from year to year stored water to which it may be entitled in any irrigation season but does not use during such season, and will be given credit therefor the following year or years subject to the following conditions and limitations:

(a) The District shall not be entitled to hold over to its credit in said reservoir at any one time more stored water than can be stored, subject to paragraph (g) of this article, in twelve and twenty-four hundredths per cent (12.24%) of the available storage capacity of the reservoir usable for irrigation; that is to say, twelve and twenty-four hundredths per cent (12.24%) of the capacity thereof other than that reserved for control of flash floods and that reserved for power.

(b) Whenever the combined amount of storage water in the Arrowrock Reservoir and the Anderson Ranch Reservoir reaches a point where there remains in the two reservoirs only 45,000 acre-feet unfilled capacity, and additional water shall be available for storage, then such additional storable water shall be considered stored in reservoir capacity made available therefor by reducing and eliminating holdover storage in the following manner: Water shall be considered released from holdover storage of the contracting party having on hand the largest amount of holdover storage water in per cent of its maximum holdover storage as fixed by (a) of this article until such per cent is reduced to that of

the party having on hand the next highest per cent, then from both parties' holdover storage, etc., until no party has holdover storage on hand. Any holdover right to and interest in water considered released under this paragraph shall be extinguished and terminated.

(c) It is fully agreed and understood that 75,000 acre-feet of the initial capacity in the Anderson Ranch Reservoir, and such water as can be stored therein, is reserved to the United States as dead storage and removable storage for power purposes, and that the removable part of the water stored in said 75,000 acre-feet of initial capacity may be held by the United States for release for power development purposes after the end of the irrigation season. Anderson Ranch Reservoir stored waters released for power production while Arrowrock Reservoir is not full, shall be considered stored in Arrowrock Reservoir, and in equal amounts may be subsequently replaced in Anderson Ranch Reservoir by storing therein waters storable in Arrowrock Reservoir, provided such replacement is effected prior to the next spill at Arrowrock Reservoir over the wasteway thereof.

(d) It is understood and agreed that a combined total of 45,000 acre-feet of empty storage space shall be kept available in the Anderson Ranch and Arrowrock Reservoirs for control of flash floods, except when used for control of such floods. Of water temporarily impounded in said 45,000 acre-feet capacity, when released, six and twelve hundredths per cent (6.12%) of it, or any part of said percentage, may be diverted for the use of the District if it so desires.

(e) It is further understood and agreed that for flood control purposes it is most desirable that the empty storage space should be maintained in Arrowrock Reservoir rather than in Anderson Ranch Reservoir,

and that the attempt will be made, so far as practicable, to keep the empty storage space in Arrowrock Reservoir so that it may be available to control floods from the largest possible watershed. With this purpose in view and for the purpose of making better use of the available water supply for power and irrigation purposes, storage water belonging to the Arrowrock Reservoir or the Deer Flat Reservoir may be held temporarily in the Anderson Ranch Reservoir, or vice versa, instead of holding the same in the reservoir in which it belongs on the basis of priority of right; but the temporary holding of such stored water in the Anderson Ranch Reservoir shall not in any way affect the rights of the several districts to the water in question, and such rights shall be considered to be the same as if said stored water were held at all times in the reservoir in which it properly belongs on the basis of priority of right. Storage water belonging in Arrowrock Reservoir or Deer Flat Reservoir but temporarily held in Anderson Ranch Reservoir will be turned down to the reservoir in which it belongs at or prior to the time that water available for storage in the Anderson Ranch Reservoir becomes available in sufficient quantity to fill the full storage capacity thereof other than the capacity thereof reserved exclusively for control of flash floods.

(f) For the purpose of a more prompt and accurate control of the water supply at canal headgates, and other beneficial purposes including but not limited to the carrying of peak loads at the power plant at the Anderson Ranch Reservoir, stored water belonging in Anderson Ranch Reservoir, or to the holders of rights in said water, and holdover storage or storage otherwise credited to the Anderson Ranch Reservoir, may likewise be held temporarily in unused space in Arrowrock Reservoir

R-698

without in any way impairing or affecting the rights of the parties entitled to such water; but such water shall not remain in Arrowrock Reservoir at any time when such use of Arrowrock capacity would injuriously affect the holders of Arrowrock storage rights in the benefit or enjoyment of such Arrowrock rights.

(g) In the filling of the available Anderson Ranch Reservoir capacity, except that reserved for power which will be filled first and except that amount of 45,000 acre-feet capacity reserved for control of flash floods, the reservoir management will endeavor so to handle the filling thereof that the same will serve both for the benefit of irrigation and for the benefit of flood control, and may for flood control purposes evacuate so much of its capacity as is deemed advisable with such releases to be first from holdover storage water on hand, in the same manner and with the same effect as provided in Article 16 (b).

(h) Holdover storage will be charged its pro rata share of evaporation and seepage losses.

General Obligation of the District

17. The District's obligation hereunder is a general repayment obligation under which the District as a whole is obligated to pay to the United States the full amount or amounts herein agreed upon according to the terms stated, notwithstanding any individual default in the payment to the District by any individual water user of any assessments, tolls, or other charges levied by the District; and while the District, so far as its powers under the laws of Idaho permit, may distribute said obligation among its landowners in a manner that takes into account the productivity of the various classes of lands of its landowners and the benefits accruing to said lands by reason of the construction

R-698

herein provided, no such distribution of said obligation shall in any manner be deemed to relieve the District, or any of its landowners, or any land therein, of the District's general obligations to the United States.

Computation of Cost

18. The cost of the Anderson Ranch Reservoir, which shall be the basis of determining the District's obligation as provided in Article 11 hereof, shall embrace all expenditures of whatsoever kind in connection with, growing out of, or resulting from the work described, including the cost of labor, material, equipment, investigations, engineering, legal work, superintendence, administration, overhead, rights of way, property, and damages of all kinds, and also including expenditures made for any of said above-mentioned purposes incurred prior to the date of this contract. The determination of what costs are properly chargeable hereunder, and the amount thereof, shall be conclusively made by the Secretary.

Cost of Operation and Maintenance to be Paid in Advance

19. For the year in which the first general repayment obligation instalment becomes due, as provided in Article 11 (c) above, and for each year thereafter, the District will pay to the United States in advance, in the manner hereinafter provided, its share of the operation and maintenance costs of Anderson Ranch Reservoir. Payment shall be made on the basis of annual estimates made by the Secretary. Such annual estimates, hereinafter referred to as the operation and maintenance charge notice, shall contain a statement of the estimated cost to be incurred during the calendar year covered by said notice for the

R-698

operation and maintenance of Anderson Ranch Reservoir, a statement of the part of said estimated costs allocated to the storage of water for irrigation, and the District's share thereof. The District's share shall be six and twelve hundredths per cent (6.12%) of the part of said estimated costs allocated by the Secretary to the storage of water for irrigation.

Such operation and maintenance charge notice shall be given to the District and to the Board of Control of the Arrowrock Division, Boise Project, on or before April 1 of the calendar year covered by said notice. The District agrees to pay its share of the estimated cost of operation and maintenance allocated to the storage of water for irrigation as set out in said notice on or before May 1 of the year in which said notice is given. Whenever in the opinion of the Secretary, funds so advanced will not be adequate to meet the District's share of costs of operating and maintaining Anderson Ranch Reservoir, he may give to the District and to the Board of Control a supplemental operation and maintenance charge notice stating therein the amount of the District's share, determined in the manner above provided, of the additional amount required for such operation and maintenance. The District shall pay its share of such additional amount, as set forth in said supplemental notice, on or before the due date fixed by the Secretary in said notice. If funds advanced by the District under this Article exceed the District's share of the actual cost and maintenance for the year for which advanced, as determined conclusively by the Secretary, the excess will be credited to operation and maintenance charges due from the district subsequent to the determination of such excess.

There shall be included in the operation and maintenance costs covered by the provisions of this Article an annual equitable charge, as determined by the Secretary, to cover general expenses and the cost of bookkeeping, accounting, clerical and legal work of the Bureau of Reclamation in connection with the accounts and collections for storage water from Anderson Ranch Reservoir.

Any expense incurred in running or protecting the Anderson Ranch Reservoir water in the channel of Boise River or the South Fork thereof or in diverting the same into the District's canals shall be considered a part of the cost of operation and maintenance of the Anderson Ranch Reservoir and charged accordingly in like manner as other operation and maintenance expenses in connection with said reservoir.

Water Rental Before Commencement of Construction Cost Repayment

20. Prior to the year in which the first general repayment obligation instalment provided for in Article 11 (c) accrues, storage water, if available, may be released for the use of the District only upon advance payment by the District to the United States of a charge per annum per acre-foot, or other charge, to be fixed by the Secretary each year and to be paid in advance of delivery of water. After the expiration of the water rental period, if any, any such charges collected and which the Secretary determines to be in excess of the cost of operation and maintenance, during the period, allocated by the Secretary to the District shall be credited to the general repayment obligation of the District under this contract in the manner determined by the Secretary.

R. 698

Release of Water in Case of Default

21. No water from the Anderson Ranch Reservoir shall be delivered to or for the District if the District shall be in arrears in the advance payment of the operation and maintenance charges provided for in Article 19 or in arrears in the payment of any other operation and maintenance charges due to the United States, or more than twelve (12) months in arrears in the payment, as required by the terms of this contract, of the general repayment obligation instalments provided for in Article 11 of this contract, or more than twelve months in arrears in the payment of any other construction charge instalments due to the United States. The District agrees that it will refuse to deliver water to lands or parties which are in arrears in the advance payment of operation and maintenance charges due from said lands or parties to the United States or to the District, or to lands or parties who are in arrears for more than twelve months in the payment of the amounts due from said lands or parties to the United States or to the District for the general repayment obligation instalments due from the District to the United States under this or any other contract. The provisions of this Article are not exclusive and shall not in any manner prevent the United States from exercising any other remedy given by this contract or by law to enforce the collection of any payments due under the terms of this contract.

Penalty for Delinquent Payments

22. In the event that any payment provided for in this contract is not made on or before the date that such payment is due and payable, there shall be added to the amount unpaid a penalty of one-half of one

R-698

per cent (1/2%) on the day following the due date, and there shall be added a like penalty of one-half on one per cent of said unpaid amount on the first day of each calendar month thereafter so long as such default shall continue.

Title to Reservoir in the United States

23. Pursuant to the provisions of section 6 of the Act of June 17, 1902 (32 Stat. 388), title to the Anderson Ranch Reservoir shall remain in the United States until otherwise provided by Congress.

Power Resources to Remain Perpetually in the United States

24. The rights and resources which may be used or useful for the development of power, and any plant or plants and appurtenant structures and facilities which may be now or hereafter constructed by or under the authority of the United States which may be used or useful for the development of hydroelectric power, are hereby reserved to and shall be and remain in the exclusive control, possession and ownership of the United States: Provided, That no costs, as determined by the Secretary and which are in his opinion, attributable solely to power development, shall be taken into account in determining the District's construction cost obligation under this contract. All revenues, including miscellaneous revenues from or incident to the establishment or use of power plants or appurtenant structures and facilities, and from the use, sale or other disposal of power in any form, shall be and remain the property of the United States and shall be disposed of as provided in the Interior Department Appropriation Act, 1939, (Act of May 9, 1938, 52 Stat. 291, 322).

Operation and Maintenance of Works by the United States

25. The works constructed by the United States under the provisions of Article 9 above will be operated and maintained by the United States as a part of the reserved works of the Arrowrock Division of the Boise Project in the same manner as that provided in the Government-District contract, but the District's share of the cost of operation and maintenance of said works shall be paid by the District as provided in Article 19 above.

Economical Use of Water

26. (a) It is understood and agreed that if Anderson Ranch Reservoir is to be effective in reducing water shortages in dry cycles, it is essential that the District take every reasonable measure to effect economical and efficient use of water by every water user within the District; and the District agrees to take such measures. It is further understood and agreed that whenever wasteful, inefficient or uneconomical use of water is being made by a water user within the District, the District with the advice and cooperation of the Bureau of Reclamation will take such action as may be necessary to correct such wasteful, inefficient, or uneconomic use of water.

(b) The District agrees to distribute storage water made available to the District under the provisions of this contract and to use the same only upon lands within the District, upon like terms and conditions as provided for the use and distribution of storage water made available to the District under the provisions of the Government-District Contract.

R-698

District to Use All Powers to Collect Charges

27. The District agrees it will cause to be levied and collected all necessary assessments, and will use all the powers and resources of the District, including the taxing power of the District, and the power to withhold delivery of water, to pay to the United States all charges provided in this contract in full on or before the day that the same become due.

Shortage of Water

28. On account of drought, inaccuracy of distribution, or other causes, it is expected there will occur at times a shortage in the quantity of storage water which normally can be made available from Anderson Ranch Reservoir, and in no event shall any liability accrue against the United States or any of its officers, agents, or employees for any damages, direct or indirect, arising from any such shortage; and the payments to the United States provided for herein shall not be reduced because of any such shortage or damage.

Losses in Running Stored Water to be Deducted

29. A pro rata share of such losses, if any, as may be incurred in running the Anderson Ranch Reservoir stored water from the reservoir to the head of the Phyllis Canal will be charged to the District.

Contract to be Authorized by Electors and Confirmed by Court

30. The District agrees that, upon the execution of this contract, it will proceed promptly to secure the authorization of this contract by the electors of said District, and will secure a decree of the proper

R-698

court of the State of Idaho approving and confirming this contract and decreeing and adjudging the same to be a lawful, valid and binding general obligation of the District, and decreeing the same to be lawful and valid, and promptly will apportion the benefits of this contract to the lands of the District and will secure a confirmation court decree confirming such apportionment as provided for in the Idaho statutes. The District shall furnish certified copies of such decrees to the Secretary. In the event that in the opinion of the Secretary satisfactory confirmatory decrees are not promptly secured as herein provided, the Secretary may terminate this contract.

Waste Water, Seepage, and Return Flow Water
Not Abandoned and Right Reserved to Recapture the Same

31. It is agreed and understood that the United States does not abandon or relinquish any of the waste, seepage or return flow water resulting from the use, application or conveyance of the said Anderson Ranch Reservoir water, but that the same is reserved and intended to be retained for the benefit of the Boise Project.

Assignment of Contract

32. No assignment or transfer of this contract, or any part hereof, or interest therein, shall be valid until approved by the Secretary. All rights for breach of this contract are reserved to The United States as provided in Section 3737 of the Revised Statutes of the United States.

Secretary the Arbiter -- Secretary's Acts, Decisions and Determinations Conclusive

33. In the event of disputes between the parties hereto arising out of this contract involving questions of fact, and in so far as the provisions hereof require a determination of fact to be made, the Secretary is hereby designated as the arbiter of such questions and as the one required to make such determination of facts; and his decision therein shall be conclusive and binding on the parties hereto. In all acts, matters and determinations provided in this contract to be done, determined or decided by the Secretary or by the United States, it is agreed that the acts, decisions, findings and determinations by the Secretary shall be final and conclusive and shall be accepted as final and conclusive by all the parties to this contract and by all persons claiming any rights under or by virtue of this contract or in any wise based upon or arising out of this contract or any act or proceeding carried on thereunder.

Changes in Organization of District

34. While this contract is in effect no change will be made in the District, either by inclusion or exclusion of lands, by partial or total consolidation or merger with another district, by proceedings to dissolve, or otherwise, except upon the Secretary's written assent thereto.

Rules and Regulations

35. The Secretary reserves the right, so far as the purport thereof may be consistent with the provisions of this contract, to make rules and regulations and to add to and modify them, as may be deemed proper and

necessary to carry out this contract and to supply necessary details of its administration, and, by suitable rules and regulations, to provide for the administration of the Anderson Ranch Reservoir and the water supply thereof as to any details of such administration not expressly covered by the terms of this contract; and the District agrees to observe such rules and regulations.

Representative of Secretary

36. It is agreed and understood that where this contract requires action by the Secretary, said action may be taken for and on behalf of the Secretary by his representative duly authorized in writing by the Secretary. Written notice of any such authority shall be mailed to the District within one week from the date of such authorization.

Obligation to Proceed Contingent Upon the Execution of Contracts in Form Satisfactory to the Secretary Covering the Full Amount Allocated to Irrigation

37. The obligation of the United States to proceed with the construction provided for under the provisions of Article 9 hereof is contingent upon the execution and confirmation of contracts in form satisfactory to the Secretary providing for the repayment to the United States of the full proportionate part of the cost of the Anderson Ranch Reservoir allocated to irrigation.

Substitution of Payette or Salmon River Water

38. It is agreed that in lieu of the water which the District is entitled to receive from the Boise River and its tributaries and the reservoirs thereon, or any part of such water, the United States, at the option of the Secretary, shall have the right to substitute an

R. 698

equal amount of water from the Payette River or the Salmon River, or in part from the Payette and in part from the Salmon, and in the event of such substitution the Secretary, upon the completion of the necessary tunnels and other works to such extent as may be necessary to convey such Payette River or Salmon River water to the Boise River immediately above the government diversion dam, for the Arrowrock Division of the Boise Project, will make, by appropriate credits, such readjustment, if any, in the charges against the District as he shall then find to be equitable in view of the changed conditions then applicable to the water supply furnished for the District, but such readjustment, if any, shall not increase the financial obligations of the District under this contract nor reduce the amount of water which the District is entitled to receive under this contract.

Rights to Include Obligations in Contract Under Reclamation Project Act of 1939

39. In the event that the District enters into an amendatory contract under the provisions of section 4 of the Reclamation Project Act of 1939 (53 Stat. 1187) for the purpose of securing the benefits of said section of said act, the right is reserved to the District to have included in such amendatory contract the construction charge obligations of the District under this contract, and in that event the then unaccrued portion of the charges for the costs incurred in the Arrowrock repairs shall be treated as part of the Arrowrock dam construction charges, as authorized by Act of April 22, 1940 (_____ Stat._____).

Contingent Upon Appropriation or Allotment of Funds

40. The expenditure of any money or the performance of any work by the United States herein provided for which may require appropriations of money by Congress or the allotment of funds, shall be contingent upon such appropriations or allotments being made. The failure of Congress so to appropriate funds, or the failure of an allotment of funds shall not relieve the District from any obligations under this contract and no liability shall accrue to the United States in case such funds are not so appropriated or allotted.

Officials Not to Benefit

41. No member of or delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom, but this restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

Former Contracts Remain in Effect

42. All provisions to the Government-District Contract, to the extent that they are not inconsistent with the terms and provisions of this contract, shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed the day and year first above written.

Filed May 4, 1943 in Office of Pioneer Irrigation District Caldwell, Ida.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

Denver, Colorado
October 26, 1942.

To: The Board of Directors of
Pioneer Irrigation District,
Caldwell, Idaho.

Gentlemen:

The following certificate is furnished in accordance with your request:

I do hereby certify that the estimated cost of Anderson Ranch Reservoir is as follows:

Right of Way, Clearing and Road Relocation	$1,200,000
Dam	6,500,000
Outlet	800,000
Spillway	1,800,000
Power Plant	2,400,000
Arrowrock Outlets	400,000
	$13,100,000

I do hereby certify that the surveys and examinations of the Anderson Ranch Reservoir, together with the estimated cost of construction thereof as above set forth, and the maps and plans of said dam and reservoir were made under the direction of the Chief Engineer, Bureau of Reclamation, Department of the Interior.

WALTER R. YOUNG
Acting Chief Engineer,
Bureau of Reclamation.

FILED
May 4, 1943
Fred L. Evans, Secretary
Pioneer Irrigation District

May 5, 1943

STATEMENT OF COSTS AND BENEFITS TO THE PIONEER IRRIGATION DISTRICT RESULTING FROM ANDERSON RANCH RESERVOIR

Records in the Watermaster's report for Water District 12-A covering diversions by the Phyllis Canal of the Pioneer Irrigation District are available beginning 1915 and up to the present time, a twenty-seven year period. These records show that during this twenty-seven year period Anderson Ranch Reservoir storage would have materially benefited the Pioneer Irrigation District for nineteen of these years. The total benefit in acre feet of water during this period would have amounted to 321,982 acre feet or an average benefit of 11,925 acre feet.

The engineers of the United States Bureau of Reclamation in considering Anderson Ranch storage as supplemental water for the Boise Project placed a value of $5.00 per acre foot upon this water. The same valuation would presumably be fair for the Pioneer Irrigation District. Upon this basis the benefits to the Pioneer Irrigation District for the twenty-seven year period, from 1915 to 1942 inclusive, would have amounted to $1,609,910.00 or an average annual benefit of $59,625.00.

The cost to the Pioneer Irrigation District for Anderson Ranch storage allowing a 10% increase, permissable under the contract, will total $313,038.00 and, as provided for under the terms of the contract, distributed over a 40-year period in equal annual payments without interest the average annual cost to the District will amount to $7,826.00.

In other words, on the above basis the benefits will be nearly eight times the cost.

During the short-water years the Phyllis Canal of the Pioneer Irrigation District is quite often dry and the lands under it entirely out of water during an important part of the growing season, especially the late summer months. The following tabulation shows the number of days the Phyllis Canal was out of water prior to September 30th during some of these short-water years:

1920	10 Days	1935	37 Days
1924	38 Days	1936	18 Days
1926	56 Days	1937	44 Days
1929	23 Days	1939	38 Days
1931	67 Days	1940	32 Days
1933	26 Days	1942	14 Days
1934	61 Days		

Anderson Ranch storage will greatly alleviate this condition.

Dairying, which has increased tremendously during the past 20 years, is now the major industry of the Boise Valley. Green pastures throughout the growing season are an important part of this industry and require a full water supply all through the late summer months.

During the past several years there has been a decided trend towards row-crop farming in the Boise Valley including especially onions, lettuce, celery, potatoes, sugar beets, and vegetable seeds. As an illustration, of the total amount of sweet hybrid seed corn grown in the United States last year, 41% was grown in Canyon County alone. The growing of these crops is proving to be quite profitable. The lands in the Pioneer Irrigation District, and especially under the Phyllis Canal, are well suited for the growing of these crops but due to the uncertainity of the water supply the farmers of this District have not been able to raise these row-crops as extensively as they have in other districts throughout the Valley. In other words, during the past 27-year period there has been an intangible loss to the farmers of this District, difficult to measure in dollars and cents but never-the-less very extensive, due to the fact that they have been forced to grow such crops as can be matured with a limited water supply rather than the crops which are generally more profitable but which require a full water supply throughout the entire growing season. This intangible loss, in my opinion, places upon Anderson Ranch storage water a far greater value than the $5.00 per acre foot estimate by the engineers of the United States Bureau of Reclamation.

The foregoing tabulations relative to water supply and water diversions were taken from the reports of the Watermaster of this office. The observations expressed herein are based upon 18 years of experience as Watermaster of Water District 12-A (Boise River).

W. E. WELSH, Watermaster
Water District 12-A

CALDWELL, IDAHO May 4, 1943

The Board of Directors met this day in regular session, all members, Oscar Baum, President, C. W. Shryack and Monroe W. Dille, Directors, and Fred L. Evans, Secretary, being present.

* * * * * * * *

The following resolution was presented and unanimously adopted:

"WHEREAS, in accordance with the request of this Board on October 6, 1942, R. J. Newell, a competent irrigation engineer, Boise, Idaho, has made surveys, examinations, maps and plans of the Anderson Ranch Reservoir and signed and certified the same and submitted them to this Board, and also in lieu of S. O. Harper, chief engineer of the Bureau of Reclamation filing with this Board the estimates of the cost of construction of the Anderson Ranch reservoir, Walter R. Young, acting chief engineer of the Bureau of Reclamation, a well known and competent irrigation engineer, has filed with this Board said estimates of the cost and construction of the Anderson Ranch reservoir, $13,100,000.00, the same being the estimated cost as provided in said contract between the United States of America and the Pioneer Irrigation District concerning the construction of Anderson Ranch reservoir approved by the Secretary of the Interior June 20, 1941, and by this Board October 6, 1942;

"BE IT THEREFORE RESOLVED:

"1. That the said surveys, examinations, maps and plans prepared by R. J. Newell be, and the same are, hereby accepted and ordered filed.

R-698

"2. That the said estimated cost of the construction of the Anderson Ranch reservoir prepared by Walter H. Young, acting chief engineer, Bureau of Reclamation, be accepted in lieu of S. O. Harper's estimates, and the same is hereby ordered filed.

"BE IT FURTHER RESOLVED That in addition to the request in said resolution of this Board passed at its meeting of October 6, 1942, the Board requests that John Turner, Superintendent of Pioneer Irrigation District, and William E. Welsh, Watermaster of the Boise River, make studies, maps and reports estimating the annual benefits to the lands within the Pioneer Irrigation District, growing out of the purchase of the supplemental water supply in the Anderson Ranch reservoir, as provided in said contract approved by the Secretary of the Interior on the 20th day of June, 1941, and approved and ordered filed by this Board October 6, 1942, together with the estimated annual cost thereof covering a series of years, and to sign and certify said studies, maps and reports and submit the same to this Board at its next meeting on June 1st."

CALDWELL, IDAHO

Filed June 1, 1943
In office of Board of
Directors Pioneer Irrigation
District. Caldwell Idaho
Chas. E. Evans

May 29, 1943

To the Board of Directors of
Pioneer Irrigation District:

In compliance with your request as stated in your minutes of May 4, 1942, I have made the following study with reference to the annual costs and benefits over a series of years from the purchase of the supplemental water supply from Anderson Ranch Reservoir. The following study is an estimate of the annual benefits and cost to the lands within Pioneer Irrigation District, growing out of the purchase of the supplemental water supply, year by year for the past twelve years.

The following data as to the benefits of Anderson Ranch Storage space allocated Pioneer Irrigation District is based upon the amount of space, 6.12% or 23,256 acre feet. The value of this supplemental water, which is needed greatly some years in July, August and September, is estimated by the Bureau of Reclamation to be worth $5.00 per acre foot. The value to the lands under the Phyllis Canal will be as follows:

Year	Amt. used in acre feet	Amt. needed in acre feet	Shortage in acre feet	Sup. by Anderson Ranch Dam in acre feet	Benefit per Acre
1931	65,170	110,000	44,830	23,256	$4.65
1932	111,016	"	None		
1933	110,312	"	None		
1934	85,148	"	24,852	23,256	4.65
1935	97,746	"	12,254	12,254	2.45
1936	100,138	"	9,862	9,862	1.97
1937	83,308	"	26,692	23,256	4.65
1938	111,026	"	None		
1939	98,038		11,962	11,962	2,39
1940	92,608	"	17,392	17,392	3.47
1941	104,914	"	5,086	5,086	1.01
1942	93,000	"	17,000	17,000	3.40
12 Year Total			169,930	143.324	28.64

The maximum cost to the District under the present contract is twenty-three cents per acre over a forty year period, which would leave the benefits as against the cost as follows:

(Benefits estimated value per acre feet over 12 years)

Cost per Acre	$5.00 acre feet	$2.50 acre feet	$1.25 acre feet
$0.23	2.38 per acre	1.19 acre	.59 acre

R-698

June 1, 1943

The Board of Directors of Pioneer Irrigation District met this day in regular session, all members being present, namely: J. O. Baum, Monroe Dille, and C. W. Shryack. The minutes of the meeting of May 4, 1943, were read and approved.

The following resolution was presented and unanimously adopted:

"WHEREAS, R. J. Newell's surveys, examinations, maps and plans of Anderson Ranch Reservoir was accepted and filed by this Board on the 4th day of May, 1943, and the estimated cost of the construction of said reservoir, as certified to by Walter R. Young, acting chief engineer of the Bureau of Reclamation, was accepted and filed with this Board on May 4, 1943; and

"WHEREAS, as requested by resolution of this Board dated May 4, 1943, there has been presented, accepted and filed the following:

Study and charts prepared and certified to by Wm. E. Welsh, Watermaster of Boise River.

Study prepared by John Turner, Superintendent of Pioneer Irrigation District.

"and WHEREAS, it appears from said studies, maps, and reports, together with other matters considered by this Board, that the annual benefits to the lands within Pioneer Irrigation District through the adoption and operation of the following general plan in acquiring a supplemental water supply for Pioneer Irrigation District will greatly exceed the annual cost thereof and that such plan is feasible and practicable;

"NOW, THEREFORE, be it resolved by the Board of Directors of Pioneer Irrigation District, that the following shall constitute a general plan for acquiring a supplemental water supply for the lands within Pioneer Irrigation District:

Received and filed for record in the State Department of Reclamation at 11:00 A.M. June 2, 1943

JAMES SPOFFORD
State Reclamation Engineer
By [signature]
Supervisor of Water Distribution

R-698

"1. It is proposed that the said District enter into the contract between United States and Pioneer Irrigation District approved by the Secretary of the Interior June 20, 1941 and by this Board on October 6, 1942, to purchase the right to store water available in 6.12 percent of the storage capacity of Anderson Ranch reservoir each year allocated to irrigation purposes, in accordance with the terms and conditions of that certain contract between the United States and Pioneer Irrigation District concerning the construction of Anderson Ranch Reservoir and related matters, approved by the Secretary of the Interior on June 20, 1941 and approved and ordered filed by this Board on October 6, 1942, the cost not to exceed $313,038.00, and that said contract on file in this office is hereby referred to and by reference made a part of this resolution and said general plan.

"2. It is proposed by Pioneer Irrigation District to raise the funds necessary to carry out this general plan by annual assessments to be levied against the lands in Pioneer Irrigation District, as provided by law.

"IT IS FURTHER RESOLVED, That Fred L. Evans, Secretary of this District, be, and he is, hereby authorized and directed to certify to and submit such certified copies to the Department of Reclamation, State Capitol, Boise, Idaho, to-wit:

(a) Certified copy of the minutes of the Board of Directors of Pioneer Irrigation District of October 6, 1942, attached to which is copy of contract between the United States and Pioneer Irrigation District approved by the Secretary of the Interior on June 20, 1941 and by this Board on October 6, 1942.

(b) Certified copy of the minutes of the Board of Directors of May 4, 1943, attached to which is estimated cost of the construction of Anderson Ranch Reservoir, as certified by Walter T. Young, Assistant chief engineer of the Reclamation service.

R-647

(c) Certified copies of the surveys, examinations, maps and plans, designated on two maps, certified to by Engineer R. J. Newell.

(d) Certified copy of the minutes of the Board of Pioneer Irrigation District of June 1, 1943, included in which is the resolution containing the general plan for acquiring the supplemental water supply for the lands within this District, in which general plan and resolution there is included the contract between the United States and Pioneer Irrigation District, attached to which is copy of the studies, maps, and reports of William E. Welsh and John Turner.

WHEREUPON, The Board adjourned, to meet the 6th day of July, 1943.

J. O. Baum
President

ATTEST:

Fred L. Evans
Secretary

R-697

August 5, , 1943

To the Board of Directors
Pioneer Irrigation District
Caldwell, Idaho

Gentlemen:

We beg to acknowledge receipt of certified copies of the following, to-wit:

1. Copy of the minutes of the Board of Directors of Pioneer Irrigation District of October 6, 1942, attached to which is a copy of the proposed contract between the United States of America and Pioneer Irrigation District approved by the Secretary of the Interior on June 20, 1941, and by your Board on October 6, 1942.

2. Certified copy of the minutes of the Board of Directors of Pioneer Irrigation District of May 4, 1943, attached to which is an estimated cost of the construction of Anderson Ranch reservoir, as certified by Walter R. Young, acting Chief Engineer of the Reclamation Service of the United States.

3. Certified copies of the surveys, examinations, maps and plans designated by two maps certified to by Engineer R. J. Newell and filed in your office on May 4, 1943.

4. Certified copy of the minutes of the Board of Directors of Pioneer Irrigation District for June 1, 1943, included in which minutes is the resolution containing the general plan for acquiring the supplemental water supply for the lands within the Pioneer Irrigation District, in which general plan and resolution there is included the contract between the United States of America and Pioneer Irrigation District approved by the Secretary of the Interior on the 20th day of June, 1941, and by your Board on the 6th day of October, 1942, together with a copy of studies, a map and report, of Wm. E. Welsh, Watermaster of Boise River, and John Turner, Superintendent of your District.

I find that the application for the right to appropriate and store the water in said Anderson Ranch Reservoir, located on the South fork of the Boise River, has been approved by this Department on February 25, 1941, and that Permit No. R-698 has been issued; and included in the list of lands to be irrigated from said storage water in Anderson Ranch Reservoir, are the lands within Pioneer Irrigation District.

One map, certified to by R. J. Newell, shows a cross-section of the proposed Anderson Ranch Dam, and the contour within the Reservoir site, as well as a table of capacities and various contour elevations, has been checked and is hereby approved.

The estimate of annual costs and benefits to the lands within Pioneer Irrigation District has been carefully worked out.

Upon examination of all the matters presented, I find that the said general plan is feasible and practicable; that the benefits accruing to the lands within the District in acquiring the right to the storage water, as provided in said contract, will greatly exceed the cost thereof, and I therefore approve the same.

Very truly yours,

JAMES S POFFORD
State Reclamation Engineer

RECEIVED JUN 24 1992

Total number of acres to be irrigated 277,000

9. Describe any other water rights used for the same purpose as described above Decrees, Licenses, Permits, and beneficial use claims held for the Boise Federal Reclamation Project.

10. To your knowledge, has any portion of this water right undergone a period of five or more consecutive years of nonuse? No If yes, describe in item D, REMARKS.

B DESCRIPTION OF PORTION OF RIGHT OWNED BY APPLICANT (If the entire right is owned by the applica omit part B).

1. Amount of water: a. _____ cubic feet per second
&/or
b. _____ acre feet per annum

2. Point of diversion _____ ¼ _____ ¼, Section _____ Township _____

Range _____, B.M., _____ County

Additional points _____

3. Place of use:

TWP.	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	

Total number of acres to be irrigated _____

C. DESCRIPTION OF RIGHT OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. General Information

a. Amount of water to be diverted _____ c.f.s. &/or 5200 acre feet

b. Description of diverting works Storage water to be released from Anderson Ranch Reservoir through the outlet works and power penstocks.

c. Describe the reasons for the proposed changes 5200 acre-feet of water to be changed from joint irrigation and power to joint municipal-industrial and power use.

2. Change in point of diversion

Point of diversion No change ¼ _____ ¼, Section _____ Township _____

Range _____, B.M., _____ County

Additional points Secondary diversions from the Boise River chanel may be from additional locations downstream from the Boise River Diversion Dam.

3. Change in place of use

a. Are there leins, mortgages, or contracts on the lands from which you propose to transfer the water right which limit your authority to make the proposed change? Yes _____ No X If yes, provide a statement agreeing to the proposed change from the holder of the lien, mortgage or contract.

b. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer None - not with standing the uses listed in license No. R698, 5200 acre-feet of storage has been reserved exclusively for power head from the inception of the project. There will be no change in the quantity available for irrigation.

JUN 24 1992

c. Describe the lands · ace of use to which the right will be t ferred:

TWP.	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	

No change. The place of proposed Municipal Industrial use is included in the area listed in item 8.

Total number of acres to be irrigated 277,000

4. Describe any other water rights used for the same purpose as described above. Water Rights of the Boise Water Corporation, city of Boise, and various other water users.

5. Draw a map indicating the new point(s) of diversion and/or the new land to be irrigated. Show clearly the land involved by section, township and range number.

No Change

SCALE. 2 inches equal 1 mile. Draw plan in ink.

D. REMARKS

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

I understand that any willfull misrepresentations made in this application may result in voiding its approval.

STATE OF IDAHO

DEPARTMENT OF WATER RESOURCES

Application For Transfer of Water Right
Supplemental Information for
CHANGE IN NATURE OF USE

1. Fully complete Form 222. Type or print in ink "CHANGE IN NATURE OF USE" at the top of page 1. If no change in point of diversion or place of use is desired, so note under items C.2 and/or C.3 C.

2. Describe fully the new use to which the water is intended to be applied:

a. Nature of use: Joint Power and Municipal Industrial use. Municipal-Industrial uses will be by various secondary diversions from the Boise River Chanel downstream from Boise River Diversion Dam.

b. Rate of flow: Not to exceed 100 cfs

c. Hours per day and days per year that the flow will be diverted: Various irregular schedule

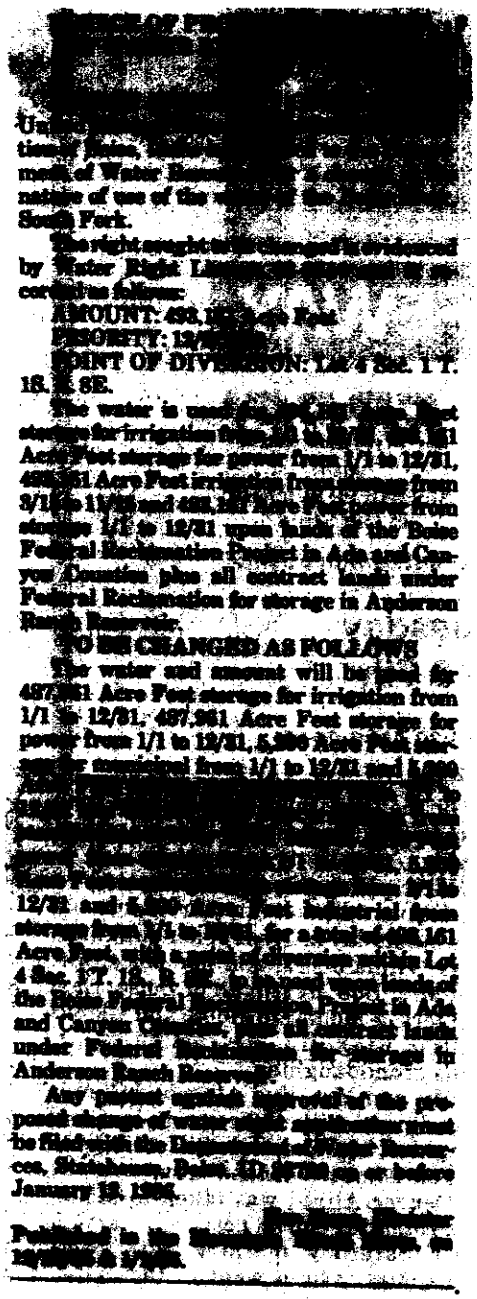

d. Season of use: Year-round

e. Return flows from the use: (quantity and quality of return flows, and location of discharge):

Returns are estimated at 60% of diversions. Quality of point source returns would be regulated by munical waste discharge permits. Non point discharge quantities would be minor and generally located downstream of Boise.

3. Describe positive and negative effects on other waterusers predicted to result from the proposed change in nature of use. There are no known negative effects. The change will help meet the increasing demands for municipal-industrial water supplies in the Boise Valley. The change will also provide a surface water source for the existing surface water component of diversions by the Boise water corporation through their existing Ranney collectors.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT NO. 63-3614

Notice is hereby given that the United States of America, Bureau of Reclamation of Boise, Idaho has applied to the Department of Water Resources for a change in the nature of use of the water of the Boise River, South Fork.

The right sought to be changed is evidenced by Water Right License 63-3614 and is recorded as follows:

AMOUNT:
493,161 Acre Feet

PRIORITY:
12/9/1940

POINT OF DIVERSION:
Lot 4 Sec. 1 T. 1S. R. 8E.

The water is used for 493,161 Acre Feet storage for irrigation from 1/1 to 12/31, 493,161 Acre Feet storage for power from 1/1 to 12/31, 493,161 Acre Feet irrigation from storage from 3/15 to 11/15 and 493,161 Acre Feet power from storage 1/1 to 12/31 upon lands of the Boise Federal Reclamation Project in Ada and Canyon Counties plus all contract lands under Federal Reclamation for storage in Anderson Ranch Reservoir.

TO BE CHANGED AS FOLLOWS:

The water and amount will be used for 487,961 Acre Feet storage for irrigation from 1/1 to 12/31, 487,961 Acre Feet storage for power from 1/1 to 12/31, 5,200 Acre Feet storage for municipal from 1/1 to 12/31 and 5,200 Acre Feet storage for industrial from 1/1 to 12/31 and 487,961 Acre Feet irrigation from storage from 3/15 to 11/15, 487,961 Acre Feet power from storage from 1/1 to 12/31, 5,200 Acre Feet municipal from storage from 1/1 to 12/31 and 5,200 Acre Feet industrial from storage from 1/1 to 12/31, for a total of 493,161 Acre Feet, with a point of diversion within Lot 4, Sec. 1 T. 1S., R. 8E., to be used upon lands of the Boise Federal Reclamation Project in Ada and Canyon Counties, plus all contract lands under Federal Reclamation for storage in Anderson Ranch Reservoir.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Statehouse, Boise, ID 83702 on or before January 13, 1986.

DEPARTMENT OF RECLAMATION.

NOTICE OF APPLICATION TO APPROPRIATE WATER IN ACCORDANCE WITH THE PROVISIONS OF CHAPTER 145, 1935 SESSION LAWS.

NOTICE IS HEREBY GIVEN, That on the 9th day of December, 1940, THE UNITED STATES OF AMERICA, acting through R. J. Newell, U. S. Bureau of Reclamation, made application No. R-26522, to construct a reservoir and store and appropriate 500,000 acre feet per annum of waters of the South Fork of the Boise River, a tributary of the Snake River, for irrigation and power.

That the point of outlet is located N. 790, W. 2070 feet distant from the Southwest corner of Section 6, Township 1 South, Range 9 East B. M., and is in Lot 4 of Section 1, Township 1 South, Range 8 East B. M. Elmore County.

That the lands proposed to be irrigated by use of said water consist of 275,766 acres, described as follows:

Township 1 N., Range 1 E., B. M.
N½NE¼, SE¼NE¼, Section 5; N½NE¼, E½NW¼, Section 6.

Township 2 N., Range 1 E., B. M.
All of Sections 1, 2, 4, 5, 6, 7, 9, 18, 19, 20, 29, 30, 31, 32.
All of Section 3 except S½SE¼, All of 8 Except SE¼SE¼.
SW¼NE¼, NW¼, SW¼, W½SE¼, SE¼SE¼ of Section 10.
NE¼NE¼, NE¼NW¼ of Section 11; N½NE¼, N½NW¼ Section 12
N½NE¼, SW¼NE¼, NW¼, NW¼SW¼ Section 15
NE¼, E½NW¼, NE¼SW¼, S½SW¼, W½SE¼, NE¼SE¼ Section 16.
W½NE¼, NW¼, SW¼, SE¼ Section 17; NW¼NE¼, NW¼, SW¼ Section 21.
NW¼, SW¼, W½SE¼, SE¼SE¼ Section 28; NE¼, NW¼, SW¼, W½SE¼, NE¼SE¼ S 33.
SW¼NW¼, SW¼ Section 34.

Township 3 N., Range 1 E., B. M.
All of Sections 1, 2, 3, 5, 6, 8, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 26, 27, 28, 29, 30, 32, 33, 34, & 35.
N½ of Section 4; NE¼, N½NW¼, SW¼NW¼, S½SW¼, SE¼ Section 7.
S½ of Section 9; NE¼, NW¼, N½SW¼, SW¼SW¼, W½SE¼, NE¼SE¼ Section 25.
NE¼, N½NW¼, SW¼SW¼, E½SW¼, SE¼ Section 31; W½NW¼, SW¼, SW¼SE¼ Sec 36.

Township 4 N., Range 1 E., B. M.
All of Sections 4, 5, 6, 7, 8, 9, 27, 28, 29, 30, 32, 33, & 35, 31, 34.
N½NW¼, SW¼NW¼ Section 3; S½NE¼, NW¼NW¼, S½NW¼, SW¼, W½SE¼, NE¼SE¼, 10.
E½SE¼ Section 13; E½NE¼ Section 14; W½NE¼, N½NW¼ Section 15.
NE¼NE¼, NW¼ Section 16; N½NE¼, SE¼NE¼, N½NW¼ Section 17.
N½NE¼ Section 18; All of Section 19 except the N½N½.
SW¼, W½SE¼, SE¼SE¼ Section 20; S½SW¼, SW¼SE¼ Section 21; S½NW¼, S½ SEC. 26;
W½SW¼, SE¼SW¼, SW¼SE¼ Section 25; all of 36 except NE¼NE¼.

Township 5 N., Range 1 E., B. M.
W½NW¼, SE¼NW¼, SW¼, SW¼SE¼, E½SE¼ Section 31.
W½SW¼, SE¼SW¼, SW¼SE¼ Section 32; SE¼SW¼, SW¼SE¼ Section 33.
SE¼SW¼ Section 34.

Township 2 N., Range 2 E., B. M.
SW¼NW¼, W½SW¼ Section 6; NW¼NW¼ Section 7.

