Gentlemen:

We have received a log on a well drilled for you at Fairmont Junior High School. The log indicates that the well was completed August 4, 1964. The test shows the well is capable of supplying 700 gallons per minute. We find no record of a permit for this well.

Idaho Code, 42-229, as amended by the 1963 Session of the Legislature, provides that a permit to divert subterranean water must be obtained from this office in all cases where over 13,000 gallons per day or 9 gallons per minute will be diverted.

Idaho Code, 42-237a, provides that the State Reclamation Engineer may commence action to enjoin the illegal opening or excavation of wells, or withdrawal or use of water therefrom.

Form 3, Application for Permit to Appropriate Subterranean Water, with Instructions, is enclosed. May we hear from you in the matter?

Very truly yours,

RALPH W. THOMAS
Deputy State Reclamation Engineer

In regards to your letter to the Boise Independent School District dated September 21, 1973 pertaining to issuance of water license at Fairmont Junior High School permit number 32611/63-3475 and McKinley Elementary School permit number 32624/63-3479 the following situations exist.

There is approximately 10 acres at Fairmont Junior High which has been set aside for the installation of an Elementary School which is not being irrigated from this well at this time. We do plan on using the well to serve these 10 acres in the future.

We also have an agreement with the Presbyterian Church on Overland to use approximately one acre of ground belonging to the church for playground use at McKinley School. It is our intention for the coming year to extend our present sprinkling service from McKinley to serve this additional area.

In accordance with our telephone conversation I understand it will be necessary to submit an application to you for permission and license to use water from the respective wells to serve these areas.

I would appreciate your sending to us the necessary forms to make application for these licenses.

Very truly yours,

Don Gribble

Gentlemen:

One of the conditions of the approval of your Permit No. G-32611/63-3475 was that proof of application of the water to beneficial use be submitted to this office on or before November 26, 1970.

Enclosed is an affidavit form which must be used to submit proof of beneficial use. You may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended.

Either the proof affidavit or a request for extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Gentlemen;

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department; previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

If you will complete the enclosed forms, we will cause the notice to be published. Should you require additional forms or information, we will be glad to supply them upon request at any time.

Very truly yours,

Donald W. McEldowney

Gentlemen:

We have received a log on a well drilled for you at Fairmont Junior High School. The log indicates that the well was completed August 4, 1964. The test shows the well is capable of supplying 700 gallons per minute. We find no record of a permit for this well.

Idaho Code, 42-229, as amended by the 1963 Session of the Legislature, provides that a permit to divert subterranean water must be obtained from this office in all cases where over 13,000 gallons per day or 9 gallons per minute will be diverted.

Idaho Code, 42-237a, provides that the State Reclamation Engineer may commence action to enjoin the illegal opening or excavation of wells, or withdrawal or use of water therefrom.

Form 3, Application for Permit to Appropriate Subterranean Water, with Instructions, is enclosed. May we hear from you in the matter?
