STATE OF IDAHO }  
COUNTY OF ADA } ss.

Georgene Padgett, being duly sworn,  
deposes and says: That she is the Principal Clerk of The Idaho  
Evening Statesman, a daily newspaper printed and published at  
Boise, Ada County, State of Idaho, and having a general circula-  
tion therein and which said newspaper has been continuously  
and uninterruptedly published in said County during a period of  
twelve consecutive months prior to the first publication of the  
notice, a copy of which is attached hereto; that said notice was  
published in the regular Monday edition of The Idaho Evening  
Statesman in conformity with Sec. 60-108, Idaho Code, for

four consecutive weekly insertions  
beginning with the issue of January 18, 1965,  
and ending with the issue of February 8, 1965.

Georgene Padgett, Principal Clerk  
Subscribed and sworn to before me this 16th day of  
February, 1965.

Leah H. Stubblefield  
Notary Public for Idaho, Residing at Boise, Idaho

NOTICE FOR PUBLICATION  
NOTICE OF PROOF APPLICATION  
OF WATER TO BENEFICIAL USE  
Notice is hereby given that at 11  
A.M., on the 23rd day of February,  
1965, at Boise, County of Ada, State  
of Idaho, before Franklin Jones,  
Notary Public, proof will be sub-  
mitted of the application to benefi-  
cial use of one cubic foot per sec-  
ond of the waters of Boise River,  
in accordance with the terms and  
conditions of Permit No. 27706,  
heretofore issued by the Department  
of Reclamation of the State of Idaho.  
The name and post office address  
of the person or corporation hold-  
ing said permit, Regional Forester,  
U.S. Forest Service, Ogden, Utah.  
The use to which said water has  
been applied is irrigation.  
The amount applied to beneficial  
use is one cubic foot per second.  
The point of diversion of said wa-  
ter is SW1/4NE1/4, Sec. 21, T3N.,  
R4E., Boise Meridian.  
The place where said water is  
used W1/4NW1/4, N1/4SW1/4, Sec. 21,  
T3N., R4E., E1/4.  
The date of priority which said  
user is prepared to establish is  
12-22-58.

## State of Idaho License and Certificate of Water Right

Water License No. 27706

Amount 1.0 c.f.s.

Water District No.

Priority December 29, 1958

THIS IS TO CERTIFY that UNITED STATES OF AMERICA, FOREST SERVICE  
of Boise, Idaho, made application for a permit to appropriate the  
public waters of the State of Idaho, dated December 29, 1958; that Permit No. 27706  
was issued under said application; that Certificate of Completion of works, with a carrying capacity of  
1.0 second feet, was issued thereunder on December 12, 1963, showing that said works  
were completed on the 11th day of December, 1963; and that on the 23rd  
day of February, 1965, UNITED STATES OF AMERICA, FOREST SERVICE

of Boise, State of Idaho, made proof to the satisfaction of the  
State Reclamation Engineer of Idaho, of the right to use the waters of Boise  
River, a tributary of Snake River, for the purpose of irrigation  
under Use Permit No. 27706 of the Department of Reclamation  
and that said right to the use of said waters has been perfected in accordance with the laws of Idaho,  
and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume  
13 of Licenses at page 8509, on the 27 day of June, 1966;  
The right hereby confirmed dates from December 29, 1958;

The Point of Diversion is located  
in the SW 1/4 NE 1/4, Sec. 21, Tp. 3 N, R. 4 E, B. M. Ada County

That the amount of water to which such right is entitled and hereby confirmed, for the purposes  
aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall  
not exceed 1.0 cubic feet per second.

Description and location of use:

# Application For Permit To Appropriate the Public Waters of the State of Idaho

APPLICATION No. 35642  
PERMIT No. 27706  
DISTRICT No.

U. S. Forest Service  
210 Main Street  
Boise, Idaho

1. Name of Applicant: U. S. FOREST SERVICE

Postoffice address: 210 Main Street, Boise County: Ada State: Idaho

I. If applicant is a corporation, give:

- (a) Date and place of incorporation:
- (b) Amount of capital stock:
- (c) Amount paid in:
- (d) Names and addresses of directors:

II. The financial resources of the applicant are:

- (a) Cash on hand:
- (b) Treasury stock:
- (c) Bond to be issued:
- (d) Other resources:

2. Quantity of water claimed: 3 cubic feet per second.

3. Source of water supply: Boise River which is a tributary of Snake River

4. Location of point of diversion: feet distant from the

corner of Section , T. , R. , B.M., and is in the SE $\frac{1}{4}$ SW $\frac{1}{4}$   
of section 21 , T. 3 N , R. 4 E. , B. M., County of Ada

5. Water is to be used for Irrigation

6. If for mining, milling, power or manufacturing purposes, give:

(a) Point of use of water: feet distant from corner of Section

T. , R. , B.M., in the of Section of , T. , R. , B.M.

(b) Amount of power generated: H.P., under feet head.