APPLICATION FOR PERMIT

To Construct a Reservoir and Store and Appropriate
The Public Waters of the State of Idaho

Application No. R 26522
Permit No. R 698

1. Name of Applicant: UNITED STATES OF AMERICA, acting through R. J. Newell, U. S. Bureau of Reclamation, Boise, Idaho

Postoffice address: Boise County Ada State Idaho

I. If applicant is a corporation, give: The applicant is the United States Government, acting under provision of the Act of of Congress of June 17, 1902 (32 Stat. 388) known as the Reclamation Act and Acts of
(a) Date and place of incorporation Congress supplementary (b) Amount of Capital Stock: $ thereto and amendatory thereof.
(c) Amount paid in: $ (d) Names and addresses of directors:

applicant
II. The financial resources of the ~~corporation~~ are:

(a) Cash on hand: $ (b) Treasury Stock: $
(c) Bonds to be issued: $ (d) Other resources: Receipts in the Reclamation Fund from the sale of public lands, mineral leases, etc., and other appropriations made by Congress.

2. Quantity of water to be stored: 500,000 acre feet per annum. ~~acre feet per annum.~~
3. Source of water supply is South Fork Boise (~~Creek~~) (River) (~~Spring~~), a tributary of Snake River.
4. The outlet of the proposed reservoir is located N790,W2070 (bearing) feet, distant from the SW corner of Section 6, Township 1 S, Range 9 E, B. M. and is in the Lot 4 ¼ of ~~¼ of~~ Section 1, Township 1 S, Range 8 E, B. M. County of Elmore
5. Fill out either (a) or (b).
(a) The reservoir is located in the channel of South Fork Boise (~~Creek~~) (River).
(b) The reservoir is to be filled through a feeder canal, the point of diversion for which is located feet distant from the (bearing) corner of Section, Township, Range, B. M., and is in the ¼ of ¼ of Section, Township, Range, B. M.; width at bottom feet, width at top feet, depth of water feet; average grade per mile feet; Capacity cubic feet per second.
6. (a) The area of the high water line of the reservoir is 4600 acres.
(b) The reservoir capacity is 500,000 acre feet.
7. Height of reservoir dam 400 feet, length at top 1400 feet, length at bottom 150 feet, size of outlet 2-96" valves ~~feet~~ by feet. The dam is to be constructed of materials as follows: Earthfill, rock blanket

(If height will exceed 10 feet, plans must be approved by Department of Reclamation, before beginning construction.)

8. (a) Will water stored in reservoir be diverted to canal or acqueduct, thence to land to be irrigated without commingling with natural flow of South Fork Boise (~~Creek~~) (River) ? No
(b) Water stored in reservoir will be carried in the channel of Boise (~~Creek~~) (River,) a distance of 50 miles to point of diversion located as constructed present Boise River Diversion Dam (bearing) feet, distant from the Lot 9 ~~corner~~ of Section 3, Township 2 N, Range 3 E, B. M., and in the ¼ of ¼ of Section, Township, Range B. M.
9. Amount of water claimed from (Creek) (River) (Spring) in addition to that stored in reservoir cubic feet per second.
10. Water is to be used for irrigation and power purposes.
11. If for mining, milling, power or manufacturing purposes give:
(a) Point of use of water N790,W2070 (bearing) feet, distant from SW Corner of Section 6, Township 1 S, Range 9 E B. M. and is in the Lot 4 ~~¼ of~~ ¼ of Section 1, Township 1 S, Range 8 E, B. M.
(b) Amount of power generated: 20,000KW H.P., under 324 feet head.
(c) Water is to be returned to South Fork Boise (~~Creek~~) (River) (~~Spring~~) at a point N790,W2120 (bearing) feet distant from the SW Lot 4 corner of Section 6, Township 1 S, Range 9 E, B. M., in the ~~¼ of~~ ¼ of Section 1, Township 1 S, Range 8 E B. M.
12. Water stored in accordance with this Permit will be carried to place of use through a canal heretofore constructed under the terms of Permit No. , which is hereby referred to and made a part hereof.

R- 698

13. Kind of diversion works: rubble concrete weir dam (Dam, canal, flume, pipe, etc.)

14. Height of diversion dam: 52 feet, length at top 500 feet, length at bottom 400 feet. The dam is constructed of materials as follows: rubble concrete

(If height will exceed 10 feet, plans must be approved by Department of Reclamation, before beginning construction.)

15. Size of headgate: Width 8-5'X6' gates feet, Height feet.

16. Diversion Canal: Width at bottom 40 feet, width at water line 67 feet, depth of water 9 feet, Dimensions of Flume Diameter of Pipe inches; Length of Conduit miles. Average grade per mile feet.

17. Estimated cost of Works: Storage Works: $ 10.300,000. Diversion Works: $ constructed.

18. Time required for completion of work ten (10) years.

19. Time required for complete application of water to proposed beneficial use is fifteen years from the date of the appr of this application.

This comes under the proviso in Section 41-204, I.C.A., applicable to reservoirs of more than 200,000 acre-feet capacity. A suitable showin comply with said proviso will be made.

20. The land to be irrigated is described in the following tabulation: Lands of the Boise Federal Irrigation project, a more detailed descrption of which will be furnished as soon as it is known which districts will subscribe for the Anderson Ranch Reservoir.

(Give Irrigable acreage in each 40-acre subdivision.)

Total Number of Acres to be Irrigated 275,766

Remarks:

BE IT KNOWN That the undersigned hereby makes application for permit to construct a reservoir and store and appropriate the public waters of Idaho as herein set forth, and that the enclosed map is hereby made a part of this application.

United States of America
Applicant.

By R. J. Newell, Construction Engineer of U. S. Bureau of Reclamation, Boise, Idaho.
Agent.

Date of first receipt at office of Commissioner of Reclamation 3:40 P. M., Dec. 9, 1940

Returned to applicant for correction

Corrected application received

APPROVAL OF COMMISSIONER OF RECLAMATION

The number of this permit is R 698

Recorded in book R 3, page R698 Approved February 25, 1941

This is to certify that I have examined the within application for a permit to construct a reservoir and store and appropriate the public waters of the State of Idaho, and hereby approve the same, subject to the following limitations and conditions:

Bond in the sum of $ 1,000.00, to be filed on or before April 26, 1941.

Work to begin on or before and to continue diligently and uninterruptedly to completion, unless temporarily interrupted by circumstances over which the permit holder has no control.

One fifth of the work above specified to be completed on or before February 25, 1946

The whole of said work to be completed on or before February 25, 1951.

Beneficial use of water stored in accordance herewith, to be made on or before February 25, 1956.

Witness my hand this 25th day of February, 19 41.

E.V. BERG.
Commissioner of Reclamation.

AFFIDAVIT OF R. J. NEWELL

STATE OF IDAHO)
) ss.
COUNTY OF ADA)

R. H. Newell, being first duly sworn, deposes and says:

That he is an irrigation engineer and has been employed in irrigation engineering work by the United States Bureau of Reclamation for more than 16 years last past. That he is now employed by the United States as the engineer in charge of the Boise Reclamation project, which includes the proposed Anderson Ranch Reservoir.

That affiant is familiar with the work involved in organizing, financing, and constructing the said reservoir and the time which may reasonably be required for the completion thereof, and is also familiar with the work heretofore done by the United States under permit no. R-698 toward the construction of said reservoir, and the amount expended thereon by the United States.

An affiant further deposes and says that the time stated in permit no. R-698 is needed for completion of works under said permit on account of the time required for organizing, financing, and constructing works of the very large size involved under said permit.

That the said permit no. R-698 involves the construction of a reservoir of more than two hundred thousand (200,000) acre-feet capacity, namely, the Anderson Ranch Reservoir, having a capacity as set out in said permit of about five hundred thousand (500,000) acre-feet.

That the United States has actually expended toward the construction of said reservoir (including expenditures for the purchase of rights of way and property in connection therewith) more than one hundred thousand ($100,000) dollars.

R. J. NEWELL /s/

SEAL Subscribed and sworn to before me this 12th day of January, 1942.

W. H. VERNON /s/
Notary Public, residing at Boise, Idaho.
My commission expires January 24, 1945.

Recorded in the Department of Reclamation this 13th day of January, 1942.

E. V. BERG /s/, Commissioner of Reclamation.

CERTIFICATE OF COMPLETION OF WORKS

To All Whom It May Concern:

This is to certify that UNITED STATES OF AMERICA, Acting through the Bureau of Reclamation of Boise, County of Ada, and State of Idaho, the holder of Permit No. R-698, issued upon Application No. R-26522, bearing date of priority of December 9, 1940, authorizing the construction of a reservoir, with the right to appropriate and store 500,000 acre feet per annum of the waters of Boise River a tributary of Snake River, in the County of Elmore, State of Idaho, for irrigation and power purposes, has fully complied with the provisions of the laws of the State of Idaho relating to the proof of completion of the works set out and described in said Permit; that said works include a dam and reservoir adequate for the storage of 493,161 acre feet of water per annum, with adequate diversion works and conduit to the reservoir, and a conduit capable of conducting said water to the place of intended use; that the point of outlet of said reservoir is located in Lot 4 of Section 1, Township 1 South, Range 8 East, and that the place of use, or the lands proposed to be irrigated by the use of said water, are described as follows, to-wit: Supplemental irrigation land in the following townships: Twps. 1,2,3,4,5 N., Rge. 1 E., B.M. Twps. 2,3,4 N., Rge. 2 E., B.M. Twps. 2 & 3 N., Rge. 3 E., B.M. Twp. 1 S., Rge. 1 W., B.M. Twps. 1,2,3,4,5,N. Rge. 1 W., B.M. Twp. 1 S., Rge. 2 W., B.M. Twps. 1,2,3,4,N., Rge. 2 W., B.M. Twps. 2,3,4,5 N. Rge. 3 W., B.M. Twps. 2,3,4,5 N., Rge. 4 W.,B.M. Twps. 3,4,5,6 N., Rge. 5 W., B.M. Twps. 4,5,6 N., Rge. 6 W., B.M.
Also Twps. 21 and 22 S., Rge. 46 E., and Twp. 21 S., Rge. 47 E., Willamette Meridian.

Witness my hand this 30th day of August, 1952.

MARK R. KULP
State Reclamation Engineer

H0704

LEGISLATURE OF THE STATE OF IDAHO
Fifty-third Legislature Second Regular Session - 1996

IN THE HOUSE OF REPRESENTATIVES

HOUSE BILL NO. 704

BY RESOURCES AND CONSERVATION COMMITTEE

AN ACT

RELATING TO INTERIM AUTHORITY FOR RENTAL OF WATER TO AUGMENT FLOWS DURING THE MIGRATION OF SNAKE RIVER SALMON; AMENDING CHAPTER 17, TITLE 42, IDAHO CODE, BY THE ADDITION OF A NEW SECTION 42-1763B, IDAHO CODE, TO STATE LEGISLATIVE FINDINGS AND INTENT, TO PROVIDE WATER RENTALS, TO PROVIDE CONDITIONS ON WATER RENTALS, TO PROVIDE APPLICATION TO CERTAIN CONTRACTUAL OBLIGATIONS, TO PROVIDE EFFECTIVENESS CONTINGENT ON CERTAIN CONDITIONS OCCURRING AND TO PROVIDE A SUNSET CLAUSE.

Be It Enacted by the Legislature of the State of Idaho:

SECTION 1. That Chapter 17, Title 42, Idaho Code, be, and the same is hereby amended by the addition thereto of a **NEW SECTION** , to be known and designated as Section 42-1763B, Idaho Code, and to read as follows:

42-1763B. INTERIM AUTHORITY FOR RENTAL OF STORAGE WATER TO AUGMENT FLOWS DURING THE MIGRATION OF SNAKE RIVER SALMON. (1) Legislative findings and intent regarding rental of storage water from U.S. bureau of reclamation projects in the Snake River basin within Idaho to augment lower Snake River flows during the migration of Snake River salmon.

(a) The legislature finds that the U.S. bureau of reclamation requested the release of four hundred twenty-seven thousand (427,000) acre feet of water to augment salmon flows in order to satisfy the conditions of the biological opinion issued by the national marine fisheries service on March 2, 1995. The legislature authorizes the U.S. bureau of reclamation to release water from its projects under the limited conditions of this section in 1996, 1997, 1998 and 1999.

(b) It is the intent of the legislature to promptly consider the repeal of subsections (2) and (3) of this section in the event that the provisions of the biological opinion issued by the national marine fisheries service on March 2, 1995, related to the provision of flows for salmon from the Snake River basin above Brownlee Reservoir are modified or declared arbitrary, capricious or otherwise unlawful, or are set aside by any federal court.

(2) Rental of storage water from U.S. bureau of reclamation storage.

(a) Notwithstanding the legislative approval required in section 42-108, Idaho Code, any storage water release from U.S. bureau of reclamation reservoirs within the state of Idaho for

use to augment river flows during the migration of Snake River salmon pursuant to this section must be rented through the water bank operated by the Idaho water resource board pursuant to sections 42-1761 through 42-1764, Idaho Code, or through local water rental committees, created pursuant to section 42-1765, Idaho Code, under their respective water bank rules; provided however, that the agricultural preference provisions of local rental pool rules shall not apply to any uncontracted space rented by the U.S. bureau of reclamation pursuant to this section.

(b) For any rental of water pursuant to this section, the director shall not be required to determine under section 42-1763, Idaho Code, whether the water supply is sufficient for the purpose for which it is sought, whether the rental would cause the use of water to be enlarged beyond that authorized under the water right to be rented, whether such use is in the public interest, or whether such use is consistent with the factors enumerated under subsection (3) of section 42-401, Idaho Code.

(3) Conditions on storage water rentals.

(a) Any storage water made available under this section shall be obtained only from willing lessors. Any water rented under this section from reservoirs located within a basin having a local rental pool committee established pursuant to section 42-1765, Idaho Code, shall be rented pursuant to this section only through the local rental pool committee.

(b) Storage water made available under this section shall be limited to four hundred twenty-seven thousand (427,000) acre feet annually. These releases from storage shall be reduced by other water the U.S. bureau of reclamation provides for augmentation of salmon flows from the Snake River and its tributaries.

(c) In no event shall the release of water under this section cause the water surface of Cascade Reservoir to be below the elevation required to maintain a storage volume of three hundred

thousand (300,000) acre feet, fifty thousand (50,000) acre feet of which is dead space, which is currently estimated to be at an elevation of four thousand eight hundred nine and two-tenths (4,809.2) feet.

(d) The U.S. bureau of reclamation shall submit a report to the director by January 15 of each year describing the time, volume, and purpose of storage water released for salmon purposes during the past year and shall report on the plan for releases for the spring and summer chinook by April 1 and on the plan for releases for the fall chinook by July 15 of each year.

(e) All storage water rented from U.S. bureau of reclamation reservoirs under this section must be used for power production purposes within the state of Idaho.

(f) Nothing herein shall entitle the U.S. bureau of reclamation to rent storage water upon termination or expiration of the permission given in this section.

(4) Nothing in this section shall be construed to alter in any way the existing contractual obligations of the U.S. bureau of reclamation or to constitute a finding by the legislature that the rental or use of storage water for augmentation of flows for salmon migration is a beneficial use of water, that it is in the public interest, or whether such use injures existing water rights.

(5) This section shall not become effective until the

director certifies to the governor that the U.S. bureau of reclamation's applications to transfer water right numbers 46 , 4617, 4618, 4623, 4625, 4626, 4627, 4628, 4629, 4630, 4631, 4632, 4633 and 4636, and to amend water right permit numbers 25-07004 and 63-3618 will be held in abeyance until July 1, 1999.

(6) On and after January 1, 2000, this act shall be null, void and of no force and effect.

PHILIP E. BATT
GOVERNOR

KARL J. DREHER
DIRECTOR

June 5, 1996

F.Y.I.

The Honorable Philip E. Batt
Governor, State of Idaho
State Capitol
Boise, ID 83720-0034

RE: CERTIFICATION REQUIRED BY H.B. 704

Dear Governor Batt:

This letter certifies that the Department of Water Resources will hold the U.S. Bureau of Reclamation's Applications for Transfer Numbers 4616, 4617, 4618, 4623, 4625, 4626, 4627, 4628, 4629, 4630, 4631, 4632, 4633 and 4636 and Applications to Amend Permit Numbers 25-07004 and 63-03618 in abeyance until July 1, 1999. This certification is required under subsection 5 of Section 42-1763B, Idaho Code, as a condition for the effectiveness of House Bill 704 approved by the 1996 Legislature which will become effective July 1, 1996.

The department will hold in abeyance all actions associated with the applications including action on requests for discovery or other matters relating to the applications. If you have questions about this matter or if I can provide additional information, I am available at your convenience.

Sincerely,

KARL J. DREHER
Director

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE STATE OF IDAHO

IN THE MATTER OF APPLICATIONS FOR TRANSFER NOS. 4616, 4617, 4618, 4623, 4624, 4625, 4626, 4627, 4628, 4629, 4630, 4631, 4632, 4633, 4636, AND FOR THE AMENDMENT OF WATER RIGHT PERMIT NOS. 25-07004 AND 63-03618 IN THE NAME OF THE UNITED STATES BUREAU OF RECLAMATION	)	ORDER STAYING PROCEEDINGS

On May 15, 1995, the United States Bureau of Reclamation (Bureau) filed fifteen applications for transfer of water rights and two applications for amendment of water right permits with the Idaho Department of Water Resources (Department). The applications seek approval to use a combined total of up to 427,000 acre feet of water per year from Bureau reservoirs for flow augmentation purposes as a proposed contribution to salmon recovery efforts. The applications seek authorization to release water for the requested purposes beginning in the Spring of 1996.

Pursuant to the consent of the parties, the director entered an order on September 19, 1995, providing among other things that the Bureau's pending applications would be held without further action until April 1, 1996. In accordance with the stipulation of the parties, the order also directed the parties to address the issues and concerns raised by the Bureau's applications through draft legislation or other alternative means.

Legislation prepared in response to the issues and concerns identified as a result of this proceeding was introduced before the 1996 Idaho Legislature as House Bill No. 704. The legislation was approved on March 15, 1996, as Session Laws Ch. 282 to be codified as section 42-1763B, Idaho Code, with an effective date of July 1, 1996. Subsection 5 of section 42-1763B provides that the section shall not become effective until the director certifies to the Governor that the U.S. Bureau of Reclamation's applications at issue in this proceeding will be held in abeyance until July 1, 1999. Section 42-1763B, Idaho Code, as added by H.B. 704 provides as follows:

> 42-1763B. INTERIM AUTHORITY FOR RENTAL OF STORAGE WATER TO AUGMENT FLOWS DURING THE MIGRATION OF SNAKE RIVER SALMON. (1) Legislative findings and intent regarding rental of storage water from U.S. bureau of reclamation projects in the Snake River basin within Idaho to augment lower Snake River flows during the migration of Snake River salmon.
>
> (a) The legislature finds that the U.S. bureau of reclamation requested the release of four hundred twenty-seven thousand (427,000) acre feet of water to augment salmon flows in order to satisfy the conditions of the biological opinion issued by the national marine fisheries service on March 2, 1995. The legislature authorizes the U.S. bureau of reclamation to release water from its projects under the limited conditions of this section in 1996, 1997, 1998 and 1999.
>
> (b) It is the intent of the legislature to promptly consider the repeal of subsections (2) and (3) of this section in the event that the provisions of the biological opinion issued by the national marine fisheries service on March 2, 1995, related to the provision of flows for salmon from the Snake River basin above Brownlee Reservoir are modified or declared arbitrary, capricious or otherwise unlawful, or are set aside by any federal court.
>
> (2) Rental of storage water from U.S. bureau of reclamation storage.
>
> (a) Notwithstanding the legislative approval required in section 42-108, Idaho Code, any storage water release from U.S. bureau of reclamation reservoirs within the state of Idaho for use to augment river flows during the migration of Snake River salmon pursuant to this section must be

rented through the water bank operated by the Idaho water resource board pursuant to sections 42-1761 through 42-1764, Idaho Code, or through local water rental committees, created pursuant to section 42-1765, Idaho Code, under their respective water bank rules; provided however, that the agricultural preference provisions of local rental pool rules shall not apply to any uncontracted space rented by the U.S. bureau of reclamation pursuant to this section.

(b) For any rental of water pursuant to this section, the director shall not be required to determine under section 42-1763, Idaho Code, whether the water supply is sufficient for the purpose for which it is sought, whether the rental would cause the use of water to be enlarged beyond that authorized under the water right to be rented, whether such use is in the public interest, or whether such use is consistent with the factors enumerated under subsection (3) of section 42-401, Idaho Code.

(3) Conditions on storage water rentals.

(a) Any storage water made available under this section shall be obtained only from willing lessors. Any water rented under this section from reservoirs located within a basin having a local rental pool committee established pursuant to section 42-1765, Idaho Code, shall be rented pursuant to this section only through the local rental pool committee.

(b) Storage water made available under this section shall be limited to four hundred twenty-seven thousand (427,000) acre feet annually. These releases from storage shall be reduced by other water the U.S. bureau of reclamation provides for augmentation of salmon flows from the Snake River and its tributaries.

(c) In no event shall the release of water under this section cause the water surface of Cascade Reservoir to be below the elevation required to maintain a storage volume of three hundred thousand (300,000) acre feet, fifty thousand (50,000) acre feet of which is dead space, which is currently estimated to be at an elevation of four thousand eight hundred nine and two-tenths (4,809.2) feet.

(d) The U.S. bureau of reclamation shall submit a report to the director by January 15 of each year describing the time, volume, and purpose of storage water released for salmon purposes during the past year and shall report on the plan for releases for the spring and summer chinook by April 1 and on the plan for releases for the fall chinook by July 15 of each year.

(e) All storage water rented from U.S. bureau of reclamation reservoirs under this section must be used for power production purposes within the state of Idaho.

(f) Nothing herein shall entitle the U.S. bureau of reclamation to rent storage water upon termination or expiration of the permission given in this section.

(4) Nothing in this section shall be construed to alter in any way the existing contractual obligations of the U.S. bureau of reclamation or to constitute a finding by the legislature that the rental or use of storage water for augmentation of flows for salmon migration is a beneficial use of water, that it is in the public interest, or whether such use injures existing water rights.

(5) This section shall not become effective until the director certifies to the governor that the U.S. bureau of reclamation's applications to transfer water right numbers 4616, 4617, 4618, 4623, 4625, 4626, 4627, 4628, 4629, 4630, 4631, 4632, 4633 and 4636, and to amend water right permit numbers 25-07004 and 63-3618 will be held in abeyance until July 1, 1999.

(6) On and after January 1, 2000, this act shall be null, void and of no force and effect.

Having reviewed the prior stipulation of the parties in this proceeding and the provisions of House Bill 704, to be codified as section 42-1763B, Idaho Code, the director orders as follows:

ORDER

IT IS HEREBY ORDERED that, in accordance with the provisions of House Bill 704, to be codified as section 42-1763B(5), Idaho Code, effective July 1, 1996, the U.S. Bureau of Reclamation's Applications to transfer water right numbers 4616, 4617, 4618, 4623, 4624, 4625, 4626, 4627, 4628, 4629, 4630, 4631, 4632, 4633 and 4636, and to amend water right permit numbers 25-07004 and 63-3618 shall be held in abeyance until July 1, 1999.

IT IS FURTHER ORDER that:

1. All matters associated with this proceeding, including issues regarding the scope and nature of potential discovery and the holding of any hearing, shall be held in abeyance

until July 1, 1999, and the existing rights of the parties to raise issues regarding these matters shall not be diminished as a result of the issuance of this order.

2. The U.S. Bureau of Reclamation shall be authorized to release water to augment Snake River flows for salmon migration purposes during 1996, 1997, 1998 and 1999 in accordance with the provisions of section 42-1763B, Idaho Code.

3. Pursuant to section 42-1763B(3)(d), Idaho Code, the Bureau shall submit a report to the director by January 15 of each year describing the time, volume, and purpose of storage water released for salmon purposes during the past year and shall report on the plan for releases for the spring and summer chinook by April 1 and on the plan for releases for the fall chinook by July 15 of each year.

4. The Bureau, in addition, shall provide at least seven-days prior notice to the director of the actual amount, source and timing of water releases as they are made under section 42-1763B, Idaho Code, or if impracticable, as soon as feasible under the circumstances.

5. This is an interlocutory order issued pursuant to Rule 710 of the Department's Rules of Procedure, IDAPA 37.01.010710.

DATED this 5th day of June 1996.

KARL J. DREHER
Director

CERTIFICATE OF SERVICE

I HEREBY CERTIFY that I have, this 7th day of June, 1996, served the foregoing upon all parties of record in this proceeding, according to the Department of Water Resource's most current service list, by mailing a copy thereof to each party.

Total Quantity Appropriated is 523,161.00 A.F.A.

Total Consumptive Use is 423,200.0 Acre Feet Per Annum.

Remarks:

Place of use for the irrigation from storage water is irrigated lands within the Boise Federal Reclamation Project in Ada and Canyon Counties, Idaho, and Malheur County, Oregon. This transfer is intended to delineated a specific location for the use of the 400 acre feet wildlife from storage water and 400 acre feet of irrigation from storage water. The 400 acre feet is the same water. The transfer requests a right for wildlife be allocated on 90 acres and an irrigation right on a portion (50.95 acres) of the 90 acres. The irrigation right and acreage subject to this transfer will not expand in the future, but the wildlife right may expand in the near future. The irrigation acreage will decline on an equal basis, up to the 90 acres, as the wildlife acreage expands. See application for specific place of use.

NOV 19 1998

This is a multi-year storage project.

Proposed conditions of water use:

Irrigation of crops for wildlife use on approximately 51 acres. Wildlife and wildlife storage uses for a habitat pond.

General Information:

Purpose of Transfer

___Change point(s) of diversion _X_ Add diversion point(s) ___Add & Change point(s) of diversion
___Change place of use ___Change nature of use ___Add point diversion & Change place of us
___Change period of use _X_ Other Add Place & Nature of Use ___Change point diversion & place use

Describe the reason for the proposed changes:

Water has been provided to about 51 acres from Anderson Ranch Reservoir for years. As requested by the p a Memorandum of Agreement has been signed by Boise Kuna Irrigation District to deliver the water Reclamation's Anderson Ranch Reservoir to property owned by the United States and managed by the United States Fish and Wildlife Service below the upper embankment at Lake Lowell.

If the place of use of the water right(s) is changed, complete the following:

1. Provide evidence of water right ownership:

Water Right Number 63-03614

Mitigation water ~ 400 AF from non-contract Proj.

2. Is the land from which you propose to transfer the water right subject to any liens, deeds of trust mortgages, or contracts? No If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

3. Identify all other water rights used on the lands affected by this transfer application (original and new lands).

None.

Re: Application for Transfer No. 4457; Water Right No. 63-03614

Dear Mr. Graf:

In August of 1994, the U. S. Bureau of Reclamation filed an application for transfer to change the nature of use from a portion of water right no. 63-03614 (400 acre feet) from irrigation to wildlife. The application for transfer also proposed to change the place of use and change the point of diversion. The application was protested by the Nampa & Meridian Irrigation District, Boise-Kuna Irrigation District, Wilder Irrigation District, New York Irrigation District and Big Bend Irrigation District.

Notes in the file indicate that you were seeking withdrawal from the protestants. This office has inquired several times informally about negotiations to resolve the protest. The file does not show that the protest concerns have been satisfied.

IDWR must press forward with the administrative process. Please update me regarding your efforts to negotiate a settlement. If I have not heard from you within 30 days, IDWR will schedule a conference.

Sincerely,

Gary Spackman

Subj: PERMIT 63-09661 AND BOR RIGHT NO. 63-03614

Steve, your second mail message concerning Permit No. 63-09661 is correct - the extension of time is being held because of the Boise Front Low Temp. Geothermal GWMA and will continue to be held until that issue is resolved.

Next, I have some info. to pass along concerning a pending transfer on the Bureau of Rec's right 63-03614. I believe Phil Graeff spoke to you earlier concerning the issue of 5200 af already having been approved by Trans. 3310 for municipal and industrial storage. Phil was in my office this morning and I looked at the file - that transfer was never data entered. I have since data entered the information from that transfer so the database is now correct. I don't know if it warrants an advertising correction or not. I'll leave that to you to decide. I just wanted you to know that the database has been updated to reflect the previous transfer and it does have some relevance to some of the protest issues.

See next message

If you have any questions, give me a call.

Sharla

Dave - also see my 12/5 Conv. Memo w/ Phil G.

5200 Af reduction from irrig. to muni is w/dll. in current transfer advertised & protested by Irr. Dists.

5200 Af change was already approved in T. 3310 but overlooked in current processing (not in d'base, no hard copy at Region).

Suggest re-advertising not needed since publishing revised details shouldn't have any bearing on getting add'l. protests (will change 405 Af of 5200 Af to w/dll.fr).

Irr Dists' protests might be resolved in BOR meeting 12/5 in which already approved 5200 Af change reducing irrig. will be discussed.

What do you think re re-advertising?

-SL

I agree that it is Not required.

MEMORANDUM

TO: FILE
FROM: STEVE LESTER
DATE: DECEMBER 1, 1994
SUBJECT: RECOMMENDATIONS FOR T. 4457, RIGHT NO. 63-03614

BOR filed a transfer to essentially change the nature of use of a portion of water stored in Anderson Ranch Reservoir. The transfer will codify some uses that have occurred under contract (municipal) and will reflect 400 af for wildlife use adjacent to Lake Lowell. All of the use will remain within the Boise Project area.

This memo clarifies some details of the transfer. Some if not most of this is obvious but perhaps unstated anywhere in the water right record. The land where wildlife use is proposed in SE 1/4 S.26 is currently irrigated or at least wetted according to the 1987 NAPP photo. Continued irrigation (expected to diminish as wildlife use increases) from storage water does not pose a problem in the transfer.

When comparing the licensed right to the proposed right, note that the * irrigation amount will be reduced by 5,200 af, which will be listed as 4,800 af for municipal and 400 af for wildlife. The 29,000 af difference between irrigation/power storage and irrigation/power from storage represents the dead pool quantity. The total amount of the right must remain at 493,161 af in the transfer; the 30,000 af bank storage addition to the right can only be resolved via the SRBA, I assume. The figures shown in the top part of transfer page 2 above "total quantity appropriated" appear acceptable.

Likewise, the seasons of use for the beneficial uses in the top half of page 2 are appropriate. This will complete the unspoken seasons in the license. The tributary for the South Fork Boise River source should be the Boise River instead of the Snake River. The P/D for Anderson Ranch Dam can be more completely identified as Lot 4 (NWSE) and/or Lot 8 (SWSE), Section 1 (see topo in page 7 of transfer). The "rediversion points" are just those points where water is withdrawn from Lake Lowell via the Deer Flat Caldwell Canal and the points where water is subsequently withdrawn from that canal (see topo in page 6 of transfer). These are not true "rediversion points" as we normally think of them. Perhaps the "rediversion points" can instead be listed in remarks instead of in the P/D field of the water right.

The forfeiture question is assumed to be not applicable for storage water. I believe that at least one or more precedents for this concept were developed to some degree in an earlier Lost Valley Reservoir transfer(s).

If the transfer is to be approved, the applicant should submit proof of ownership of the lands in Section 26 where wildlife use will occur. The application states that these are federally owned acres -- we should verify this. I will send a letter to BOR (contact is Phil Graf 378-5322) about this.

Basically, the transfer is fairly straight forward and does not appear present difficult issues upon review.

MICROFILMED
NOV 9 1998

* update after memo prepared: T. 3310 already changed 5200 AF to Muni-Ind.; so now really proposing to change 400 AF of the 5200 AF non-irrig. to wildlife OR to add wildlife use to the 5200 AF as well SL 12/7/94 SEE 12/6/94 MAIL MSG.

Re: Transfer Application No. 4457 for License No. 63-03614

Dear Phil:

The above-referenced transfer application addresses the concept of allowing use of Anderson Ranch Reservoir water for wildlife purposes adjacent to Lake Lowell. Specifically, the wildlife use is described for land in NESE, SWSE and SESE, Section 26, T3N, R3W. The application states that this land is owned by the United States and managed by the U.S. Fish and Wildlife Service.

Proof of ownership of the land in Section 26 should be submitted to this office to facilitate processing of the application. Please provide such documentation within 30 days.

Thank you for your assistance in this matter.

Sincerely,

Steve Lester
Water Rights Supervisor

OF THE STATE OF IDAHO

IN THE MATTER OF THE APPLICATION OF THE UNITED STATES OF AMERICA, ACTING THROUGH THE BUREAU OF RECLAMATION, FOR A CHANGE IN NATURE OF THE USE UNDER WATER RIGHT NO. 63-03614	**PROTEST OF IRRIGATION DISTRICTS WILDER, NEW YORK AND BIG BEND**

Wilder Irrigation District, New York Irrigation District and Big Bend Irrigation District (the "Districts"), holders of contract storage rights in Anderson Ranch Reservoir, hereby protest the proposed change of Water Right No. 63-03614, Transfer No. 4457, on the following grounds:

1. That the Districts have been negotiating with the Applicant for the delivery of water through the District facilities of up to 240 acre feet of water (400 acre feet less systems loss of 40%) for the raising of crops on 51 acres of

MICROFILMED

land, for water fowl forage in the Deer Flat Dam area and for delivery to wetlands within a 90-acre parcel.

2. That the water to be used for this purpose was to come from uncontracted storage in the Anderson Ranch Reservoir account through an amendment to the Anderson Ranch License.

3. That the proposed change may not comply with the understanding between the Applicant and the Districts.

4. That the notice also states that the Applicant is claiming an additional 30,000 acre feet of "bank storage" which is in excess of the storage capacity of the reservoir. That if this bank storage claim is at issue in this proceeding, it raises significant concerns to the Districts.

5. That the change may injure the water rights of the Districts.

6. That the applicant has not satisfied the requirement of Idaho Code Section 42-108.

7. That the proposed change is not in the local public interest as defined in Section 42-203A(5), Idaho Code.

DATED this 7th day of November, 1994.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT NO. 63-03614

Notice is hereby given that United States of America acting through the Bureau of Reclamation of Boise, ID has applied to the Department of Water Resources for Transfer No. 4457 for a Change in Nature of Use of the following described water right to be changed pursuant to Section 42-222 of Idaho Code:

WATER RIGHT AS RECORDED:

BASIS License
DATE OF PRIORITY 12-09-1940
SOURCE South Fork Boise River tributary to Snake River
AMOUNT 493,161 acre feet (af)
USE Irrigation and Power Storage & Irrigation and Power from Storage (period of use unspecified in license)
POINT OF DIV Lot 4 (NWSE), S01, T01S, R08E, Elmore County (Dam for Anderson Ranch Reservoir)
PLACE OF USE Lands irrigated under Boise Federal Reclamation Project in Ada and Canyon Counties, ID and Malheur County, OR (approx. 276,000 acres)

WATER RIGHT AS CLAIMED IN SNAKE RIVER BASIN ADJUDICATION:

Same as above except that Storage periods defined as all year and Uses from Storage include Irrigation from 3-15 to 11-15 plus Power and Municipal all year. Claim also lists 30,000 more of reservoir capacity (bank storage) then recognized in license.

RIGHT NO. 63-03614 AND ADJUDICATION CLAIM NO. A63-03614 TO BE CHANGED AS FOLLOWS:

USE AND AMOUNT 493,161 af as follows:

Power 493,161 af; Irrigation 487,961 af; Municipal 4,800 af; and Wildlife 400 af.

REMARKS Water Storage & Use from Storage clarified as all year except Irrigation from Storage from 3-15 to 11-15. Transfer will provide 400 af for wildlife mitigation to 90 acres in SE 1/4, S26, T03N, R03W, Canyon County. Irrigation via project water has occurred on 51 of 90 acres and will continue but will decline as wildlife uses increase on site. Reservoir water delivered to Lake Lowell to be withdrawn from Lake Lowell for the 90 acres via Deer Flat Caldwell Canal (local diversions: Headgate Caldwell, No. 247 and No. 117 DFC No. 2). Canal and its diversions are also located in SE 1/4, S26, T03N, R03W.

Any protest against approval of the proposed water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705, together with a protest fee of $25.00 on or before November 7, 1994. The protestant must also send a copy of the protest to the applicant.

NOTICE OF PROPOSED CHANGE
OF WATER RIGHT NO. 63-03614

Notice is hereby given that United States of America acting through the Bureau of Reclamation of Boise, ID has applied to the Department of Water Resources for Transfer No. 4457 for a Change in Nature of Use of the following described water right to be changed pursuant to Section 42-222 of Idaho Code:

WATER RIGHT AS RECORDED:

BASIS	License
DATE OF PRIORITY	12-09-1940
SOURCE	South Fork Boise River tributary to Snake River
AMOUNT	493,161 acre feet (af)
USE	Irrigation and Power Storage & Irrigation and Power from Storage (period of use unspecified in license)
POINT OF DIV	Lot 4 (NWSE), S01, T01S, R08E, Elmore County (Dam for Anderson Ranch Reservoir)
PLACE OF USE	Lands irrigated under Boise Federal Reclamation Project in Ada and Canyon Counties, ID and Malheur County, OR (approx. 276,000 acres)

WATER RIGHT AS CLAIMED IN SNAKE RIVER BASIN ADJUDICATION:

Same as above except that Storage periods defined as all year and Uses from Storage include Irrigation from 3-15 to 11-15 plus Power and Municipal all year. Claim also lists 30,000 more af reservoir capacity (bank storage) than recognized in license.

RIGHT NO. 63-03614 AND ADJUDICATION CLAIM NO. A63-03614
TO BE CHANGED AS FOLLOWS:

USE AND AMOUNT	493,161 af as follows: Power 493,161 af; Irrigation 487,961 af; Municipal 4,800 af; and Wildlife 400 af.
REMARKS	Water Storage & Use from Storage clarified as all year except Irrigation from Storage from 3-15 to 11-15. Transfer will provide 400 af for wildlife mitigation to 90 acres in SE 1/4, S26, T03N, R03W, Canyon County. Irrigation via project water has occurred on 51 of 90 acres and will continue but will decline as wildlife uses increase on site. Reservoir water delivered to Lake Lowell to be withdrawn from Lake Lowell for the 90 acres via Deer Flat Caldwell Canal (local diversions: Headgate Caldwell, No. 247 and No. 117 DFC #2). Canal and its diversions are also located in SE 1/4, S26, T03N, R03W.

MICROFILMED
NOV 0 9 1998

Any protest against approval of the proposed water right application must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705, together with a protest fee of $25.00 on or before November 7, 1994. The protestant must also send a copy of the protest to the applicant.

MEMORANDUM

TO: Transfer File No. (63-03614)

FROM: Cindy Hodges

RE: Additional information for processing

The intent of this transfer application as I understand it is to re-define the use of certain portions of previously non-contracted storage water in Anderson Ranch Reservoir (shown as irrigation/power storage).

The application identifies 400 acre-feet to be used for irrigation/wildlife purposes. This water has been delivered or considered delivered for some time in the Lake Lowell/Deer Flat Draw area on 51 acres of irrigated land which is owned by BOR and leased to a local operator. Deliveries have occurred through either Boise-Kuna or Nampa-Meridian I.D.'s, as conveyance room has allowed, but lands are not represented by shares in either district. Adjacent to the irrigated land and just below the upper embankment of Lake Lowell (see map), a marshy area of approximately 40 acres (BOR owned/USFW managed?) has been present due to seepage through the upper embankment. This area may have also been the recipient of the irrigation return flows from the irrigated lands.

Recently, repairs have been conducted on the Lake Lowell upper embankment which have all but stopped the seepage through the embankment and which have dried up the marsh. This action has been viewed (by COE?) as a wetlands violation and BOR has been asked to mitigate the area. As stated in the application, an MOU has been signed with Boise-Kuna I.D. which secures deliveries of the flows to the site. It is BOR's intent to eventually create a wildlife habitat area on the entire site (+/- 90 acres) which will be managed by USFW. For the short term, the 51 acres will continue to be farmed and slowly phased into the wildlife area. The transfer identifies 400 acre-feet of previously non-contracted pool to be delivered for this purpose. The 400 acre-feet will be defined under both irrigation and wildlife, but will be non-cumulative for the combined uses at this site.

Also, the transfer application proposes to re-define 4800 acre-feet of non-contracted pool for municipal uses. Of this 4800 AF, 1000 AF is currently contracted to Boise Water Corp, and 800 AF is contracted to Trinity Springs Ltd on an exchange basis (Trinity Springs is located near Pine on the South Fork Boise above Anderson Ranch Res). The remaining 3000 AF is currently non-contracted. Place of use for this component should be shown as consistent with places of use shown on other rights for these two entities.

Contact person for this application is Phil Graf at the listed phone #.

APPLICATION FOR TRANSFER OF WATER RIGHT

PART 1

MAY 11 1992
Department of Water Resources
Eastern Regional Office

Name of applicant United States of America, Acting through the Regional Director, PN Region, Bureau of Reclamation Phone (208) 554-1165

Post Office address Box 043-550 West Street, Boise ID 83724-0043

A. PURPOSE OF TRANSFER

1. ☐ Change point of diversion ☐ Add diversion point(s) ☒ Change place of use
   ☒ Change nature of use ☒ Change period of use ☐ Other

2. Describe the reason for the proposed changes To authorize the use of waters stored in Anderson Ranch Reservoir for streamflow maintenance during the 1992-1993 and 1993-1994 non-irrigation seasons.

WITHDRAWN

B. DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Right Number | Priority | Amount (cfs/ac-ft) | Nature of Use | Period of Use

Right Number	Priority	Amount (cfs/ac-ft)	Nature of Use	Period of Use
63-3614 - R/[illegible]	12-09-1940	446,961 A.F.	Irrigation & Power	Mar. 15 to Nov. 15
"	"	5,200 A.F.	M & I and Power	Jan. 1 to Dec. 31
"	"	41,000 A.F.	Streamflow Maintenance	Aug. 15 to Apr. 15
	TOTAL:	493,161 A.F.		to

SEE ATTACHMENT A

2. Total amount of water being transferred _____ cubic feet per second and/or 41,000 acre-feet per annum.

3. Source of water S. Fork Boise River tributary to ~~Snake~~ Boise River

per top of 82 5/12/92

4. Point(s) of Diversion:

Lot	¼	¼	¼	Sec.	Twp.	Rge.	County	Local name for diversion
NO CHANGE								

5. Lands irrigated or place of use:

Twp.	Rge.	Sec.	NE ¼				NW ¼				SW ¼				SE ¼				Totals
			NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	NE ¼	NW ¼	SW ¼	SE ¼	
NO CHANGE																			

RECEIVED
JUN 24 1992

See Attachment A

PART 1

6. General Information:

a. Description of diversion system Anderson Ranch Dam Outlet Works

b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? X Yes _____ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
There will be no adverse impacts to existing irrigation. Irrigation water contractors will have diverted all of their storage entitlements by the end of the 1992 irrigation season. After the irrigation season, 41,000 more feet of water for the Inactive Storage Pool will be released to maintain instream flows in the Boise River below Lucky Peak Reservoir

d. Remarks:
This application is for the 1992-1993 and 1993-1994 winter season(s) only. The transfer will expire on April 15, 1994, at which time the uses will revert to those existing prior to the transfer.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. _____

Affidavit of Publication

No 23631

STATE OF IDAHO
COUNTY OF TWIN FALLS } ss.

I, Linda Capps McBride being first duly sworn upon oath, depose and say that I am Legal Clerk of the TIMES-NEWS, published daily, at Twin Falls, Idaho, and do solemnly swear that a copy of the notice of advertisement, as per clipping attached, was published in the regular and entire issue of said newspaper, and not in any supplement thereof, for Two consecutive Weeks, commencing with the issue dated May 21, 1992, and ending with the issue dated May 28, 1992.

And I do further certify that said newspaper is a consolidation, effective February 16, 1942, of the Idaho Evening Times, published theretofore daily except Sunday, and the Twin Falls News, published theretofore daily except Monday, both of which newspapers prior to consolidation had been published under said names in said city and county continuously and uninterruptedly during a period of more than twelve consecutive months, and said TIMES-NEWS, since such consolidation, has been published as a daily newspaper except Saturday, until July 31, 1978, at which time said newspaper began daily publication under said name in said city and county continuously and uninterruptedly.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week has been designated as the day on which legal notice by law or by order of any court of competent jurisdiction within the state of Idaho, to be published weekly, will be published; and that at the head of the editorial column of said combined newspapers, and in each issue thereof, Thursday is announced as the day on which said legal notices will be published.

STATE OF IDAHO
COUNTY OF TWIN FALLS

On this 18 day of June in the year of 1992, before me, a Notary Public, personally appeared Linda Capps McBride, known or identified to me to be the person whose name subscribed to the within instrument, and being by me first duly sworn, declared that the statements therein are true, and acknowledged to me that he executed the same.

Idaho Rivers United is an Idaho non-profit corporation representing citizens interested in improving river management in keeping with the Public Trust. The Ted Trueblood Chapter of Trout Unlimited (TTTU) represents fishing enthusiasts in the Treasure Valley. Our members use and enjoy the Boise River in the affected reach. Idaho Rivers United (IRU), and TTTU have a direct and substantial interest in the above proceedings in that many of our members could be impacted by the proposed transfer. We would like to be full parties to all proceedings related to this application.

