Dear Mr. Foit:

SUBJ: #63-7865, Appropriate Public Waters
#63-3609, Change Point of Diversion

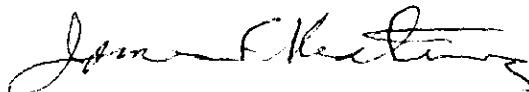

Greone Tree, Incorporated has filed the above noted applications for pond development and irrigation diversion. The pond application states that the pond is to be filled by winter storage of runoff water. The irrigation diversion relocation application purports to gain a more advantageous diversion point for irrigation.

The maps accompanying the two applications show the irrigation diversion flowing through the pond site. It appears the applicant is attempting to divert public stream to private land for recreation purposes. The applicant has a summer home development under construction at the pond and diversion site.

I would suggest that these permits be denied until the actual uses of the water are clarified.

Sincerely,

Change of Water Right No. 63-3609 - Greene Tree, Incorporated

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. In order to receive payment, the following certification must appear on the bill:

"I hereby certify that the foregoing account is just and correct, that the amount claimed is legally due, after allowing all just credits, and that no part of the same has been paid."

Re: Permits Nos. 18479 & 18480

Mr. Eugene H. Anderson,
Idaho Building,
Boise, Idaho.

Dear Mr. Anderson:

We have received the report of our Field Engineer on examination for beneficial use in connection with the above numbered permits in the name of H. F. Coors, the former for water from Graylock Creek, and the latter from the Middle Fork of the Boise River.

This report shows 46 acres being irrigated, in four 40-acre subdivisions, as follows: 5 acres in SW $\frac{1}{4}$ NE $\frac{1}{4}$, 15 acres in SE $\frac{1}{4}$ NW $\frac{1}{4}$, 20 acres in NE $\frac{1}{4}$ SW $\frac{1}{4}$ and 6 acres in NW $\frac{1}{4}$ SW $\frac{1}{4}$; all in Section 35, Township 6 North, Range 11 East.

As the maximum amount of water allowed for irrigation purposes is one inch to the acre, we can only issue a license for 0.92 second feet; and upon receipt of the statutory fee of \$8.00 (being at the rate of \$2.00 for each legal subdivision) a license will be issued for 0.92 second foot of water from the Middle Fork of Boise River.

Dear Sir:-

This will acknowledge receipt of the deposition of the holder, depositions of two witnesses, and the affidavit of proof of publication from the newspaper, all in connection with beneficial use proof under the above numbered permit.

Before final action can be taken in this matter, the law requires that a field examination be made by an engineer from this department. We are unable to say just when this examination will be made, since the department has but one field engineer who makes examinations all over the state.

However, Mr. Tolman, Field Engineer for this department, will contact you at the time set for examination, so that you may arrange to have him shown over the grounds. After his report is on file in this office, you will be further notified as to fees before the issuance of a license.

Mr. E. H. Anderson
Attorney at Law
Mountain Home, Idaho

Dear Sir:

On July 24th we received Mr. H.F. Coors's two applications for permits to appropriate the waters of Graylock Creek and the Middle Fork of the Boise River.

As you know, the one claiming water from Graylock Creek was filed several weeks ago and then returned for completion. This filing claims two second feet of water. The new application, i.e., the one claiming water from the Middle Fork of the Boise River, was submitted for four second feet, making a total of six second feet claimed under the two of them.

As you know, the whole of this water was to be used on 158 acres of land. Since the Statutes of this State prohibit the Department from issuing a permit in excess of one miners' inch per acre, it was necessary for us to reduce the quantity of water claimed under the application on the Middle Fork to 1.2 second feet, making a total of 3.2 second feet for the two of them.

We are herewith enclosing fifty cents (50¢), which is the amount of refund due you on the Middle Fork application.

Very truly yours,

Deputy Commissioner of Reclamation
