MEMORANDUM

TO: File 63-03603
FROM: Sharla
DATE: September 1, 1992
RE: Transfer Review (No. 3990)

The above referenced transfer application proposes to add several points of diversion (wells) under this right.

Advertising was completed correctly. There is no indication that drilling permits have been obtained. Therefore, the standard condition regarding drilling permit requirements will be added.

The transfer can be approved with the following conditions:

- T07 The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
- T08 Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
- T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
- 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- R32 This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands described herein.

Use of water with a temperature greater than 85 degrees Fahrenheit is not authorized under this right.

Use of low temperature geothermal water for irrigation purposes is prohibited, unless the heat is first removed through another beneficial use.

Approval of this transfer authorizes the diversion of water from one producing well only.

Gentlemen:

This is to confirm our telephone conversation on the above permit.

The 0.76 cfs on well in NW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 22 seems to be about right.

The other two locations should also be approved. The NE $\frac{1}{4}$ of NW $\frac{1}{4}$ 22 is an artesian well and the amount should be .055 cfs as measured by CH2M. The SW $\frac{1}{4}$ of NW $\frac{1}{4}$ is a combination artesian and pumped well and was measured as .214 cfs by CH2M.

Please review these locations and your including these in your approval would be appreciated.

Dear Mr. Terteling:

One of the conditions of the approval of your permit no.
G-33602/63-3603 was that proof of application of the water
to beneficial use be submitted to this office on or before
June 5, 1970.

Enclosed is an affidavit form which must be used to submit this proof. You may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code Amended.

Either the proof or a request for extension of time must be received by this department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Boise, Idaho

Dear Mr. Terteling:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department; previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply it upon request at any time.

Dear Mr. Terteling:

Proof of completion of works and application of water to beneficial use for the above referenced permit is due not later than June 5, 1968.

Under the terms of your permit, it is required that a notice be published once a week for four consecutive weeks in a local newspaper showing your intent to submit proof. The proof will consist of depositions which the permit holder and two disinterested witnesses must complete before the listed notary public, and must be accompanied by an affidavit of publication of the legal notice.

We have prepared the enclosed notice from the information on your permit. The complete name and address of a notary public of the State of Idaho must be entered together with a date for you to appear before the notary. Allow at least 40 days from the date the notice is mailed to this department for your appearance before the notary.

If you find any discrepancy in the notice or have made any changes, please advise this department and we will assist you in doing whatever may be necessary to assure correct publication.

If the enclosed notice is correct, complete the blank spaces on both forms, sign the form authorizing us to publish the notice at your expense, and return all forms. At the time we send the notice to the newspaper, you will be supplied with further instructions.

If you do not desire to complete the proofs and obtain a license of water right, you are requested to complete the relinquishment portion of this form below and return it to the Department of Reclamation.

ATTENTION: J. R. Holt

Dear Mr. Holt:

We are writing in regards to the above referenced applications and our many personal and telephone conversations of the past week. It was our understanding that we would be supplied with a power of attorney for the afore mentioned applications on or before the 8th of May 1967. As of this letter, we have not received these designations.

Unless a reply is received within 10 days from this letter, we will be required to return the applications rejected as being in improper form. Please contact us if we may be of further assistance.

Very truly yours,

MEMO

Re: Applications G-41832 and 41833
J. E. Terteling

Mr. Terteling is now aware that the lands in question are covered by decreed water from Stewart Creek and that the spring filing is not necessary as the springs are tributary to the creek; therefore, are already decreed to Mr. Terteling. However, he would still like to leave the spring application intact and see if we would approve if for any additional water there might be beyond the 50 inches or 90 inches that are decreed to him.

Mr. Terteling also requests that the application for well permit No. 41832 be left intact and be filed, as he feels that he does not have a water right on this. We can consider the applications once a power of attorney form has been received on these applications, as both were signed by an agent.