We are concerned about potential Water Quality Impacts, impacts to the existing fishery, and the wildlife habitat loss to the South Fork and Main Boise River if this transfer is not approved.

IRU and TTTU would like to request that a public hearing be scheduled to consider the public impact and beneficial use that this proposed transfer of water right would create.

A public hearing is necessary to help us and the department review the information and determine how this transfer will support existing beneficial uses of the river this winter.

Signed,

Bruce Johnstone

Boise ID 83705

Subject: Withdrawal of Transfer Application, Streamflow Maintenance, Anderson Ranch Dam, Water Right No. 63-03614 (Water Rights)

Dear Mr. Tuthill:

Careful analysis of the current Boise River water supply outlook indicates that sufficient minimum releases from Lucky Peak Reservoir should be possible this winter without the need to tap inactive storage at Anderson Ranch Reservoir. Consequently, **we no longer believe that you need to process the application we filed on May 11, 1991, and hereby withdraw that application.**

Although the application was only intended to provide for instream flow use for the 1992-1993 and 1993-1994 nonirrigation seasons, the published notice was interpreted by some water users to indicate that a permanent change in the rights claimed in the Snake River Basin Adjudication was contemplated. This misconception could most expeditiously be alleviated by our withdrawal of the application.

Thank you for the efforts you have expended to date in processing the application. We trust this withdrawal will free you to devote additional time to the many other challenges facing your department in this difficult drought year.

Sincerely yours,

John W. Keys, III

Regional Director

IDAHO DEPARTMENT OF WATER RESOURCES

IN THE MATTER OF THE APPLICATION OF THE UNITED STATES OF AMERICA FOR CHANGES TO WATER RIGHT NO. 63-3614-R/698	**PROTEST OF NAMPA & MERIDIAN IRRIGATION DISTRICT**

COMES NOW Nampa & Meridian Irrigation District, Protestant, and protests the changes in Water Right No. 63-3614-R/698 as set forth in the Application of the United States of America, acting through the Regional Director of the Pacific Northwest Region, Bureau of Reclamation, Box 43, Boise, Idaho 83724, pursuant to §§42-108, 42-222, and 42-401, Idaho Code.

Protestant is an irrigation district organized under the laws of the State of Idaho, holding water rights in the waters of the Boise River, both natural flow and storage, which water is used for the irrigation of lands within the boundaries of Nampa & Meridian Irrigation District located in Ada County and Canyon County, Idaho.

Protestant is represented in this matter by Ringert Clark, Chartered, Lawyers, P.O. Box 2773, Boise, Idaho 83701.

The grounds of protest asserted by Nampa & Meridian Irrigation District include the following:

RECEIVED
JUN 24 1992

1. The proposed change will injure water rights of Nampa & Meridian Irrigation District;

2. The change constitutes an enlargement in the use of the original right;

3. The change is not consistent with the conservation of water resources within the state of Idaho;

4. The change is not in the local public interest as defined in §42-203A(5), Idaho Code;

5. The proposed change would significantly affect the agricultural base of the local area;

6. The proposed change is beyond the statutory authority of the Applicant;

7. Under current water conditions, if not in all cases, the stored water for which the change is requested is committed by contract to irrigation storage, if not used for inactive storage;

8. The Applicant has not established that, under current water conditions, the proposed use of the stored water is a beneficial use or, if beneficial, that it is of a higher order of preference as a beneficial use than the use of the same stored water for irrigation.

JUN 24 1992

Dated June 3, 1992.

RINGERT CLARK, CHARTERED

By W. F. Ringert

CERTIFICATE OF SERVICE

I hereby certify that service of the within and foregoing Protest of Nampa & Meridian Irrigation District was made this 3rd day of June, 1992, by mailing a copy thereof, postage prepaid to Bureau of Reclamation, Box 43, Boise, Idaho 83724.

Attorneys for NEW YORK IRRIGATION DISTRICT

DIRECTOR
IDAHO DEPARTMENT OF WATER RESOURCES

IN THE MATTER OF THE U.S. BUREAU OF RECLAMATION'S APPLICATION FOR TRANSFER OF WATER RIGHT NO. 63-3614-R/698 FOR STREAMFLOW MAINTENANCE IN IN THE BOISE RIVER	NEW YORK IRRIGATION DISTRICT'S PROTEST TO CHANGE IN WATER RIGHT NO. 63-3614-R/698

NEW YORK IRRIGATION DISTRICT, by and through its attorneys HAWLEY TROXELL ENNIS & HAWLEY, protests the proposed change of use as reflected in the Bureau of Reclamation's application for transfer of water right no. 63-3614-R/698 associated with the waters stored in the Anderson Ranch Reservoir on the Boise River. The Bureau proposes to change this water right to include, in addition to irrigation and power generation use, an instream flow use for the 1992-1993 and 1993-1994 non-irrigation seasons. The Bureau intends to use approximately 41,000 acre feet of water from Anderson Ranch Reservoir to maintain minimum streamflows in the Boise River.

FILMED
JUN 24 1992

NEW YORK IRRIGATION DISTRICT objects to and protests this proposed change for, but not limited to, the following reasons:

1. The change of use to instream flow uses is contrary to the local public interest. As such, the proposed change is invalid pursuant to § 42-222(1).

2. The proposed change will significantly affect the agricultural base of the Boise area. As such, the proposed change is invalid pursuant to 42-222(1).

3. The Bureau of Reclamation has made no demonstration that the proposed change in use is consistent with the conservation of water resources within the State of Idaho as required by 42-222(1).

4. The proposed change may cause injury to the water rights on which the NEW YORK IRRIGATION DISTRICT depends. If so, the change in water use cannot be permitted under § 42-222(1) or § 42-108.

5. The proposed change may interfere with the contractual rights of the District relating to the storage and delivery of water from the Bureau of Reclamation's Anderson Ranch and Arrowrock Reservoirs and their integrated operation with the Lucky Peak Reservoir, owned and operated by the U.S. Army Corps of Engineers. Any interference with the Districts' contractual rights would constitute a breach of contract by the Bureau of Reclamation.

The NEW YORK IRRIGATION DISTRICT reserves the right to raise additional objections to the Bureau of Reclamation's

MICRO
JUN 24 1992

application for temporary transfer of water right no. 63-3614-R/698.

DATED this 2nd day of JUNE 1992.

BEFORE THE DEPARTMENT OF WATER RESOURCES

STATE OF IDAHO

- - - - - - - - - -

In the Matter of the Proposed Change of Water Right, No. 63-03614 of the United States of America, Acting through the Bureau of Reclamation.

P R O T E S T

- - - - - - - - - -

COME NOW A & B Irrigation District, Burley Irrigation District and Falls Irrigation District, duly organized irrigation districts under the laws of the State of Idaho, and do hereby protest the application of the Bureau of Reclamation for a proposed change of nature, period and place of use of the water of the Boise River, South Fork under Water Right No. A63-03614 on the grounds and for the following reasons, to-wit:

1. That each of these protestants, through contractual arrangements with the United States of America, acting through the Bureau of Reclamation, operate and maintain a reclamation project constructed pursuant to the Reclamation Act of 1902, as amended, by the Bureau of Reclamation and as authorized by the Congress of the United States.

2. That pursuant to the laws of the United States of America and the contractual agreements between the protestants and the Bureau of Reclamation, protestants are preferred customers for the use of electric power generated by Bureau of Reclamation

RECEIVED
JUN 24 1992

power projects within Southern Idaho, including the power production facilities of the Bureau of Reclamation at Anderson Ranch Dam and Water Right No. A63-03614.

3. Protestants are, by law and contract, the primary beneficiaries of power production from Bureau of Reclamation power projects authorized by the Congress of the United States, and as such beneficiaries, are obligated by law and contract to pay for electric power received from the Bureau of Reclamation Southern Idaho power projects at a rate based upon the operation and maintenance costs of the respective power facilities operated by the Bureau of Reclamation, and the rates of the protestants are affected by the amount of electric power generated by the Bureau of Reclamation through its reclamation power projects located in Southern Idaho, and operated as the Southern Idaho power pool of the Bureau of Reclamation.

4. That protestants and the waterusers within each of the projects operated and maintained by protestants have relied upon the numerous licenses issued to the United States of America, acting through the Bureau of Reclamation, for the storage of water for power production, including the rights to store water in Anderson Ranch Reservoir under License No. 63-03614, in the development, operation and maintenance of the reclamation projects operated by protestants.

5. That under License No. 63-03614, the Bureau of Reclamation has maintained a minimum power pool of 41,000 acre

JUN 24 1992

feet of water in the Anderson Ranch Dam, to maximize the generation of electric power from the hydropower facilities operated at the Anderson Ranch Dam.

6. The change in the nature and place of use of this 41,000 acre feet of stored water now used as a minimum power pool will result in the loss of power production at Anderson Ranch Dam which would otherwise have been generated with the 41,000 acre feet of water, resulting in irreparable damage to protestants and their waterusers who are the primary beneficiaries by contract and law of said power production by the Bureau of Reclamation.

7. That protestants rely upon electric power produced by the Bureau of Reclamation from its reclamation power facilities in Southern Idaho and such electric power is necessary to provide water to the waterusers within the reclamation projects operated by protestants.

8. The applicant, Bureau of Reclamation, has acknowledged in its application that a change in the nature and place of use of stored water under its license will reduce the power production at Anderson Ranch Dam, resulting in injury to the protestants and their waterusers who are, by law, the third party beneficiaries of License No. 63-03614 granted by the State of Idaho for power production.

9. That the application of the Bureau of Reclamation seeks to change the nature and place of use of stored water for the maintenance of a minimum stream flow which is not allowed

JUN 24 1992

under the laws of the State of Idaho and is contrary to the provisions of Chapter 15 of Title 42 of the Idaho Code, in the following respects, to-wit:

(a) No person may appropriate water for a minimum stream flow except the Idaho Water Resource Board, and such appropriation is limited to "unappropriated water."

(b) Appropriation of water for minimum stream flows must be made by application by the Water Resource Board of the State of Idaho to the Director of the Department of Water Resources, and public hearings must be held on the proposed appropriation.

(c) Approved applications by the Water Resource Board of the State of Idaho must be submitted to the legislature and shall not be a final appropriation until affirmatively acted upon by concurrent resolution of the Idaho Legislature or by the failure of the legislature to act prior to the end of the regular session to which the application was submitted.

(d) Under Section 42-1504, Idaho Code, the Bureau of Reclamation must request that the Water Resource Board of the State of Idaho consider the appropriation of a minimum stream flow of the unappropriated waters of any stream, and the Water Resource Board may reject such proposal, and there shall be no right of review of any board decision rejecting such a request.

WHEREFORE, protestants pray that the Director of the Department of Water Resources deny the application for the following reasons, to-wit:

JUN 24 1992

(a) The application of the Bureau of Reclamation should be summarily dismissed on the grounds and for the reasons that the proposed use is contrary to the laws of the State of Idaho.

(b) That the protestants, as third party beneficiaries of applicant's license to store water for power production, will be irreparably damaged by such proposed change in the nature and place of use.

(c) The proposed change in the nature and place of use should be denied on the grounds and for the reasons that it is inconsistent with the conservation of water resources within the State of Idaho.

(d) That the application for the change in nature and place of use should be denied on the grounds and for the reasons that it is against the local public interests as defined in Section 42-203A(5), Idaho Code.

(e) That the application for the change in nature and place of use should be denied on the grounds and for the reasons that it is not a beneficial use by which a federal entity has the authority under the laws of the State of Idaho to appropriate water for.

(f) That the application for the change in nature and place of use be denied on the grounds and for the reasons that said change constitutes an unlawful taking of the rights of protestants and their waterusers, without just compensation, and

JUN 24 1992

without due process to which protestants are entitled under the Constitution of the United States of America and the State of Idaho.

RESPECTFULLY SUBMITTED this 3rd day of June, 1992.

Attorneys for Boise Project Board of Control

DIRECTOR
IDAHO DEPARTMENT OF WATER RESOURCES

IN THE MATTER OF THE U.S. BUREAU OF RECLAMATION'S APPLICATION FOR TRANSFER OF WATER RIGHT NO. 63-3614-R/698 FOR STREAMFLOW MAINTENANCE IN IN THE BOISE RIVER	BOISE PROJECT BOARD OF CONTROL'S PROTEST TO CHANGE IN WATER RIGHT NO. 63-3614-R/698

The Boise Project Board of Control, by and through their attorneys Hawley Troxell Ennis & Hawley, protests the proposed change of use requested in the Bureau of Reclamation's application for transfer of water right no. 63-3614-R/698 associated with the waters stored in the Anderson Ranch Reservoir on the Boise River. This water right is designated for irrigation and power generation. The Bureau proposes to change this water right to an instream flow use for the 1992-1993 and 1993-1994 non-irrigation seasons. The Bureau intends to use approximately 41,000 acre feet of water from Anderson Ranch Reservoir to maintain minimum streamflows in the Boise River

MICROFILMED
JUN 24 1992

The Boise Project Board of Control objects to and protests this proposed change for, but not limited to, the following reasons:

1. The change of use to instream flow uses is contrary to the local public interest. As such, the proposed change is invalid pursuant to § 42-222(1).

2. The proposed change will significantly affect the agricultural base of the Boise area. As such, the proposed change is invalid pursuant to 42-222(1).

3. The Bureau of Reclamation has made no demonstration that the proposed change in use is consistent with the conservation of water resources within the State of Idaho as required by 42-222(1).

4. The proposed change may cause injury to the water rights under which the Boise Project Board of Control distributes water to its member irrigation districts. If so, the change in water use cannot be permitted under § 42-222(1) or § 42-108.

5. The proposed change may interfere with the contractual rights of the irrigation districts belonging to the Boise Project Board of Control relating to the storage and delivery of water from the Bureau of Reclamation's Anderson Ranch and Arrowrock Reservoirs and their integrated operation with the Lucky Peak Reservoir, owned and operated by the U.S. Army Corps of Engineers. Any interference with these contractual rights would constitute a breach of contract by the Bureau of Reclamation.

RECEIVED
JUN 24 1992

6. The change of the nature and place of use of stored water for the maintenance of a minimum stream flow as requested by the Bureau of Reclamation is not allowed under the laws of the State of Idaho and is contrary to the provisions of Idaho Code § 42-1501 et. seq. in the following respects:

(a) The right to appropriate water for a minimum stream flow is restricted to the Idaho Water Resource Board, and such appropriation is limited to "unappropriated water."

(b) Under Section 42-1504, Idaho Code, the Bureau is permitted to request that the Water Resource Board consider the appropriation of a minimum stream flow from the unappropriated waters of any stream, and the Water Resource Board may reject such proposal, and there shall be no right of review of any Board decision rejecting such a request.

(c) If the Water Resource Board approves the Bureau's request for minimum stream flows, application for the appropriation of water for minimum stream flows by the Water Resource Board must be made to the Director of the Idaho Department of Water Resources, and public hearings must be held on the proposed appropriation.

(d) Approval of instream flows by the Director of the Department of Water Resources must be submitted to the legislature and shall not be a final appropriation until affirmatively acted upon by concurrent resolution of the Idaho Legislature or by the failure to the legislature to act prior to

MICROFILMED
JUN 24 1992

the end of the regular session to which the application was submitted.

The Boise Project Board of Control reserves the right to raise additional objections to the Bureau of Reclamation's application for temporary transfer of water right no. 63-3614-R/698.

DATED this 5th day of June, 1992.

Attorneys for Wilder Irrigation District

DIRECTOR
IDAHO DEPARTMENT OF WATER RESOURCES

IN THE MATTER OF THE U.S. BUREAU OF RECLAMATION'S APPLICATION FOR TRANSFER OF WATER RIGHT NO. 63-3614-R/698 FOR STREAMFLOW MAINTENANCE IN IN THE BOISE RIVER	WILDER IRRIGATION DISTRICT'S PROTEST TO CHANGE IN WATER RIGHT NO. 63-3614-R/698

The Wilder Irrigation District, by and through their attorneys Hawley Troxell Ennis & Hawley, protests the proposed change of use requested in the Bureau of Reclamation's application for transfer of water right no. 63-3614-R/698 associated with the waters stored in the Anderson Ranch Reservoir on the Boise River. This water right is designated for irrigation and power generation. The Bureau proposes to change this water right to an instream flow use for the 1992-1993 and 1993-1994 non-irrigation seasons. The Bureau intends to use approximately 41,000 acre feet of water from Anderson Ranch Reservoir to maintain minimum streamflows in the Boise River.

ACKNOWLEDGED
JUN 24 1992

The Wilder Irrigation District objects to and protests this proposed change for, but not limited to, the following reasons:

1. The change of use to instream flow uses is contrary to the local public interest. As such, the proposed change is invalid pursuant to § 42-222(1).

2. The proposed change will significantly affect the agricultural base of the Boise area. As such, the proposed change is invalid pursuant to 42-222(1).

3. The Bureau of Reclamation has made no demonstration that the proposed change in use is consistent with the conservation of water resources within the State of Idaho as required by 42-222(1).

4. The proposed change may cause injury to the water rights on which the members of the Wilder Irrigation District depend. If so, the change in water use cannot be permitted under § 42-222(1) or § 42-108.

5. The proposed change may interfere with the contractual rights of the Wilder Irrigation District relating to the storage and delivery of water from the Bureau of Reclamation's Anderson Ranch and Arrowrock Reservoirs and their integrated operation with the Lucky Peak Reservoir, owned and operated by the U.S. Army Corps of Engineers. Any interference with these contractual rights would constitute a breach of contract by the Bureau of Reclamation.

6. The change of the nature and place of use of stored water for the maintenance of a minimum stream flow as

JUN 1 1992

requested by the Bureau of Reclamation is not allowed under the laws of the State of Idaho and is contrary to the provisions of Idaho Code § 42-1501 et. seq. in the following respects:

(a) The right to appropriate water for a minimum stream flow is restricted to the Idaho Water Resource Board, and such appropriation is limited to "unappropriated water."

(b) Under Section 42-1504, Idaho Code, the Bureau is permitted to request that the Water Resource Board consider the appropriation of a minimum stream flow from the unappropriated waters of any stream, and the Water Resource Board may reject such proposal, and there shall be no right of review of any Board decision rejecting such a request.

(c) If the Water Resource Board approves the Bureau's request for minimum stream flows, application for the appropriation of water for minimum stream flows by the Water Resource Board must be made to the Director of the Idaho Department of Water Resources, and public hearings must be held on the proposed appropriation.

(d) Approval of instream flows by the Director of the Department of Water Resources must be submitted to the legislature and shall not be a final appropriation until affirmatively acted upon by concurrent resolution of the Idaho Legislature or by the failure to the legislature to act prior to the end of the regular session to which the application was submitted.

The Wilder Irrigation District reserves the right to raise additional objections to the Bureau of Reclamation's application for temporary transfer of water right no. 63-3614-R/698.

RE: Bureau of Reclamation Application for Temporary Transfer of Water Right for 41,000 acre feet of Inactive Storage of Anderson Ranch Reservoir

Dear Gentlemen:

We have been advised that the United States Department of Interior, Bureau of Reclamation has made application for a temporary transfer of 41,000 acre feet of inactive storage in Anderson Ranch Reservoir for the 1992-1994 non-irrigation seasons. To this date, we have not seen the publication of any notice on this application. Would you please provide to this office a copy of the application and notice as soon as possible. We have been advised that the last date to protest the application is June 8, 1992, and time is of the essence.

Very truly yours,

Re: Transfer Application by USBR for Stream Flow Maintenance, Anderson Ranch Dam

Dear Mr. Tuthill:

We have received a copy of Mr. Max E. Van Den Berg's letter to you, dated May 11, 1992, and the Application for Transfer of Water Right by the United States of America, acting through the Regional Director, USBR, covering 41,000 acre feet of Water Right No. 63-6314.

This is to notify you and the USBR that Nampa & Meridian Irrigation District will file a protest against the Application for Change in Use, Nature of Use or Season of Use, as soon after legal notice has been published as counsel can prepare the appropriate protest.

In the meantime, this letter constitutes a formal request that personal and direct service of the Notice of Application and any other notices in the proceeding be made on Nampa & Meridian Irrigation District, by sending copies to me at P.O. Box 2773, Boise, Idaho 83701.

Yours very truly,

W. F. Ringert

IN REPLY REFER TO:

PN-424

MAY 11 1992

RECEIVED
MAY 11 19[illegible]
Department of Water Resources
Western Regional Office

Mr. David R. Tuthill, Jr.
Manager, Western Region
Idaho Water Resources Department
2735 Airport Way
Boise ID 83705

Subject: Transfer Application, Streamflow Maintenance, Anderson Ranch Dam, (Water Rights)

Dear Mr. Tuthill:

As has been discussed with you, the water which has accrued to storage in Lucky Peak Reservoir Boise River instream flow account has fallen far short this year. We have proposed the use of 41,000 acre-feet of uncontracted water stored in Anderson Ranch Reservoir to supplement the instream flow account. The water right for this storage is for irrigation and power, but it is normally retained in the reservoir as "inactive storage for power head."

Enclosed is an application for Transfer of Water Right to authorize the release of up to 41,000 acre-feet of water from the inactive pool of Anderson Ranch Dam to maintain a minimum streamflow in the Boise River after the irrigation season this coming fall and winter, and possibly during the 1993-1994 non-irrigation season. As indicated in the application, the only anticipated adverse impacts to existing water users will be the reduction of Power Head to the existing Anderson Ranch Dam Powerplant, and a reduced water level in Anderson Ranch Reservoir with its associated impacts to the resident fishery. There will be no change or impacts to Reclamation's irrigation contracts or water users. Should the reservoir not fill during the coming storage season, an equal amount of water will be made available to the irrigation contractors in the 1993 and 1994 seasons. In this way Reclamation's irrigation contractors will not be adversely impacted by this proposal.

The filing fee will be paid from impressed funds.

Sincerely,

Marvin E. VanDenBerg

Regional Supervisor of
Water, Power, and Lands

FROM: TIM LUKE

RE: Water Right Transfer No.s 3883, 3884 & 3885

DATE: 2-20-92

The Bureau of Reclamation filed water right transfers on all all Bureau reservoirs within Idaho. The transfers were submitted in November, 1991. Numerous protests have been received. This water right is included in one of the above transfers. The transfers have been filed in order to recognize release of storage water for fish enhancement purposes (i.e.; to benefit salmon fish migrations).

Since the transfer applications are lengthy and involve numerous rights, a copy of the appropriate transfers are not included in this file. Please refer to the transfer application file for information concerning the transfers.

RE: Boise Water Corporation Diversion from the Boise River

Dear Lee:

You have advised this office that in order for Boise Water Corporation to divert water from the Boise River, a water right from storage must be identified.

The purpose of this letter is to advise you that the Department is currently in the process of reviewing an Application for Transfer submitted by the U.S. Bureau of Reclamation, which proposes to provide water for municipal and industrial purposes for a 5200 acre feet portion of licensed water right number 63-3614, from Anderson Ranch Reservoir.

As stated in our discussion on April 16, 1987, the Department received no protests to approval of the application, and approval appears to be imminent. Because Boise Water Corporation has already entered into a contract with the U.S. Bureau of Reclamation for the purchase of storage water, I have requested that you not prevent delivery of this stored water to Boise Water Corporation, pending final action on the transfer application.

On this day the application is being forwarded from the regional office to the state office for final action.

Sincerely,

David R. Tuthill Jr.

DATE 4/14/87

MICROFILMED
JUN 24 1992

TO 63-3614

SUBJECT

Pursuant to a visit to the office from Ed Thomas & Jim Brooks of U.S. BOR, I forwarded this file to Bob Fleenor for additional review with respect to what requirements we would establish for the BOR regarding deletion of acres irrigated, in light of new Department policy on storage rights. Bob Fleenor returned the file to me with a recommendation that we could approve the application without identification of lands to be removed from the land list, since the total acre feet of storage remains unchanged.

Re: Application for Transfer of Water Right No. 63-3614

Gentlemen:

As you are aware, the review of the above-referenced Application for Transfer was withheld until July 1, 1986 because an amendment to the statute pertaining to transfers, Section 42-222, Idaho Code, became effective on that date. Based on the revised statute a preliminary analysis of the application has been completed. The purpose of this letter is to describe the results of this analysis.

A basic provision of Section 42-222, Idaho Code, is that a transfer of a water right cannot allow an expansion. Historically this provision has been interpreted by the Department to mean that uses or places of use could not be added to an existing water right, even one for storage purposes. Instead, the Department has historically required that the additional uses or places of use be either (1) described in an Application for Transfer as being in lieu of all or a portion of an existing water right, or (2) filed in an Application for Permit to develop a new water right.

The effect of the amendment to Section 42-222, Idaho Code, was to add a provision that:

> The transfer of the right to the use of stored water for irrigation purposes shall not constitute an enlargement in the use of the original right even though more acres may be irrigated, if no other water rights are injured thereby.

JUN 24 1992

Our interpretation of this new language is that the statute now allows acreage to be added to an existing storage water right for irrigation, if no other water rights are injured thereby. We do not consider the language to apply to the addition of other uses such as municipal or industrial use.

Based on this interpretation, the above-referenced Application for Transfer can not be approved as currently filed. Instead, specific lands must be identified to be reduced from the current land list of 277,000 acres. The storage volume of 493,161 acre feet of water for irrigation of 277,000 acres implies a pro-rata share of 1.78 acre feet per acre. One method of assigning a number of acres to be deleted from the land list to correspond to the allocation of 5200 acre feet for municipal-industrial use is to divide the allocated volume by the pro-rata share, resulting in the computation 2920 acres.

As a next step regarding the application, I would suggest that you identify 2920 acres to be deleted from the existing place of use land list. This information can be conveyed to this office via correspondence to my attention. Upon receipt of this information, or an acceptable alternative that you may provide, the application will be forwarded to the State Office for further action. Please advise if you wish to discuss this interpretation.

Sincerely,

David R. Tuthill Jr.

CONVERSATION MEMORANDUM

DATE 10/8/86

FILE 63-3614

NAME OF PARTY Bob Fleenor

EMPLOYEE Dave Tuthill

RE: Interpretation of Change to Section 42-222, I.C., with respect to existing storage water rights.

Bob & I discussed Changes in 42-222 with respect to this application. The change provides that:

"The transfer of the right to the use of stored water for irrigation purposes shall not constitute an enlargement in use of the original right even though more acres may be irrigated, if no other water rights are injured thereby."

Bob's guidance was that we should limit interpretation of this statutory change to the addition of irrigated acres only, and not allow the addition of other uses such as municipal and commercial uses to be added to an existing right unless there is a corresponding deletion of the water right that has been perfected.

NOTICE OF PROPOSED CHANGE

OF WATER RIGHT NO. 63-3614

NOTICE IS HEREBY GIVEN that the United States of America, Bureau of Reclamation of Boise, Idaho has applied to the Department of Water Resources for a change in the nature of use of the water of the Boise River, South Fork.

The right sought to be changed is evidenced by Water Right License 63-3614 and is recorded as follows:

AMOUNT: 493,161 Acre Feet PRIORITY: 12/9/1940

POINT OF DIVERSION: Lot 4 Sec. 1 T. 1S. R. 8E.

The water is used for 493,161 Acre Feet storage for irrigation from 1/1 to 12/31, 493,161 Acre Feet storage for power from 1/1 to 12/31, 493,161 Acre Feet irrigation from storage from 3/15 to 11/15 and 493,161 Acre Feet power from storage 1/1 to 12/31 upon lands of the Boise Federal Reclamation Project in Ada and Canyon Counties plus all contract lands under Federal Reclamation for storage in Anderson Ranch Reservoir.

TO BE CHANGED AS FOLLOWS

The water and amount will be used for 487,961 Acre Feet storage for irrigation from 1/1 to 12/31, 487,961 Acre Feet storage for power from 1/1 to 12/31, 5,200 Acre Feet storage for municipal from 1/1 to 12/31 and 5,200 Acre Feet storage for industrial from 1/1 to 12/31 and 487,961 Acre Feet irrigation from storage from 3/15 to 11/15, 487,961 Acre Feet power from storage from 1/1 to 12/31, 5,200 Acre Feet municipal from storage from 1/1 to 12/31 and 5,200 Acre Feet industrial from storage from 1/1 to 12/31, for a total of 493,161 Acre Feet, with a point of diversion

MICROFILMED
JUN 24 1992

within Lot 4 Sec. 1 T. 1S., R. 8E., to be used upon lands of the Boise Federal Reclamation Project in Ada and Canyon Counties, plus all contract lands under Federal Reclamation for storage in Anderson Ranch Reservoir.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Statehouse, Boise, ID 83720 on or before January 13, 1986.

I, L. C. Knowlton, do hereby certify that I am the Secretary of the Board of Directors of the Wilder Irrigation District and as such Secretary I have in my custody the minutes of the proceedings, records and files of said Board and of said District and the seal thereof and that the above and foregoing is a true and correct copy of the contract approved and ordered filed February 4th, 1941 and made a part of the general plan in resolution No. 2 of the minutes of February 27th, 1941.

Signed by me with the seal of said District attached this 27th day of February, 1941.

L. C. Knowlton
Secretary

1 R 698 DEFENDANT'S EXHIBIT NO. 9

Approved by the Secretary of the Interior Jan 13, 1941

Approved by the Board of Directors of Wilder Irrigation District and Filed Feb 4, 1941 See Minutes P. 206 R C Knowlton, Secy.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

BOISE PROJECT, IDAHO

RECEIVED
FEB 28 1941
Department of Reclamation

Contract with Wilder Irrigation District concerning construction of Anderson Ranch Reservoir and related matters

THIS AGREEMENT, Made this _____ day of _____, 194__, under the provisions of the Act of Congress of June 17, 1902 (32 Stat. 388) and acts amendatory thereof or supplementary thereto, and particularly the Act of August 4, 1939 (53 Stat. 1187), known as the Reclamation Project Act of 1939, together hereinafter referred to as the Federal Reclamation Law, between the UNITED STATES OF AMERICA, hereinafter referred to as the United States, acting for this purpose through _____, _____ Secretary of the Interior, hereinafter referred to as the Secretary, and the WILDER IRRIGATION DISTRICT, an irrigation district organized under the laws of the State of Idaho and located in Canyon County, Idaho, hereinafter referred to as the District;

WITNESSETH:

Explanatory Recitals

2. WHEREAS, under the authority of the Federal Reclamation Laws, the United States constructed that certain irrigation project in the State of Idaho commonly known as the Boise Project, and also known as the Boise Reclamation Project; and

3. WHEREAS, the United States and the District entered into contracts dated April 6, 1926 and December 20, 1935 hereinafter collectively referred to as the Government-District contract; and

4. WHEREAS, the Government-District contract provides, among other things, for the payment by the District of a part of the expenditures made by the United States in the construction of said Boise Project; and

5. WHEREAS, the water users within the Arrowrock Division of the Boise Project have suffered a shortage of water during certain irrigation seasons in the past and, in order to improve their water supply, desire the construction of additional storage capacity; and

6. WHEREAS, the Secretary has caused investigations to be made of a proposed reservoir on the South Fork of the Boise River at or near the Anderson Ranch site, of approximately Five Hundred Thousand (500,000) acre-feet capacity, hereinafter referred to as the Anderson Ranch Reservoir, and the District, together with the other irrigation districts of the Arrowrock Division of the Boise Project, has requested the construction thereof; and

7. WHEREAS, the total cost of the proposed Anderson Ranch Reservoir, of sufficient size to create a storage reservoir of approximately 500,000 acre-feet capacity, and appurtenant works including facilities for the generation of electrical power at Anderson Ranch Reservoir, and related flood control improvements at Arrowrock Reservoir, is estimated to be the sum of $13,100,000, of which $400,000 is the estimated cost of the flood control improvements at Arrowrock Reservoir and $2,400,000 is the estimated cost of the power plant, and of which sum of $13,100,000 the proportionate allocation for the storage of water for irrigation is $4,650,000, the proportionate allocation for flood

R-698

control is $5,050,000, and the proportionate allocation for the generation of electrical power, (including the estimated cost of the power plant) is $3,400,000; and

8. WHEREAS, that portion of the actual cost of the Anderson Ranch Reservoir allocated to irrigation is the proportionate part of the Anderson Ranch Reservoir cost (exclusive of the cost of the power plant and of the Arrowrock flood control improvements) that $4,650,000 is of $10,300,000; and

9. WHEREAS, the District desires to enter into a contract with the United States for certain additional storage water to be made available by said Anderson Ranch Reservoir.

NOW THEREFORE, In consideration of the mutual and dependent stipulations and covenants herein contained, it is hereby mutually agreed by and between the parties hereto as follows:

Works To Be Constructed

10. The United States, subject to article 42 and article 45 of this contract, will construct, on the South Fork of the Boise River at or near the Anderson Ranch site, a dam and reservoir (to be known as the Anderson Ranch Dam and Anderson Ranch Reservoir) designed to provide a storage capacity of approximately Five Hundred Thousand (500,000) acre-feet, and, at its option, may enlarge the outlet gates at Arrowrock Dam with a view to providing improved flood control facilities, and may construct a power plant in connection with the said Anderson Ranch Dam.

General Repayment Obligation of the District

11. As its general repayment obligation under this contract, the District shall pay to the United States, in the installments hereinafter provided, the following amount, subject to adjustment as provided in Article 16 hereof:

Should the actual cost of the Anderson Ranch Reservoir (exclusive of the power plant and of Arrowrock flood control improvements) as determined and stated by the Secretary in the notice and statement provided for in article 12 (a) hereof, be the same as the estimated cost of $10,300,000, the general repayment obligation of the District shall be $1,567,515.

Should the said actual cost exceed or be less than the said estimated cost, then the general repayment obligation of the District shall be that percentage of said actual cost which $1,567,515 is of said estimated cost of $10,300,000, as said actual cost is conclusively determined by the Secretary in accordance with the provisions of article 20 hereof, subject, however, to the limitation, that the maximum general repayment obligation of the District under this contract shall not exceed $1,724,266.50.

Terms of Payment of Construction Installments

12. (a) Whenever the construction of Anderson Ranch Reservoir is substantially completed, or is advanced to a point where storage water in an amount exceeding 275,000 acre-feet becomes available for irrigation use from said storage reservoir, the Secretary shall so announce, and shall give to the District notice thereof, hereinafter referred to as the tentative construction cost notice. Said notice shall be given prior to September 1 of the year in which given and shall include a statement

R-698

of the cost of the Anderson Ranch Reservoir, as then estimated, and of the District's general repayment obligation under article 11 of this contract based on said statement of cost. Said tentative construction cost notice shall govern the amount of repayment obligation installments until such time as the cost and the District's general repayment obligation based thereon can be determined by the Secretary, and the statement thereof submitted to the District in a final construction cost notice. Any difference between the District's general repayment obligation as stated in the tentative construction cost notice and said obligation as stated in the final construction cost notice shall be spread in such a manner as to maintain approximately equal overall annual payments as hereinafter provided for in this article, as increases or decreases as the case may be, in the installments on account of Anderson Ranch Reservoir coming due after said final construction cost notice has been given to the District.

The Secretary's determinations of cost and of the District's general repayment obligation in each of said notices shall be conclusive.

(b) At the time the Secretary gives to the District the tentative construction cost notice provided in (a) of this article, stating the District's general repayment obligation, the Secretary shall determine the respective amounts of the first ten (10) successive annual installments of said obligation. The respective amounts of said first ten (10) installments shall be determined so that the annual installments, including the then estimate of those following the tenth, on account of Anderson Ranch Reservoir, when combined with the then unaccrued installments to be paid by the District for the repair, resurfacing,

improvement and enlargement of Arrowrock Dam (hereinafter referred to as Arrowrock repairs), and the Secretary's then estimate of the probable annual construction installments to be paid by the District under the Government-District contract, form a combined, overall schedule of approximately equal annual installments throughout the forty (40) year repayment period within which the District's general repayment obligation under this contract shall be paid. In the year in which the tenth annual installment due from the District on account of Anderson Ranch Reservoir accrues, the Secretary shall determine the respective amounts of the remaining thirty (30) installments of the District's general repayment obligation under this contract in the same manner as provided above for the first ten installments, excepting that the determination in said tenth installment year shall be made upon consideration of the then unaccrued installments on account of Arrowrock repairs and the Secretary's then estimate of probable annual construction installments to be paid by the District under the Government-District contract. In no event, however, shall any annual installment to be paid by the District on account of Anderson Ranch Reservoir be less than $13,500.

(c) The District agrees to pay the general repayment obligation, in the forty (40) successive annual installments, scheduled under (b) of this article; and there being no irrigation block designated by the Secretary and no development period fixed by him, the first installment shall become due and payable in the calendar year following immediately after the one in which the Secretary gives the tentative construction cost notice provided for in (a) of this article. Each year's installment on account of Anderson Ranch Reservoir shall become due and payable from the District to the United States one-half on July 1 and one-half on December 31 of

R-696

the year in question.

(d) Each year the installment of the District's general repayment obligation scheduled for such year shall be the construction charges due and payable by the District for such year, and the normal and percentage plan of payment shall not apply thereto unless such normal and percentage plan shall be hereafter adopted and provided for by supplemental contract, as authorized in article 44 hereof.

District's Percentage of Stored Water From Anderson Ranch Reservoir

13. Subject to the holdover rights provided for in article 18 hereof, and the allowance of similar holdover rights provided for by contracts with other contracting districts and companies entitled to receive stored water from Anderson Ranch Reservoir, and subject to the adjustment authorized under article 16 hereof, the United States, in the manner and subject to the conditions provided in this contract, will release for the use of the District each year (as ordered by the District through its operating agent, the Board of Control, or the manager or superintendent thereof) as nearly as is reasonably practicable thirty-three and seventy-one hundredths per cent (33.71%) of the stored water actually available from said reservoir that year for irrigation purposes, as determined by the Secretary.

Optional with Secretary to Measure and Deliver Anderson Storage Either at Outlets of Anderson Ranch Reservoir or at Outlets of Arrowrock Reservoir

14. At the option of the Secretary, the Anderson Ranch Reservoir stored water to which the District is entitled may be measured and delivered to or for the District either at the outlets of the Anderson Ranch Reservoir or at the outlets of the Arrowrock Reservoir.

Secretary Authorized to Determine the Administration of the Reservoirs and the Holding of Water Therein

15. In all matters not expressly covered by the provisions of this contract, the Secretary is authorized to determine the proper administration of the said Anderson Ranch Reservoir and Arrowrock Reservoir and the water supply therefrom, and his authority shall include but not be limited to the authority to determine the length of time and the extent to which the stored water belonging to either of said reservoirs may be held in the other without injury to the holders of rights to water therefrom.

Right Reserved to Provide Storage, For Big Bend District and other Contractors

16. The United States reserves the right, at the option of the Secretary, to contract to furnish to the Big Bend Irrigation District and to such of the old canal companies and irrigation districts of the Boise Valley as may desire to contract for an additional water supply, the right to the use of the water available from a proportionate part of the storage capacity of Anderson Ranch Reservoir, not exceeding an aggregate amount of eleven and two-tenths percent (11.2%) of the part thereof available for irrigation, and in that event to reduce the percentage to be furnished to the District to such extent as the Secretary shall find necessary not exceeding a reduction of eleven and two-tenths percent (11.2%). In that event the general repayment obligation of the District and any scheduled installments thereof shall be reduced in the same proportion that the District's right to receive stored water under this contract is reduced. It is agreed that the rights to the use of water under contracts made with other parties in accordance with the reservation set out in the preceding sentence shall be full proportionate

rights, in all respects on a par as to priority and dignity of right with the rights of the District hereunder, except as to holdover rights unless they be provided for in the contract with said other party; and that the respective rights of the said four principal districts to the use of storage water made available by Anderson Ranch Reservoir shall be on a basis of equality as to priority and dignity of right.

Each District May Assign Part of Its Contract Right

17. Each of the four principal districts (New York Irrigation District, Boise-Kuna Irrigation District, Nampa & Meridian Irrigation District and Wilder Irrigation District) shall have the right, at its option, to assign and transfer a proportionate part of its right to receive water from said Anderson Ranch Reservoir: Provided, That the assignee assumes a like proportionate part of the obligations of the contract thus partially assigned to it, and provided further that no such assignment shall be valid and binding until approved by the Secretary.

Holdover Rights and Reservations For Power and Flood Control and Temporary Holding In One Reservoir of Water Belonging to Another

18. The rights provided for in this article will be referred to as the District's holdover rights. The District will be allowed to hold over in Anderson Ranch Reservoir from year to year stored water to which it may be entitled in any irrigation season but does not use during such season, and will be given credit therefor the following year or years subject to the following conditions and limitations:

(a) The District shall not be entitled to hold over to its credit in said reservoir at any one time more stored water than can be stored, subject to paragraph (g) of this article, in sixty-seven and forty-two hundredths percent (67.42%) of the available storage capacity of the reservoir usable for irrigation; that is to say, sixty-seven and forty-two hundredths percent (67.42%) of the capacity thereof other than that reserved for control of flash floods and that reserved for power.

(b) Whenever the combined amount of storage water in the Arrowrock Reservoir and the Anderson Ranch Reservoir reaches a point where there remains in the two reservoirs only 45,000 acre-feet unfilled capacity, and additional water shall be available for storage, then such additional storable water shall be considered stored in reservoir capacity made available therefor by reducing and eliminating holdover storage in the following manner: Water shall be considered released from holdover storage of the contracting party having on hand the largest amount of holdover storage water in percent of its maximum holdover storage as fixed by (a) of this article until such percent is reduced to that of the party having on hand the next highest percent, then from both parties' holdover storage, etc., until no party has holdover storage on hand. Any holdover right to and interest in water considered released under this paragraph shall be extinguished and terminated.

(c) It is fully agreed and understood that 75,000 acre-feet of the initial capacity in the Anderson Ranch Reservoir, and such water as can be stored therein, is reserved to the United States as dead storage and removable storage for power purposes, and that the removable part of the water stored in said 75,000 acre-feet of initial capacity may be held by the United States for release for power development purposes after the end of the irrigation season. Anderson Ranch Reservoir stored waters released for power production while Arrowrock Reservoir is not full, shall be considered stored in Arrowrock Reservoir, and in equal amounts may be subsequently replaced in Anderson Ranch Reservoir by storing therein waters storable in Arrowrock Reservoir, provided such replacement is effected prior to the next spill at Arrowrock Reservoir over the wasteway thereof.

(d) It is understood and agreed that a combined total of 45,000 acre-feet of empty storage space shall be kept available in the Anderson Ranch and Arrowrock Reservoirs for control of flash floods, except when used for control of such floods. Of water temporarily impounded in said 45,000 acre-feet capacity, when released, thirty-three and seventy-one hundredths percent (33.71%) of it, or any part of said percentage, may be diverted for the use of the District if it so desires.

(e) It is further understood and agreed that for flood control purposes it is most desirable that the empty storage space should be maintained in Arrowrock Reservoir rather than in Anderson Ranch Reservoir,

and that the attempt will be made, so far as practicable, to keep the empty storage space in Arrowrock Reservoir so that it may be available to control floods from the largest possible watershed. With this purpose in view and for the purpose of making better use of the available water supply for power and irrigation purposes, storage water belonging to the Arrowrock Reservoir or the Deer Flat Reservoir may be held temporarily in the Anderson Ranch Reservoir, or vice versa, instead of holding the same in the reservoir in which it belongs on the basis of priority of right; but the temporary holding of such stored water in the Anderson Ranch Reservoir shall not in any way affect the rights of the several districts to the water in question, and such rights shall be considered to be the same as if said stored water were held at all times in the reservoir in which it properly belongs on the basis or priority of right. Storage water belonging in Arrowrock Reservoir or Deer Flat Reservoir but temporarily held in Anderson Ranch Reservoir will be turned down to the reservoir in which it belongs at or prior to the time that water available for storage in the Anderson Ranch Reservoir becomes available in sufficient quantity to fill the full storage capacity thereof other than the capacity thereof reserved exclusively for control of flash floods.

(f) For the purpose of a more prompt and accurate control of the water supply at canal headgates, and other beneficial purposes

including but not limited to the carrying of peak loads at the power plant at the Anderson Ranch Reservoir, stored water belonging in Anderson Ranch Reservoir, or to the holders of rights in said water, and holdover storage or storage otherwise credited to the Anderson Ranch Reservoir, may likewise be held temporarily in unused space in Arrowrock Reservoir without in any way impairing or affecting the rights of the parties entitled to such water; but such water shall not remain in Arrowrock Reservoir at any time when such use of Arrowrock capacity would injuriously affect the holders of Arrowrock storage rights in the benefit or enjoyment of such Arrowrock rights.

(g) In the filling of the available Anderson Ranch Reservoir capacity, except that reserved for power which will be filled first and except that amount of 45,000 acre-feet capacity reserved for control of flash floods, the reservoir management will endeavor so to handle the filling thereof that the same will serve both for the benefit of irrigation and for the benefit of flood control, and may for flood control purposes evacuate so much of its capacity as is deemed advisable with such releases to be first from holdover storage water on hand, in the same manner and with the same effect as provided in Article 18 (b).

