Gentlemen:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Idaho World, all submitted in proof of completion of works and beneficial use on Permit No. 32597.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try to contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

M. Russell Bosch

DEPARTMENT OF RECLAMATION

Re: Permit No. 32597 Date: **Sept. 1, 1966**

Regional Forester
U. S. Forest Service
Forest Service Bldg.
Ogden, Utah

Dear **Sir:**

Under the terms of your Permit No. 32597 you are required to make proofs of completion of works and application of water to beneficial use on or before **Nov. 5, 1966**

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.
