Gentlemen:

Our field examiner's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. 31188 shows the pipe and troughs are capable of conveying 0.01 c.f.s. or 0.005 miner's inch. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 0.8 miner's inch.

Upon receipt of the statutory fees, totaling \$5.00, we will issue the Certificate of Completion of Works for 0.01 c.f.s. and the License and Certificate of Water Right for 0.01 c.f.s. confirming the right, with priority of June 10, 1963, to the use of surface water from a spring with the point of diversion in SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 6, T. 4 N, R. 6 E, B.M., for watering stock.

Dear Sir:

Under the terms of your Permit No. see above you are required to make proofs of completion of works and application of water to beneficial use on or before **June 12, 1964**

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.

Very truly yours,

Carl E. Tappan