(h) Holdover storage will be charged its pro rata share of evaporation and seepage losses.

General Obligation of the District

19. The District's obligation hereunder is a general repayment obligation under which the District as a whole is obligated to pay to the United States the full amount or amounts herein agreed upon according to the terms stated, notwithstanding any individual default in the payment to the District by any individual water user of any assessments, tolls, or other charges levied by the District; and while the District, so far as its powers under the laws of Idaho permit, may distribute said obligation among its landowners in a manner that takes into account the productivity of the various classes of lands of its landowners and the benefits accruing to said lands by reason of the construction herein provided, no such distribution of said obligation shall in any manner be deemed to relieve the District, or any of its landowners, or any land therein, of the District's general obligations to the United States.

Computation of Cost

20. The cost of the Anderson Ranch Reservoir, which shall be the basis of determining the District's obligation as provided in Article 12 hereof, shall embrace all expenditures of whatsoever kind in connection with, growing out of, or resulting from the work described, including the cost of labor, material, equipment, investigations, engineering, legal work, superintendence, administration, overhead, rights of way, property, and damages of all kinds, and also including expenditures made for any of said above-mentioned purposes incurred

prior to the date of this contract. The determination of what costs are properly chargeable hereunder, and the amount thereof, shall be conclusively made by the Secretary.

Cost of Operation and Maintenance to be Paid in Advance

21. For the year in which the first general repayment obligation installment becomes due, as provided in Article 12 (c) above, and for each year thereafter, the District will pay to the United States in advance, in the manner hereinafter provided, its share of the operation and maintenance costs of Anderson Ranch Reservoir. Payment shall be made on the basis of annual estimates made by the Secretary. Such annual estimates, hereinafter referred to as the operation and maintenance charge notice, shall contain a statement of the estimated cost to be incurred during the calendar year covered by said notice for the operation and maintenance of Anderson Ranch Reservoir, a statement of the part of said estimated costs allocated to the storage of water for irrigation, and the District's share thereof. The District's share shall be thirty-three and seventy-one hundredths percent (33.71%) of the part of said estimated costs allocated by the Secretary to the storage of water for irrigation, less any reduction, not to exceed eleven and two tenths percent (11.2%), thereof made under Article 16 hereof.

Such operation and maintenance charge notice shall be given to the District and to the Board of Control of the Arrowrock Division,

Boise Project, on or before April 1 of the calendar year covered by said notice. The District agrees to pay its share of the estimated cost of operation and maintenance allocated to the storage of water for irrigation as set out in said notice on or before May 1 of the year in which said notice is given. Whenever in the opinion of the Secretary, funds so advanced will not be adequate to meet the District's share of costs of operating and maintaining Anderson Ranch Reservoir, he may give to the District and to the Board of Control a supplemental operation and maintenance charge notice stating therein the amount of the District's share, determined in the manner above provided, of the additional amount required for such operation and maintenance. The District shall pay its share of such additional amount, as set forth in said supplemental notice, on or before the due date fixed by the Secretary in said notice. If funds advanced by the District under this Article exceed the District's share of the actual cost and maintenance for the year for which advanced, as determined conclusively by the Secretary, the excess will be credited to operation and maintenance charges due from the District subsequent to the determination of such excess.

There shall be included in the operation and maintenance costs covered by the provisions of this Article an annual equitable charge, as determined by the Secretary, to cover general expenses and the cost of bookkeeping, accounting, clerical and legal work of the Bureau of

Reclamation in connection with the accounts and collections for storage water from Anderson Ranch Reservoir.

Any expense incurred in running or protecting the Anderson Ranch Reservoir water in the channel of Boise River or the South Fork thereof or in diverting the same into the Main South Side Canal of the Arrowrock Division shall be considered a part of the cost of operation and maintenance of the Anderson Ranch Reservoir and charged accordingly in like manner as other operation and maintenance expenses in connection with said reservoir.

Water Rental Before Commencement of Construction Cost Repayment

22. Prior to the year in which the first general repayment obligation installment provided for in Article 12 (c) accrues, storage water, if available, may be released for the use of the District only upon advance payment by the District to the United States of a charge per annum per acre-foot, or other charge, to be fixed by the Secretary each year and to be paid in advance of delivery of water. After the expiration of the water rental period, if any, any such charges collected and which the Secretary determines to be in excess of the cost of operation and maintenance, during the period, allocated by the Secretary to the District shall be credited to the general repayment obligation of the District under this contract in the manner determined by the Secretary.

Refusal of Water in Case of Default

23. No water from the Anderson Ranch Reservoir shall be delivered to or for the District if the District shall be in arrears in the advance payment of the operation and maintenance charges provided for in Article 21 or in arrears in the payment of any other operation and maintenance charges due to the United States, or more than twelve (12) months in arrears in the paymont, as required by the terms of this contract, of the general repayment obligation installments provided for in Article 12 of this contract, or more than twelve months in arrears in the payment of any other construction charge installments due to the United States. The District agrees that it will refuse to deliver water to lands or parties which are in arrears in the advance payment of operation and maintenance charges due from said lands or parties to the United States or to the District, or to lands or parties who are in arrears for more than twelve months in the payment of the amounts due from said lands or parties to the United States or to the District for the general repayment obligation installments due from the District to the United States under this or any other contract. The provisions of this Article are not exclusive and shall not in any manner prevent the United States from exercising any other remedy given by this contract or by law to enforce the collection of any payments due under the terms of this contract.

Penalty for Delinquent Payments

24. In the event that any payment provided for in this contract is not made on or before the date that such payment is due and payable, there shall be added to the amount unpaid a penalty of one-half of one percent (1/2%) on the day following the due date, and there shall be added a like penalty of one-half of one percent of said unpaid amount on the first day of each calendar month thereafter so long as such default shall continue.

Title to Reservoir in the United States

25. Pursuant to the provisions of section 6 of the Act of June 17, 1902 (32 Stat. 388), title to the Anderson Ranch Reservoir shall remain in the United States until otherwise provided by Congress.

Power Resources to Remain Perpetually in the United States

26. The rights and resources which may be used or useful for the development of power, and any plant or plants and appurtenant structures and facilities which may be now or hereafter constructed by or under the authority of the United States which may be used or useful for the development of hydroelectric power, are hereby reserved to and shall be and remain in the exclusive control, possession and ownership of the United States: Provided, That no costs, as determined by the Secretary and which are in his opinion, attributable solely to power development, shall be taken into account in determining the District's construction cost obligation under this contract. All revenues, including miscellaneous revenues from or incident to the establishment or use of power

plants or appurtenant structures and facilities, and from the use, sale or other disposal of power in any form, shall be and remain the property of the United States and shall be disposed of as provided in the Interior Department Appropriation Act, 1939, (Act of May 9, 1938, 52 Stat. 291,322).

Operation and Maintenance of Works by the United States

27. The works constructed by the United States under the provisions of Article 10 above will be operated and maintained by the United States as a part of the reserved works of the Arrowrock Division of the Boise Project in the same manner as that provided in the Government-District contract, but the District's share of the cost of operation and maintenance of said works shall be paid by the District as provided in Article 21 above.

Board of Control as Operating Agent

28. The provisions of the Government-District contract relating to the Board of Control are hereby made applicable to the collection of operation and maintenance charges provided for in this contract, and to the payment to the United States of said charges and to the enforcement of the provisions of Article 23 of this contract, and to the distribution of the water to the lands entitled to receive the same. It is agreed that under the administration of the Board of Control the transferred works of the Arrowrock Division of the Boise Project shall be available for the conveyance of the Anderson Ranch Reservoir water

R-698

to the lands entitled to receive the same, in similar manner and subject to similar conditions applicable to the distribution of Arrowrock and Deer Flat water.

Collections Outside Districts

29. The District agrees that, if requested by the Secretary to do so, the Board of Control will collect charges due to the United States under Anderson Ranch Reservoir contracts from parties other than the four principal districts named in Article 17 hereof, and will pay over promptly to the United States such charges so collected, and where such organization or individuals receive such storage water from Anderson Ranch Reservoir through the transferred works in control of the Board of Control, the said Board, in accordance with the terms of such contracts, will enforce the payment of such charges by withholding delivery of water, and is authorized to do so. If, by reason of the fact of the lands involved being out of cultivation, or for any other reason, the withholding of water proves ineffectual in securing the payment of such charges, the Board of Control will report such cases to the authorized representative of the Secretary, for such action as the United States shall deem advisable.

Selection of Manager or Superintendent

30. The obligation of the Board of Control to employ a project manager or superintendent as provided in Article 61 of the contract between the United States and the District dated April 6, 1926, shall

continue until completion of the payment to the United States of all installments due to the United States under this contract.

Economical Use of Water

31. It is understood and agreed that if Anderson Ranch Reservoir is to be effective in reducing water shortages in dry cycles, it is essential that the District take every reasonable measure to effect economical and efficient use of water by every water user within the District; and the District agrees to take such measures. It is further understood and agreed that whenever wasteful, inefficient or uneconomical use of w ater is being made by a water user within the District, the District with the advice and cooperation of the Bureau of Reclamation will take such action as may be necessary to correct such wasteful, inefficient, or uneconomic use of water.

District to Use All Powers to Collect Charges

32. The District agrees it will cause to be levied and collected all necessary assessments, and will use all the powers and resources of the District, including the taxing power of the District, and the power to withhold delivery of water, to pay to the United States all charges provided in this contract in full on or before the day that the same become due.

Shortage of Water

33. On account of droughts, inaccuracy of distribution, or other causes, it is expected there will occur at times a shortage in

the quantity of storage water which normally can be made available from Anderson Ranch Reservoir, and in no event shall any liability accrue against the United States or any of its officers, agents, or employees for any damages, direct or indirect, arising from any such shortage; and the payments to the United States provided for herein shall not be reduced because of any such shortage or damage.

Losses in Running Stored Water to be Deducted

34. A pro rata share of such losses, if any, as may be incurred in running the Anderson Ranch Reservoir stored water from the reservoir to the head of the New York Canal will be charged to the District.

Contract to be Authorized by Electors and Confirmed by Court

35. The District agrees that, upon the execution of this contract, it will proceed promptly to secure the authorization of this contract by the electors of said District, and will secure a decree of the proper court of the State of Idaho approving and confirming this contract and decreeing and adjudging the same to be a lawful, valid and binding general obligation of the District, and decreeing the same to be lawful and valid, and promptly will apportion the benefits of this contract to the lands of the District and will secure a confirmation court decree confirming such apportionment as provided for in the Idaho statutes. The District shall furnish certified copies of such decrees to the Secretary. In the event that in the opinion of the Secretary satisfactory

confirmatory decrees are not promptly secured as herein provided, the Secretary may terminate this contract.

Waste Water, Seepage, and Return Flow Water Not Abandoned and Right Reserved to Recapture the Same

36. It is agreed and understood that the United States does not abandon or relinquish any of the waste, seepage or return flow water resulting from the use, application or conveyance of the said Anderson Ranch Reservoir water, but that the same is reserved and intended to be retained for the benefit of the Boise Project.

Assignment of Contract

37. No assignment or transfer of this contract, or any part hereof, or interest therein, shall be valid until approved by the Secretary. All rights for breach of this contract are reserved to the United States as provided in Section 3737 of the Revised Statutes of the United States.

Secretary the Arbiter -- Secretary's Acts, Decisions and Determinations Conclusive

38. In the event of disputes between the parties hereto arising out of this contract involving questions of fact, and in so far as the provisions hereof require a determination of fact to be made, the Secretary is hereby designated as the arbiter of such questions and as the one required to make such determination of facts; and his decision therein shall be conclusive and binding on the parties hereto.

In all acts, matters and determinations provided in this contract to be done, determined or decided by the Secretary or by the United States, it is agreed that the acts, decisions, findings and determinations by the Secretary shall be final and conclusive and shall be accepted as final and conclusive by all the parties to this contract and by all persons claiming any rights under or by virtue of this contract or in any wise based upon or arising out of this contract or any act or proceeding carried on thereunder.

Changes in Organization of District

39. While this contract is in effect no change will be made in the District, either by inclusion or exclusion of lands, by partial or total consolidation or merger with another district, by proceedings to dissolve, or otherwise, except upon the Secretary's written assent thereto.

Rules and Regulations

40. The Secretary reserves the right, so far as the purport thereof may be consistent with the provisions of this contract, to make rules and regulations and to add to and modify them, as may be deemed proper and necessary to carry out this contract and to supply necessary details of its administration, and, by suitable rules and regulations, to provide for the administration of the Anderson Ranch Reservoir and the water supply thereof as to any details of such administration not expressly covered by the terms of this contract; and the District agrees to observe such rules and regulations.

Representative of Secretary

41. It is agreed and understood that where this contract requires action by the Secretary, said action may be taken for and on behalf of the Secretary by his representative duly authorized in writing by the Secretary. Written notice of any such authority shall be mailed to the Board of Control within one week from the date of such authorization.

Obligation to Proceed Contingent Upon the Execution of Contracts in Form Satisfactory to the Secretary Covering the Full Amount Allocated to Irrigation

42. The obligation of the United States to proceed with the construction provided for under the provisions of Article 10 hereof is contingent upon the execution and confirmation of contracts in form satisfactory to the Secretary providing for the repayment to the United States of the full proportionate part of the cost of the Anderson Ranch Reservoir allocated to irrigation.

Substitution of Payette or Salmon River Water

43. It is agreed that in lieu of the water which the District is entitled to receive from the Boise River and its tributaries and the reservoirs thereon, or any part of such water, the United States, at the option of the Secretary, shall have the right to substitute an equal amount of water from the Payette River or the Salmon River, or in part from the Payette and in part from the Salmon, and in the event of such substitution the Secretary, upon the completion of the necessary tunnels and other works to such extent as may be necessary to convey such

R-648

Payette River or Salmon River water to the Boise River immediately above the government diversion dam, for the Arrowrock Division of the Boise Project, will make, by appropriate credits, such readjustment, if any, in the charges against the District as he shall then find to be equitable in view of the changed conditions then applicable to the water supply furnished for the District, but such readjustment, if any, shall not increase the financial obligations of the District under this contract nor reduce the amount of water which the District is entitled to receive under this contract.

Right to Include Obligations in Contract Under Reclamation Project Act of 1939

44. In the event that the District enters into an amendatory contract under the provisions of section 4 of the Reclamation Project Act of 1939 (53 Stat. 1187) for the purpose of securing the benefits of said section of said act, the right is reserved to the District to have included in such amendatory contract the construction charge obligations of the District under this contract, and in that event the then unaccrued portion of the charges for the costs incurred in the Arrowrock repairs shall be treated as part of the Arrowrock dam construction charges, as authorized by Act of April 22, 1940 (_____ Stat. _____).

Contingent Upon Appropriation or Allotments of Funds

45. The expenditure of any money or the performance of any work by the United States herein provided for which may require appropriations

of money by Congress or the allotment of funds, shall be contingent upon such appropriations or allotments being made. The failure of Congress so to appropriate funds, or the failure of an allotment of funds, shall not relieve the District from any obligations under this contract and no liability shall accrue to the United States in case such funds are not so appropriated or allotted.

Officials Not to Benefit

46. No Member of or Delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom, but this restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

Former Contracts Remain in Effect

47. All provisions of the former contracts between the United States and the District, including the contracts dated April 6, 1926, and December 20, 1935, to the extent that they are not inconsistent with the terms and provisions of this contract, shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed the day and year first above written.

Wilder Irrigation District

Sirs:

ESTIMATED YEARS COSTS AND BENEFITS TO THE WILDER IRRIGATION DISTRICT FROM THE ANDERSON RANCH RESERVOIR.

Average acre amount due the Bureau of Reclamation on the present construction cost of the Boise P roject January - 1941..$	54.00
Amount due on Arrowrock Refacing.....	3.60
Total.....	57.60

Assuming that Anderson Ranch Reservoir payments will start in four years and that the payments on the present construction will average $1.40 each year and on the Arrowrock resurfacing $0.18 - then

$1.40 + $0.18 X 4 .....$	6.32
Balance due per acre in 1945.....$	51.28

If Anderson Ranch Reservoir is built this can be figured as if it were spread over 40 years or per acre per year.....$ 1.28

On the present estimated cost of $10,300,000 for the Anderson Ranch Dam, the Wilder District's share will be $1,567,515 reduced by the Secretary's sale of 11.2% of Anderson water. This amount will be.....$1,391,953.00

If these charges are spread over 54,000 acres, the charge per acre will be .....$	25.78
If spread over 56,600 acres, the charge per acre will be.....$	24.59
Average construction cost using higher cost will be each year per acre.....$	.64
Average payment (40 years) as above.....$	1.28
Total construction payment per acre (40 years).....$	1.92

Estimated construction costs for 40 year period without Anderson Ranch are tabulated below:

	1941 to 1961	1961 to 1979	1979 to 1982
Present const. Repayment	$ 1.40	$ 1.40	$ 0
Arrowrock Refacing	.18	0	0
Total estimate per acre yearly	$ 1.58	$ 1.40	0

Estimated construction costs for 40 year period if Anderson Ranch Reservoir is built, are tabulated below:

	1941 to 1945	1945 to 1955	1955 to 1961	1961 to 1978	1978 to 1985
Present construction	$ 1.40	1.45	1.45	1.45	0
Arrowrock Refacing	.18	.18	.18	. 0	0
Anderson Ranch Reservoir	0	.29	.29	.47	1.92
Total estimated per acre yearly	$ 1.58	1.92	1.92	1.92	1.92

Estimate of Extra Water from Anderson Ranch Reservoir taken from Anderson Ranch Reservoir - report of June 5, 1940.

Table 3 on the report shows the following:

Years	Present Shortage Acre Feet	Remaining Shortage 382,000 a.f. Effective Capacity	Gain a.f.	Boise Project Gain 90%	Wilder Dist. Gain 33.71%	Gain Per A.
1895 to 1939 Average	62,000	5,000	47,000	42,300	14,300	.26
1932 to 1939 Average	119,000	14,000	105,000	94,500	32,000	.59

In the Anderson Ranch Reservoir report, a value of $5.00 per acre foot is used to arrive at the benefits. Using this value and taking the 45 year period of 1895 to 1939 the yearly benefits to the Wilder District will be:

14,000 X $5.00 ..... $ 70,000

If we take the period of 1923 to 1939, 17 years - the yearly benefits to the Wilder District will be: 32,000 X $5.00..... $ 160,000

Estimated Operation and Maintenance Costs with Anderson Ranch Reservoir are as follows:

Bureau of Reclamation Costs at Dam, yearly.....	$ 2,000
Extra Cost to Project due to longer irrigation season (Present time).....	$ 7,000
Total additional costs to Project.....	$ 9,000
Estimated costs per acre to Wilder District.....	$ 0.05

- - - - -

The above information was taken from the records of the Wilder Irrigation District and the Boise Project Board of Control, also from the Bureau of Reclamation report on Anderson Ranch Reservoir of June 1940.

I do hereby certify the information given above to be true to the best of my knowledge and belief.

W. H. Tucker

Licensed Engineer & Project Manager

Reclamation Department

~~WILDER IRRIGATION DISTRICT~~
~~Caldwell, Idaho~~

February 28th
1941

RECEIVED
FEB 28 1941
Department of Reclamation

To the Members of the Board of Directors
of
Wilder Irrigation District

Gentlemen:

Beg to acknowledge receipt of certified copies of the following, to wit:

1. Copy of the minutes of your Board of Directors of February 4, 1941, in which you approved the contract between the United States of America and the Wilder Irrigation District approved by the Secretary of the Interior January 13, 1941, and ordered the same filed, together with the request of certain engineers for surveys, maps, examinations, plans, and estimates of the cost of construction of Anderson Ranch Reservoir. substantially in form

2. A copy of the minutes of your Board of Directors of February 22nd 1941, included in which were resolutions No. 1 and No. 2; said resolution No. 2 embraced the general plan of the district to acquire a supplemental water supply for the irrigation of the lands within the Wilder Irrigation District.

3. A copy of the contract between the United States of America and the Wilder Irrigation District approved by the Secretary of the Interior January 13, 1941, and approved by your Board of Directors February 4, 1941, and ordered filed, included in the above mentioned resolution No. 2 and made a part of the said general plan.

4. Surveys, examinations, maps and plans of Anderson Ranch Reservoir made or caused to be made by R. J. Newell, a competent irrigation engineer of Boise, Idaho, together with the estimated cost of construction of said Anderson Ranch Reservoir prepared by or caused to be prepared by S. O. Harper, Chief Engineer of the Bureau of Reclamation of the United States of America.

5. A copy of studies and report prepared by Wm. H. Tuller, an irrigation engineer and Manager of the Boise Project, in which Project are included the lands of the Wilder Irrigation District, showing the annual benefits to the lands within said district from the purchase of the supplemental water supply and the annual cost thereof through a series of years.

I find that the application for the right to appropriate and store the water in said Anderson Ranch Reservoir located on the south fork of the Boise River has been approved by this Department on Feb 25 1941, and that Permit No 698 has been issued and included in the list of lands to be irrigated from said storage water in Anderson Ranch Reservoir are the lands within the Wilder Irrigation District.

I further find that when Anderson Ranch Reservoir has been constructed, practically all the feasible reservoir sites of Boise basin will have been occupied. It further appears that this reservoir with the other reservoirs (now in use in Boise Valley) would impound practically all the water available for storage in Boise River and its tributaries.

R-647

In conclusion, it should be stated that it is desirable that the above general plan be culminated, as under existing conditions and circumstances it seems very doubtful that in the visible future Wilder Irrigation District will be afforded another opportunity to acquire the much needed supplemental water supply for the lands in such district. Upon examination of all the matters presented, I further find that the said general plan is feasible and practicable and that the benefits accruing to the lands within the district in acquiring the rights to the storage water aforesaid will greatly exceed the cost thereof and I, therefore, approve the same.

Yours very truly,

Paragraph

WILDER IRRIGATION DISTRICT

MINUTES OF BOARD OF DIRECTORS

Board met in regular session.

Present - all of Directors towit: Frank L. Dickinson; Glenn M. Eidemiller; Thos. M. Harris; C. B. Lundy; J. L. Nicholes; Preacie Trunell; O. W. Bunton, President; and L. C. Knowlton, Secretary.

The following proceedings were had towit:

* * * * * * * * * * * * * * *

The following resolution was presented and unanimously adopted.

WHEREAS the Wilder Irrigation District for ten years last past has been negotiating with the United States Bureau of Reclamation endeavoring to acquire a supplemental water supply to the lands within said district and

WHEREAS such negotiations has resulted in the drafting of a contract between the United States of America and the Wilder Irrigation District approved by the Secretary of the Interior on January 13, 1941, and

WHEREAS said approved draft of the contract contains the terms and conditions agreed to by and between the United States of America and this district with reference to Anderson Ranch Reservoir

NOW THEREFORE be it resolved

1st. - that the contract approved by the Secretary of the Interior January 13, 1941, be and the same is hereby approved by this district and ordered filed.

2nd. - that S. O. Harper, Chief Engineer of the Bureau of Reclamation and R. J. Newell of Boise, Idaho, both competent irrigation engineers, be requested to file with this Board, estimates of the cost of construction of Anderson Ranch Reservoir and maps and plans and estimates properly certified by one or the other of said engineers.

* * * * * * * * *

On motion the Board adjourned to meet 7:00 P.M. February 27th 1941.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

Denver, Colorado
February 13, 1941

To The Board of Directors of
Wilder Irrigation District,
Caldwell, Idaho.

Gentlemen:

The following certificate is furnished in accordance with your request.

I do hereby certify that the estimated cost of Anderson Ranch Reservoir is as follows:

Right of Way, Clearing and Road Relocation	$1,200,000
Dam	6,500,000
Outlet	800,000
Spillway	1,800,000
Power Plant	2,400,000
Arrowrock Outlets	400,000
	$13,100,000

I do hereby certify that the surveys and examinations of the Anderson Ranch Reservoir, together with the estimated cost of construction thereof as above set forth, and the maps and plans of said dam and reservoir were made by me or under my direction and that I believe the same to be true and correct.

S. O Harper
Chief Engineer
Bureau of Reclamation

RECEIVED
JAN 28 1941
Department of ...

Estimated years costs and benefits to the Wilder Irrigation District from the Anderson Ranch Reservoir.

Average acre amount due the Bureau of Reclamation on the present construction cost of the Boise Project January 1941	$54.00
Amount due on Arrowrock Refacing.	3.60
Total	$57.60

Assuming that Anderson Ranch Reservoir payments will start in four years and that the payments on the present construction will average $1.40 each year and on the Arrowrock resurfacing $0.18 - then

$1.40 + $0.18 X 4	$ 5.32
Balance due per acre in 1945.	$51.28

If Anderson Ranch Reservoir is built this can be figured as if it were spread over 40 years or per acre per year. . $ 1.28

On the present estimated cost of $10,300,000 for the Anderson Ranch Dam, the Wilder District's share will be $1,867,515 reduced by the Secretary's sale of 11.2% of Anderson Water. This amount will be. . . $1,391,953.

If these charges are spread over 54,000 acres, the charge per acre will be . . . . . $ 25.78

If spread over 56,600 acres, the charge per acre will be . . . . . $ 24.59

Average construction cost using higher cost will be each year per acre. . . . . $ .64

Average payment (40 years) as above . . . . . $ 1.28

Total construction payment per acre (40 years) . . . $ 1.92

R-692

Estimated construction costs for 40 year period without Anderson Ranch are tabulated below:

	1941 to 1961	1961 to 1979	1979 to 1982
Present construct. Repayment	$ 1.40	$ 1.40	$ 0
Arrowrock Refacing	.18	00	0
Total estimate per acre yearly	$ 1.58	$ 1.40	0

Estimated construction costs for 40 year period if Anderson Ranch Reservoir is built, are tabulated below:

	1941 to 1945	1945 to 1955	1955 to 1961	1961 to 1978	1978 to 1985
Present construction	$1.40	1.45	1.45	1.45	0
Arrowrock Refacing	.18	.18	.18	.0	0
Anderson Ranch Reservoir	0	.29	.29	.47	1.92
Total estimated per acre yearly	$1.58	1.92	1.92	1.92	1.92

Estimate of Extra Water from Anderson Ranch Reservoir taken from Anderson Ranch Reservoir - report of June 5, 1940.

Table 3 of the report shows the following:

YEARS	Present Shortage Acre Feet	Remaining Shortage 382,000 a.f. Effective Capacity	Gain a.f.	Boise Project 90% Gain	Wilder Dist. 33.71% Gain	Gain per A.
1895 to 1939 Average	62,000	5,000	47,000	42,300	14,300	.86
1932 to 1939 Average	119,000	14,000	105,000	94,500	32,000	.59

In the Anderson Ranch Reservoir report a value of $5.00 per acre foot is used to arrive at the benefits. Using this value and taking the 45 year period of 1895 to 1939 the yearly benefits to the Wilder District will be . . . . . 14,000 X $5.00 = $ 70,000

If we take the period of 1923 to 1939, 17 years - the yearly benifits to the Wilder District will be 32,000 X $5.00 = $ 160,000

Estimated Operation and Maintenance Costs with Anderson Ranch Reservoir are as follows:

Bureau of Reclamation Costs at Dam yearly	$ 2,000
Extra Cost to Project due to longer irrigation season (Present time)	7,000
Total additional costs to Project	$ 9,000
Estimated costs per acre to Wilder District.	$ 0.06

NEW YORK IRRIGATION DISTRICT

-----:-----

Resolution

In Re Revised Description

of

District Boundaries and Irrigable Areas

-----:-----

The assistant secretary presented the following schedules prepared by him under the direction of the district's attorney:

Revised List of Lands Within the Boundaries of the New York Irrigation District -- July 1, 1941, containing:

1. A list of the lands within the boundaries of the said district, as originally declared by the Board of County Commissioners of Ada County, Idaho, on May 10, 1926, as shown by the said county commissioners' Minutes, Book E, page 65, and recorded in Book 10 of Miscellaneous at page 443 in the office of the recorder of said county.

2. A notation of all changes in said boundaries made by order of the board of directors of said district and confirmation decrees of the District Court of the Third Judicial District of the State of Idaho in and for Ada County.

3. Alternative and corrected descriptions to conform to the identifying designations shown on the public surveys and on recorded plats of subdivisions.

4. The gross area of the respective tracts of land.

5. The area of the respective tracts of land classified as irrigable, according to the determinations and official records of the said district.

After a careful examination of said list, the board unanimously adopted the following resolution:

BE IT RESOLVED BY THE BOARD OF DIRECTORS OF THE NEW YORK IRRIGATION DISTRICT, That the

Revised List of Lands Within the Boundaries of the New York Irrigation District -- July 1, 1941,

heretofore prepared by order of the board and this day presented by the assistant secretary, be and the same is hereby approved as a revised and corrected description of all lands within the boundaries of the district and a correct statement of the areas therein now classified as irrigable on the records of the district and subject to the apportionment and assessments of benefits heretofore made under the Anderson Ranch Reservoir contract. All other areas within the district potentially irrigable are contingently assessable under said Anderson Ranch Reservoir contract under the following rule hereby adopted:

> Lands within the boundaries of the district not classified on said list as irrigable may upon request of the owners and approval of the board receive the benefits of the Anderson Ranch Reservoir contract, upon consenting to the apportionment of benefits under the said contract and paying or assuming the assessments thereunder upon the same acreage basis as lands now classified as irrigable.

NEW YORK IRRIGATION DISTRICT

STATE OF IDAHO,)
) ss.
County of Ada.)

I, W. J. ABBS, the duly appointed, qualified, and acting Assistant Secretary of the New York Irrigation District, do hereby certify that the attached

REVISED LIST OF LANDS
WITHIN THE BOUNDARIES OF THE NEW YORK IRRIGATION DISTRICT
July 1, 1941

contains:

1. A list of the lands within the boundaries of the said district, as originally declared by the Board of County Commissioners of Ada County, Idaho, on May 10, 1926, as shown by the said county commissioners' Minutes, Book M, page 65, and recorded in Book 10 of Miscellaneous at page 443 in the office of the recorder of said county.

2. A notation of all changes in said boundaries made by order of the board of directors of said district and confirmation decrees of the District Court of the Third Judicial District of the State of Idaho in and for Ada County.

3. Alternative and corrected descriptions to conform to the identifying designations shown on the public surveys and on recorded plats of subdivisions.

4. The gross area of the respective tracts of land.

5. The area of the respective tracts of land classified as irrigable, according to the determinations and official records of the said district.

I further certify that said list was presented to the board of directors of said district at its regular meeting on July 1, 1941, and was adopted and approved by said board as the official list of lands within the boundaries of said district, as shown by copy of resolution attached thereto, the same being a full, true, and correct copy of said resolution, as shown by the records of said

district (Book 8 of Minutes at page 89) in my custody.

WITNESS, My hand and the seal of said district, this 2nd day of July, 1941.

(SEAL)

W. J. ABBS

Assistant Secretary.

Form 23

STATE OF IDAHO

DEPARTMENT OF RECLAMATION

BOISE, IDAHO

REPORT OF ENGINEER

Permit No. R-698

This proof is for Beneficial Use In Water District No.

1. Name of applicant U.S.Dep't. of Interior, Bureau of Rec'l. P.O.Box 937, Boise, Idaho
2. Source of water supply: South Fork of the Boise River
3. Location of point of diversion: Is in the Lot 4 of Section 1
   T. 1 S. R. 8 E., B.M. County of Elmore
4. Describe works as they exist, giving dimensions and capacities of same:
5. Water is used for: Irrigation
6. State whether or not water has been turned into works of diversion:
7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

   Irrigation of cultivated lands of the Boise Federal Reclamation Project in Ada and Canyon counties as more particularly described in Certificate of Completion of Works issued in connection with Permit No. R-698, including all lands for contracts under the Federal Reclamation laws for space in Anderson Ranch Reservoir.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks:

This examination was made on the 26 day of April, 19 56

(Signed) E. N. Humphreys
Examiner.

R-698

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Re: Permit No. R-698

Mr. H. T. Nelson, Regional Director
U. S. Bureau of Reclamation
P. O. Box 937
Boise, Idaho

Dear Mr. Nelson:

Herewith License and Certificate of Water Right issued under Permit No. R-698 confirming the right to the use of 493.161 acre-feet of water from South Fork of the Boise River with point of diversion in Lot 4, Section 1, Township 1 South, Range 8 East of the Boise Meridian, with priority of December 9, 1940, for irrigation and such power as can be generated by use of water released for irrigation of all lands for contracts under the Federal Reclamation laws for space in Anderson Ranch Reservoir.

Also enclosed is departmental receipt No. 28278 for $5.00 issued for payment of License fee.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Attn: Edna P. Rutledge, Chief Clerk

Dear Mr. Kulp:

Enclosed is a voucher in the amount of $5.00 to cover the cost of issuing Anderson Ranch Reservoir water appropriation permit No. R-698, as mentioned in your letter of October 24, 1956.

Please sign the voucher where indicated and return it to this office to be processed for payment.

Very truly yours,
M. T. Nelson
Regional Director

RE: Permit No. R-698

Mr. H. W. Nelson
Regional Director
Bureau of Reclamation
Box 937
Boise, Idaho

Dear Mr. Nelson:

Upon receipt of the statutory fee of $5.00 a license can be issued, under Permit No. R-698 for irrigation and such power as can be generated by use of water released for irrigation use, for 493,161 acre feet of water.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION
Boise Project, Idaho

CONTRACT WITH CAPITOL VIEW IRRIGATION DISTRICT CONCERNING CONSTRUCTION OF ANDERSON RANCH RESERVOIR AND RELATED MATTERS

THIS AGREEMENT, made this 7th day of July, 1954, under the provisions of the act of Congress of June 17, 1902 (32 Stat. 388) and acts amendatory thereof or supplementary thereto, and particularly the act of August 4, 1939 (53 Stat. 1187), known as the Reclamation Project Act of 1939, together hereinafter referred to as the Federal Reclamation Laws, between THE UNITED STATES OF AMERICA, hereinafter referred to as the United States, acting for this purpose through the Secretary of the Interior, hereinafter referred to as the Secretary, and the CAPITOL VIEW IRRIGATION DISTRICT, an irrigation district organized under the laws of the state of Idaho and located in Ada County, Idaho, hereinafter referred to as the District;

WITNESSETH, THAT:

EXPLANATORY RECITALS

2. WHEREAS, under the authority of the Federal Reclamation Laws, the United States constructed that certain irrigation project in the state of Idaho commonly known as the Boise Project, and also known as the Boise reclamation project; and

3. WHEREAS, the water users receiving water from the District's canal have suffered a shortage of water during certain irrigation seasons in the past and, in order to improve their water supply, the District desires to enter into a contract with the United States for certain additional storage water to be made available by Anderson Ranch Reservoir;

NOW, THEREFORE, in consideration of the mutual and dependent stipulations and covenants herein contained, it is hereby mutually agreed by and between the parties hereto as follows:

CONSTRUCTED WORKS

4. The United States has constructed on the south fork of the Boise River a dam and reservoir, known as the Anderson Ranch Dam and Anderson Ranch Reservoir, designed to provide a storage capacity of approximately five hundred thousand (500,000) acre-feet, and is enlarging the outlet gates at Arrowrock Dam with a view to providing improved flood control facilities, and has constructed a powerplant in connection with the said Anderson Ranch Dam.

GENERAL REPAYMENT OBLIGATION OF THE DISTRICT

5. As its general repayment obligation under this contract, the District shall pay to the United States, in the instalments hereinafter provided, six thousand four hundred dollars ($6,400).

TERMS OF PAYMENT OF CONSTRUCTION INSTALMENTS

6. The District's general repayment obligation shall be spread in forty equal annual instalments of one hundred sixty dollars ($160) each. Each year's instalment on account of the general repayment obligation under this contract shall become due and payable from the District to the United States one-half on July 1 and one-half on December 31 of the year for which it is applicable. Notwithstanding the later execution of this contract, the instalments shall begin for the year 1952. Upon execution of this contract, the Secretary shall give notice of the then accrued instalments and the District shall pay the amount on or before the date established in said notice.

DISTRICT'S PERCENTAGE OF STORED WATER
FROM ANDERSON RANCH RESERVOIR

7. Subject to the holdover rights provided for in article 11 hereof, and the allowance of similar holdover rights provided for by contracts with other contracting districts and companies entitled to receive stored water from Anderson Ranch Reservoir, the United States, in the manner and subject to the conditions provided in this contract, will release for the use of the District each year (as ordered by the District) as nearly as is reasonably practicable, eleven hundredths per cent (0.11%) of the stored water actually available from said reservoir that year for irrigation purposes, as determined by the Secretary. It is the District's responsibility to arrange for the diversion and carriage of said released water to its lands, including an arrangement with the Farmers' Union Ditch Company to transport the said released water in that company's canal.

OPTIONAL WITH SECRETARY TO MEASURE AND DELIVER ANDERSON STORAGE
EITHER AT OUTLETS OF ANDERSON RANCH RESERVOIR
OR AT OUTLETS OF ARROWROCK RESERVOIR

8. At the option of the Secretary, the Anderson Ranch Reservoir stored water to which the District is entitled may be measured and delivered to or for the District either at the outlets of the Anderson Ranch Reservoir or at the outlets of the Arrowrock Reservoir.

SECRETARY AUTHORIZED TO DETERMINE THE ADMINISTRATION
OF THE RESERVOIRS AND THE HOLDING OF WATER THEREIN

9. In all matters not expressly covered by the provisions of this contract, the Secretary is authorized to determine the proper administration of the said Anderson Ranch Reservoir and Arrowrock Reservoir and the water supply therefrom, and his authority shall include but not be limited to the authority to determine the length of time and the extent to which

the stored water belonging to either of said reservoirs may be held in the other without injury to the holders of rights to water therefrom.

ALL RIGHTS IN RESERVOIR OF EQUAL PRIORITY

10. It is agreed that all parties contracting with the United States for stored water for irrigation purposes from said Anderson Ranch Reservoir shall be entitled to proportionate rights to stored water available for irrigation purposes from said reservoir and that the rights of the District under this contract shall be in all respects on a par as to priority and dignity of rights with the rights of the other contracting parties, except as to holdover rights, which holdover rights shall be as provided for in article 11 hereof.

HOLDOVER RIGHTS AND RESERVATIONS FOR POWER AND FLOOD CONTROL AND TEMPORARY HOLDING IN ONE RESERVOIR OF WATER BELONGING TO ANOTHER

11. The rights provided for in this article will be referred to as the District's holdover rights. The District will be allowed to hold over in Anderson Ranch Reservoir from year to year stored water to which it may be entitled in any irrigation season, but does not use during such season, and will be given credit therefor the following year or years subject to the following conditions and limitations:

(a) The District shall not be entitled to hold over to its credit in said reservoir at any one time more stored water than can be stored, subject to paragraph (g) of this article, in twenty-two hundredths per cent (0.22%) of the available storage capacity of the reservoir usable for irrigation; that is to say, twenty-two hundredths per cent (0.22%) of the capacity thereof other than that reserved for control of flash floods and that reserved for power.

(b) Whenever the combined amount of storage water in the Arrowrock Reservoir and the Anderson Ranch Reservoir reaches a point where there remains in the two reservoirs only 45,000 acre-feet unfilled capacity, and additional water shall be available for storage, then such additional storable water shall be considered stored in reservoir capacity made available therefor by reducing and eliminating holdover storage in the following manner: Water shall be considered released from holdover storage of the contracting party having on hand the largest amount of holdover storage water in per cent of its maximum holdover storage as fixed by (a) of this article until such per cent is reduced to that of the party having on hand the next highest per cent, then from both parties' holdover storage, etc., until no party has holdover storage on hand. Any holdover right to and interest in water considered released under this paragraph shall be extinguished and terminated.

(c) It is fully agreed and understood that 75,000 acre-feet of the initial capacity of the Anderson Ranch Reservoir, and such water as can be stored therein, is reserved to the United States as dead storage and removable storage for power purposes, and that the removable part of the water stored in said 75,000 acre-feet of initial capacity may be held by the United States for release for power development purposes after the end of the irrigation season. Anderson Ranch Reservoir stored waters released for power production while Arrowrock Reservoir is not full, shall be considered stored in Arrowrock Reservoir, and in equal amounts may be subsequently replaced in Anderson Ranch Reservoir by storing therein waters storable in Arrowrock Reservoir, provided such replacement is effected prior to the next spill at Arrowrock Reservoir over the wasteway thereof.

(d) It is understood and agreed that a combined total of 45,000 acre-feet of empty storage space shall be kept available in the Anderson Ranch and Arrowrock Reservoirs for control of flash floods, except when used for control of such floods. Of water temporarily impounded in said 45,000 acre-feet capacity, when released, eleven hundredths per cent (0.11%) of it, or any part of said percentage, may be diverted for the use of the District if it so desires.

(e) It is further understood and agreed that for flood control purposes it is most desirable that the empty storage space should be maintained in Arrowrock Reservoir rather than in Anderson Ranch Reservoir, and that the attempt will be made, so far as practicable, to keep the empty storage space in Arrowrock Reservoir so that it may be available to control floods from the largest possible watershed. With this purpose in view and for the purpose of making better use of the available water supply for power and irrigation purposes, storage water belonging to the Arrowrock Reservoir or the Deer Flat Reservoir may be held temporarily in the Anderson Ranch Reservoir, or vice versa, instead of holding the same in the reservoir in which it belongs on the basis of priority of right; but the temporary holding of such stored water in the Anderson Ranch Reservoir shall not in any way affect the rights of the several districts to the water in question, and such rights shall be considered to be the same as if said stored water were held at all times in the reservoir in which it properly belongs on the basis of priority of right. Storage water belonging in Arrowrock Reservoir or Deer Flat Reservoir but temporarily held in Anderson Ranch Reservoir will be turned down to the reservoir in which it belongs at or prior to the time that water available for storage in the Anderson

Ranch Reservoir becomes available in sufficient quantity to fill the full storage capacity thereof other than the capacity thereof reserved exclusively for control of flash floods.

(f) For the purpose of a more prompt and accurate control of the water supply at canal headgates, and other beneficial purposes including but not limited to the carrying of peak loads at the powerplant at the Anderson Ranch Reservoir, stored water belonging in Anderson Ranch Reservoir, or to the holders of rights in said water, and holdover storage or storage otherwise credited to the Anderson Ranch Reservoir, may likewise be held temporarily in unused space in Arrowrock Reservoir without in any way impairing or affecting the rights of the parties entitled to such water; but such water shall not remain in Arrowrock Reservoir at any time when such use of Arrowrock capacity would injuriously affect the holders of Arrowrock storage rights in the benefit or enjoyment of such Arrowrock rights.

(g) In the filling of the available Anderson Ranch Reservoir capacity, except that reserved for power which will be filled first and except that amount of 45,000 acre-feet capacity reserved for control of flash floods, the reservoir management will endeavor so to handle the filling thereof that the same will serve both for the benefit of irrigation and for the benefit of flood control, and may for flood control purposes evacuate so much of its capacity as is deemed advisable with such releases to be first from holdover storage water on hand, in the same manner and with the same effect as provided in (b) of this article.

(h) Holdover storage will be charged its pro rata share of evaporation and seepage losses.

GENERAL OBLIGATION OF THE DISTRICT

12. The District's obligation hereunder is a general repayment obligation under which the District as a whole is obligated to pay to the United States the full amount or amounts herein agreed upon according to the terms stated, notwithstanding any individual default in the payment to the District by any individual water user of any assessments, tolls, or other charges levied by the District; and while the District, so far as its powers under the laws of Idaho permit, may distribute said obligation among its landowners in a manner that takes into account the productivity of the various classes of lands of its landowners and the benefits accruing to said lands by reason of the construction herein provided, no such distribution of said obligation shall in any manner be deemed to relieve the District, or any of its water users or any land receiving water from its canal, of the District's general obligations to the United States.

COST OF OPERATION AND MAINTENANCE TO BE PAID IN ADVANCE

13. (a) For the year in which the first general repayment obligation instalment becomes due, as provided in article 6 above, and for each year thereafter, the District will pay to the United States in advance, in the manner hereinafter provided, its share of the operation and maintenance costs of Anderson Ranch Reservoir. Payment shall be made on the basis of annual estimates made by the Secretary. Such annual estimates, hereinafter referred to as the operation and maintenance charge notice, shall contain a statement of the estimated cost to be incurred during the calendar year covered by said notice for the operation and maintenance of Anderson Ranch Reservoir, a statement of the part of said estimated costs

allocated to the storage of water for irrigation, and the District's share thereof. The District's share shall be eleven hundredths per cent (0.11%) of the part of said estimated costs allocated by the Secretary to the storage of water for irrigation.

(b) Such operation and maintenance charge notice shall be given to the District on or before April 1 of the calendar year covered by said notice. The District agrees to pay its share of the estimated cost of operation and maintenance allocated to the storage of water for irrigation as set out in said notice on or before May 1 of the year in which said notice is given. Whenever, in the opinion of the Secretary, funds so advanced will not be adequate to meet the District's share of costs of operating and maintaining Anderson Ranch Reservoir, he may give to the District a supplemental operation and maintenance charge notice stating therein the amount of the District's share, determined in the manner above provided, of the additional amount required for such operation and maintenance. The District shall pay its share of such additional amount, as set forth in said supplemental notice, on or before the due date fixed by the Secretary in said notice. If funds advanced by the District under this article exceed the District's share of the actual cost of operation and maintenance for the year for which advanced, as determined conclusively by the Secretary, the excess will be credited to operation and maintenance charges due from the District subsequent to the determination of such excess.

(c) There shall be included in the operation and maintenance costs covered by the provisions of this article an annual equitable charge, as determined by the Secretary, to cover general expenses and the cost of

bookkeeping, accounting, clerical and legal work of the Bureau of Reclamation in connection with the accounts and collections for storage water from Anderson Ranch Reservoir.

(d) Any expense incurred by the United States in running or protecting the Anderson Ranch Reservoir water in the channel of Boise River or the south fork thereof or in diverting the same into the canals that transport water for the District shall be considered a part of the cost of operation and maintenance of the Anderson Ranch Reservoir and charged accordingly in like manner as other operation and maintenance expenses in connection with said reservoir.

RELEASE OF WATER IN CASE OF DEFAULT

14. It is further agreed and understood that the payment of the construction and operation and maintenance charges at the rates and upon the terms and conditions provided for herein is a prerequisite to the right to receive water from any of the works constructed by the United States; and no irregularity in levying charges or assessments by the District, or lack of authority in the District, whether affecting the validity of District assessments or not, and no water user of the District, or landowner under the canal of the District, shall have any right to demand or receive storage water from storage works constructed by the United States hereunder, unless construction and operation and maintenance charges at the rates and upon the terms and conditions provided for herein have been paid by the District to the United States or its successors, and such landowner's or water user's pro rata share thereof paid by such landowner or water user to the District. No water from the water supply provided for in this contract shall be delivered to or for

the District or any landowner or water user of the District while the District is in arrears in the advance payments to the United States of operation and maintenance charges provided for in article 13 or in arrears in the payment of any other operation and maintenance charges due to the United States, or more than twelve (12) months in arrears in the payment to the United States of any construction charges or general repayment obligation instalments provided for in article 6 of this contract, or more than twelve (12) months in arrears in the payment of any other construction charge instalments due to the United States. The District agrees that it will refuse to deliver water to any lands or parties which are in arrears in the advance payment of operation and maintenance charges, due from said lands or parties to the United States or to the District, or to any lands or parties which are in arrears more than twelve (12) months in the payment of the amounts due from said lands or parties to the United States or to the District for the construction or general repayment obligation instalments due from the District to the United States under this or any other contract. The provisions of this article are not exclusive and shall not in any manner prevent the United States from exercising any other remedy given by this contract or by law to enforce the collection of any payments due under the terms of this contract.

PENALTY FOR DELINQUENT PAYMENTS

15. In the event that any payment provided for in this contract is not made on or before the date that such payment is due and payable, there shall be added to the amount unpaid a penalty of one-half of one per cent (1/2%) on the day following the due date, and there shall be added a like

penalty of one-half of one per cent (1/2%) of said unpaid amount on the first day of each calendar month thereafter so long as such default shall continue.

TITLE TO RESERVOIR IN THE UNITED STATES

16. Pursuant to the provisions of section 6 of the act of June 17, 1902 (32 Stat. 388), title to the Anderson Ranch Reservoir shall remain in the United States until otherwise provided by the Congress.

POWER RESOURCES TO REMAIN PERPETUALLY IN THE UNITED STATES

17. The rights and resources which may be used or useful for the development of power, and any plant or plants and appurtenant structures and facilities which may be now or hereafter constructed by or under the authority of the United States which may be used or useful for the development of hydroelectric power, are hereby reserved to and shall be and remain in the exclusive control, possession and ownership of the United States. All revenues, including miscellaneous revenues from or incident to the establishment or use of powerplants or appurtenant structures and facilities, and from the use, sale or other disposal of power in any form, shall be and remain the property of the United States and shall be disposed of as provided by law.

OPERATION AND MAINTENANCE OF WORKS BY THE UNITED STATES

18. The works constructed by the United States under the provisions of article 4 above will be operated and maintained by the United States as a part of the reserved works of the Arrowrock Division of the Boise Project and the District's share of the cost of operation and maintenance of said works shall be paid by the District as provided in article 13 above.

ECONOMICAL USE OF WATER

19. (a) It is understood and agreed that if Anderson Ranch Reservoir is to be effective in reducing water shortages in dry cycles, it is essential that the District take every reasonable measure to effect economical and efficient use of water by every water user receiving water from the District's canal; and the District agrees to take such measures. It is further understood and agreed that whenever wasteful, inefficient or uneconomical use of water is being made by a water user receiving water from the District's canal, the District, with the advice and cooperation of the Bureau of Reclamation, will take such action as may be necessary to correct such wasteful, inefficient, or uneconomic use of water.

(b) The District agrees to distribute storage water made available to the District under the provisions of this contract and to use the same only upon lands under the District's canal, except that not to exceed twenty per cent (20%) of the water provided to the District under terms of this contract each year may be made available to the Farmers' Union Ditch Company as payment for transportation of the stored water in the main canal of the Farmers' Union Ditch Company, and subject to the condition that such water shall not be furnished to any one landowner in amounts in excess of the amounts provided in the Federal Reclamation Laws.

DISTRICT TO USE ALL POWERS TO COLLECT CHARGES

20. The District agrees it will cause to be levied and collected all necessary assessments, and cause to be fixed or established and collected all necessary charges, rates or tolls and will use all powers and resources of the District, including the power to withhold delivery of water, to collect and pay to the United States all charges provided in this contract in full on or before the day that the same become due.

SHORTAGE OF WATER

21. On account of drought, inaccuracy of distribution, or other causes, it is expected there will occur at times a shortage in the quantity of storage water which normally can be made available from Anderson Ranch Reservoir, and in no event shall any liability accrue against the United States or any of its officers, agents, or employees for any damages, direct or indirect, arising from any such shortage; and the payments to the United States provided for herein shall not be reduced because of any such shortage or damage.

LOSSES IN RUNNING STORED WATER TO BE DEDUCTED

22. A pro rata share of such losses, if any, as may be incurred in running the Anderson Ranch Reservoir stored water from the reservoir to the head of the Farmers' Union Ditch Company will be charged to the District.

NO OBLIGATION TO DELIVER WATER IF PAYMENTS IN ARREARS AND SECRETARY MAY TERMINATE CONTRACT

23. It is expressly understood and agreed that the United States shall not be obliged to deliver or release any water to or for said District or the landowners thereunder or stockholders thereof at any time when the District is in default in any of the payments herein agreed to be made, and should any of the payments herein agreed to be made by the District to the United States remain unpaid for more than twelve (12) months after the same become due, the Secretary at his option, after thirty (30) days' notice to the District, may terminate this contract, and after such termination the District shall have no further interest or right of any nature or kind whatsoever in the water supply provided for in this contract. It is expressly understood and agreed that the instalments herein agreed to be paid by the District would be a fair and reasonable

rental price for the water supply provided for herein, and that in case of any such termination of the contract any instalments or payments theretofore made by the District shall be held and considered to be the rental price for the use and benefit of such stored water as the District shall have received or used prior to such termination.

WASTE WATER, SEEPAGE, AND RETURN FLOW WATER NOT ABANDONED AND RIGHT RESERVED TO RECAPTURE THE SAME

24. It is agreed and understood that the United States does not abandon or relinquish any of the waste, seepage or return flow water resulting from the use, application or conveyance of the said Anderson Ranch Reservoir water, but that the same is reserved and intended to be retained for the benefit of the Boise Project.

ASSIGNMENT OF CONTRACT

25. No assignment or transfer of this contract, or any part hereof, or interest therein, shall be valid until approved by the Secretary. All rights for breach of this contract are reserved to the United States as provided in section 3737 of the revised statutes of the United States.

SECRETARY THE ARBITER—SECRETARY'S ACTS, DECISIONS AND DETERMINATIONS CONCLUSIVE

26. In the event of disputes between the parties hereto arising out of this contract involving questions of fact, and in so far as the provisions hereof require a determination of fact to be made, the Secretary is hereby designated as the arbiter of such questions and as the one required to make such determination of facts; and his decision therein shall be conclusive and binding on the parties hereto. In all acts, matters and determinations provided in this contract to be done, determined or decided

R. 698

by the Secretary or by the United States, it is agreed that the acts, decisions, findings and determinations by the Secretary shall be final and conclusive and shall be accepted as final and conclusive by all the parties to this contract and by all persons claiming any rights under or by virtue of this contract or in anywise based upon or arising out of this contract or any act or proceeding carried on thereunder.

RULES AND REGULATIONS

27. The Secretary reserves the right, so far as the purport thereof may be consistent with the provisions of this contract, to make rules and regulations and to add to and modify them, as may be deemed proper and necessary to carry out this contract and to supply necessary details of the administration, and, by suitable rules and regulations, to provide for the administration of the Anderson Ranch Reservoir and the water supply thereof as to any details of such administration not expressly covered by the terms of this contract; and the District agrees to observe such rules and regulations.

REPRESENTATIVE OF SECRETARY

28. It is agreed and understood that where this contract requires action by the Secretary, said action may be taken for and on behalf of the Secretary by his representative duly authorized in writing by the Secretary. Written notice of any such authority shall be mailed to the District within one week from the date of such authorization.

SUBSTITUTION OF PAYETTE OR SALMON RIVER WATER

29. It is agreed that in lieu of the water which the District is entitled to receive from the Boise River and its tributaries and the reservoirs thereon, or any part of such water, the United States, at the option of the Secretary, shall have the right to substitute an equal amount of water from the Payette River or the Salmon River, or in part from the Payette and in part from the Salmon, and in the event of such substitution the Secretary, upon completion of the necessary tunnels and other works to such extent as may be necessary to convey such Payette River or Salmon River water to the Boise River immediately above the government diversion dam, for the Arrowrock Division of the Boise Project, will make, by appropriate credits, such readjustment, if any, in the charges against the District as he shall then find to be equitable in view of the changed conditions then applicable to the water supply furnished for the District, but such readjustment, if any, shall not increase the financial obligations of the District under this contract nor reduce the amount of water which the District is entitled to receive under this contract.

CONTINGENT UPON APPROPRIATION OR ALLOTMENT OF FUNDS

30. The expenditure of any money or the performance of any work by the United States herein provided for which may require appropriations of money by the Congress or the allotment of funds, shall be contingent upon such appropriations or allotments being made. The failure of the Congress so to appropriate funds, or the failure of an allotment of funds shall not relieve the District from any obligations under this contract and no liability shall accrue to the United States in case such funds are not so appropriated or allotted.

R-698

OFFICIALS NOT TO BENEFIT

31. No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom, but this restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed the day and year first above written.

Department of Reclamation

Contract with Boise-Kuna Irrigation District concerning construction of Anderson Ranch Reservoir and related matters

THIS AGREEMENT, Made this 1st day of August, 1941, under the provisions of the Act of Congress of June 17, 1902 (32 Stat. 388) and acts amendatory thereof or supplementary thereto, and particularly the Act of August 4, 1939 (53 Stat. 1187), known as the Reclamation Project Act of 1939, together hereinafter referred to as the Federal Reclamation Law, between the UNITED STATES OF AMERICA, hereinafter referred to as the United States, acting for this purpose through John J. Dempsey Under Secretary of the Interior, hereinafter referred to as the Secretary, and the BOISE-KUNA IRRIGATION DISTRICT, an irrigation district organized under the laws of the State of Idaho and located in Canyon and Ada Counties, Idaho, hereinafter referred to as the District;

WITNESSETH:

Explanatory Recitals

2. WHEREAS, under the authority of the Federal Reclamation Laws, the United States constructed that certain irrigation project in the State of Idaho commonly known as the Boise Project, and also known as the Boise Reclamation Project; and

3. WHEREAS, the United States and the District entered into a contract dated March 20, 1926, as amended by a contract dated October 11, 1940, hereinafter referred to as the Government-District contract; and

4. WHEREAS, the Government-District contract provides, among other things, for the payment by the District of a part of the expenditures made by the United States in the construction of said Boise Project; and

5. WHEREAS, the water users within the Arrowrock Division of the Boise Project have suffered a shortage of water during certain irrigation seasons in the past and, in order to improve their water supply, desire the construction of additional storage capacity; and

6. WHEREAS, the Secretary has caused investigations to be made of a proposed reservoir on the South Fork of the Boise River at or near the Anderson Ranch site, of approximately Five Hundred Thousand (500,000) acre-feet capacity, hereinafter referred to as the Anderson Ranch Reservoir, and the District, together with the other irrigation districts of the Arrowrock Division of the Boise Project, has requested the construction thereof; and

7. WHEREAS, the total cost of the proposed Anderson Ranch Reservoir, of sufficient size to create a storage reservoir of approximately 500,000 acre-feet capacity, and appurtenant works including facilities for the generation of electrical power at Anderson Ranch Reservoir, and related flood control improvements at Arrowrock Reservoir, is estimated to be the sum of $13,100,000, of which $400,000 is the estimated cost of the flood control improvements at Arrowrock Reservoir and $2,400,000 is the estimated cost of the power plant, and of which sum of $13,100,000 the proportionate allocation for the storage of water for irrigation is $4,650,000, the proportionate allocation for flood

control is $5,050,000, and the proportionate allocation for the generation of electrical power, (including the estimated cost of the power plant) is $3,400,000; and

8. WHEREAS, that portion of the actual cost of the Anderson Ranch Reservoir allocated to irrigation is the proportionate part of the Anderson Ranch Reservoir cost (exclusive of the cost of the power plant and of the Arrowrock flood control improvements) that $4,650,000 is of $10,300,000; and

9. WHEREAS, the District desires to enter into a contract with the United States for certain additional storage water to be made available by said Anderson Ranch Reservoir.

NOW THEREFORE, In consideration of the mutual and dependent stipulations and covenants herein contained, it is hereby mutually agreed by and between the parties hereto as follows:

Works To Be Constructed

10. The United States, subject to article 42 and article 45 of this contract, will construct, on the South Fork of the Boise River at or near the Anderson Ranch site, a dam and reservoir (to be known as the Anderson Ranch Dam and Anderson Ranch Reservoir) designed to provide a storage capacity of approximately Five Hundred Thousand (500,000) acre-feet, and, at its option, may enlarge the outlet gates at Arrowrock Dam with a view to providing improved flood control facilities, and may construct a power plant in connection with the said Anderson Ranch Dam.

General Repayment Obligation of the District

11. As its general repayment obligation under this contract, the District shall pay to the United States, in the installments hereinafter

R-698

provided, the following amount, subject to adjustment as provided in article 16 hereof:

Should the actual cost of the Anderson Ranch Reservoir (exclusive of the power plant and of Arrowrock flood control improvements) as determined and stated by the Secretary in the notice and statement provided for in article 12 (a) hereof, be the same as the estimated cost of $10,300,000, the general repayment obligation of the District shall be $1,404,765.

Should the said actual cost exceed or be less than the said estimated cost, then the general repayment obligation of the District shall be that percentage of said actual cost which $1,404,765 is of said estimated cost of $10,300,000, as said actual cost is conclusively determined by the Secretary in accordance with the provisions of article 20 hereof, subject however, to the limitation, that the maximum general repayment obligation of the District under this contract shall not exceed $1,545,241.50.

Terms of Payment of Construction Installments

12. (a) Whenever the construction of Anderson Ranch Reservoir is substantially completed, or is advanced to a point where storage water in an amount exceeding 275,000 acre-feet becomes available for irrigation use from said storage reservoir, the Secretary shall so announce, and shall give to the District notice thereof, hereinafter referred to as the tentative construction cost notice. Said notice shall be given prior to September 1 of the year in which given and shall include a statement of the cost of the Anderson Ranch Reservoir, as then estimated, and of

R-698

the District's general repayment obligation under article 11 of this contract based on said statement of cost. Said tentative construction cost notice shall govern the amount of repayment obligation installments until such time as the cost and the District's general repayment obligation based thereon can be determined by the Secretary, and the statement thereof submitted to the District in a final construction cost notice. Any difference between the District's general repayment obligation as stated in the tentative construction cost notice and said obligation as stated in the final construction cost notice shall be spread in such a manner as to maintain approximately equal overall annual payments as hereinafter provided for in this article, as increases or decreases as the case may be, in the installments on account of Anderson Ranch Reservoir coming due after said final construction cost notice has been given to the District.

The Secretary's determinations of cost and of the District's general repayment obligation in each of said notices shall be conclusive.

(b) At the time the Secretary gives to the District the tentative construction cost notice provided in (a) of this article, stating the District's general repayment obligation, the Secretary shall determine the respective amounts of the first ten (10) successive annual installments of said obligation. The respective amounts of said first ten (10) installments shall be determined so that the annual installments, including the then estimate of those following the tenth, on account of Anderson Ranch Reservoir, when combined with the then unaccrued installments to be paid by the District for the repair, resurfacing,

R-692

improvement and enlargement of Arrowrock Dam (hereinafter referred to as Arrowrock repairs), and the Secretary's then estimate of the probable annual construction installments to be paid by the District under the Government-District contract, form a combined, overall schedule of approximately equal annual installments throughout the forty (40) year repayment period within which the District's general repayment obligation under this contract shall be paid. In the year in which the tenth annual installment due from the District on account of Anderson Ranch Reservoir accrues, the Secretary shall determine the respective amounts of the remaining thirty (30) installments of the District's general repayment obligation under this contract in the same manner as provided above for the first ten installments, excepting that the determination in said tenth installment year shall be made upon consideration of the then unaccrued installments on account of Arrowrock repairs and the Secretary's then estimate of probable annual construction installments to be paid by the District under the Government-District contract. In no event, however, shall any annual installment to be paid by the District on account of Anderson Ranch Reservoir be less than $12,100.

(c) The District agrees to pay the general repayment obligation, in the forty (40) successive annual installments, scheduled under (b) of this article; and there being no irrigation block designated by the Secretary and no development period fixed by him, the first installment shall become due and payable in the calendar year following immediately after the one in which the Secretary gives the tentative construction cost notice provided for in (a) of this article. Each year's installment on account of Anderson Ranch Reservoir shall become due and payable from the District

to the United States one-half on July 1 and one-half on December 31 of the year in question.

(d) Each year the installment of the District's general repayment obligation scheduled for such year shall be the construction charges due and payable by the District for such year, and the normal and percentage plan of payment shall not apply thereto unless such normal and percentage plan shall be hereafter adopted and provided for by supplemental contract, as authorized in article 44 hereof.

District's Percentage of Stored Water From Anderson Ranch Reservoir

13. Subject to the holdover rights provided for in article 18 hereof, and the allowance of similar holdover rights provided for by contracts with other contracting districts and companies entitled to receive stored water from Anderson Ranch Reservoir, and subject to the adjustment authorized under article 16 hereof, the United States, in the manner and subject to the conditions provided in this contract, will release for the use of the District each year (as ordered by the District through its operating agent, the Board of Control, or the manager or superintendent thereof) as nearly as is reasonably practicable thirty and twenty one hundredths percent (30.21%) of the stored water actually available from said reservoir that year for irrigation purposes, as determined by the Secretary.

Optional With Secretary to Measure and Deliver Anderson Storage Either at Outlets of Anderson Ranch Reservoir or at Outlets of Arrowrock Reservoir

14. At the option of the Secretary, the Anderson Ranch Reservoir stored water to which the District is entitled may be measured and

delivered to or for the District either at the outlets of the Anderson Ranch Reservoir or at the outlets of the Arrowrock Reservoir.

Secretary Authorized to Determine the Administration of the Reservoirs and the Holding of Water Therein

15. In all matters not expressly covered by the provisions of this contract, the Secretary is authorized to determine the proper administration of the said Anderson Ranch Reservoir and Arrowrock Reservoir and the water supply therefrom, and his authority shall include but not be limited to the authority to determine the length of time and the extent to which the stored water belonging to either of said reservoirs may be held in the other without injury to the holders of rights to water therefrom.

Right Reserved To Provide Storage, For Big Bend District and other Contractors

16. The United States reserves the right, at the option of the Secretary, to contract to furnish to the Big Bend Irrigation District and to such of the old canal companies and irrigation districts of the Boise Valley as may desire to contract for an additional water supply, the right to the use of the water available from a proportionate part of the storage capacity of Anderson Ranch Reservoir, not exceeding an aggregate amount of eleven and two-tenths percent (11.2%) of the part thereof available for irrigation, and in that event to reduce the percentage to be furnished to the District to such extent as the Secretary shall find necessary not exceeding a reduction of eleven and two-tenths percent (11.2%). In that event the general repayment obligation of the District and any scheduled installments thereof shall be reduced in the same proportion that the District's right to receive stored water under this contract is reduced. It is agreed that the rights to the use of

water under contracts made with other parties in accordance with the reservation set out in the preceding sentence shall be full proportionate rights, in all respects on a par as to priority and dignity of right with the rights of the District hereunder, except as to holdover rights unless they be provided for in the contract with said other party; and that the respective rights of the said four principal districts to the use of storage water made available by Anderson Ranch Reservoir shall be on a basis of equality as to priority and dignity of right.

Each District May Assign Part of Its Contract Right

17. Each of the four principal districts (New York Irrigation District, Boise-Kuna Irrigation District, Nampa & Meridian Irrigation District and Wilder Irrigation District) shall have the right, at its option, to assign and transfer a proportionate part of its right to receive water from said Anderson Ranch Reservoir: Provided, that the assignee assumes a like proportionate part of the obligations of the contract thus partially assigned to it, and provided further that no such assignment shall be valid and binding until approved by the Secretary.

Holdover Rights and Reservations For Power and Flood Control and Temporary Holding In One Reservoir of Water Belonging to Another

18. The rights provided for in this article will be referred to as the District's holdover rights. The District will be allowed to hold over in Anderson Ranch Reservoir from year to year stored water to which it may be entitled in any irrigation season but does not use during such season, and will be given credit therefor the following year or years subject to the following conditions and limitations:

(a) The District shall not be entitled to hold over to its credit in said reservoir at any one time more stored water than can be stored.

subject to paragraph (g) of this article, in sixty and forty-two hundredths per cent (60.42%) of the available storage capacity of the reservoir usable for irrigation; that is to say, sixty and forty-two hundredths per cent (60.42%) of the capacity thereof other than that reserved for control of flash floods and that reserved for power.

(b) Whenever the combined amount of storage water in the Arrowrock Reservoir and the Anderson Ranch Reservoir reaches a point where there remains in the two reservoirs only 45,000 acre-feet unfilled capacity, and additional water shall be available for storage, then such additional storable water shall be considered stored in reservoir capacity made available therefor by reducing and eliminating holdover storage in the following manner: Water shall be considered released from holdover storage of the contracting party having on hand the largest amount of holdover storage water in per cent of its maximum holdover storage as fixed by (a) of this article until such per cent is reduced to that of the party having on hand the next highest per cent, then from both parties' holdover storage, etc., until no party has holdover storage on hand. Any holdover right to and interest in water considered released under this paragraph shall be extinguished and terminated.

(c) It is fully agreed and understood that 75,000 acre-feet of the initial capacity in the Anderson Ranch Reservoir, and such water as can be stored therein, is reserved to the United States as dead storage and removable storage for power purposes, and that the removable part

of the water stored in said 75,000 acre-feet of initial capacity may be held by the United States for release for power development purposes after the end of the irrigation season. Anderson Ranch Reservoir stored waters released for power production while Arrowrock Reservoir is not full, shall be considered stored in Arrowrock Reservoir, and in equal amounts may be subsequently replaced in Anderson Ranch Reservoir by storing therein waters storable in Arrowrock Reservoir, provided such replacement is effected prior to the next spill at Arrowrock Reservoir over the wasteway thereof.

(d) It is understood and agreed that a combined total of 45,000 acre-feet of empty storage space shall be kept available in the Anderson Ranch and Arrowrock Reservoirs for control of flash floods, except when used for control of such floods. Of water temporarily impounded in said 45,000 acre-feet capacity, when released, thirty and twenty one hundredths per cent (30.21%) of it, or any part of said percentage, may be diverted for the use of the District if it so desires.

(e) It is further understood and agreed that for flood control purposes it is most desirable that the empty storage space should be maintained in Arrowrock Reservoir rather than in Anderson Ranch Reservoir, and that the attempt will be made, so far as practicable, to keep the empty storage space in Arrowrock Reservoir so that it may be available to control floods from the largest possible watershed. With this purpose in view and for the purpose of making better use of the available water supply for power and irrigation purposes, storage water belonging to the Arrowrock Reservoir or the Deer Flat Reservoir may be held temporarily in the Anderson Ranch Reservoir, or vice versa, instead of holding the same in

the reservoir in which it belongs on the basis of priority of right; but the temporary holding of such stored water in the Anderson Ranch Reservoir shall not in any way affect the rights of the several districts to the water in question, and such rights shall be considered to be the same as if said stored water were held at all times in the reservoir in which it properly belongs on the basis of priority of right. Storage water belonging in Arrowrock Reservoir or Deer Flat Reservoir but temporarily held in Anderson Ranch Reservoir will be turned down to the reservoir in which it belongs at or prior to the time that water available for storage in the Anderson Ranch Reservoir becomes available in sufficient quantity to fill the full storage capacity thereof other than the capacity thereof reserved exclusively for control of flash floods.

(f) For the purpose of a more prompt and accurate control of the water supply at canal headgates, and other beneficial purposes including but not limited to the carrying of peak loads at the power plant at the Anderson Ranch Reservoir, stored water belonging in Anderson Ranch Reservoir, or to the holders of rights in said water, and holdover storage or storage otherwise credited to the Anderson Ranch Reservoir, may likewise be held temporarily in unused space in Arrowrock Reservoir without in any way impairing or affecting the rights of the parties entitled to such water; but such water shall not remain in Arrowrock Reservoir at any time when such use of Arrowrock capacity would injuriously affect the holders of Arrowrock storage rights in the benefit or enjoyment of such Arrowrock rights.

(g) In the filling of the available Anderson Ranch Reservoir capacity, except that reserved for power which will be filled first and except that amount of 45,000 acre-feet capacity reserved for control of flash floods, the reservoir management will endeavor so to handle the filling thereof that the same will serve both for the benefit of irrigation and for the benefit of flood control, and may for flood control purposes evacuate so much of its capacity as is deemed advisable with such releases to be first from holdover storage water on hand, in the same manner and with the same effect as provided in Article 18 (b).

(h) Holdover storage will be charged its pro rata share of evaporation and seepage losses.

General Obligations of the District

19. The District's obligation hereunder is a general repayment obligation under which the District as a whole is obligated to pay to the United States the full amount or amounts herein agreed upon according to the terms stated, notwithstanding any individual default in the payment to the District by any individual water user of any assessments, tolls, or other charges levied by the District; and while the District, so far as its powers under the laws of Idaho permit, may distribute said obligation among its landowners in a manner that takes into account the productivity of the various classes of lands of its landowners and the benefits accruing to said lands by reason of the construction herein provided, no such distribution of said obligation shall in any manner be deemed to relieve the District, or any of its landowners, or any land therein, of the District's general obligations to the United States.

Computation of Cost

20. The cost of the Anderson Ranch Reservoir, which shall be the basis of determining the District's obligation as provided in Article 12 hereof, shall embrace all expenditures of whatsoever kind in connection with, growing out of, or resulting from the work described, including the cost of labor, material, equipment, investigations, engineering, legal work, superintendence, administration, overhead, rights of way, property, and damages of all kinds, and also including expenditures made for any of said above-mentioned purposes incurred prior to the date of this contract. The determination of what costs are properly chargeable hereunder, and the amount thereof, shall be conclusively made by the Secretary.

Cost of Operation and Maintenance to be Paid in Advance

21. For the year in which the first general repayment obligation installment becomes due, as provided in Article 12 (c) above, and for each year thereafter, the District will pay to the United States in advance, in the manner hereinafter provided, its share of the operation and maintenance costs of Anderson Ranch Reservoir. Payment shall be made on the basis of annual estimates made by the Secretary. Such annual estimates, hereinafter referred to as the operation and maintenance charge notice, shall contain a statement of the estimated cost to be incurred during the calendar year covered by said notice for the operation and maintenance of Anderson Ranch Reservoir, a statement of the part of said estimated costs allocated to the storage of water for irrigation, and the District's share thereof. The District's share shall be thirty and twenty one hundredths percent (30.21%) of the part of said

R-698

estimated costs allocated by the Secretary to the storage of water for irrigation, less any reduction, not to exceed eleven and two tenths percent (11.2%), thereof made under Article 16 hereof.

Such operation and maintenance charge notice shall be given to the District and to the Board of Control of the Arrowrock Division, Boise Project, on or before April 1 of the calendar year covered by said notice. The District agrees to pay its share of the estimated cost of operation and maintenance allocated to the storage of water for irrigation as set out in said notice on or before May 1 of the year in which said notice is given. Whenever in the opinion of the Secretary, funds so advanced will not be adequate to meet the District's share of costs of operating and maintaining Anderson Ranch Reservoir, he may give to the District and to the Board of Control a supplemental operation and maintenance charge notice stating therein the amount of the District's share, determined in the manner above provided, of the additional amount required for such operation and maintenance. The District shall pay its share of such additional amount, as set forth in said supplemental notice, on or before the due date fixed by the Secretary in said notice. If funds advanced by the District under this Article exceed the District's share of the actual cost and maintenance for the year for which advanced, as determined conclusively by the Secretary, the excess will be credited to operation and maintenance charges due from the District subsequent to the determination of such excess.

There shall be included in the operation and maintenance costs covered by the provisions of this Article an annual equitable charge, as determined by the Secretary, to cover general expenses and the cost of bookkeeping, accounting, clerical and legal work of the Bureau of Reclamation in connection with the accounts and collections for storage water from Anderson Ranch Reservoir.

Any expense incurred in running or protecting the Anderson Ranch Reservoir water in the channel of Boise River or the South Fork thereof or in diverting the same into the Main South Side Canal of the Arrowrock Division shall be considered a part of the cost of operation and maintenance of the Anderson Ranch Reservoir and charged accordingly in like manner as other operation and maintenance expenses in connection with said reservoir.

Water Rental Before Commencement of Construction Cost Repayment

22. Prior to the year in which the first general repayment obligation installment provided for in Article 12 (c) accrues, storage water, if available, may be released for the use of the District only upon advance payment by the District to the United States of a charge per annum per acre-foot, or other charge, to be fixed by the Secretary each year and to be paid in advance of delivery of water. After the expiration of the water rental period, if any, any such charges collected and which the Secretary determines to be in excess of the cost of operation and maintenance, during the period, allocated by the Secretary to the District shall be credited to the general repayment obligation of the District under this contract in the manner determined by the Secretary.

Refusal of Water in Case of Default

23. No water from the Anderson Ranch Reservoir shall be delivered to or for the District if the District shall be in arrears in the advance payment of the operation and maintenance charges provided for in Article 21 or in arrears in the payment of any other operation and maintenance charges due to the United States, or more than twelve (12) months in arrears in the payment, as required by the terms of this contract, of the general repayment obligation installments provided for in Article 12 of this contract, or more than twelve months in arrears in the payment of any other construction charge installments due to the United States. The District agrees that it will refuse to deliver water to lands or parties which are in arrears in the advance payment of operation and maintenance charges due from said lands or parties to the United States or to the District, or to lands or parties who are in arrears for more than twelve months in the payment of the amounts due from said lands or parties to the United States or to the District for the general repayment obligation installments due from the District to the United States under this or any other contract. The provisions of this Article are not exclusive and shall not in any manner prevent the United States from exercising any other remedy given by this contract or by law to enforce the collection of any payments due under the terms of this contract.

Penalty for Delinquent Payments

24. In the event that any payment provided for in this contract is not made on or before the date that such payment is due and payable, there shall be added to the amount unpaid a penalty of one-half of one

R-698

percent (1/2%) on the day following the due date, and there shall be added a like penalty of one-half of one percent of said unpaid amount on the first day of each calendar month thereafter so long as such default shall continue.

Title to Reservoir in the United States

25. Pursuant to the provisions of section 6 of the Act of June 17, 1902 (32 Stat. 388), title to the Anderson Ranch Reservoir shall remain in the United States until otherwise provided by Congress.

Power Resources to Remain Perpetually in the United States

26. The rights and resources which may be used or useful for the development of power, and any plant or plants and appurtenant structures and facilities which may be now or hereafter constructed by or under the authority of the United States which may be used or useful for the development of hydroelectric power, are hereby reserved to and shall be and remain in the exclusive control, possession and ownership of the United States: Provided, That no costs, as determined by the Secretary and which are in his opinion, attributable solely to power development, shall be taken into account in determining the District's construction cost obligation under this contract. All revenues, including miscellaneous revenues from or incident to the establishment or use of power plants or appurtenant structures and facilities, and from the use, sale or other disposal of power in any form, shall be and remain the property of the United States and shall be disposed of as provided in the Interior Department Appropriation Act, 1939, (Act of May 9, 1938, 52 Stat. 291, 322).

Operation and Maintenance of Works by the United States

27. The works constructed by the United States under the provisions of Article 10 above will be operated and maintained by the United States as a part of the reserved works of the Arrowrock Division of the Boise Project in the same manner as that provided in the Government-District contract, but the District's share of the cost of operation and maintenance of said works shall be paid by the District as provided in Article 21 above.

Board of Control as Operating Agent

28. The provisions of the Government-District contract relating to the Board of Control are hereby made applicable to the collection of operation and maintenance charges provided for in this contract, and to the payment to the United States of said charges and to the enforcement of the provisions of Article 23 of this contract, and to the distribution of the water to the lands entitled to receive the same. It is agreed that under the administration of the Board of Control the transferred works of the Arrowrock Division of the Boise Project shall be available for the conveyance of the Anderson Ranch Reservoir water to the lands entitled to receive the same, in similar manner and subject to similar conditions applicable to the distribution of Arrowrock and Deer Flat water.

Collections Outside Districts

29. The District agrees that, if requested by the Secretary to do so, the Board of Control will collect charges due to the United States under Anderson Ranch Reservoir contracts from parties other than

R-697

the four principal districts named in Article 17 hereof, and will pay over promptly to the United States such charges so collected, and where such organization or individuals receive such storage water from Anderson Ranch Reservoir through the transferred works in control of the Board of Control, the said Board, in accordance with the terms of such contracts, will enforce the payment of such charges by withholding delivery of water, and is authorized to do so. If, by reason of the fact of the lands involved being out of cultivation, or for any other reason, the withholding of water proves ineffectual in securing the payment of such charges, the Board of Control will report such cases to the authorized representative of the Secretary, for such action as the United States shall deem advisable.

Selection of Manager or Superintendent

30. The obligation of the Board of Control to employ a project manager or superintendent as provided in Article 61 of the contract between the United States and the District dated March 20, 1926, shall continue until completion of the payment to the United States of all installments due to the United States under this contract.

Economical Use of Water

31. It is understood and agreed that if Anderson Ranch Reservoir is to be effective in reducing water shortages in dry cycles, it is essential that the District take every reasonable measure to effect economical and efficient use of water by every water user within the District; and the District agrees to take such measures. It is further understood and

R-698

agreed that whenever wasteful, inefficient or uneconomical use of water is being made by a water user within the District, the District with the advice and cooperation of the Bureau of Reclamation will take such action as may be necessary to correct such wasteful, inefficient, or uneconomic use of water.

District to Use All Powers to Collect Charges

32. The District agrees it will cause to be levied and collected all necessary assessments, and will use all the powers and resources of the District, including the taxing power of the District, and the power to withhold delivery of water, to pay to the United States all charges provided in this contract in full on or before the day that the same become due.

Shortage of Water

33. On account of drought, inaccuracy of distribution, or other causes, it is expected there will occur at times a shortage in the quantity of storage water which normally can be made available from Anderson Ranch Reservoir, and in no event shall any liability accrue against the United States or any of its officers, agents, or employees for any damages, direct or indirect, arising from any such shortage; and the payments to the United States provided for herein shall not be reduced because of any such shortage or damage.

Losses in Running Stored Water to be Deducted

34. A prorata share of such losses, if any, as may be incurred in running the Anderson Ranch Reservoir stored water from the reservoir to the head of the New York Canal will be charged to the District.

Contract to be Authorized by Electors and Confirmed by Court

35. The District agrees that, upon the execution of this contract, it will proceed promptly to secure the authorization of this contract by the electors of said District, and will secure a decree of the proper court of the State of Idaho approving and confirming this contract and decreeing and adjudging the same to be a lawful, valid and binding general obligation of the District, and decreeing the same to be lawful and valid, and promptly will apportion the benefits of this contract to the lands of the District and will secure a confirmation court decree confirming such apportionment as provided for in the Idaho statutes. The District shall furnish certified copies of such decrees to the Secretary. In the event that in the opinion of the Secretary satisfactory confirmatory decrees are not promptly secured as herein provided, the Secretary may terminate this contract.

Waste Water, Seepage, and Return Flow Water Not Abandoned and Right Reserved to Recapture the Same

36. It is agreed and understood that the United States does not abandon or relinquish any of the waste, seepage or return flow water resulting from the use, application or conveyance of the said Anderson Ranch Reservoir water, but that the same is reserved and intended to be retained for the benefit of the Boise Project.

Assignment of Contract

37. No assignment or transfer of this contract, or any part hereof, or interest therein, shall be valid until approved by the Secretary. All rights for breach of this contract are reserved to the United States as provided in Section 3737 of the Revised Statutes of the United States.

R-698

Secretary the Arbiter -- Secretary's Acts, Decisions and Determinations Conclusive

38. In the event of disputes between the parties hereto arising out of this contract involving questions of fact, and in so far as the provisions hereof require a determination of fact to be made, the Secretary is hereby designated as the arbiter of such questions and as the one required to make such determination of facts; and his decision therein shall be conclusive and binding on the parties hereto. In all acts, matters and determinations provided in this contract to be done, determined or decided by the Secretary or by the United States, it is agreed that the acts, decisions, findings and determinations by the Secretary shall be final and conclusive and shall be accepted as final and conclusive by all the parties to this contract and by all persons claiming any rights under or by virtue of this contract or in any wise based upon or arising out of this contract or any act or proceeding carried on thereunder.

Changes in Organization of District

39. While this contract is in effect no change will be made in the District, either by inclusion or exclusion of lands, by partial or total consolidation or merger with another district, by proceedings to dissolve, or otherwise, except upon the Secretary's written assent thereto.

Rules and Regulations

40. The Secretary reserves the right, so far as the purport thereof may be consistent with the provisions of this contract, to make rules and regulations and to add to and modify them, as may be deemed proper and necessary to carry out this contract and to supply necessary details of

R-698

its administration, and, by suitable rules and regulations, to provide for the administration of the Anderson Ranch Reservoir and the water supply thereof as to any details of such administration not expressly covered by the terms of this contract; and the District agrees to observe such rules and regulations.

Representative of Secretary

41. It is agreed and understood that where this contract requires action by the Secretary, said action may be taken for and on behalf of the Secretary by his representative duly authorized in writing by the Secretary. Written notice of any such authority shall be mailed to the Board of Control within one week from the date of such authorization.

Obligation to Proceed Contingent Upon the Execution of Contracts in Form Satisfactory to the Secretary Covering the Full Amount Allocated to Irrigation

42. The obligation of the United States to proceed with the construction provided for under the provisions of Article 10 hereof is contingent upon the execution and confirmation of contracts in form satisfactory to the Secretary providing for the repayment to the United States of the full proportionate part of the cost of the Anderson Ranch Reservoir allocated to irrigation.

Substitution of Payette or Salmon River Water

43. It is agreed that in lieu of the water which the District is entitled to receive from the Boise River and its tributaries and the reservoirs thereon, or any part of such water, the United States, at the option of the Secretary, shall have the right to substitute an equal amount of water from the Payette River or the Salmon River, or in part

R-698

from the Payette and in part from the Salmon, and in the event of such substitution the Secretary, upon the completion of the necessary tunnels and other works to such extent as may be necessary to convey such Payette River or Salmon River water to the Boise River immediately above the government diversion dam, for the Arrowrock Division of the Boise Project, will make, by appropriate credits, such readjustment, if any, in the charges against the District as he shall then find to be equitable in view of the changed conditions then applicable to the water supply furnished for the District, but such readjustment, if any, shall not increase the financial obligations of the District under this contract nor reduce the amount of water which the District is entitled to receive under this contract.

Right to Include Obligations in Contract Under Reclamation Project Act of 1939

44. In the event that the District enters into an amendatory contract under the provisions of section 4 of the Reclamation Project Act of 1939 (53 Stat. 1187) for the purpose of securing the benefits of said section of said act, the right is reserved to the District to have included in such amendatory contract the construction charge obligations of the District under this contract, and in that event the then unaccrued portion of the charges for the costs incurred in the Arrowrock repairs shall be treated as part of the Arrowrock dam construction charges, as authorized by Act of April 22, 1940 (54 Stat. 155).

Contingent Upon Appropriation or Allotments of Funds

45. The expenditure of any money or the performance of any work by the United States herein provided for which may require appropriations of money by Congress or the allotment of funds, shall be contingent upon

R-698

such appropriations or allotments being made. The failure of Congress so to appropriate funds, or the failure of an allotment of funds, shall not relieve the District from any obligations under this contract and no liability shall accrue to the United States in case such funds are not so appropriated or allotted.

Officials Not to Benefit

46. No Member of or Delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom, but this restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

Former Contracts Remain in Effect

47. All provisions of the former contracts between the United States and the District, including the contract dated March 20, 1926, as amended by the contract dated October 11, 1940, to the extent that they are not inconsistent with the terms and provisions of this contract, shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed the day and year first above written.

IN REPLY REFER TO:

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION
REGIONAL OFFICE, REGION I
BOX 937, BOISE, IDAHO

APR 11 1956

RECEIVED
APR 12 1956
Department of Reclamation

Mr. Mark R. Kulp
State Reclamation Engineer
Boise, Idaho

Dear Mr. Kulp:

Mr. Humphrey has inquired of this office concerning additional information for your use in connection with the acceptance of the proof of completion of water to beneficial use and the issuance of water right certificate under Permit No. R-698 relating to Anderson Ranch Reservoir. Mr. Humphrey inquired about the installed capacity of the Anderson Ranch powerplant. The nameplate rating carried for the plant is 27,000 kw. However, in actual practice, the plant is operated at a capacity of 37,500 kw. As indicated in the deposition of witnesses submitted in connection with proofs under the permit, the machinery as installed is capable of this operation, or even greater in times of emergency.

Mr. Humphrey also inquired concerning the payment contract arrangements for the disposition of water for irrigation at Anderson Ranch Reservoir. Contracts have been entered into with the Boise Valley irrigation districts and canal companies as follows:

District	Contract No.	Date
Nampa-Meridian Irrigation District	Ilr-1362	7/2/41
New York Irrigation District	Ilr-1359	8/7/41
Boise-Kuna Irrigation District	Ilr-1360	8/1/41
Wilder Irrigation District	Ilr-1361	8/1/41
Pioneer Irrigation District	Ilr-1479	11/10/43
Farmers Union Ditch Company	Ilr-1477	6/5/43
New Dry Creek Ditch Company	Ilr-1480	10/5/44
Settlers Irrigation District	Ilr-1478	7/26/43
Boise Valley Irrigation Ditch Company	Ilr-1481	6/25/45
Ballentyne Ditch Company	Ilr-1512	1/20/48
South Boise Mutual Irrigation Company	Ilr-1476	2/26/45
Big Bend Irrigation District	Ilr-1544	12/11/46
Capitol View Irrigation District	14-06-100-525	7/7/54

There is enclosed for your information a copy of the contract with the Boise-Kuna Irrigation District which is typical of the contracts with the four major irrigation districts and which subscribes to the portion of the irrigation space not contracted to the remaining districts. There is also enclosed a copy of the contract with the Capitol View Irrigation District which is typical of the contracts with the remaining districts.

R-698

I hope this information meets your requirements, and if there is any additional material that would be helpful to you so that the water right certificate can be issued by your office as soon as possible, it will be provided.

Sincerely yours,

Wm H Tuller

Acting Regional Director

Form 16.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. R-698

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Harold T. Nelson, Regional Director, Region 1, United States Department of the Interior, Bureau of Reclamation, P. O. Box 937, Boise, Idaho

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. United States of America, acting through the Regional Director, Region 1, Bureau of Reclamation, Box 937, Boise, Idaho, pursuant to a delegation of authority from the Secretary of the Interior.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit No. R-698 dated February 25, 1941. Priority dated December 9, 1940

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. South Fork of the Boise River - north 790 feet, west 2,070 feet distant from the southwest corner of section 6, township 1 south, range 9 east, Boise meridian.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. New York Canal, 2,850 c.f.s.; Ridenbaugh Canal, 600 c.f.s.; other canals 1,850 c.f.s.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation of cultivated lands of the Boise Federal Reclamation Project in Ada and Canyon counties as more particularly described in Certificate of Completion of Works issued in connection with Permit No. R-698, including all lands for contracts under the Federal Reclamation laws for space in Anderson Ranch Reservoir.

R-698

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. In addition to use of water for irrigation purposes, water is used for generation of power at Anderson Ranch powerplant. As of the date of this deposition, power has been generated at varying rates up to 37,500 kw. (50,250 hp).

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. Approximately 1,700 c.f.s.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Each year since initial storage of approximately 100,000 a.f. of water in 1946 in gradually increasing amounts up to the full reservoir capacity of 493,161 a.f.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. The water here involved is in addition to the other rights of natural flow and storage to which the lands are entitled. The permits held by the United States include Nos. 430, 4,800, 7,180, 16,098 and R-652.

Form 17

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

PERMIT NO. R-698

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Wm. H. Tuller, 67, Boise, Idaho, Assistant Regional Director, United States Bureau of Reclamation, P. O. Box 937, Boise, Idaho

Ques. 2. Are you acquainted with The United States of America, acting through the Bureau of Reclamation, the Agency holder of Permit No. R-698? How long have you known ~~him~~ and where ~~does he reside~~ is its local place of business?

Ans. Yes. Since 1919. For purposes of this deposition, the place of business is the Fairgrounds, Boise, Idaho

Ques. 3. Have you read or heard read said Permit No. R-698, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. The South Fork of the Boise River, as stored in Anderson Ranch Reservoir, diverted at various Boise River diversion dams, through the canals and ditches of the Boise Federal Reclamation Project.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. New York Canal, 2,850 c.f.s.; Ridenbaugh Canal, 600 c.f.s.; other canals 1,850 c.f.s.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation of cultivated lands of the Boise Federal Reclamation Project in Ada and Canyon counties as more particularly described in Certificate of Completion of Works issued under Permit No. R-698, including all lands having storage rights in Anderson Ranch Reservoir pursuant to repayment contracts entered into under the Federal Reclamation laws.

R-698

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. In addition to use of water for irrigation purposes, water is used for generation of power at Anderson Ranch powerplant. As of the date of this deposition, power has been generated at varying rates up to 37,500 kw.

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Highly productive, sandy to clay loams. About 3.7 acre-feet per acre.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. In my official capacity as Assistant Regional Director, Region 1, Bureau of Reclamation, Boise, Idaho.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. Each year since initial storage of approximately 100,000 acre-feet of water in 1946 in gradually increasing amounts up to the full reservoir capacity of 493,161 acre-feet.

(Signed) Wm H. Tuller

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Boise, County of Ada, State of Idaho, on this 21st day of February, A. D. 19 56.

RE: Permit No. R-698

Mr. William Tuller
Assistant Regional Director
Bureau of Reclamation
Box 937
Boise, Idaho

Dear Mr. Tuller:

We are enclosing herewith Statements from the Idaho Daily Statesman at Boise and from the Caldwell New-Tribune at Caldwell in connection with Publication Notices of the Publication of Beneficial Use on Anderson Ranch Reservoir Permit No. R-698.

We are also enclosing a copy of our office letter to the Caldwell News-Tribune and a copy of their reply to this Department.

These letters are being enclosed for the purpose of explanation in the difference in costs for the Publication of the same Notice by the two different newspapers.

Please send us the necessary vouchers in payment of the enclosed Statements in connection with said Notices of Beneficial Use proof.

We will request that you return the two Statements which we will keep for our files.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Mr. Mark R. Kulp
State Reclamation Engineer
Department of Reclamation
Boise, Idaho

Dear Mr. Kulp:

In connection with Permit No. R-698 relating to storage of 493,161 acre-feet of water at Anderson Ranch Reservoir, Proof of Application of Water to Beneficial Use was taken before Robert H. Harris, Notary Public, at 10:00 a.m. on February 21, 1956. The proofs, which are enclosed in duplicate, consist of the deposition of the Regional Director on behalf of the holder of the permits, the Deposition of Witness of Geo. N. Carter, Regional Supervisor of Irrigation, Boise, Idaho, and Wm. H. Tuller, Assistant Regional Director, Boise, Idaho.

If any further information is needed in connection with completion of the steps necessary to issue the water rights certificate, please advise us.

Very truly yours,

H. T. Nelson

NOTICE FOR PUBLICATION

NOTICE OF PROOF APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10:00 A. M. on the 21st day of February, 19 56, at Bureau of Reclamation Office at Fairview (U.S. Highway 30) at Orchard Avenue County of Ada, State of Idaho, before R. H. Harris, Notary Public, proof will be submitted of the application to beneficial use of 493,161 acre-feet of the waters of Boise River, as stored at Anderson Ranch Reservoir accordance with the terms and conditions of Permit No. R-698 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are United States of America, acting through the Regional Director, Region 1, Bureau of Reclamation, P. O. Box 937, Boise, Idaho

The use to which said water has been applied is irrigation and power

The amount applied to beneficial use is 493,161 acre-feet

The place where said water is used (if for irrigation, give full and accurate description of the lands irrigated)

Twps. 1,2,3,4,5 N.,Rge. 1 E.,B.M. Twps. 2,3,4, N.,Rge. 2 E.,B.M. Twps. 2 & 3 N., Rge. 3 E.,B.M. Twp. 1 S.,Rge. 1 W.,B.M. Twps. 1,2,3,4,5, N.Rge. 1 W., B.M. Twp. 1 S., Rge. 2 W.,B.M. Twps. 1,2,3,4, N.,Rge. 2 W.,B.M. Twps. 2,3,4,5 N.Rge. 3 W.,B.M. Twps. 2,3,4,5 N.,Rge. 4 W.,B.M. Twps. 3,4,5,6 N.,Rge. 5 W., B.M. Twps. 4,5,6 N., Rge. 6 W.,B.M. Also Twps. 21 & 22 S.,Rge. 46 E., and Twp. 21 S.,Rge. 47 E., Willamette Meridian.

The name of the canal or ditch or other works by which said water is conducted to such place of use is various canals and ditches participating in the Boise Federal Reclamation Project.

The right to take water from such works is based upon Permit No. R-698

The source of supply from which such water is diverted is Anderson Ranch Reservoir

The date of priority which said user is prepared to establish is December 9, 1940

Attention Mr. Thompson:

Gentlemen:

Referring to your letter of February 15 and also to the enclosed charge for legal advertising, we wish to advise you that the rates charged for this advertising are the rates that were set by the last legislature for legal and official notices.

The advertising was set in 6 point type, which is our standard type, for which, according to law we are to charge 15 cents per column line for the first insertion and 10 cents per column line for each subsequent insertion.

We do not know how the Statesman arrived at their figures but the enclosed bill has been figured at the same rate that has been used since May 5, 1955.

Very truly yours,

News-Tribune

Gentlemen:

We are in receipt of your Affidavit of Publication also your Statement of Costs for publishing said Notice. We are enclosing said Affidavit and Statement for your information.

The Department of Reclamation authorized this same Notice to be published in your paper and the Idaho Daily Statesman at Boise and we have received their Statement for publication for four consecutive weeks to the amount of $17.05. Your bill, as enclosed, states a cost of $30.15 for the publication of the same Notice and the same number of publications.

We think there must be an error in your Statement of Costs. If so kindly correct same and if not return the Affidavit and Statement.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Mr. F. M. Clinton
C/o U. S. Bureau of Reclamation
Box 937
Boise, Idaho

Dear Mr. Clinton:

We now have on file the report of our field engineer on examination for completion of works on Permit No. R-698, Anderson Ranch Dam.

This report shows completion of works with a capacity of 493,161 acre feet and a certificate of completion of works can be issued for that amount upon payment of the statutory fee amounting to $593.90. This is at the rate of $5.00 for the first 2500 acre feet and 30 cents for each additional 250 acre feet.

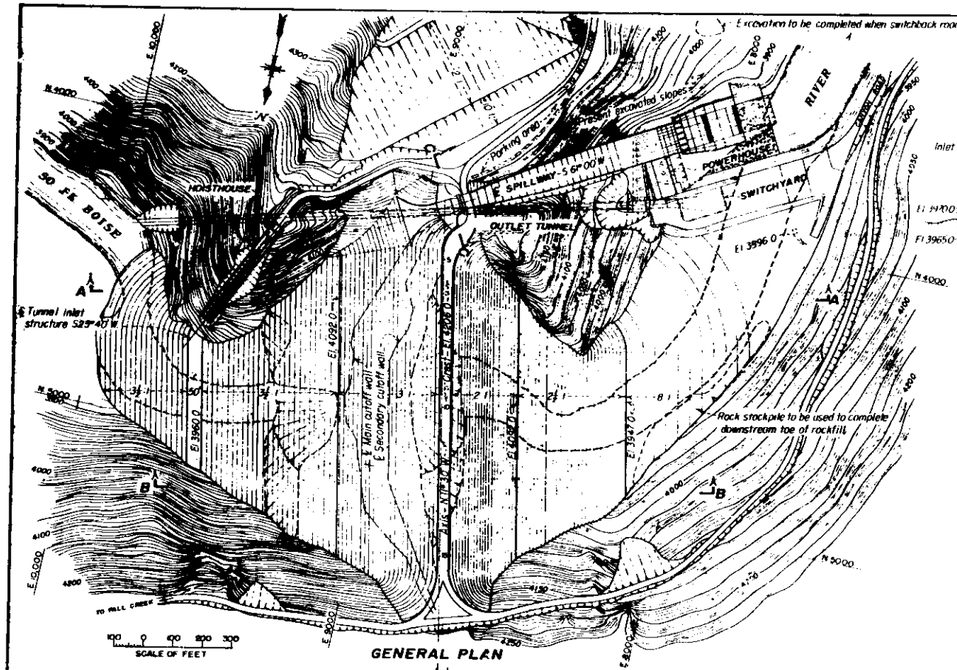

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Region 1 - Boise, Idaho

ANDERSON RANCH AND CASCADE DAMS - BOISE PROJECT

Anderson Ranch Dam, on the South Fork of the Boise River, is a major unit in the comprehensive development of southwestern Idaho. It will make available a much-needed supplemental supply of water for 320,000 acres in the Boise Project, provide more than 100 million kilowatt-hours of electric power to meet growing needs of southern Idaho, and help control flood waters in the Boise River Basin, which some years have caused considerable damage.

Eventually, when facilities for exchanging water between the Payette River Basin and the Boise River have been completed, Anderson Ranch Dam will furnish irrigation water for a large tract of desert land under the 400,000 acre Mountain Home Project. The Boise waters diverted to the Mountain Home area will be replaced when needed by Boise River irrigators from surplus flows from the Payette River regulated in the proposed Garden Valley and Cascade Reservoirs. The latter is now under construction.

Anderson Ranch Dam when completed will be the highest earth-fill dam in the world. The crest will be 456 feet above lowest bedrock. Other dimensions of the structure will be: crest length, 1,350 feet; crest width, 40 feet; thickness between the upstream and downstream toes, 2,500 feet; volume, 9,053,300 cubic yards; and reservoir capacity, 500,000 acre-feet. The top of the dam will be 4,206 feet above sea level.

Earth-placing production reached a record high in August 1946 with 414,709 cubic yards of material added to the structure. This brought the dam, exclusive of the outlet works, spillway, and powerhouse to 84 percent completion. Approximately 1,638,814 cubic yards of material remain to be placed.

The body of the dam is a rolled embankment which is being zoned to produce an impervious (water tight) core, supported by stable, free-drainage sections. Three feet of heavy rock rip-rap is provided to protect the upstream face of the dam from wave action. Two concrete cut-off walls extend across the base of the dam and up both abutments.

The spillway, now under construction, is designed for a maximum discharge of 20,000 cubic feet per second. It is situated on the left abutment and will be a concrete-lined, open channel chute, cut in rock, varying in width from 53 to 100 feet. It is unusually steep and with the water falling about 330 feet during periods of overflow, a spectacular waterfall will be created.

During the construction of the dam, the South Fork of the Boise River, which has an average peak flow of 5,000 cubic feet per second, is being

R-698

diverted past the dam site through a 1500-foot long diversion tunnel, 20 feet in diameter. The tunnel will become a permanent part of the outlet works for controlling the discharge of water out of the reservoir.

A 41,500-kilowatt power plant is to be constructed at the base of the dam. Penstocks will carry the water from the outlet works into the turbines. Space has been provided for three 13,500-kilowatt generators, but present plans call for the installation of only two of the units. The powerhouse will be 70 feet wide and 104 feet long.

Construction of Anderson Ranch Dam was started in August 1941 by the contractor, Morrison-Shea-Twaits-Winston Company, with the scheduled completion date April 24, 1946. Despite material and labor shortages due to the war, the contractor pushed work vigorously until December 1942, when with the structure one-third completed, the War Production Board issued a stop-order to divert critical materials to war purposes. The stop-order was modified on October 6, 1943, on the recommendation of the War Food Administration, which felt the project could make a sizable contribution to war food supplies if completed in time. Limited construction was permitted.

The original construction program contemplated completing a partial section of the dam to permit storing 45,000 acre-feet of water during the 1945 irrigation season, 130,000 acre-feet during the 1946 irrigation season, and completing all of the authorized program to permit full storage for the 1947 irrigation season. Because of manpower shortages and inability to obtain certain materials and equipment, part of the program anticipated for the 1944 season was not completed. This necessitated a revision of the program for the 1945 season. The revised program provided for raising the upstream portion of the dam to make available 80,000 acre-feet of storage for the 1946 irrigation season. This goal was met.

Present plans call for the storage of 130,000 acre-feet of water for the 1947 irrigation season, 340,000 acre-feet in 1948, and full storage for the 1949 season. The dam is scheduled to be completed in 1948, provided adequate appropriations are made available.

CASCADE DAM

Work on Cascade Dam, initiated in 1941 but stopped by the War Production Board in 1942 for the duration of the war, was resumed this spring. The earth-fill structure, scheduled to be completed in 1948 provided adequate funds are allotted, will make available a full supply of water for 25,000 acres of new land near New Plymouth and Middleton of the Payette Division, and a supplemental supply for 85,000 acres in the Emmett Valley, which suffer periodic shortages.

The earth-fill structure, which will one day also become a regulating reservoir for the Mountain Home Project, will be 90 feet high, 660 feet wide at the base, and 860 feet long on the crest. It will have a volume of approximately 368,000 cubic yards with the reservoir storing 700,000 acre-feet of water.

Construction of the distribution system on the Payette Division is also in progress. In contrast to Anderson Ranch Dam, which will serve no new land at first, this project will make settlement opportunities available for qualified veterans and others on 7,000 acres of public land in the Payette Division.

2. Source of water supply: South fork of Boise River

3. Location of point of ~~diversion~~ outlet: Is in the Lot 4 of Section 1

T. 1 S. R. ~~7~~ 6 E. County of Elmore

4. Describe works as they exist, giving dimensions and capacities of same: Dam H is approx. 255'. H above bed rock is 456'. Crest l. 1350' W - 40'. Upstream slope 3 to 1. Downstream 2 to 1, greater at base. Freeboard is 10'. Well rip rapped. Concrete spillway 53' w at top by 32' w, 100' w at bottom. Capacity - 20,000 c.f.s. Reservoir capacity - 473,719 a.f. Steel tube leading to each turbine is 7½' in diameter. Main tube through tunnel is 15' in diameter. Main tube through tunnel is 15' in diameter. There are 5 by pass valve each 72" in diameter with 2,000 c.f.s. per unit. Theme are directly under the spillway. The building for the power plant is solid concrete, 101' wide, main section is 55' wide by 139' long by 55' high. There are two 13,500 k.w. generators operating and provisions made for installation of a third one. Generator No. 1 - Westinghouse 15,000 K.V.A. 6900 V. 1253 amps. 90% P.F. 3 phase, 60 cycle, 277 r.p.m. No. 1 S 26 P 792. Turbine No. 1, James Leffel & Co. Springfield, Ohio, Head - 245', B.H.P. - 18,500, R.P.M. 277. Year - 1950, Type N. Order No. W 2300

5. Water is used for: Irrigation and power

6. State whether or not water has been turned into works of diversion: Yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

Supplemental irrigation of 275,766 acres in the following townships:

Townships 1, 2, 3, 4 and 5 North,	Range 1 East, B.M.
Township 2, 3 and 4, North,	Range 2 East, B.M.
Townships 2 and 3 North,	Range 3 East, B.M.
Township 1 South,	Range 1 West, B.M.
~~Townships 1, 2, 3, 4 and 5 North,~~	~~Range 1 West, B. M.~~
Township 1 South,	Range 2 West, B.M.
Townships 1, 2 3 and 4 North,	Range 2 West, B.M.
Townships 2, 3, 4 and 5 North,	Range 3 West, B.M.
Townships 2, 3, 4 and 5 North,	Range 4 West, B.M.
~~Townships 3, 4, 5 and 6 North,~~	~~Range 5 West, B.M.~~
Townships 4, 5 and 6 North,	Range 6 West, B.M.

Also Twps. 21 S. and 22 S., Range 46 E., and Twp. 21 S., Range 47 E., Willamette Mer. State of Oregon.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: Generator No. 2 and Turbine No. 2 do not have specification plates mounted, but are duplicates of the first two. There are two air compressor units, one to furnish air for brakes on the turbines, and the other for plant use. One is powered by a Westinghouse 20 h.p. electric motor, compressor size 7 X 7. No. 43255. The other has a 30 h.p. motor, compressor size 9 X 9, No. 43425. Both are multiple V. belt driven. There is a 120 V. lead acid emergency storage battery in the plant. Ventilating system for whole building operated by 5 h.p. G.E. motor. American Blower H. S. fan size 440 X 39 Ser. 81 No. 46693 A. There is large DeLaval oil filter unit, Model 74-36 P No. 3517257, operated by a 2 h.p. G.E. electric motor. It is used to filter and reclaim oil from the transformers and also the lubricating oil.

An automatic fire extinguishing is coupled to each large generator. At present water used for irrigation passes on down stream thru Arrowrock.

This examination was made on the 24th day of June, 1952

(Signed) E. N. Humphreys
Examiner.

R-698

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Mr. F. M. Clinton
Acting Regional Director
Bureau of Reclamation
Box 937
Boise, Idaho

Dear Mr. Clinton:

We acknowledge receipt of your letter of December 8, 1950, enclosing duplicate Notices of Completion of Works Proof to be made on Permit No. R-698 on February 6, 1951.

We shall send a copy of this notice to the Mountain Home News with instructions to publish it once a week for four consecutive weeks prior to that date, and to send you the Affidavit of Publication, together with statement of costs.

We think the forms for making this proof have previously been sent to your office, probably to Mr. Stueve, but if that is not the case, we will be glad to furnish you the necessary forms upon request.

Very truly yours,

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

U.S.A. Bureau of Reclamation
Box # 937
Boise, Idaho

Boise, Idaho, December 1, 1950

Dear Sirs—

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. ~~R-698 (Anderson Ranch Dam)~~

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before ~~February 25, 1951~~. Upon receipt of the blank properly filled out, notice of publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Mr. William Burpee
C/o Bureau of Reclamation
Box 937
Boise, Idaho

Dear Mr. Burpee:

At your request, we enclose some forms for making Notice of Proof of Completion of Works (Form 8), also Form 11 which is authorization for us to have the notice published in the designated county newspaper at Permit Holder's expense.

As you know, this notice should be made in duplicate, setting time and place and naming the Notary Public before whom the proof is to be made. As four weeks publication are required, the time should be set sufficiently far ahead. Both copies of Form 8 to be returned to this Department, together with Form 11.

Very truly yours,

MARK R. KULP

DEFENDANT'S EXHIBIT NO

March 12, 1943

Board of Directors
Settler's Irrigation District
Meridian, Idaho

Gentlemen:

Subject: Anderson Ranch Reservoir
Contract for purchase of storage water from the United States by Settler's Irrigation District.

Reference is made to your letter of March 10, 1943, concerning the purchase of storage water in the Anderson Ranch Reservoir and requesting a report on the feasibility of the above subject project by this Department.

The resolution unanimously adopted by you on March 19th at the special meeting referred to accepted the surveys, examinations, maps, plans and estimates of cost of said Anderson Ranch Reservoir prepared by the U. S. Bureau of Reclamation and heretofore filed with and approved by this Department under reservoir permit #698 as your surveys, examinations, maps, plans and estimates of cost to the extent of feasibility and cost of said project.

Your resolution also approved the contract inclosed in your letter to be entered into by Settler's Irrigation District, which contract was approved by the Secretary of the Interior of the United States on June 20, 1941.

My report is favoreble to the acquisition of said water right and the entering into of said contract as in my opinion the construction of Anderson Ranch Reservoir is feasible and the general plan adopted by Settler's Irrigation District by which it will acquire supplemental water for irrigation of the lands in said District is feasible and it is to the best interests of said district and the land owners therein that such supplemental water should be acquired in the method proposed under the contract between the United States of America acting through the Secretary of the Interior and Settler's Irrigation District.

Respectfully yours,

James Spofford
State Reclamation Engineer.

CERTIFICATE OF SECRETARY

STATE OF IDAHO)
: ss.
County of Ada)

I, Frank L. Cox, hereby certify that I am, and at the time hereinafter mentioned was, the duly appointed, qualified and acting Secretary of Settlers Irrigation District, in Ada County, Idaho; that I attended a meeting of the Board of Directors of said District held at 11:00 o'clock A.M. on the 19th day of March, 1943, and as such Secretary kept the minutes of the proceedings of said Board of Directors; that the above and foregoing, consisting of three sheets numbered from 1 to 3, both inclusive, is a full, true and correct copy of the minutes of said meeting, which minutes were duly recorded in the permanent minute book of said Directors of said Settlers Irrigation District.

IN WITNESS WHEREOF, I have hereunto set my hand this 19th day of March, 1943.

Frank L. Cox
Secretary
Settlers Irrigation District

K-694

MINUTES OF SPECIAL MEETING
BOARD OF DIRECTORS
SETTLERS IRRIGATION DISTRICT
March 19, 1943

The Board of Directors of Settlers Irrigation District met on March 19, 1943, at 11:00 o'clock, A.M., pursuant to call of the President, Fred Rosti. The meeting was called to order by the President and the minutes were kept by the Secretary, Frank L. Cox. A roll call showed the following Directors present:

Fred Rosti W. L. McMullen
John Demond

constituting the entire Board of Directors.

The President stated this meeting had been called for the purpose of considering entering into a contract with the United States of America, acting through the Secretary of the Interior, whereby Settlers Irrigation District will purchase a portion of the waters to be stored in Anderson Ranch Reservoir on the South Fork of Boise River. The President further stated a copy of the proposed contract by which Settlers Irrigation District may purchase said waters has been furnished by the United States and is in the possession of Mr. Cox, Secretary; that under said proposed contract Settlers Irrigation District would purchase, as nearly as practicable, 1.12% of the stored water in said Reservoir, available for irrigation purposes.

After the discussion of said question and the consideration of said proposed contract Mr. Demond presented and the Secretary read the following resolution:

> "WHEREAS, Settlers Irrigation District for many years last past has attempted to acquire a supplemental water supply for the irrigation of the lands within said District, and in furtherance of this object has joined with other water users in Boise Valley in urging the United States Bureau of Reclamation to investigate the possibilities of additional storage on Boise River and its tributaries; and,

R-696

"WHEREAS, Such negotiations have resulted in the Bureau of Reclamation acquiring a reservoir site at what is known as Anderson Ranch on the South Fork of Boise River and is constructing a dam to impound water in what is known as Anderson Ranch Reservoir; and,

"WHEREAS, The United States of America, acting through the Secretary of the Interior, is willing to enter into an agreement with Settlers Irrigation District whereby said District will purchase, as nearly as is reasonably practicable, 1.12% of the water stored in said Reservoir and available for irrigation purposes; and,

"WHEREAS, Under said proposed contract the estimated cost to be paid by Settlers Irrigation District is $52,080.00 and the maximum liability of said District shall not exceed $65,100.00; and,

"WHEREAS, In the judgment of the Board of Directors it is to the best interest of said District and the land owners therein that said proposed contract be approved and entered into between the United States of America and Settlers Irrigation District; and,

"WHEREAS, Complete surveys, examinations, maps, plans and estimates of cost for the construction of said Anderson Ranch Reservoir have been made by the engineers of the United States Bureau of Reclamation and have been filed with, and approved by, the Department of Reclamation of the State of Idaho, to which reference is hereby made for the details thereof;

"NOW, THEREFORE, BE IT RESOLVED:

"(a) That the contract approved by the Secretary of the Interior of the United States on June 20, 1941, a copy of which has this day been considered by the Board of Directors of Settlers Irrigation District be, and the same is hereby, approved by said District and ordered filed with its Secretary.

"(b) That the surveys, examinations, maps, plans and estimates of cost prepared by the United States Bureau of Reclamation and filed with and approved by the Department of Reclamation of the State of Idaho be, and the same are hereby, adopted as the surveys, examinations, maps, plans and estimates of cost of Settlers Irrigation District as to the feasibility and cost of said project.

"(c) That copies of the proposed contract between the United States of America and Settlers Irrigation District whereby said District will acquire a portion of the storage waters in Anderson Ranch Reservoir, as hereinabove set out, be filed by the Secretary of said District with the Department of Reclamation of the State of Idaho and the State Reclamation Engineer be requested to approve said contract and the surveys, examinations, maps, plans and estimates of cost for the construction of said Anderson Ranch Reservoir, hereinabove referred to.

R-697

"BE IT FURTHER RESOLVED That the general plan for acquiring supplemental water for the irrigation of the lands within the Settlers Irrigation District is as follows:

"(1) It is proposed that said District enter into a contract with the United States of America to purchase, as nearly as reasonably practicable, 1.12% of the stored water in Anderson Ranch Reservoir available for irrigation purposes, all as set forth in a proposed contract between the United States of America and Settlers Irrigation District 'concerning the construction of Anderson Ranch Reservoir and related matters' approved by the Secretary of the Interior June 20, 1941, and approved and ordered filed by this Board, as hereinabove set out; the estimated cost to said District being $52,080.00 and the maximum cost not to exceed $65,100.00; which said contract on file with the Secretary of said District is hereby referred to and by reference made a part of this resolution.

"(2) It is proposed that Settlers Irrigation District raise the money necessary to make the payments under said contract by annual assessments to be levied against the lands within said Irrigation District, in the manner provided by law."

After the consideration of said resolution it was moved by Director Demond and seconded by Director McMullen that the same be adopted. After consideration thereof and upon ballot being taken all Directors voted in favor of the motion to adopt said resolution and the President thereupon declared said motion unanimously carried.

There being no further business to come before said meeting, the same was duly adjourned.

Attest:

Frank R. Cox
Secretary

Fred Bostic
President

SUITE 403-404-405 IDAHO BUILDING
TELEPHONE 6161

THOMAS L. MARTIN
ATTORNEY AT LAW
BOISE, IDAHO

March 19, 1943

Honorable James Spofford
State Reclamation Engineer
Department of Reclamation
Boise, Idaho

Dear Mr. Spofford:

Settlers Irrigation District, organized under the irrigation district laws of the State of Idaho, and being in Ada County, Idaho, desires to enter into a contract with the United States of America, acting through the Secretary of the Interior, whereby said District will become the purchaser of 1.12% of the water stored in Anderson Ranch Reservoir, being constructed by the United States Bureau of Reclamation on the South Fork of Boise River; a copy of which proposed contract is submitted herewith and by reference made a part hereof.

The Directors of said District have considered said contract and approved the same, as shown by a resolution adopted by said Directors, a certified copy of which resolution is enclosed herewith.

You will note by said resolution said Directors have adopted the surveys, examinations, maps, plans and estimates of cost of said project prepared by the United States Bureau of Reclamation which are on file in the Department of Reclamation, as the surveys, examinations, maps, plans and estimates of cost of said Settlers Irrigation District.

By said resolution said Directors also adopted a general plan for acquiring supplemental water for the lands within said District as set forth in said resolution, all of which is hereby referred to and by reference made a part of this application.

You will further note that under said resolution the Secretary of said District requests the State Engineer of the Department of Reclamation of the State of Idaho to approve said contract to be entered into between the United States of America and Settlers Irrigation District, and the surveys, examinations, maps, plans and estimates of cost for the construction of said Anderson Ranch Reservoir.

I am writing this letter as the Secretary of said Irrigation District under direction of the Board of Directors thereof with the request that you examine the instruments herewith delivered and hereinabove referred to, and that you execute and deliver to Settlers Irrigation District your approval thereof, as provided by Section 42-401, Idaho Code Annotated.

Respectfully yours,

SETTLERS IRRIGATION DISTRICT

By _____
Secretary

TLM:JH

ENCLOSURES

R-648

PLANS FOR ARRANGEMENT FOR ACQUIREMENT

OF USE OF

ADDITIONAL OR SUPPLEMENTAL WATER
FOR
NEW YORK IRRIGATION DISTRICT

TO E. V. BERG, COMMISSIONER
BUREAU OF RECLAMATION
STATE OF IDAHO
BOISE, IDAHO

The New York Irrigation District has for sometime been negotiating with the Secretary of the Interior of the United States through the Federal Bureau of Reclamation, with the view of cooperation with the United States as provided under Chapter XVIII, Title 42 Idaho Code Annotated.

The Board of Directors of the New York Irrigation District, under authority of Section 42-1803 I.C.A. are seeking to enter into a contract with the United States for the construction, operation and maintenance of the necessary works for the delivery and distribution of water therefrom, under the provisions of the Federal Reclamation Act, and all acts amendatory thereof, or supplementary thereto, and the Rules and regulations established thereunder.

Application for water permit has heretofore been filed by the United States Department of Interior, Bureau of Reclamation with which filing, certain surveys, examinations, maps, plans, and estimates prepared by a competent irrigation engineer, and certified by him as provided for in Section 42-401 I.C.A., has been prepared, copies of which we herewith submit, or by reference thereto make a part hereof as though herewith filed.

a. Map of Anderson Ranch Reservoir, certified to by R. J. Newell, Construction Engineer, United States Bureau of Reclamation.

R-698

b. Map of canals and land of the Boise Project, which includes the New York Irrigation District, prepared by United States Department of Interior, Bureau of Reclamation, and certified to by R. J. Newell, Construction Engineer, United States Bureau of Reclamation.

c. Land list accompanying Anderson Ranch Reservoir filing.

d. By reference thereto description of lands in the New York Irrigation District in Ada County, Idaho as heretofore filed with your department.

e. Report of the Anderson Ranch Reservoir, Boise Project, submitted to the President of the United States on July 22nd, 1940, through Harold L. Ickes, Secretary of the Interior, showing generally the details for construction of the proposed Anderson Ranch Reservoir and its necessity and benefits to arise therefrom to the New York Irrigation District, which said report is officially on record with the construction engineer of the United States Department of Reclamation at his office on Broadway, in Boise City, Idaho, and available for your inspection and examination in your office, being lodged with the Application for Permit No. 26522, now under consideration in your office.

f. Copy of contract presented to the Board of Directors of the New York Irrigation District as the same was approved by the Secretary of the Interior on December 18th, 1940, showing generally the construction costs and the charges to be made for the use of waters from said Anderson Ranch Reservoir when completed.

The Board of Directors did, by resolution entered on its records, approve said plans of its proposed participation in and the operation of the works to be constructed at Anderson

R-698

Ranch Reservoir site, and other works in connection therewith of purchasing the right to the use of certain space therein, and water deliveries therefrom, all as outlined and set forth in the detail hereinbefore referred to.

The surveys, examinations and plans in the judgment of this board form the proper basis for an estimate of the cost of carrying out the same, and we have therefore by said resolution also called an election to submit the question to the qualified electors of the District as to whether or not the contract should be entered into; Said election being called for holding on February 4th, 1941, in accordance with the provisions of Section 42-401 and 42-1808 I. C. A.

The Board having already determined the amount of money necessary to be raised and the same being embodied in the proposed contract as hereinbefore referred to, and this being an element which under the rules and regulations and requirements of the Federal Statute must necessarily precede approval by the Secretary of the Interior, and by the Electors and the Board of Directors, the order of proceedure has been somewhat slightly changed from that generally outlined in Section 42-401 I. C. A.

It is desired that we have approval of your department of the proceedure, plans of construction, and generally those matters which in the judgment of your department may be desirable as provided for in Section 42-401 I. C. A., and embodied in a report to us so that formal compliance with the requirement of the statute are evident.

Respectfully submitted:

BOARD OF DIRECTORS
NEW YORK IRRIGATION DISTRICT
By _____ President.
and by _____ Assistant Secretary.

R-698

NEW YORK IRRIGATION DISTRICT

SPECIAL SESSION --

APPORTIONMENT

OF BENEFITS

Office of the Board
409 Noble Building
Boise, Idaho
May 26, 1941

The board met this day at 10 o'clock A.M. in special session, pursuant to resolution adopted at its last regular meeting for the purpose of apportioning benefits under the Anderson Ranch Reservoir contract.

Present: J. M. Lampert, President, Chas. L. King, Secretary, and E. L. Abbott, Directors; W. J. Abbs, Assistant Secretary, and B. W. Oppenheim, attorney.

No appearance either in person or by written protest was made by anyone to object to such apportionment.

The assistant secretary presented a map of the district, showing the boundaries thereof and the lands therein subject to assessment under the 1926 contract with the government. He also presented the assessment list under said contract showing the irrigable area in each subdivision assessed thereunder, together with various summaries thereof. It appears that the total irrigable area administered by the district is 17,757.18 acres, as shown by its 1941 toll list. Of the said acreage, 17,043.05 acres of irrigable land are within the boundaries of the district. The remainder are lands irrigable from the system, served under contract with river and Arrowrock water as a part of the project of the district's predecessor, the New York Canal Company, from which lands installments in the nature of assessments are collected by the district as fiscal agent. The said lands, under the Anderson Ranch Reservoir contract, are privileged to contract with the district for proportionate shares of Anderson Ranch Reservoir water.

The said totals are subject to slight change from time to time by reason of various factors, such, for example, as

Uncertainty as to the status of the ownership of small blocks of New York Canal Company stock and transfers thereof;

Titles of land and water stock in dispute;

Delinquencies in payment of assessments;

Ownership of lands taken by the county and the district on tax titles;

Segregation of assessable area by reason of transfers;

Subdivision of farm lands into urban and suburban tracts;

Pending exclusions of land and possible annexation of small tracts;

Adjustments from time to time of irrigable areas due to changed conditions and the installation of pumps for areas originally classified as high lands; etc.

The changes so made occur from time to time, more or less constantly, but do not at any time materially affect the total irrigable area.

For practical purposes, the board determined that the assessable irrigable area within the legal boundaries of the district is approximately 17,000 acres, and that while the said area constitutes the minimum acreage which can become liable under all adverse contingencies for the district's share of the construction cost of Anderson Ranch Reservoir, 17,700 acres is the approximate area which will be benefited by the construction of said reservoir and can be relied upon to pay the cost by assessments or by installments under contract.

The board further determined that the minimum liability of the district under said Anderson Ranch Reservoir contract is $456,276.60, and the maximum $565,207.50, that a uniform assessment of $26 per acre on each and every acre of irrigable land benefited will pay the district's minimum obligation, and that if the said assessment were increased by 25% the district would be enabled to pay the maximum obligation under the most adverse contingencies which can be anticipated under said contract.

Proposed Exclusions of Land Not Classified as Irrigable Under Anderson Ranch Reservoir Contract

The assistant secretary reported that, under the direction of the board and the district's attorney, he had informally notified numerous owners of land not now assessed for benefits under the 1926 contract with the United States of the willingness of the directors to consider petitions for exclusion thereof from the boundaries of the district; that petitions had already been filed by

Idaho Power Company,

C. E. Faust, and

Della H. Rohrer et al.;

and that several other petitions were, according to his information, in process of preparation and would probably be filed before the board's regular meeting in June, the first occasion when, under the statute, the board can consider them.

It appearing to the board that certain petitions have been filed and others are about to be filed praying for the exclusion from the boundaries of the district of certain lands which for various reasons are not properly within its boundaries and which have not been assessed for benefits under the 1926 contract with the federal government; that said petitions are pending, at the board's invitation, for the purpose of more accurately conforming the district's boundaries to its assessed irrigable area:

The board, by motion duly made, seconded and unanimously carried, declared its intention to exclude all such lands the owners of which shall make proper legal proof of right to exclusion, and further determined that such lands (to be more accurately and specifically identified by the board's subsequent action on such petitions) are not a part of the irrigable area within the district which will be benefited under the contract between this district and the United States for the construction of Anderson Ranch Reservoir.

Reclassification of Lands of CLAUDE BREEDEN

Claude Breeden, an owner of land within the boundaries of the district, appeared before the board and filed the following petition:

May 26, 1941

Board of Directors
New York Irrigation District
409 Noble Building
Boise, Idaho

Gentlemen:

With respect to the assessment of benefits under the Anderson Ranch Reservoir contract on my land, the South half (S½) of South-west quarter (SW¼) of Section Four (4), Township 2 North, Range 1 East, B.M. The total irrigable area heretofore assessed under the 1926 contract is 73.48 acres. This computation resulted from the exclusion of road rights-of-way and of high land, the latter amounting to 4.5 acres.

This high land is where my house and its yard are located, and I have facilities for pumping water thereon. I therefore request that it be included as a part of the irrigable area under the pending assessment of benefits, making the total area assessed 77.98 acres.

Please consider this also as my application for additional supplemental water for said 4.5 acres whenever your Board finds it convenient and expedient to allocate the same.

Respectfully yours,

/s/ CLAUDE BREEDEN
Your Office No. 376

The board, having verified the information in said petition from its records, thereupon unanimously agreed to classify as irrigable the 4.5 acres of high land referred to in said petition, and authorized the secretary to show the irrigable area on the S½ SW¼, Sec. 4, Twp. 2 N., R. 1 E., B.M., as 77.98 acres for the purpose of assessment of benefits under the Anderson Ranch Reservoir contract.

The matter of allocating supplemental water under the 1926 contract to said 4.5 acres was temporarily deferred for action at a later meeting of the board.

The board thereupon recessed at 4 o'clock P.M., to meet Tuesday, May 27, 1941, at 10 o'clock A.M.

NEW YORK IRRIGATION DISTRICT

By /s/ J. M. LAMPERT
President.

SPECIAL SESSION --

APPORTIONMENT

OF BENEFITS

The board met at 10 o'clock A.M. in special session, pursuant to adjournment, to continue its work of apportioning benefits under the Anderson Ranch Reservoir contract.

Present: J. M. Lampert, President, Chas. L. King, Secretary, and E. L. Abbott, Directors.

The board continued in session throughout the day in discussion of the various phases and problems of such apportionment.

No appearance either in person or by written protest was made by anyone to object to such apportionment. Several land owners appeared, however, during the day to discuss the effect of such apportionment. To them the board explained its proposed action, to which they made no objection.

At 4 o'clock P.M., no further business appearing, the board recessed to meet Wednesday, May 28, 1941, at 10 o'clock A.M.

NEW YORK IRRIGATION DISTRICT

SPECIAL SESSION —

APPORTIONMENT

OF BENEFITS

Office of the Board
409 Noble Building
Boise, Idaho
May 28, 1941

The board met at 10 o'clock A.M. in special session, pursuant to adjournment, to continue its work of apportioning benefits under the Anderson Ranch Reservoir contract.

Present: J. M. Lampert, President, Chas. L. King, Secretary, and E. L. Abbott, Directors.

The board continued in session throughout the day in discussion of the various phases and problems of such apportionment.

No appearance either in person or by written protest was made by anyone to object to such apportionment. Several persons appeared throughout the day for discussion but without protest against the board's proposed action.

-----:-----

Apportionment of Benefits Under
Anderson Ranch Reservoir Contract

The board having had under consideration and having fully discussed the subject of apportionment of benefits under the Anderson Ranch Reservoir contract, Director Abbott moved the adoption of the following resolution, which was seconded by Director King, and unanimously adopted:

Premises:

Pursuant to authority conferred at an election held in the New York Irrigation District February 4, 1941, and confirmed by decree of the court on March 24, 1941, the Board of Directors has authorized entering into a contract with the United States, which was approved as to form by the Secretary of the Interior December 18, 1940, and which is about to be formally executed, for the

construction of Anderson Ranch Reservoir and related matters, whereby this district has, among other matters, assumed the payment of the district's share of the cost of such construction, estimated at a minimum of $456,276.60 but subject to a possible increase to $565,207.50, dependent upon contingencies in said contract provided.

The board, having examined each tract or legal subdivision of land in the district for the purpose of determining the benefits which will accrue to each of such tracts or subdivisions under said contract, did by resolution in regular session on May 6, 1941, fix May 26, 1941, at 10 o'clock A.M., at the board's office, 409 Noble Building, in Boise, Ada County, Idaho, as the time and place for making an apportionment and distribution over the lands of said district of the amount owing to the United States under said contract and of assessing benefits thereunder and of making a list of such apportionment, distribution, and assessment, at which place and time, or continuation thereof, any person interested was privileged to appear, be heard, and make his objections.

Pursuant to such resolution and order, notice was given to the owners of all lands in said district by:

Publication of the same in The Idaho Sunday Statesman in its issues of May 11, 18, and 25, 1941, as shown by affidavit of the publisher's principal clerk now on file; and

Mailing of such notice on a postal card to each owner of lands within the district, as shown by the records and assessment rolls of the district, at their respective addresses, as shown on said records, as appears by certificate of the assistant secretary now on file.

Pursuant to said order and notice, this board convened at its said office May 26, 1941, at the hour of 10 o'clock A.M., for the purpose aforesaid, and continued in session throughout the day and during the two following days. No one has appeared to object or protest and no written objections have been filed. The board, being fully advised, is now prepared to apportion and assess such benefits.

Resolution:

THEREFORE, BE IT RESOLVED by the Board of Directors of the New York Irrigation District that--

The irrigable area of the system of the district is approximately 17,700 acres, including lands served under contract, and the irrigable area within the boundaries of the district is approximately 17,000 acres. The basic record of such irrigable area consists of the surveys made and maps prepared by the U. S. Bureau of Reclamation at or about the time of the organization of the district, as modified by slight changes and adjustments over the intervening years and more accurately reflected on the present assessment rolls of the district under apportionment of benefits made under the 1926 contract with the United States. The area within the district boundaries is shown on the map prepared for this meeting, which has been identified as filed this day and is hereby made a part of the official records of the district, and by reference made a part of this resolution.

All lands within the district, as well as all lands under the district's system privileged to purchase Anderson Ranch Reservoir storage water, now classified on the district records as irrigable, are and will be equally, uniformly, and proportionately benefited by the said contract with the United States.

To meet the minimum obligations of the district under the said Anderson Ranch Reservoir contract, there is hereby apportioned as benefits to each and every acre within the boundaries of the district now classified on its records as irrigable the sum of $26.00, subject to an additional possible increase up to 25% of such sum, conditioned upon the contingencies which may occur under the terms of said contract, and particularly the following:

1. Under said contract, the cost of construction may be increased up to an additional 10% over present estimates. Should the actual cost of construction exceed the estimated cost, the obligation of the district will be increased and the apportionment of benefits to each acre of irrigable land will be correspondingly increased pro rata.

2. Under the said contract, the Secretary of the Interior has the option to sell up to 11.2% of the water storage rights for which this and other major districts have contracted to lands outside said districts. Should the Secretary fail to exercise such option or should such outside lands fail to contract with the United States therefor, this district will be obligated to pay its proportionate share of such unsold rights. In such event the district's water supply will be thereby increased, and each acre of irrigable land within the district will be proportionately additionally benefited thereby and reciprocally will become liable for its proportionate share of the added obligation.

3. Certain lands not within the legal boundaries of the district, but situated and served with water by virtue of stock ownership in the New York Canal Company which the district acquired, are now served under contract. Such lands, under the Anderson Ranch Reservoir contract, are privileged to acquire storage rights therein by contract with this district and by paying in installments the equivalent of assessments, and a portion of the storage rights for which the district is obligated is tentatively allocated for such purpose. Any rights so allocated which are not so contracted for will remain in the district and will proportionately augment the water supply and benefits of each and every acre of irrigable land therein and proportionately increase its apportionment.

BE IT FURTHER RESOLVED that the assistant secretary prepare copies of the map of all assessed lands within the boundaries of the district presented to this meeting (the same being on a convenient scale), endorsing thereon a general statement that all such lands are assessed at the rate in this resolution fixed; that one copy of such map be filed in the office of the Department of Reclamation of the State of Idaho, and one copy thereof remain in the office of the board of directors for public inspection.

BE IT FURTHER RESOLVED that B. W. Oppenheim, as attorney for the district, is hereby authorized and instructed to proceed forthwith to take the necessary legal proceedings to have the said apportionment and assessment of benefits examined, approved, and confirmed by the District Court of the Third Judicial District of the State of Idaho in and for the County of Ada.

No further business appearing, the board adjourned.

I, W. J. ABBS, the duly appointed, qualified, and acting Assistant Secretary of the New York Irrigation District in said county and state, do hereby certify that the attached map is a duplicate copy of map filed with the Board of Directors of the New York Irrigation District May 26, 1941, showing the boundaries of said district and the assessable irrigable areas therein, as the said map was subsequently revised to show certain exclusions of land ordered by said board July 1, 1941, as shown by the records and files of said district in my custody.

WITNESS, My hand and the seal of said district, this 8th day of July, 1941.

W J Abbs

Assistant Secretary,
New York Irrigation District.

(DISTRICT SEAL)

DEPARTMENT OF RECLAMATION

March 19, 1941

STATEMENT BY THE COMMISSIONER OF RECLAMATION IN REGARD TO THE STORAGE WATERS TO BE IMPOUNDED BY THE ANDERSON RANCH DAM AS THEY PERTAIN TO THE NAMPA AND MERIDIAN IRRIGATION DISTRICT

I have carefully examined the map showing the distribution system of the Nampa and Meridian Irrigation District and approve the system as sufficient to water the lands thereunder.

The map showing a cross section of the proposed Anderson Ranch Dam and the contours within the reservoir site, as well as a table of capacities for various contour elevations has been checked and is hereby approved.

The items on the sheet containing the cost estimate of the Dam, the Reservoir and Power Plant have been investigated and appear to be reasonable.

The estimate of Annual Costs and Benefits to the lands within the Nampa and Meridian Irrigation District have been carefully worked out. Of the total of 300,000 acre feet set aside for irrigation, this district is allotted 84,461 acre feet at a cost to the district of $1,033,539. This amount is spread over a period of 40 years, beginning in 1945 and amounts to an annual payment of 64¢ per acre on project lands lying above the Ridenbaugh Canal and 31¢ per acre on lands receiving water from the Ridenbaugh Canal. The annual increase in Operation and Maintenance Costs range from 2¢ to 5¢ per acre depending on the location of the land on the project. The costs as they will be assessed to the landowner, both for construction and for operation and maintenance are low in comparison to the benefits derived and are hereby approved.

The Minutes of the meeting of the Board of Directors, called for the purpose of outlining a plan for the improvement of the water supply for the lands under the district have been submitted.

All the Directors and the Secretary were present and a very clear statement of the Contract to be entered into with the Government was set forth, together with a statement of the costs and benefits to accrue to the water users. This Department is convinced that the directors of the district well understand the terms and conditions of the Contract for the construction of the Anderson Ranch Dam, and the minutes are hereby approved.

It is the conclusion of the Commissioner of Reclamation that all maps and documents submitted are in order and that the project represented thereby is meritorious and should have the support of all the water users concerned.

A. V. [illegible]
Commissioner of Reclamation

DEPARTMENT OF RECLAMATION

March 19, 1941

STATEMENT BY THE COMMISSIONER OF RECLAMATION IN REGARD TO THE STORAGE WATERS TO BE IMPOUNDED BY THE ANDERSON RANCH DAM AND THEY CONTRACT TO THE NAMPA AND MERIDIAN IRRIGATION DISTRICT

I have carefully examined the map showing the distribution system of the Nampa and Meridian Irrigation District and approve the system as sufficient to water the lands thereunder.

The map showing a cross section of the proposed Anderson Ranch Dam and the contours within the reservoir site, as well as a table of capacities for various contour elevations has been checked and is hereby approved.

The items on the sheet containing the cost estimate of the Dam, the Reservoir and Power Plant have been investigated and appear to be reasonable.

The estimate of Annual Costs and Benefits to the lands within the Nampa and Meridian Irrigation District have been carefully worked out. Of the total of 380,000 acre feet set aside for irrigation, this district is allotted 84,461 acre feet at a cost to the district of $1,033,539. This amount is spread over a period of 40 years, beginning in 1945 and amounts to an annual payment of 64¢ per acre on project lands lying above the Ridenbaugh Canal and 31¢ per acre on lands receiving water from the Ridenbaugh Canal. The annual increase in Operation and Maintenance Costs range from 2¢ to 5¢ per acre depending on the location of the land on the project. The costs as they will be assessed to the landowner, both for construction and for operation and maintenance are low in comparison to the benefits derived and are hereby approved.

The Minutes of the meeting of the Board of Directors, called for the purpose of outlining a plan for the improvement of the water supply for the lands under the district have been submitted.

It is the conclusion of the Commissioner of Reclamation that all maps and documents submitted are in order and that the project represented thereby is meritorious and should have the support of all the water users concerned.

E. V. [illegible]
Commissioner of Reclamation

ANDERSON RANCH RESERVOIR

ESTIMATE OF ANNUAL COSTS AND BENEFITS TO THE LANDS WITHIN THE NAMPA & MERIDIAN IRRIGATION DISTRICT

The Engineers of both the Army and Bureau of Reclamation estimate the construction cost of the dam at $10,300,000, of which $4,650,000 is payable by irrigation districts.

The general obligation of the Nampa-Meridian Irrigation District is 25.03% of the irrigation cost, amounting to $1,163,895. The Secretary of the Interior reserves the right to sell 11.2% to other districts in the Boise Valley which will make the net obligation of said district $1,033,539. This is payable in 40 annual instalments, payments to begin after 275,000 acre feet of water are available for irrigation.

The total capacity of the reservoir is about 500,000 acre feet of which 380,000 are set aside for irrigation and flood control and allocated to the various districts.

Of this amount, 84,461 acre feet are allotted to the Nampa-Meridian Irrigation District at a cost of $12.24 per acre foot of space.

A study of past records indicates that, as nearly as practicable, a uniform water supply will be secured for all lands within the district by the following apportionment:

U. S. GOVERNMENT PROJECT LANDS LYING ABOVE THE RIDENBAUGH CANAL AND HAVING WATER DELIVERED BY THE BOISE PROJECT BOARD OF CONTROL

16,070 acres at 2.10 acre feet of space per acre — 33,747 Ac.Ft.

U. S. GOVERNMENT PROJECT LANDS HAVING WATER DELIVERED FROM THE RIDENBAUGH CANAL

24,130 acres at 1.02 acre feet of space per acre — 24,529 Ac.Ft.

OLD RIGHT RIDENBAUGH LANDS

26,185 acres at 1.00 acre feet of space per acre — 26,185 Ac.Ft.

Total — 84,461

Annual construction payments due on ALL PROJECT LANDS in the District (Based on present crop returns and without Anderson Ranch Reservoir)

	1941-1961	1961-1985
Boise Project Construction	$ 1.05	$ 1.05
Arrowrock Repairs	.18	.00
Total per acre	$ 1.23	$ 1.05

Annual construction payments on PROJECT LANDS LYING ABOVE THE RIDENBAUGH CANAL (Based on present crop returns and with Anderson Ranch Reservoir)
(Estimated that payments on this reservoir will not begin until 1945)

	1941-1945	1945-1985
Boise Project Construction	$ 1.05	$ 1.05
Arrowrock Repairs	.18	.07
Anderson Ranch Dam	.00	.64
Total per acre	$ 1.23	$ 1.76

Annual construction payments on PROJECT LANDS RECEIVING WATER FROM THE RIDENBAUGH CANAL (Based on present crop returns and with Anderson Ranch Reservoir)

	1941-1945	1945-1985
Boise Project Construction	$ 1.05	$ 1.05
Arrowrock Repair	.18	.07
Anderson Ranch Dam	.00	.31
Total per acre	$ 1.23	$ 1.43

Present Annual Average Construction payments on OLD RIGHT RIDENBAUGH LANDS

	1941-1944	1944-1952	
Bond and Interest	$ .625	$ .85	Paid up in
U. S. Drainage Construction	.40	.00	1952
Total per acre	$1.025	$ .85	

Annual construction payments with Anderson Ranch Reservoir OLD RIGHT RIDENBAUGH LANDS

	1941-1944	1944-1945	1945-1952	1952-1985
Bond and Interest	$ 0.625	$ .85	$ .85	$ .00
U.S.Drainage	.40	.00	.00	.00
Anderson Ranch Dam	.00	.00	.31	.31
	$ 1,025	$ 0.85	$ 1.16	$ 0.31

BENEFITS ACCRUING TO LANDS WITHIN THE NAMPA & MERIDIAN IRRIGATION DISTRICT FROM THE CONSTRUCTION OF ANDERSON RANCH DAM.

From a 25 year average of the crop reports on the U. S. Government Project Lands, it has been determined that an acre foot of water in Anderson Ranch Reservoir should produce an annual crop benefit of $5.00.

BENEFITS TO PROJECT LANDS LYING ABOVE THE RIDENBAUGH CANAL

Records of the run-off on the Boise River, as computed by the Bureau of Reclamation, show that during the years 1923 to 1939 inclusive, the average gain for these lands would have been about 0.57 acre foot per acre.

Annual benefit per acre = .57 x $5.00 = $2.85

BENEFITS TO RIDENBAUGH LANDS AND TO PROJECT LANDS LYING BELOW RIDENBAUGH CANAL

Records of the District Office in Nampa show that the average gain for these lands during the years 1928 to 1940 inclusive would have been about 0.27 acre foot per acre.

Annual benefit per acre = .27 x $5.00 = $1.35

INCREASE IN ANNUAL OPERATION AND MAINTENANCE COST

For Anderson Ranch Reservoir - The Bureau of Reclamation estimate is about ½ cent per acre foot of space.

For Project lands---------- Mr. Wm. H. Tuller, Project Manager for the Board of Control, estimates 6¢ per acre

For Ridenbaugh Lands---------- About 2¢ per acre.

I, FORREST SOWER, do hereby certify that I have carefully examined the surveys made by the Bureau of Reclamation of the proposed Anderson Ranch Reservoir on the South Fork of the Boise River; the examination made of such Reservoir, with maps and plans of the said Reservoir and Dam; and the estimates of the costs of constructing said dam as made by the said Bureau of Reclamation, and also by R. J. Newell, Construction Engineer. From such examination I find that the said plan is feasible and practicable; that the proposed Reservoir when constructed will improve the water supply for the land within the Nampa & Meridian Irrigation District, and now receiving water for irrigation purposes and will provide a practical plan for storage of water for a supplemental supply for seasons of water shortage, and that such plan will conserve the waters of the Boise River and prevent a large part of

said water from being wasted in unusual run-offs. That said surveys, plans, maps, examinations and estimates above mentioned furnish a proper basis for an estimate of the cost for carrying out the construction of said Reservoir and Dam, and I do hereby approve said plans and estimates above mentioned.

Dated March 18, 1941.

Forrest Sower

Licensed Engineer, and Manager of the Nampa & Meridian Irrigation District.

EXHIBIT "I"

MINUTES OF A MEETING OF THE BOARD OF DIRECTORS OF

THE NAMPA & MERIDIAN IRRIGATION DISTRICT HELD ON

MARCH 18, 1941

Present - W. T. Evans,
John W. Hubbard, and
Wm. Wymer - Directors.

Jesse Jones - Secretary.

The following proceedings were had:

A copy of the proposed Contract between the United States and the Nampa & Meridian Irrigation District, approved by the Secretary of the Interior on January 13, 1941, providing for the construction of a reservoir on the South Fork of the Boise River at or near the Anderson Ranch site for the storage of water for irrigation purposes, was presented to the Board of Directors; and the Board having duly considered said Contract and it appearing to the Board that the construction of said "Anderson Ranch Reservoir" is for the best interest of the District and the water users within the District, thereupon the Board unanimously adopted the following Resolution:

BE IT RESOLVED By the Board of Directors of the Nampa & Meridian Irrigation District that the proposed Contract between the United States and the Nampa & Meridian Irrigation District, approved by the Secretary of the Interior on January 13, 1941, be and the same is hereby approved, subject to the approval by the electors of said District at a special election to be hereafter called and held in said District, and said Contract is hereby ordered to be filed by the Secretary of the District. A copy of said Contract is attached hereto marked "Exhibit 1-A" and made a part hereof.

The question of formulating a general plan to improve the water supply for the irrigation of land within the District, by providing for the storage of supplemental water coming on for consideration. Thereupon, the Board after full consideration, unanimously adopted the following Resolution as a general plan for improving the water supply of the Nampa & Meridian Irrigation District, and for providing storage space for a supplemental water supply:

BE IT RESOLVED By the Board of Directors of the Nampa & Meridian Irrigation District that, whereas by the laws of the State of Idaho governing Irrigation Districts, it is provided as follows:

"Said Board may also construct the necessary dams, reservoirs and works for the collection of water for said District and to do any and every lawful act necessary to be done that sufficient water may be furnished to each land owner in said District for irrigation purposes."

It appearing to the Board of Directors of the Nampa & Meridian Irrigation District that the District has heretofore acquired, by purchase, what is known as the Ridenbaugh Canal System, diverting water from the Boise River, in Ada County, State of Idaho, to lands in said District, sufficient to furnish a supply of water from the run-off of the Boise River to water approximately 26,185 acres of land in said District, during the time that the water is flowing in the Boise River. That the said lands so irrigated from the water of the Boise River diverted through the Ridenbaugh Canal System will hereinafter be referred to as the "old water right lands". That there is, within the boundaries of the

Nampa & Meridian Irrigation District approximately 40,200 acres of land for which no water is available for irrigation from the Ridenbaugh Canal, and some portions of which are above the Ridenbaugh Canal system and can not be watered therefore; and that heretofore the District entered into Contracts with the United States to furnish water rights for lands within the District not susceptible to irrigation from the Ridenbaugh Canal and lands under the Ridenbaugh Canal for which no water rights were available, which lands are hereinafter referred to as "project lands", which said Contracts were dated April 1, 1909, June 1, 1915, November 5, 1918 and March 2, 1926, which are hereinafter collectively referred to as "Government-District Contracts".

That the works contemplated by the "Government-District Contracts" have been completed and it appearing to the Board that the water users within the Nampa & Meridian Irrigation District, including "old water right lands" and "project lands" have suffered a shortage of water for irrigation purposes during certain irrigation seasons in the past and that generally there is a shortage of water for both the "old water right lands" and the "project lands" for late irrigation; and that it is for the best interest of the District and the owners of the "project lands" that additional storage capacity be provided for the purpose of supplementing the water supply when necessary in the latter part of the irrigation season; and to, as far as possible, provide for the holding over of water in storage in years when there is a sufficient water run-off, to permit such storage to supplement the water supply in the years of a short water run-off; and that some of the "old water right lands" need such supplemental storage.

The United States of America, acting through the Bureau of Reclamation, has submitted to the said District a proposed Contract with reference to furnishing additional storage capacity for the storage of water of the Boise River, by constructing what is known as the "Anderson Ranch Reservoir" on the South Fork of the Boise River, and to sell to the District storage space in said Reservoir sufficient for the storage of 84,461 acre feet of water; to be used for the storage of water of the Boise River for delivery as needed, which said proposed Contract provides with the allocation for stored water from said "Anderson Ranch Reservoir", for the use of "old water right lands" of the District only to the extent that such additional stored water supply shall be contracted for by the owners thereof under Contract between such land owners and the District, all the remainder of the stored water supply provided for the District under said Contract and not covered by the Contracts with the owners of the "old water right lands" to be allocated and furnished to the "project lands" of the District.

It appearing to the Board that the United States is willing to sell to said District a sufficient storage capacity in said "Anderson Ranch Reservoir" to store 84,461 acre feet, and that such additional storage capacity is necessary to supply an adequate supplemental water right for the lands within said District; and

That the cost of such storage capacity is estimated to be ONE MILLION ONE HUNDRED SIXTY-THREE THOUSAND EIGHT HUNDRED NINETY-FIVE & NO/100 ($1,163,895.00) DOLLARS, and that the Secretary of the Interior reserves the right to sell 11-2/10% of the rights reserved by the said District, which if sold will reduce the amount of the estimated cost to the said District to ONE MILLION THIRTY-THREE THOUSAND FIVE HUNDRED THIRTY-NINE & NO/100 ($1,033,539.00) DOLLARS. It being provided by said proposed Contract, however, that the maximum general repayment of the obligation of said District shall not exceed ONE MILLION TWO HUNDRED EIGHTY THOUSAND TWO HUNDRED EIGHTY-FOUR & 50/100 ($1,280,284.50) DOLLARS. That by the terms of said Contract, the District shall be obligated to pay in forty (40) annual installments, without interest, the payments to begin after 275,000 acre feet are available from said "Anderson Ranch Reservoir" for irrigation purposes.

Said Contract further provides that any portion of said storage capacity in said "Anderson Ranch Reservoir" allocated to the Nampa & Meridian Irrigation District not contracted for by the owners of the "old water right lands" and not needed for the use of "project lands" within said District, may be sold with the consent of the Secretary of the Interior.

The cost of all storage capacity and storage water under said proposed Contract to be by the District apportioned to the several tracts of land in said District according to the benefits to accrue therefrom under the terms of said Contract and assessed to said lands.

It further appearing to the Board of Directors that the Engineers of the United States Reclamation Service have heretofore made surveys, examinations, maps, plans and estimates for the construction of the said "Anderson Ranch Reservoir" to be used as a storage reservoir for flood control and generation of electricity, and that the same have been received by this Board, and that the Construction Engineer of the United States Reclamation Service, R. J. Newell, has made a report as to the cost of the construction of said "Anderson Ranch Reservoir", which are now received by the Board, and which said maps, surveys, estimates and plans are hereby accepted and made a part of this plan; and it further appearing to the Board that all such surveys, examinations, maps, plans and estimates were made under the direction of the Engineers of the United States Department of Reclamation, certified to by them, and that said Engineers are competent Irrigation Engineers; and that this Board has heretofore employed Forrest Sower, a competent Irrigation Engineer and that said Forrest Sower has carefully examined said surveys, maps, plans and estimates, and certified that they demonstrated the practicability of such plans and furnish the proper basis for an estimate of the cost of carrying out the same, and has approved the estimate of cost heretofore mentioned.

NOW THEREFORE, It is ordered by the Board that the foregoing shall constitute the general plan of the Board of Directors for the purpose of providing supplemental water rights and to improve the water supply for the "project lands" and "old water right lands" within said District, subject to changes and modifications as good policy and the best interest of the District may direct. It is ordered that the maps, plans and estimates above referred to, together with this Resolution, be submitted to the Commissioner of Reclamation of the State of Idaho as required by law, and that the Secretary of the Board is hereby authorized at the earliest moment to convey to the said Commissioner of Reclamation of Boise, Idaho, said maps, plans and estimates for his examination and report.

On motion the Board adjourned.

Attest:

Secretary

DEFENDANT'S EXHIBIT NO 13

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

BOISE PROJECT, IDAHO

Contract with Settlers Irrigation District concerning construction of Anderson Ranch reservoir and related matters.

THIS AGREEMENT, Made this _____ day of _____, 194__, under the provisions of the Act of Congress of June 17, 1902 (32 Stat. 388) and acts amendatory thereof or supplementary thereto, and particularly the Act of August 4, 1939 (53 Stat. 1187), known as the Reclamation Project Act of 1939, together hereinafter referred to as the Federal Reclamation Law, between the UNITED STATES OF AMERICA, hereinafter referred to as the United States, acting for this purpose through the Secretary of the Interior, hereinafter referred to as the Secretary, and the Settlers Irrigation District, an irrigation district organized under the laws of the State of Idaho and located in Ada County, Idaho, hereinafter referred to as the District;

WITNESSETH:

Explanatory Recitals

2. WHEREAS, under the authority of the Federal Reclamation Law, the United States constructed that certain irrigation project in the State of Idaho commonly known as the Boise project, and also known as the Boise reclamation project; and

3. WHEREAS, the United States and the District entered into contract dated February 9, 1918, contract dated February 18, 1919 and amended September 19, 1921, and contract dated June 12, 1931, all of

R-698

which are hereinafter collectively referred to as the Government-District contract; and

4. WHEREAS, the water users within the District have suffered a shortage of water during certain irrigation seasons in the past and, in order to improve their water supply, desire the construction of additional storage capacity; and

5. WHEREAS, the Secretary has caused investigations to be made of a proposed reservoir on the south fork of the Boise river at or near the Anderson Ranch site, of approximately five hundred thousand (500,000) acre-feet capacity, hereinafter referred to as the Anderson Ranch reservoir, and the District, together with the other irrigation districts of the Arrowrock Division of the Boise project, has requested the construction thereof; and

6. WHEREAS, the total cost of the proposed Anderson Ranch reservoir, of sufficient size to create a storage reservoir approximately 500,000 acre -feet capacity, and appurtenant works including facilities for the generation of electrical power at Anderson Ranch reservoir, and related flood control improvements at Arrowrock reservoir, is estimated to be the sum of $13,100,000, of which $400,000 is the estimated cost of the

R-6-98

flood control improvements at Arrowrock Reservoir and $2,400,000 is the estimated cost of the power plant, and of which sum of $13,100,000 the proportionate allocation for the storage of water for irrigation is $4,650,000, the proportionate allocation for flood control is $5,050,000, and the proportionate allocation for the generation of electrical power (including the estimated cost of the power plant) is $3,400,000; and

7. WHEREAS, that portion of the actual cost of the Anderson Ranch Reservoir allocated to irrigation is the proportionate part of the Anderson Ranch Reservoir cost (exclusive of the cost of the power plant and of the Arrowrock flood control improvements) that $4,650,000 is of $10,300,000; and

8. WHEREAS, the District desires to enter into a contract with the United States for certain additional storage water to be made available by said Anderson Ranch Reservoir;

NOW, THEREFORE, In consideration of the mutual and dependent stipulations and covenants herein contained, it is hereby mutually agreed by and between the parties hereto as follows:

Works To Be Constructed

9. The United States, subject to article 37 and article 40 of this contract, will construct, on the South Fork of the Boise River at or near the Anderson Ranch site, a dam and reservoir (to be known as the Anderson Ranch Dam and Anderson Ranch Reservoir) designed to provide a storage capacity of approximately Five Hundred

Thousand (500,000) acre-feet, and, at its option, may enlarge the outlet gates at Arrowrock Dam with a view to providing improved flood control facilities, and may construct a power plant in connection with the said Anderson Ranch Dam.

General Repayment Obligation of the District

10. As its general repayment obligation under this contract, the District shall pay to the United States, in the installments hereinafter provided, the following amount:

Should the actual cost of the Anderson Ranch Reservoir (exclusive of the power plant and of Arrowrock flood control improvements) as determined and stated by the Secretary in the notice and statement provided for in Article 11 (a) hereof, be the same as the estimated cost of $10,300,000, the general repayment obligation of the District shall be $52,080.

Should the said actual cost exceed or be less than the said estimated cost, then the general repayment obligation of the District shall be that percentage of said actual cost which $52,080 is of said estimated cost of $10,300,000, as said actual cost is conclusively determined by the Secretary in accordance with the provisions of article 18 hereof, subject, however, to the limitation, that the maximum general repayment obligation of the District under this contract shall not exceed $65,100.

Terms of Payment of Construction Installments

11. (a) Whenever the construction of Anderson Ranch Reservoir is substantially completed, or is advanced to a point where storage water

R-698

in an amount exceeding 275,000 acre-feet becomes available for irrigation use from said storage reservoir, the Secretary shall so announce, and shall give to the District notice thereof, hereinafter referred to as the tentative construction cost notice. Said notice shall be given prior to September 1 of the year in which given and shall include a statement of the cost of the Anderson Ranch Reservoir, as then estimated, and of the District's general repayment obligation under Article 10 of this contract, based on said statement of cost. Said tentative construction cost notice shall govern the amount of repayment obligation installments until such time as the cost and the District's general repayment obligation based thereon can be determined by the Secretary, and the statement thereof submitted to the District in a final construction cost notice. Any difference between the District's general repayment obligation as stated in the tentative construction cost notice and said obligation as stated in the final construction cost notice shall be spread in such a manner as to maintain approximately equal overall annual payments as hereinafter provided for in this article, as increases or decreases as the case may be, in the installments on account of Anderson Ranch Reservoir coming due after said final construction cost notice has been given to the District.

The Secretary's determinations of cost and of the District's general repayment obligation in each of said notices shall be conclusive.

(b) At the time the Secretary gives to the District the tentative construction cost notice provided in (a) of this article, stating the District's general repayment obligation, the Secretary shall determine

R-698

the respective amounts of the first ten (10) successive annual installments of said obligation. The respective amounts of said first ten (10) installments shall be determined so that the annual installments, including the then estimate of those following the tenth, on account of Anderson Ranch Reservoir, when combined with the then unaccrued installments to be paid by the District for the repair, resurfacing, improvement and enlargement of Arrowrock Dam (hereinafter referred to as Arrowrock repairs), and the Secretary's then estimate of the probable annual construction installments to be paid by the District under the Government-District contract, form a combined, overall schedule of approximately equal annual installments throughout the forty (40) year repayment period within which the District's general repayment obligation under this contract shall be paid. In the year in which the tenth annual installment due from the District on account of Anderson Ranch Reservoir accrues, the Secretary shall determine the respective amounts of the remaining thirty (30) installments of the District's general repayment obligation under this contract in the same manner as provided above for the first ten installments, excepting that the determination in said tenth installment year shall be made upon consideration of the then unaccrued installments on account of Arrowrock repairs and the Secretary's then estimate of probable annual construction installments to be paid by the District under the Government-District contract. In no event, however, shall any annual installment to be paid by the District, on account of Anderson Ranch Reservoir be less than $1,000.

(c) The District agrees to pay the general repayment obligation, in the forty (40) successive annual installments, scheduled under (b) of this article; and there being no irrigation block designated by the Secretary and no development period fixed by him, the first installment shall become due and payable in the calendar year following immediately after the one in which the Secretary gives the tentative construction cost notice provided for in (a) of this article. Each year's installment on account of Anderson Ranch reservoir shall become due and payable from the District to the United States one-half on July 1 and one-half on December 31 of the year in question.

(d) Each year the installment of the District's general repayment obligation scheduled for such year shall be the construction charges due and payable by the District for such year, and the normal and percentage plan of payment shall not apply thereto unless such normal and percentage plan shall be hereafter adopted and provided for by supplemental contract, as authorized in Article 39 hereof.

District's Percentage of Stored Water from Anderson Ranch Reservoir

12. Subject to the holdover rights provided for in Article 16 hereof, and the allowance of similar holdover rights provided for by contracts with other contracting districts and companies entitled to receive stored water from Anderson Ranch reservoir, the United States, in the manner and subject to the conditions provided in this contract, will release for the use of the District each year (as ordered by the District as nearly as is reasonably practi-

cable one and twelve hundredths per cent (1.12%) of the stored water actually available from said reservoir that year for irrigation purposes, as determined by the Secretary.

Optional With Secretary to Measure and Deliver Anderson Storage Either at Outlets of Anderson Ranch Reservoir or at Outlets of Arrowrock Reservoir

13. At the option of the Secretary, the Anderson Ranch Reservoir stored water to which the District is entitled may be measured and delivered to or for the District either at the outlets of the Anderson Ranch Reservoir or at the outlets of the Arrowrock Reservoir.

Secretary Authorized to Determine the Administration of the Reservoirs and the Holding of Water Therein

14. In all matters not expressly covered by the provisions of this contract, the Secretary is authorized to determine the proper administration of the said Anderson Ranch Reservoir and Arrowrock Reservoir and the water supply therefrom, and his authority shall include but not be limited to the authority to determine the length of time and the extent to which the stored water belonging to either of said reservoirs may be held in the other without injury to the holders of rights to water therefrom.

All Rights in Reservoir of Equal Priority

15. It is agreed that all parties contracting with the United States for stored water for irrigation purposes from said Anderson Reservoir shall be entitled to proportionate rights to stored water available for irrigation purposes from said reservoir and that the rights of the District under this contract shall be in all respects on a par as to priority and dignity of rights with the rights of the other contracting parties, except as to holdover rights, which holdover rights shall be as provided for in Article 16 hereof.

R-698

Holdover Rights and Reservations For Power and Flood Control and Temporary Holding In One Reservoir of Water Belonging to Another

16. The rights provided for in this article will be referred to as the District's holdover rights. The District will be allowed to hold over in Anderson Ranch Reservoir from year to year stored water to which it may be entitled in any irrigation season but does not use during such season, and will be given credit therefor the following year or years subject to the following conditions and limitations:

(a) The District shall not be entitled to hold over to its credit in said reservoir at any one time more stored water than can be stored, subject to paragraph (g) of this article, in two and twenty-four hundredths per cent (2.24%) of the available storage capacity of the reservoir usable for irrigation; that is to say, two and twenty-four hundredths per cent (2.24%) of the capacity thereof other than that reserved for control of flash floods and that reserved for power.

(b) Whenever the combined amount of storage water in the Arrowrock Reservoir and the Anderson Ranch Reservoir reaches a point where there remains in the two reservoirs only 45,000 acre-feet unfilled capacity, and additional water shall be available for storage, then such additional storable water shall be considered stored in reservoir capacity made available therefor by reducing and eliminating holdover storage in the following manner: Water shall be considered released from holdover storage of the contracting party having on hand the largest amount of holdover storage water in per cent of its maximum holdover storage as fixed by (a) of this article until such per cent is reduced to that of

R-698

the party having on hand the next highest per cent, then from both parties' holdover storage, etc., until no party has holdover storage on hand. Any holdover right to and interest in water considered released under this paragraph shall be extinguished and terminated.

(c) It is fully agreed and understood that 75,000 acre-feet of the initial capacity in the Anderson Ranch Reservoir, and such water as can be stored therein, is reserved to the United States as dead storage and removable storage for power purposes, and that the removable part of the water stored in said 75,000 acre-feet of initial capacity may be held by the United States for release for power development purposes after the end of the irrigation season. Anderson Ranch Reservoir stored waters released for power production while Arrowrock Reservoir is not full, shall be considered stored in Arrowrock Reservoir, and in equal amounts may be subsequently replaced in Anderson Ranch Reservoir by storing therein waters storable in Arrowrock Reservoir, provided such replacement is effected prior to the next spill at Arrowrock Reservoir over the wasteway thereof.

(d) It is understood and agreed that a combined total of 45,000 acre-feet of empty storage space shall be kept available in the Anderson Ranch and Arrowrock Reservoirs for control of flash floods, except when used for control of such floods. Of water temporarily impounded in said 45,000 acre-feet capacity, when released, one and twelve hundredths per cent (1.12%) of it, or any part of said percentage, may be diverted for the use of the District if it so desires.

(e) It is further understood and agreed that for flood control purposes it is most desirable that the empty storage space should be maintained in Arrowrock Reservoir rather than in Anderson Ranch Reservoir

R-698

and that the attempt will be made, so far as practicable, to keep the empty storage space in Arrowrock Reservoir so that it may be available to control floods from the largest possible watershed. With this purpose in view and for the purpose of making better use of the available water supply for power and irrigation purposes, storage water belonging to the Arrowrock Reservoir or the Deer Flat Reservoir may be held temporarily in the Anderson Ranch Reservoir, or vice versa, instead of holding the same in the reservoir in which it belongs on the basis of priority of right; but the temporary holding of such stored water in the Anderson Ranch Reservoir shall not in any way affect the rights of the several districts to the water in question, and such rights shall be considered to be the same as if said stored water were held at all times in the reservoir in which it properly belongs on the basis of priority of right. Storage water belonging in Arrowrock Reservoir or Deer Flat Reservoir but temporarily held in Anderson Ranch Reservoir will be turned down to the reservoir in which it belongs at or prior to the time that water available for storage in the Anderson Ranch Reservoir becomes available in sufficient quantity to fill the full storage capacity thereof other than the capacity thereof reserved exclusively for control of flash floods.

(f) For the purpose of a more prompt and accurate control of the water supply at canal headgates, and other beneficial purposes including but not limited to the carrying of peak loads at the power plant at the Anderson Ranch Reservoir, stored water belonging in Anderson Ranch Reservoir, or to the holders of rights in said water, and holdover storage or storage otherwise credited to the Anderson Ranch Reservoir, may likewise be held temporarily in unused space in Arrowrock Reservoir

without in any way impairing or affecting the rights of the parties entitled to such water; but such water shall not remain in Arrowrock Reservoir at any time when such use of Arrowrock capacity would injuriously affect the holders of Arrowrock storage rights in the benefit or enjoyment of such Arrowrock rights.

(g) In the filling of the available Anderson Ranch Reservoir capacity, except that reserved for power which will be filled first and except that amount of 45,000 acre-feet capacity reserved for control of flash floods, the reservoir management will endeavor so to handle the filling thereof that the same will serve both for the benefit of irrigation and for the benefit of flood control, and may for flood control purposes evacuate so much of its capacity as is deemed advisable with such releases to be first from holdover storage water on hand, in the same manner and with the same effect as provided in Article 16 (b).

(h) Holdover storage will be charged its pro rata share of evaporation and seepage losses.

General Obligation of the District

17. The District's obligation hereunder is a general repayment obligation under which the District as a whole is obligated to pay to the United States the full amount or amounts herein agreed upon according to the terms stated, notwithstanding any individual default in the payment to the District by any individual water user of any assessments, tolls, or other charges levied by the District; and while the District, so far as its powers under the laws of Idaho permit, may distribute said obligation among its landowners in a manner that takes into account the productivity of the various classes of lands of its landowners and the benefits accruing to said lands by reason of the construction

R-698

herein provided, no such distribution of said obligation shall in any manner be deemed to relieve the District, or any of its landowners, or any land therein, of the District's general obligations to the United States.

Computation of Cost

18. The cost of the Anderson Ranch Reservoir, which shall be the basis of determining the District's obligation as provided in Article 11 hereof, shall embrace all expenditures of whatsoever kind in connection with, growing out of, or resulting from the work described, including the cost of labor, material, equipment, investigations, engineering, legal work, superintendence, administration, overhead, rights of way, property, and damages of all kinds, and also including expenditures made for any of said above-mentioned purposes incurred prior to the date of this contract. The determination of what costs are properly chargeable hereunder, and the amount thereof, shall be conclusively made by the Secretary.

Cost of Operation and Maintenance to be Paid in Advance

19. For the year in which the first general repayment obligation instalment becomes due, as provided in Article 11 (c) above, and for each year thereafter, the District will pay to the United States in advance, in the manner hereinafter provided, its share of the operation and maintenance costs of Anderson Ranch Reservoir. Payment shall be made on the basis of annual estimates made by the Secretary. Such annual estimates, hereinafter referred to as the operation and maintenance charge notice, shall contain a statement of the estimated cost to be incurred during the calendar year covered by said notice for the

R-698

operation and maintenance of Anderson Ranch Reservoir, a statement of the part of said estimated costs allocated to the storage of water for irrigation, and the District's share thereof. The District's share shall be one and twelve hundredths per cent (1.12%) of the part of said estimated costs allocated by the Secretary to the storage of water for irrigation.

Such operation and maintenance charge notice shall be given to the District and to the Board of Control of the Arrowrock Division, Boise Project, on or before April 1 of the calendar year covered by said notice. The District agrees to pay its share of the estimated cost of operation and maintenance allocated to the storage of water for irrigation as set out in said notice on or before May 1 of the year in which said notice is given. Whenever in the opinion of the Secretary, funds so advanced will not be adequate to meet the District's share of costs of operating and maintaining Anderson Ranch Reservoir, he may give to the District and to the Board of Control a supplemental operation and maintenance charge notice stating therein the amount of the District's share, determined in the manner above provided, of the additional amount required for such operation and maintenance. The District shall pay its share of such additional amount, as set forth in said supplemental notice, on or before the due date fixed by the Secretary in said notice. If funds advanced by the District under this Article exceed the District's share of the actual cost and maintenance for the year for which advanced, as determined conclusively by the Secretary, the excess will be credited to operation and maintenance charges due from the District subsequent to the determination of such excess.

R-698

R-698

There shall be included in the operation and maintenance costs covered by the provisions of this Article an annual equitable charge, as determined by the Secretary, to cover general expenses and the cost of bookkeeping, accounting, clerical and legal work of the Bureau of Reclamation in connection with the accounts and collections for storage water from Anderson Ranch Reservoir.

Any expense incurred in running or protecting the Anderson Ranch Reservoir water in the channel of Boise River or the South Fork thereof or in diverting the same into the District's canals shall be considered a part of the cost of operation and maintenance of the Anderson Ranch Reservoir and charged accordingly in like manner as other operation and maintenance expenses in connection with said reservoir.

Water Rental Before Commencement of Construction Cost Repayment

20. Prior to the year in which the first general repayment obligation instalment provided for in Article 11 (c) accrues, storage water, if available, may be released for the use of the District only upon advance payment by the District to the United States of a charge per annum per acre-foot, or other charge, to be fixed by the Secretary each year and to be paid in advance of delivery of water. After the expiration of the water rental period, if any, any such charges collected and which the Secretary determines to be in excess of the cost of operation and maintenance, during the period, allocated by the Secretary to the District shall be credited to the general repayment obligation of the District under this contract in the manner determined by the Secretary.

Release of Water in Case of Default

21. No water from the Anderson Ranch Reservoir shall be delivered to or for the District if the District shall be in arrears in the advance payment of the operation and maintenance charges provided for in Article 19 or in arrears in the payment of any other operation and maintenance charges due to the United States, or more than twelve (12) months in arrears in the payment, as required by the terms of this contract, of the general repayment obligation instalments provided for in Article 11 of this contract, or more than twelve months in arrears in the payment of any other construction charge instalments due to the United States. The District agrees that it will refuse to deliver water to lands or parties which are in arrears in the advance payment of operation and maintenance charges due from said lands or parties to the United States or to the District, or to lands or parties who are in arrears for more than twelve months in the payment of the amounts due from said lands or parties to the United States or to the District for the general repayment obligation instalments due from the District to the United States under this or any other contract. The provisions of this Article are not exclusive and shall not in any manner prevent the United States from exercising any other remedy given by this contract or by law to enforce the collection of any payments due under the terms of this contract.

Penalty for Delinquent Payments

22. In the event that any payment provided for in this contract is not made on or before the date that such payment is due and payable, there shall be added to the amount unpaid a penalty of one-half of one

per cent (1/2%) on the day following the due date, and there shall be added a like penalty of one-half of one per cent of said unpaid amount on the first day of each calendar month thereafter so long as such default shall continue.

Title to Reservoir in the United States

23. Pursuant to the provisions of section 6 of the Act of June 17, 1902 (32 Stat. 388), title to the Anderson Ranch Reservoir shall remain in the United States until otherwise provided by Congress.

Power Resources to Remain Perpetually in the United States

24. The rights and resources which may be used or useful for the development of power, and any plant or plants and appurtenant structures and facilities which may be now or hereafter constructed by or under the authority of the United States which may be used or useful for the development of hydroelectric power, are hereby reserved to and shall be and remain in the exclusive control, possession and ownership of the United States: Provided, That no costs, as determined by the Secretary and which are in his opinion, attributable solely to power development, shall be taken into account in determining the District's construction cost obligation under this contract. All revenues, including miscellaneous revenues from or incident to the establishment or use of power plants or appurtenant structures and facilities, and from the use, sale or other disposal of power in any form, shall be and remain the property of the United States and shall be disposed of as provided in the Interior Department Appropriation Act, 1939, (Act of May 9, 1938, 52 Stat. 291, 322).

R-698

Operation and Maintenance of Works by the United States

25. The works constructed by the United States under the provisions of Article 9 above will be operated and maintained by the United States as a part of the reserved works of the Arrowrock Division of the Boise Project in the same manner as that provided in the Government-District contract, but the District's share of the cost of operation and maintenance of said works shall be paid by the District as provided in Article 19 above.

Economical Use of Water

26. (a) It is understood and agreed that if Anderson Ranch Reservoir is to be effective in reducing water shortages in dry cycles, it is essential that the District take every reasonable measure to effect economical and efficient use of water by every water user within the District; and the District agrees to take such measures. It is further understood and agreed that whenever wasteful, inefficient or uneconomical use of water is being made by a water user within the District, the District with the advice and cooperation of the Bureau of Reclamation will take such action as may be necessary to correct such wasteful, inefficient, or uneconomic use of water.

(b) The District agrees to distribute storage water made available to the District under the provisions of this contract and to use the same only upon lands within the District, upon like terms and conditions as provided for the use and distribution of storage water made available to the District under the provisions of the Government-District Contract.

District to Use All Powers to Collect Charges

27. The District agrees it will cause to be levied and collected all necessary assessments, and will use all the powers and resources of the District, including the taxing power of the District, and the power to withhold delivery of water, to pay to the United States all charges provided in this contract in full on or before the day that the same become due.

SHORTAGE OF WATER

28. On account of drought, inaccuracy of distribution, or other causes, it is expected there will occur at times a shortage in the quantity of storage water which normally can be made available from Anderson Ranch Reservoir, and in no event shall any liability accrue against the United States or any of its officers, agents, or employees for any damages, direct or indirect, arising from any such shortage; and the payments to the United States provided for herein shall not be reduced because of any such shortage or damage.

Losses in Running Stored Water to be Deducted

29. A pro rata share of such losses, if any, as may be incurred in running the Anderson Ranch Reservoir stored water from the reservoir to the head of the Settlers Canal will be charged to the District.

Contract to be Authorized by Electors and Confirmed by Court

30. The District agrees that, upon the execution of this contract, it will proceed promptly to secure the authorization of this contract by the electors of said District, and will secure a decree of the proper

court of the State of Idaho approving and confirming this contract and decreeing and adjudging the same to be a lawful, valid and binding general obligation of the District, and decreeing the same to be lawful and valid, and promptly will apportion the benefits of this contract to the lands of the District and will secure a confirmation court decree confirming such apportionment as provided for in the Idaho statutes. The District shall furnish certified copies of such decrees to the Secretary. In the event that in the opinion of the Secretary satisfactory confirmatory decrees are not promptly secured as herein provided, the Secretary may terminate this contract.

Waste Water, Seepage, and Return Flow Water
Not Abandoned and Right Reserved to Recapture the Same

31. It is agreed and understood that the United States does not abandon or relinquish any of the waste, seepage or return flow water resulting from the use, application or conveyance of the said Anderson Ranch Reservoir water, but that the same is reserved and intended to be retained for the benefit of the Boise Project.

Assignment of Contract

32. No assignment or transfer of this contract, or any part hereof, or interest therein, shall be valid until approved by the Secretary. All rights for breach of this contract are reserved to The United States as provided in Section 3737 of the Revised Statutes of the United States.

Secretary the Arbiter — Secretary's Acts, Decisions and Determinations Conclusive

33. In the event of disputes between the parties hereto arising out of this contract involving questions of fact, and in so far as the provisions hereof require a determination of fact to be made, the Secretary is hereby designated as the arbiter of such questions and as the one required to make such determination of facts; and his decision therein shall be conclusive and binding on the parties hereto. In all acts, matters and determinations provided in this contract to be done, determined or decided by the Secretary or by the United States, it is agreed that the acts, decisions, findings and determinations by the Secretary shall be final and conclusive and shall be accepted as final and conclusive by all the parties to this contract and by all persons claiming any rights under or by virtue of this contract or in any wise based upon or arising out of this contract or any act or proceeding carried on thereunder.

Changes in Organization of District

34. While this contract is in effect no change will be made in the District, either by inclusion or exclusion of lands, by partial or total consolidation or merger with another district, by proceedings to dissolve, or otherwise, except upon the Secretary's written assent thereto.

Rules and Regulations

35. The Secretary reserves the right, so far as the purport thereof may be consistent with the provisions of this contract, to make rules and regulations and to add to and modify them, as may be deemed proper and

necessary to carry out this contract and to supply necessary details of its administration, and, by suitable rules and regulations, to provide for the administration of the Anderson Ranch Reservoir and the water supply thereof as to any details of such administration not expressly covered by the terms of this contract; and the District agrees to observe such rules and regulations.

Representative of Secretary

36. It is agreed and understood that where this contract requires action by the Secretary, said action may be taken for and on behalf of the Secretary by his representative duly authorized in writing by the Secretary. Written notice of any such authority shall be mailed to the District within one week from the date of such authorization.

Obligation to Proceed Contingent Upon the Execution of Contracts in Form Satisfactory to the Secretary Covering the Full Amount Allocated to Irrigation

37. The obligation of the United States to proceed with the construction provided for under the provisions of Article 9 hereof is contingent upon the execution and confirmation of contracts in form satisfactory to the Secretary providing for the repayment to the United States of the full proportionate part of the cost of the Anderson Ranch Reservoir allocated to irrigation.

Substitution of Payette or Salmon River Water

38. It is agreed that in lieu of the water which the District is entitled to receive from the Boise River and its tributaries and the reservoirs thereon, or any part of such water, the United States, at the option of the Secretary, shall have the right to substitute an

equal amount of water from the Payette River or the Salmon River, or in part from the Payette and in part from the Salmon, and in the event of such substitution the Secretary, upon the completion of the necessary tunnels and other works to such extent as may be necessary to convey such Payette River or Salmon River water to the Boise River immediately above the government diversion dam, for the Arrowrock Division of the Boise Project, will make, by appropriate credits, such readjustment, if any, in the charges against the District as he shall then find to be equitable in view of the changed conditions then applicable to the water supply furnished for the District, but such readjustment, if any, shall not increase the financial obligations of the District under this contract nor reduce the amount of water which the District is entitled to receive under this contract.

Rights to Include Obligations in Contract Under Reclamation Project Act of 1939

39. In the event that the District enters into an amendatory contract under the provisions of section 4 of the Reclamation Project Act of 1939 (53 Stat. 1187) for the purpose of securing the benefits of said section of said act, the right is reserved to the District to have included in such amendatory contract the construction charge obligations of the District under this contract, and in that event the then unaccrued portion of the charges for the costs incurred in the Arrowrock repairs shall be treated as part of the Arrowrock dam construction charges, as authorized by Act of April 22, 1940 (54 Stat. 155).

R-698

Contingent Upon Appropriation or Allotment of Funds

40. The expenditure of any money or the performance of any work by the United States herein provided for which may require appropriations of money by Congress or the allotment of funds, shall be contingent upon such appropriations or allotments being made. The failure of Congress so to appropriate funds, or the failure of an allotment of funds shall not relieve the District from any obligations under this contract and no liability shall accrue to the United States in case such funds are not so appropriated or allotted.

Officials Not to Benefit

41. No member of or delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom, but this restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

Former Contracts Remain in Effect

42. All provisions of the Government-District Contract, to the extent that they are not inconsistent with the terms and provisions of this contract, shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed the day and year first above written.

R-698

RECEIVED
FEB 28 1941
Department of Reclamation

WILDER IRRIGATION DISTRICT OFFICE
Caldwell, Idaho
February 27th 1941

Minutes of the Board of Directors

Board met pursuant to adjournment on February 4, 1941.

Present - all directors to-wit: Frank L. Dickinson; Glenn M. Eidemiller; Thos. M. Harris; C. B. Lundy; J. L. Nicholes; Peacie Trunell; O. W. Bunton, President; and L. C. Knowlton, Secretary.

The following proceedings to be had

* * * * * * * * * * *

The following resolution known as Resolution No. 1 of February 27th 1941, was presented and unanimously adopted.

THAT WHEREAS in accordance with the request of this Board on February 4, 1941, R. J. Newell, a competent irrigation engineer of Boise, Idaho, has made surveys, examinations, maps and plans of the Anderson Ranch Reservoir and assigned and certified the same and submitted them to this Board, and also in accordance with the request of this Board on February 4, 1941, S. O. Harper, Chief Engineer of the Bureau of Reclamation of the United States of America, has made estimates of the cost of the construction of Anderson Ranch Reservoir and assigned and certified the same and submitted them to this Board. And

THAT WHEREAS on request, W. H. Tuller, a competent irrigation engineer and Project Manager, has made studies and a report thereon estimating the annual benefits to the lands within the Wilder Irrigation District growing out of the purchase of the supplemental water supply in Anderson Ranch Reservoir and as set forth in that certain contract between the United States of America and the Wilder Irrigation District approved January 13, 1941 by the Secretary of the Interior and approved and ordered filed by this Board February 4, 1941, together with the estimated annual costs thereof covering a series of years and the said Wm. H. Tuller has signed and certified said studies and report and submitted the same to this Board.

THEREFORE BE IT RESOLVED

First - That the said surveys, examinations, maps and plans prepared by R. J. Newell be and the same are hereby accepted and ordered filed.

Second - That the said estimated cost of construction of said Anderson Ranch Reservoir prepared by S. O. Harper be and the same is hereby ordered filed.

Third - That the said studies and report of Wm. H. Teller be and the same is hereby ordered filed.

The following resolution to be known as Resolution No. 2 of February 27th 1941, was presented and unanimously adopted.

THAT WHEREAS for more than ten years last past the water supply for the irrigation of the lands within the boundaries of Wilder Irrigation District has been inadequate for the proper irrigation of the lands within said district and great damage has resulted to the crops growing on said lands by reason thereof, and

WHEREAS a supplemental water supply to the water supply which the district has is necessary in order to insure crop production within said district every year, and

WHEREAS surveys, examinations, maps and plans of Anderson Ranch Reservoir have been made by R. J. Newell of Boise, Idaho, and estimates of the cost of construction of Anderson Ranch Reservoir have been made by S. O. Harper as stated in the above and preceding Resolution No. 1 and the same are now on file in this office, and

WHEREAS studies and report have been made by Wm. H. Teller, Engineer and Manager of what is known as the Boise Project, included in which are the lands within the Wilder Irrigation District, showing an estimate of the annual cost and benefits as mentioned in the above and preceding Resolution No. 1, and the same are now on file in this office, and

WHEREAS it appears that the annual benefits to the lands within the Wilder Irrigation District through the adoption and operation of the following general plan in acquiring a supplemental water supply will greatly exceed the annual cost thereof, and that such plan is practical

NOW THEREFORE BE IT RESOLVED by the Board of Directors of the Wilder Irrigation District

/that the following shall constitute a general plan for acquiring a supplemental water supply for the lands of the Wilder Irrigation District.

First - It is proposed that the said district enter into a contract with the United States of America to purchase the right to the stored water available from 33.71% of the storage capacity of the Anderson Ranch Reservoir allocated

to irrigation purposes in accordance with the terms and conditions of that certain contract between the United States of America and Wilder Irrigation District "Concerning the Construction of Anderson Ranch Reservoir and Related Matters" approved by the ~~[illegible]~~ Secretary of the Interior January 13, 1941, and approved and ordered filed by this Board on February 4, 1941, at a cost not to exceed ~~$1,784,000.00~~ 1,724,246.50 and that said contract on file in this office is hereby referred to and by reference made a part of this resolution and said general plan.

Second - It is proposed by the Wilder Irrigation District to raise the funds necessary to carry out this general plan by annual assessments to be levied against the lands in the Wilder Irrigation District as provided by law.

BE IT FURTHER RESOLVED that L. C. Knowlton, Secretary of this District, be and he is hereby authorized and directed to certify to and submit such certified copies to the Department of Reclamation, State Capitol, Boise, Idaho, to-wit:

First - Certified copy of the Minutes of the Board of Directors of February 4, 1941

Second - Certified copy of the Minutes of the Board of Directors of February 27th 1941, in which resolutions No. 1 and No. 2 are to be submitted, included in which Resolution No. 2 is the general plan for acquiring the supplemental water supply for the lands within this district, in which general plan and resolution there is included the contract between the United States of America and the Wilder Irrigation District

Third - A certified copy of the contract between the United States of America and the Wilder Irrigation District approved by the ~~[illegible]~~ Secretary of the Interior January 13, 1941, and by this Board on February 4, 1941.

Fourth - Copies of the surveys, examinations, maps and plans prepared by Engineer R. J. Newell

Fifth - Copy of the estimated cost of construction of the Anderson

Sixth - A certified copy of the studies and report prepared by Wm. H. Tuller, showing the estimate of the annual cost and benefits during a series of years.

Attested: L. C. Knowlton, Secretary

DEFENDANT'S EXHIBIT NO. 11

To the Board of Directors of the Boise Kuna Irrigation District:

Gentlemen:

I wish to state that I have carefully examined the maps, list of lands, the Bureau of Reclamation reports and the Anderson Ranch Reservoir Contract.

The water to be impounded in the proposed reservoir is to be used as a supplemental water right on 275,766 acres of land under the Boise Kuna Irrigation District and certain other areas, practically all of which land is now under successful cultivation.

Stream records show that sufficient water is available in the Boise River to justify a reservoir of the size as proposed. Thorough examination of all the elements necessary have determined that the type of dam as proposed is feasible, and the the cost will not be excessive.

The fact that the dam can be used for flood control and power purposes adds to its utility and also is the reason that the greater part of the cost will be charged to those two uses and will not have to be repaid by the irrigation interests.

All the requirements of the Department of Reclamation have been met and it is the opinion of this Department that the proposed new construction will be a great asset to the water users who are to be benefitted, as well as to the people at large in this part of the State.

Respectfully,

E. V. Berg

Commissioner of Reclamation

EVB:dbj

MINUTES AND PROCEEDINGS OF THE BOARD OF DIRECTORS OF THE BOISE KUNA IRRIGATION DISTRICT, HELD ON THE 4TH DAY OF FEBRUARY, 1941.

The Board of Directors of the Boise-Kuna Irrigation District, consisting of I. A. Weaver, G. M. Olsen and C. C. Trobaugh, all members being present, duly assembled on the 4th day of February, 1941, and the following resolution was unanimously passed:

Whereas, the water users of the Boise-Kuna Irrigation District have suffered a shortage of water during many irrigation seasons in the past and desire construction of additional water storage capacity; and

Whereas, the Secretary of the Interior has caused investigations to be made on the South Fork of the Boise River near the Anderson Ranch site of a proposed reservoir of approximately 500,000 acre feet capacity, and the District, together with other irrigation districts of the Arrowrock Division of the Boise Project, has requested the construction thereof; and

Whereas, the total cost of the proposed Anderson Ranch Reservoir and appurtenant works is estimated to be $13,100,000, and the Boise Kuna Irrigation Districts share of the cost of said reservoir is estimated to be $1,404,765, with a maximum contract obligation of $1,545,241.50, in the event that the actual cost shall exceed the estimated cost; and

Whereas, a contract has been prepared which provides that the District shall pay its share of the cost of construction of said reservoir in 40 successive annual installments and shall be entitled to 30.21 percent of the available stored water from said reservoir:

Now, therefore, be it hereby resolved, that the proposed contract between the United States of America and the Boise-Kuna Irrigation District, hereby is adopted as the Boards formulated plan for obtaining the additional water storage needed by the District, and that a copy of said proposed contract, together with a copy of this resolution be submitted to the Department of Reclamation of the State of Idaho, with a request for a report thereon as provided by Sec. 42-401, Idaho Code Annotated.

Attest:

C. C. Trobaugh
President

J. A. Martin
Secretary

State of Idaho)
County of Ada)ss.

I, J. A. Martin, Secretary of the Boise-Kuna Irrigation District and custodian of the records of said district, do hereby certify and declare, that the above and foregoing is a full and true copy of the minutes of the Board of Directors of said district made on the 4th day of Feb. 1941, as the same appears in the minute book of said district.

J. A. Martin

Subscribed and sworn to before me this 4th day of Feb. 1941.

L. W. Gribe
Notary Public, Kuna, Idaho.

June 7, 1944

Pioneer Irrigation District
Caldwell, Idaho.

Gentlemen:

This Department has received on this 7th day of June, 1944, and filed on this day, the Pioneer Irrigation District Exhibit A - Apportionment of Benefits of this $313,038.00, maximum repayment of the obligation of the Pioneer Irrigation District for the purchase of the supplemental water supply from Anderson Reservoir assessed, distributed, and apportioned on each tract and legal sub-division of the land within said district in accordance with the benefits as determined and ratified by the Board of Directors of this district at its meeting on May 2, 1944, consisting of 138 pages duly certified by the secretary of said district.

Very truly yours,

Roy W. Thompson
Supervisor of Water Distribution.

CERTIFICATE

STATE OF IDAHO)
COUNTY OF CANYON) ss.
PIONEER IRRIGATION DISTRICT)

I, KATHRYN H. HARTKOPF, hereby certify:

That I am now the duly appointed, qualified and acting Secretary of Pioneer Irrigation District in Canyon and Ada Counties, State of Idaho, and as such have under my custody and control the assessment list of Pioneer Irrigation District; that the above and foregoing 130 pages, designated as Exhibit A, are a full, true and correct copy of the original apportionment of benefits of $313,038.00, the maximum repayment obligation of Pioneer Irrigation District for the purchase of supplemental water supply from Anderson Ranch Reservoir, as assessed, distributed and apportioned upon each tract and legal subdivision of land in said District, in accordance with the benefits as determined and ratified by the Board of Directors of said District at its meeting held on May 2, 1944.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed my official seal this 2nd day of May, 1944.

Kathryn H. Hartkopf
Secretary

P 67

March 1, 1946

Re: Permit No. R-689

Hon. Frank Langley
Attorney General
Building

Dear Mr. Langley:

The Strongarm Reservoir Irrigation District made application for extension of time for completion of works on Permit No. R-689, under Chapter 12, Session Laws of 1945.

Notice of application was published; Twin Lakes Canal Company protested, and a hearing was held.

Counsel for the applicant objected to testimony other than that relating to good faith and necessity for extension of time.

Objection was over-ruled, with the understanding that the question would be submitted to the Attorney General for an opinion. (See Transcript, page 3).

Your opinion is requested as to whether or not questions concerning claimed unrecorded water rights are germane to a hearing under Chapter 12, Session Laws of 1945.

Please return attached transcript of hearing, applicant's brief and protestant's brief.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Gentlemen:

Inclosed herewith is U. S. Treasury Warrant No. 16,181,984, which is made payable to the State Reclamation Engineer and which covers cost of publication notices on Anderson Ranch Reservoir Permit No. R-698, as same appeared in four issues of the Idaho Daily Statesman. These costs amounted to $17.05, and the inclosed warrant is in that amount.

Very truly yours,

Mark R. Kulp

RE: Permit No. R-698

Mr. Wm. H. Tuller
Acting Regional Director
Bureau of Reclamation
P. O. Box 937
Boise, Idaho

Dear Mr. Tuller:

We acknowledge receipt of notice of beneficial use proof to be made on Permit No. R-698 on February 21, 1956, before Mr. R. H. Harris, Notary Public.

We shall send a copy of the notice to the Idaho Daily Statesman and the Caldwell News-Tribune with instructions to publish it once a week for four weeks prior to that date and to send you the Affidavit of Publication together with statement of costs.

At the time set, you should appear before Mr. R. H. Harris together with two disinterested witnesses who are familiar with the terms of the Permit and the work done thereunder for the purpose of executing the enclosed depositions.

Very truly yours,

MARK R. KULP

RECEIVED
JAN 11 1956
Department of Reclamation

JAN 6 1956

Mr. Mark R. Kulp
State Reclamation Engineer
Department of Reclamation
Boise, Idaho

Dear Mr. Kulp:

In connection with Permit No. R-698 relating to the storage of 493,161 acre-feet of water at Anderson Ranch Reservoir, there are enclosed, in duplicate, the form "Notice of Proof Application of Water to Beneficial Use", and a letter authorizing the publication of the Notice. Please note that the letter leaves to your discretion the selection of appropriate official newspapers in which to publish the Notice.

In accordance with our past practice, it is requested that you pay the cost of publication of the Notice and bill us for this cost. Upon receipt of your billing, we will forward the usual vouchers covering cost of publication.

You will note that we propose to submit the Notice of Proof Application of Water to Beneficial Use on February 21, 1956. We would, accordingly, appreciate very much your expediting the publication so that the statutory requirements thereon may be satisfied.

Very truly yours,

Wm H. Tullen

Re: Permit No. R-698

Mr. J. Lyle Cunningham,
Assistant Regional Director
Bureau of Reclamation
Box 937
Boise, Idaho

Dear Mr. Cunningham:

We are in receipt of your letter of February 27, 1951, enclosing Affidavit of Publication in the Mountain Home News, in connection with Proof of Completion of Works under Permit No. R-698, Anderson Ranch Dam and Reservoir.

We will handle the matter of publication costs in the manner you have suggested, and we return signed voucher for the $23.40 costs.

You of course know that before final action is taken in the matter of Completion of Works Proof, the law requires that a field examination be made by an Engineer from this Department, and our Field Engineer will try and contact someone from the Bureau when the examination is made.

Very truly yours,

MARK R. KULP

Affidavit of Publication

NOTICE FOR PUBLICATION

Notice is hereby given that at 10:00 A. M., on the 6th day of February, 1951, at Boise, County of Ada, State of Idaho, before W. L. Vernon, a notary public for Idaho, proof will be submitted of the completion of works for the storage of 500,000 acre feet per annum of the waters of South Fork of the Boise River, a tributary of Snake River, in accordance with the terms and conditions of a certain permit heretofore issued by the Commissioner of Reclamation of the State of Idaho.

1. The name of the person or corporation holding said permit is United States of America acting through the Bureau of Reclamation.

2. The postoffice address of such person or principal place of business of such corporations is P. O. Box 937, Boise, County of Ada, State of Idaho.

3. The number of such permit is R-698, and the date set for the completion of such work is February 25, 1951.

4. Said water is to be used for Irrigation and Power purposes.

5. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of storing in accordance with the plans accompanying the application for such permit, is 500,000 acre feet per annum.

6. The amount of lands for which said water is available is 275,766 acres, located in:

Township 1 N., Range 1 E.; Township 2 N., Range 1 E.; Township 3 N., Range 1 E.; Township 4 N., Range 1 E.; Township 5 N., Range 1 E.; Township 2 N., Range 2 E.; Township 3 N., Range 2 E.; Township 4 N., Range 2 E.; Township 2 N., Range 3 E.; Township 3 N., Range 3 E.; Township 1 N., Range 1 W.; Township 2 N., Range 1 W.; Township 3 N., Range 1 W.; Township 4 N., Range 1 W.; Township 5 N., Range 1 W.; Township 1 S., Range 2 W.; Township 1 N., Range 2 W.; Township 2 N., Range 2 W.; Township 3 N., Range 2 W.; Township 4 N., Range 2 W.; Township 2 N., Range 3 W.; Township 3 N., Range 3 W.; Township 4 N., Range 3 W.; Township 5 N., Range 3 W.; Township 2 N., Range 4 W.; Township 3 N., Range 4 W.; Township 4 N., Range 4 W.; Township 5 N., Range 4 W.; Township 3 N., Range 5 W.; Township 4 N., Range 5 W.; Township 5 N., Range 5 W.; Township 6 N., Range 5 W.; Township 4 N., Range 6 W.; Township 5 N., Range 6 W.; Township 6 N., Range 6 W. all Boise Meridian (Idaho); and Township 21 S., Range 46 E.; Township 22 S., Range 46 E.; Township 21 S., Range 47 E. all Willamette Meridian (Oregon).

Re: Permit No. R-698

Mr. Harold T. Nelson
Regional Director
U.S. Bureau of Reclamation
Box 937
Boise, Idaho

Dear Mr. Nelson:

We acknowledge receipt of your letter of February 7, 1951, enclosing depositions of yourself and two witnesses in proof of Completion of Works under Permit No. R-698 for Anderson Ranch Dam and Reservoir.

Question 3 of your own deposition calls for the number and date of the permit, acre feet of water claimed and source of same.

You have not given the date or the source, but with your permission, we can fill this in from our records, the date of the Permit being February 25, 1941, and the source being the South Fork of the Boise River.

The Affidavit of Publication is a necessary part of this proof and the Mountain Home News was instructed to send you this Affidavit. If you have not received it, we suggest that you take the matter up with them.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

February 21, 1946

Mr. Mark R. Kulp
State Reclamation Engineer
State House, Boise, Idaho

My dear Mr. Kulp: Re: Application for permit to store 500,000 acre feet per annum in the Anderson Ranch Reservoir on the South Fork of the Boise River - Boise project.

Please refer to permit R-698 approved on February 25, 1941 by E. V. Berg, Commissioner of Reclamation, and approving our application R-26522 for the permit to store 500,000 acre feet per annum in the Anderson Ranch Reservoir on the South Fork of the Boise River.

Since the date of the permit the United States has prosecuted the construction of the reservoir diligently and more than one-fifth of the work has been completed on or before February 25, 1946, required by the permit.

Very truly yours,

W. W. Johnston
Acting Regional Director

Gentlemen:

Inclosed herewith is Treasury Warrant No. 16,181,933 made payable to the State Reclamation Engineer covering cost of publication notices on Anderson Ranch Reservoir Permit No. R-698. These costs for the period, January 14th to February 4th amounted to $30.15, and the warrant is in that amount.

Very truly yours,

Mark R. Kulp
State Reclamation Engineer

By

Secretary and Bookkeeper.

RE: Permit No. R-698
Anderson Ranch

Mr. H. T. Nelson, Regional Director
Department of the Interior
Bureau of Reclamation
Regional Office, Region 1
Box 937
Boise, Idaho

Dear Mr. Nelson:

We are returning herewith vouchers for $30.15 and $17.05 properly signed for the payment to the Department of Reclamation for publication notices for Beneficial Use proof in connection with the above captioned permit.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

MAR 5 1956

Mr. Mark R. Kulp
State Reclamation Engineer
Department of Reclamation
Boise, Idaho

Dear Mr. Kulp:

In accordance with a letter from your office dated February 21, 1956, enclosing bills from the Idaho Daily Statesman and the Caldwell News-Tribune for publication of notices of proof of beneficial use under Permit No. R-698, we have prepared and are enclosing vouchers covering the costs of the publication. Upon return of the signed vouchers to this office, a Treasury check will be issued.

It is hoped that after payment of the vouchers your office will be able to proceed with the necessary steps for issuance of license and certificate of water right.

In accordance with the request set out in your February 21 letter, the statements from the two newspapers are returned for your records.

Sincerely yours,

H. T. Nelson

RECLAMATION.

NOTICE OF APPLICATION TO APPROPRIATE WATER IN ACCORDANCE WITH THE PROVISIONS OF CHAPTER 145, 1935 SESSION LAWS.

NOTICE IS HEREBY GIVEN, That on the 9th day of December, 1940, THE UNITED STATES OF AMERICA, acting through R. J. Newell, U. S. Bureau of Reclamation, made application No. R - 26522, to construct a reservoir and store and appropriate 500,000 acre feet per annum of waters of the South Fork of the Boise River, a tributary of the Snake River, for irrigation and power.

That the point of outlet is located N. 790 feet, W. 2070 feet distant from the Southwest corner of Section 6, Township 1 South, Range 9 East B. M., and is in Lot 4 of Section 1, Township 1 South, Range 8 East B. M. Elmore County.

That the lands proposed to be irrigated by use of said water consist of 275,766 acres, described as follows: Township 1 N., Range 1 E., B. M. N½-NE¼, SE¼ NE¼, Section 5; N½NE¼, E½NW¼, Section 6. —Township 2 N., Range 1 E., B. M. All of Sections 1, 2, 4, 5, 6, 7, 9, 18, 19, 20, 29, 30, 31, 32. All of Section 3 except S½SE¼, All of 8 Except SE¼ SE¼. SW¼NE¼, NW¼, SW¼, W½-SE¼, SE¼SE¼ of Section 10. NE¼NE¼, NE¼NW¼ of Section 11; N½NE¼, N½NW¼, Section 12 N½NE¼, SW¼-NE¼, NW¼, NW¼SW¼, Section 15. NE¼, E½NW¼, NE¼SW¼, S½SW¼, W½SE¼, NE¼SE¼ Section 16. W½NE¼, NW¼, SW¼, SE¼ Section 17; NW¼NE¼, NW¼, SW¼ Section 21. NW¼, SW¼, W½SE¼, SE¼ SE¼ Section 28; NE¼, NW¼, SW¼, W½SE¼, NE¼-SE¼ S 33. SW¼NW¼, SW¼ Section 34. — Township 3 N., Range 1 E., B. M. All of Sections 1, 2, 3, 5, 6, 8, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 26, 27, 28, 29, 30, 32, 33, 34, & 35. N½ of Section 4; NE¼, N½NW¼, SW¼NW¼, S½SW¼, SE¼ Section 7. S½ of Section 9; NE¼, NW¼, N½-SW¼, SW¼SW¼, W½SE¼, NE¼SE¼ Section 25. NE¼, N½NW¼, SW¼SW¼, E½-SW¼, SE¼ Section 31, W½NW¼, SW¼, SW¼SE¼, Section 36. — Township 4 N., Range 1 E., B. M. All of Sections 4, 5, 6, 7, 8, 9, 27, 28, 29, 30, 32, 33, & 35, 31, 34. That any protests against the approval of this application must be filed in the Department of Reclamation within forty (40) days from the date of this Notice; such protest shall state the name and address of the protestant and shall clearly set forth his objections to the approval of said application.

Dated this 13th day of January, 1941.

E. V. BERG,
Commissioner of Reclamation.

Date of first publication: January 23, 1941.

Date of last publication: February 6, 1941.

Last date for protest: February 22, 1941.

SERVICE of the foregoing, by copy, is hereby admitted this 14 day of January, 1941.
THE UNITED STATES OF AMERICA, acting through R. J. Newell, U. S. Bureau of Reclamation.

R. J. NEWELL.

Form 14-R

The Depositions of two Witnesses, in this form, taken separately, required in each case.

Permit No. R-698

Proof of Completion of Works

DEPOSITION OF WITNESS

Ques.1. State your name, residence, occupation and postoffice address.

Ans. Geo. N. Carter, Boise, Idaho, Civil Engineer, 214 Broadway

Ques. 2. Are you acquainted with United States of America, the holder of Permit No. R-698, authorizing the storage of 500,000 acre feet of the waters of South Fork of Boise River which is tributary to Snake River, in the County of Boise, State of Idaho? How long have you known him, and where does he reside?

Ans. Yes, since 1908

Ques. 3. Have you read or heard read said Permit? R-698 Are you familiar with its terms and conditions? Yes

Ques. 4. Of what material and how has the dam been constructed?

Ans. Earth, rock, and concrete and steel. By modern high standard methods for placement of compacted earth fill and concrete, field laboratory control used throughout the construction period

Ques. 5. Is the reservoir fully constructed? Yes Has water been turned into it? Yes And to what extent? Stored 315,079 acre-feet of water in 1950

Ques. 6. Where is the point of diversion of the feeder canal? None required

Ans. ¼ ¼ Section ....., Township ..... Range .....

Ques. 7. The outlet of the reservoir is located in the ¼ ¼ Section 1 Twp. 1 South Range 9 East, B. M. Lot 4

Ques. 8. Describe the spillway.

Ans. A concrete structure, 53 ft. wide on bottom with sloping side walls 37 ft. high controlled by 2 steel radial gates each 25 ft. by 72 ft., concrete chute section from gates to river level below dam

Ques. 9. How much below the top of the dam is the bottom of the spillway? 32 Ft.

Ques. 10. State the dimensions of the outlet for the reservoir a 20-ft. diam. tunnel

Ques. 11. Of what material is the outlet made? Concrete and steel

Ques. 12. How is the outlet gate operated? by oil cylinder hoists moved by motor driven oil pumps

Ques. 13. Of what material has the dam been constructed? Earth and rock concrete and steel

Ques. 14. Are the works from the reservoir to place of use fully completed? None required

Ques. 15. Describe these works as they now exist, and give your estimate of their capacity.

Ans. Stored water is released into channel of South Fork of Boise River

Ques. 16. For what purpose is the water to be used?

Ans. Irrigation and power

R-698

Ques. 17. If for irrigation purposes, are you acquainted with the land to be irrigated? Yes
How much water is required for its profitable cultivation?

Ans Four acre-feet per acre at the farm headgate

Ques. 18. Give the legal description of the land to be irrigated, or the place of use.

Ans. Lands located in:

Township 1 N., Range 1 E.	Township 2 N., Range 1 W.	Township 5 N., Range 3 W.
Township 2 N., Range 1 E.	Township 3 N., Range 1 W.	Township 2 N., Range 4 W.

Form 15-R

Permit No. R-698

Proof of Completion of Works

DEPOSITION OF HOLDER

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. H. T. Nelson, Boise, Idaho, P. O. Box 937

Ques. 2. If acting on behalf of a corporation, state its name, principal place of business, your position with reference to same, and your authority for appearing in its behalf.

Ans. United States of America, Regional Director of Region 1, Bureau of Reclamation

Ques. 3. State number and date of permit, acre feet of water you claim for storage, and source of same.

Ans. R-698 493,161 acre-feet - February 25, 1941- South fork Boise River

Ques. 4. Under terms of permit construction was required to be completed by on or before February 25 1951.

Ques. 5. Construction was actually completed on the date of February 6 1951

Ques. 6. Does the construction fully comply with the specifications? Yes

Ques. 7. Of what material was the dam built? Earth, rock, concrete and steel

Ques. 8. State whether or not the water has been turned into your reservoir, and if so, when and to what extent.

Ans. Yes, water has heretofore been stored as follows: 1946, 80,963 acre-feet; 1947, 140,003 acre-feet; 1948, 140,699 acre-feet; 1949, 140,235 acre-feet; 1950, 315,079 acre-feet

Ques. 9. The capacity of the reservoir is 493,161 acre feet.

Ques. 10. The area of the high water line of the reservoir is 4,741.3 acres.

Ques. 11. The height of the dam above bottom of reservoir is 330 feet, above low water is 204 feet.

Ques. 12. The dimensions of the spillway at intake are 53' wide on bottom, with sloping sidewalls 37' high and the spillway crest is 32 feet below the top of the dam.

Ques. 13. Dimensions of the reservoir outlet are 20 foot diam. circular, concrete and steel lined tunnel joined to a 15 foot diam. steel penstock

Ques. 14. Describe the gate and control unit.

Ans. Outlet controlled by a 15.25 ft. x 30 ft. emergency gate at upper end of outlet and 3 100-inch butterfly valves; 5 72-inch ring follower gates and 5 72-inch hollow jet valves at lower end of outlet

Ques. 15. The reservoir outlet is made of steel and concrete

Ques. 16. Is the reservoir filled through a feeder canal? No

Ques. 17. If so, where is the point of diversion for same?

Ans. -- ¼ -- ¼ -- Section, -- Twp. -- Range --

R-698

Ques. 18. Does the feeder canal comply with the specifications in the permit? --

Ques. 19. If not, explain --

Ques. 20. Cost of constructing feeder canal? $-- Cost of reservoir? $30,549,100.00

Ques. 21. State whether or not the works from reservoir outlet to place of use are fully completed, and whether or not they comply with the specifications in permit. If not, explain.

Ans. None required

Ques. 22. Water has ~~xxxxxx~~ been delivered to place of intended use? Yes

Ques. 23. Give description of dam, state dimensions, and give slope of face both upstream and downstream. Also method and material for protecting against wave action.

Ans. Earth and rock fill, 330 feet high above river bed, 1,350 feet long on crest, 40 ft. wide on crest, 2,500 ft. wide on base; upstream slopes 3½ and 3 to 1, downstream slopes, 8, 2½ and 2 to 1; 3 ft. thickness rock riprap on upstream slope

Ques. 24. State the purpose for which the water is to be used and give the place of use, and if for irrigation, state the number of acres, and give the legal description of same.

Ans. Irrigation and power. For the supplemental irrigation of 275,766 acres of land situated in

Township 1 N., Range 1 E.	Township 2 N., Range 1 W.	Township 5 N., Range 3 W.
Township 2 N., Range 1 E.	Township 3 N., Range 1 W.	Township 2 N., Range 4 W.
Township 3 N., Range 1 E.	Township 4 N., Range 1 W.	Township 3 N., Range 4 W.
Township 4 N., Range 1 E.	Township 5 N., Range 1 W.	Township 4 N., Range 4 W.
Township 5 N., Range 1 E.	Township 1 S., Range 2 W.	Township 5 N., Range 4 W.
Township 2 N., Range 2 E.	Township 1 N., Range 2 W.	Township 3 N., Range 5 W.
Township 3 N., Range 2 E.	Township 2 N., Range 2 W.	Township 4 N., Range 5 W.
Township 4 N., Range 2 E.	Township 3 N., Range 2 W.	Township 5 N., Range 5 W.

NOTICE FOR PUBLICATION

Notice is hereby given that at 10:00 A. M., on the 6th day of February, 1951, at Boise, County of Ada, State of Idaho, before W. L. Vernon, a notary public for Idaho, proof will be submitted of the completion of works for the storage of 500,000 acre feet per annum of the waters of South Fork of the Boise River, a tributary of Snake River, in accordance with the terms and conditions of a certain permit heretofore issued by the Commissioner of Reclamation of the State of Idaho.

1. The name of the person or corporation holding said permit is United States of America acting through the Bureau of Reclamation.

2. The postoffice address of such person or principal place of business of such corporations is P. O. Box 937, Boise, County of Ada, State of Idaho.

3. The number of such permit is R-698, and the date set for the completion of such work is February 25, 1951.

4. Said water is to be used for Irrigation and Power purposes.

5. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of storing in accordance with the plans accompanying the application for such permit, is 500,000 acre feet per annum.

6. The amount of lands for which said water is available is 275,766 acres, located in:

Township 1 N., Range 1 E.; Township 2 N., Range 1 E.; Township 3 N., Range 1 E.; Township 4 N., Range 1 E.; Township 5 N., Range 1 E.; Township 2 N., Range 2 E.; Township 3 N., Range 2 E.; Township 4 N., Range 2 E.; Township 2 N., Range 3 E.; Township 3 N., Range 3 E.; Township 1 S., Range 1 W.; Township 1 N., Range 1 W.; Township 2 N., Range 1 W.; Township 3 N., Range 1 W.; Township 4 N., Range 1 W.; Township 5 N., Range 1 W.; Township 1 S., Range 2 W.; Township 1 N., Range 2 W.; Township 2 N., Range 2 W.; Township 3 N., Range 2 W.; Township 4 N., Range 2 W.; Township 2 N., Range 3 W.; Township 3 N., Range 3 W.; Township 4 N., Range 3 W.; Township 5 N., Range 3 W.; Township 2 N., Range 4 W.; Township 3 N., Range 4 W.; Township 4 N.., Range 4 W.; Township 5 N., Range 4 W.; Township 3 N., Range 5 W.; Township 4 N., Range 5 W.; Township 5 N., Range 5 W.; Township 6 N., Range 5 W.; Township 4 N., Range 6 W.; Township 5 N., Range 6 W.; Township 6 N., Range 6 W. all Boise Meridian (Idaho); and Township 21 S., Range 46 E.; Township 22 S., Range 46 E.; Township 21 S., Range 47 E. all Willamette Meridian (Oregon).

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

P. O. Box 937
Boise, Idaho
January 13, 1942

Mr. E. V. Berg,
Commissioner of Reclamation
State House
Boise, Idaho

Dear Sir,

Reference is made to Permit No. R-698 for Anderson Ranch Reservoir.

Enclosed is an affidavit to the effect that more than $100,000 has been actually expended toward the construction of said reservoir and that the time required for completion of the work is ten years, as set out in item 18 of the permit.

It is requested that certified copies be returned to this office upon approval.

Very truly yours,

R. F. Newell
Construction Engineer

RECEIVED
JAN 13 1942
Department of Reclamation

R-698

AFFIDAVIT OF R. J. NEWELL

STATE OF IDAHO)
) ss.
COUNTY OF ADA)

R. J. Newell, being first duly sworn, deposes and says:

That he is an irrigation engineer and has been employed in irrigation engineering work by the United States Bureau of Reclamation for more than 16 years last past. That he is now employed by the United States as the engineer in charge of the Boise reclamation project, which includes the proposed Anderson Ranch reservoir.

That affiant is familiar with the work involved in organizing, financing, and constructing the said reservoir and the time which may reasonably be required for the completion thereof, and is also familiar with the work heretofore done by the United States under permit no. R-698 toward the construction of said reservoir, and the amount expended thereon by the United States.

And affiant further deposes and says that the time stated in permit no. R-698 is needed for completion of works under said permit on account of the time required for organizing, financing, and constructing works of the very large size involved under said permit.

That the said permit no. R-698 involves the construction of a reservoir of more than two hundred thousand (200,000) acre-feet capacity, namely, the Anderson Ranch reservoir, having a capacity as set out in said permit of about five hundred thousand (500,000) acre-feet.

That the United States has actually expended toward the construction of said reservoir (including expenditures for the purchase of rights of way and property in connection therewith) more than one hundred thousand ($100,000) dollars.

R. J. NEWELL

Subscribed and sworn to before me this _____ day of _____, 1942.

L. VERNON
Notary Public, residing at Boise, Idaho
My commission expires January 24, 1945

...en in the Dept. of Reclamation this ... day of Jan. 1942.

Commissioner of Reclamation

RECEIVED
FEB 28 194[illegible]
Depar[illegible]

To the Members of the Board of Directors
of
ilder Irrigation District

entlemen:

Beg to acknowledge receipt of certified copies of the following, to wit:

1. Copy of the minutes of your Board of Directors of February 4, 1941, in which you approved the contract between the United States of America and the Wilder Irrigation District substantially in form approved by the Secretary of the Interior January 13, 1941, and ordered the same filed, together with the request of certain engineers for surveys, maps, examinations, plans, and estimates of the cost of construction of Anderson Ranch Reservoir.

2. A copy of the minutes of your Board of Directors of February 27, 1941, included in which were resolutions No. 1 and No. 2; said resolution No. 2 embraced the general plan of the district to acquire a supplemental water supply for the irrigation of the lands within the Wilder Irrigation District.

3. A copy of the contract between the United States of America and the Wilder Irrigation District approved by the Secretary of the Interior January 13, 1941, and approved by your Board of Directors February 4, 1941, and ordered filed, included in the above mentioned resolution No. 2 and made a part of the said general plan.

4. Surveys, examinations, maps and plans of Anderson Ranch Reservoir made or caused to be made by R. J. Newell, a competent irrigation engineer of Boise, Idaho, together with the estimated cost of construction of said Anderson Ranch Reservoir prepared by or caused to be prepared by S. O. Harper, Chief Engineer of the Bureau of Reclamation of the United States of America.

5. A copy of studies and report prepared by Mr. H. Tuller, an irrigation engineer and Manager of the Boise Project, in which Project are included the lands of the Wilder Irrigation District, showing the annual benefits to the lands within said district from the purchase of the supplemental water supply and the annual cost t ereof through a series of years.

I find that the application for the right to appropriate and store the water in said Anderson Ranch Reservoir located on the south fork of the Boise River has been approved by this Department on February 25, 1941, and that Permit No. 698 has been issued and included in the list of lands to be irrigated from said storage water in Anderson Ranch Reservoir are the lands within the Wilder Irrigation District.

I further find that when Anderson Ranch Reservoir has been constructed, practically all the feasible reservoir sites of Boise basin will have been occupied. It further appears that this reservoir with the other reservoirs (now in use in Boise Valley) would impound practically all the water available for storage in Boise River and its tributaries.

In conclusion, it should be stated that it is desirable that the above general plan be culminated, as under existing conditions and circumstances it seems very doubtful that in the visible future Wilder Irrigation District will be afforded another opportunit to acquire the much needed supplemental water supply for the lands in such district.

Upon examination of all the matters presented, I further find that the said general plan is feasible and practicable and that the benefits accruing to the lands withint the district in acquiring the rights to the storage water aforesaid will greatly exceed the cost thereof and I, therefore, approve the same.

Yours very truly,

E. V. Berg

ANDERSON RANCH RESERVOIR CONTRACT

Anderson Ranch Reservoir is situated on the South Fork of the Boise River approximately 20 miles upstream from the backwaters of Arrowrock. The dam will be earth fill, built to an elevation of approximately 340 feet above the bed of the river. Its base at the river bed will be nearly one half mile in thickness. The cross section of the proposed Anderson Ranch Dam is approximately 10 times that of the Lower Deer Flat Embankment, and its construction will require about 8,500,000 cubic yards of material. Being a multiple purpose dam it will serve for irrigation, flood control and power.

Capacity of the proposed dam is dedicated as follows:

Reserved by the United States as dead storage and removable storage for power purposes	75,000 ac.ft. of space
For irrigation and flood control	380,000 " " " "
For flood control only	45,000 " " " "
Total capacity as proposed	500,000 acre feet

Estimated Costs

Anderson Ranch Dam	$10,300,000
Power Plant	2,400,000
Changes at Arrowrock for flood control	400,000
Total Estimated Cost	$13,100,000

Allotment of Costs

Charged to irrigation	$ 4,650,000
Charged to flood control	5,050,000
Charged against power	3,400,000
	$13,100,000

B-216

The contracts require the New York Irrigation District, the Nampa & Meridian Irrigation District, the Boise-Kuna Irrigation District and the Wilder Irrigation District to assume the entire obligation of the Anderson Reservoir changeable to Irrigation. The Secretary of the Interior reserves the right to sell 11.2% of the 380,000 acre foot space to other irrigation districts or canal companies in the Boise Valley. Under the present plans no new land will be irrigated. Included in the 11.2% will be the lands of wateruser organizations that own 11% of the present capacity of Arrowrock.

Allotment of Space to Districts

Outside districts in Boise Valley-11.2% of total		42,560 a. f.
New York District -	11.05% of balance	37,287 a. f.
Nampa & Meridian Dist.	25.03% of balance	84,461 a. f.
Boise-Kuna District	30.21% of balance	101,940 a. f.
Wilder District	33.71% of balance	113,752 a. f.
		380,000 a. f.

Repayment of the cost of Anderson Ranch Reservoir is to be completed in 40 years from the time 275,000 acre feet of water is available. Payments are to be combined with the unaccrued amounts payable on Arrowrock Dam resurfacing and the present construction charges, to make as nearly as possible a combined payment of 40 equal annual installments. Adjustments are to be made after the first 10 years of payment on the Anderson Ranch Dam. Repayment of the cost of resurfacing Arrowrock Dam has not yet begun. In 1939 Congress approved repayment of the recent Arrowrock construction to be made in 20 annual installments. Such payments would amount to 18 cents per acre over a 20-year period but combined with Anderson Ranch Dam payments would be the same as if they were reduced to 9 cents per acre over a 40-year period.

Districts that will pay out on their present construction obligation in less than 40 years after starting payments on Anderson Dam will receive a reduction on the Anderson payments during the time they are completing their original payments.

Amount of Districts Obligation (Provided Anderson Dam is built for the estimated cost).

New York District	11.05%	or	$ 513,825
Nampa & Meridian District	25.03%	or	1,163,895
Boise-Kuna District	30.21%	or	1,404,765
Wilder District	33.71%	or	1,567,515
	100.00%		$ 4,650,000

The above costs will be reduced by 11.2% when the outside districts take their water. The contract also allows for a possible 10% increase in the estimated cost of the dam.

The construction cost on a straight 40-year repayment plan will amount to 63 cents per acre, however the cost in each district will vary depending upon the amount that has been repaid on present construction obligations.

Water stored in the space allotted to each district will be held solely for that district and if not used, carried over to the next year. Each districts' storage in Anderson Reservoir may be as much as twice the amount for which they have space, provided such storage does not interfere with any other districts' rights. All water stored in Anderson may be wasted if snow surveys indicate possibility of spring floods.

To prevent wasting of water and to secure better flood control, provision has been made to hold Arrowrock and Deer Flat storage in Anderson Reservoir, should it be desirable to do so, or Anderson Water in Arrowrock.

Providing all four districts accept their contracts, no water will

go to any lands not now in cultivation. Provision has been made in the contract so that the Bureau of Reclamation can, at some time in the future, substitute Payette or Salmon River for storage in Anderson Reservoir if such substitution can be made. The Districts will receive the benefit of any savings in cost but in no case will they pay more than the cost of Anderson water.

The contract provides that, "It is understood and agreed that if Anderson Ranch Reservoir is to be effective in reducing water shortages in dry cycles, it is essential that the District take every reasonable measure to effect economical and efficient use of water by every water user within the District; and the District agrees to take such measures. It is further understood and agreed that whenever wasteful, inefficient or uneconomical use of water is being made by a water user within the District, the District with the advice and cooperation of the Bureau of Reclamation will take such action as may be necessary to correct such wasteful, inefficient, or uneconomic use of water."

Anderson Reservoir will not provide unlimited amounts of water. On the basis that we hold the average farm use of water to 3.45 acre feet on the upper system and 3.90 acre feet under the lower system, it would have practically eliminated water shortage during the past years with the exception of 1931, when we had three short years in succession.

The operation and maintenance cost on Anderson Dam have been estimated at one cent per acre, however since more water will be available nearly every fall the irrigation seasons will be longer so the actual extra cost of operation and maintenance will average about five cents per acre. At the present time, no change is contemplated in charging

a minimum toll with an extra charge for excess water.

The suggested plan of handling Anderson water is to have our present supply delivered as in the past. After this is used the directors of each district will specify how much extra Anderson water will be delivered. At the end of the irrigation season the amount of Anderson water plus the delivery losses will be figured and each district notified as to how much hold-over water they have for the next year. If one district is too liberal with water; another district saving; during a short year, the saving district will have the better water right.

We could have averaged close to one half acre foot per acre greater delivery over the past 17 years had Anderson Reservoir been built. This does not mean that we could have delivered one half acre foot more every year, for during several years the estimated required average amount of 3.45 and 3.90 acre feet was delivered. Anderson is primarily a hold-over reservoir, and must be used as such to eliminate water shortage in the Boise Valley.

Wm. H. Tuller

January 13, 1941.

Mr. R. J. Newell, Project Engineer
U. S. Bureau of Reclamation
Box 937
Boise, Idaho

Dear Mr. Newell: Re: Application 26522.

We are enclosing duplicate copies of notice in connection with application No. 26522 for acknowlegement of service. Please sign both copies and return to this department together with authorization to publish in a newspaper in the county where the majority of the land is located. This notice is required by law to be published once a week for three consecutive weeks.

It is also necessary to have the signature of your Engineer on the certificate.

Very truly yours,

E. V. Berg.
Commissioner of Reclamation.