(c) Water is to be returned to at a point feet

distant from the corner of Section , T. , R. , B.M., in the  
of Section , T. , R. , B.M.

7. Estimated cost of works: \$ 8500

8. Kind of works: Pipe and pump

9. Height of dam feet; length of dam at top feet; length of dam at bottom

feet; material used in dam:

10. Size of headgate: Width feet; height feet.

11. Ditch: Width at bottom fee; width at water line feet; depth of water feet;  
dimensions of flume:

Diameter of pipe 12 inches; length of conduit 1 miles.

Average grade per mile feet.

12. The time required for the completion of such work is 5 years.

13. The time required for the complete application of the water to the proposed use is 6 additional years.

14. The land to be irrigated is described in the following tabulation: See remarks.

15. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: Decreed water  
right under name of William Bedel in case Bedel vs. Percy et al, Judge Carl A. Davis Aug. 2, 1913  
Does not furnish sufficient water.

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public water of the State of Idaho as herein set forth.

| Comes now U. S. FOREST SERVICE and represents to the State Reclamation Engineer of the State of Idaho:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |       |      |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |        |
| That he is the owner and holder of Permit to appropriate the public waters of the State of Idaho, No. 27706.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |       |      |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |        |
| That the point of diversion is described in said Permit as being located: SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 21, T. 3 N., R. 4 E. B. M.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |       |      |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |        |
| That he now requests that the point of diversion be changed to a point located SW $\frac{1}{4}$ NE $\frac{1}{4}$ , Sec. 21, T. 3 N., R. 4 E., B. M.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |       |      |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |        |
| That the reason for desiring to make such change is as follows: The type of pumping installation could not feasibly be placed in the original location. That irrigation pumping is now being done under a water rental agreement with the Bureau of Reclamation and the location of such pumping installation is covered by U. S. Corps of Engineers' permit to use their land and that any water used under the subject permit No. 27706 with State of Idaho would have to be diverted through our present pumping installation since it is not now intended by the Forest Service to build additional pumping facilities to serve the area now being irrigated. |       |      |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |        |
| That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |       |      |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |        |
| Signed at Boise, Idaho, this 11th day of December, 1963.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |       |      |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |                  |        |

## APPROVAL OF STATE RECLAMATION ENGINEER

I, RALPH W. THOMAS, Deputy State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing application for amendment to Permit to Appropriate the Public Waters of the State of Idaho, No. 27706. This approval constitutes a new permit and is issued as an amendment to the original permit to which it refers and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

s/ RALPH W. THOMAS  
Deputy State Reclamation Engineer

Recorded: December 11, 1963

Permit No. 27706  
CERTIFICATE OF COMPLETION OF WORKS

TO ALL WHOM IT MAY CONCERN:

This is to certify that U. S. FOREST SERVICE of Boise, County of Ada and State of Idaho, the holder of Permit No. 27706, issued upon Application No. 35642, bearing date of priority of December 29, 1958, authorizing the diversion of 3.0 second feet of waters of Boise River, County of Ada, State of Idaho, for irrigation purposes, has fully complied with the provisions of the laws of the State of Idaho relating to the proof of completion of the works of diversion set out and described in said Permit; that said works are adequate for diverting and conveying to the place of intended use 1.0 second feet of the waters of Boise River, tributary of Snake River; that the point of diversion of said waters SW $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 21, T. 3 N., R. 4 E., B. M.; and that the lands proposed to be irrigated by the use of said water are described as follows, to-wit:

60 acres W $\frac{1}{2}$  NW $\frac{1}{4}$ , N $\frac{1}{2}$  SW $\frac{1}{4}$ , Sec. 21, T. 3 N., R. 4 E., B. M.

Witness my hand this 12th day of December, A. D., 1963.

s/ RALPH W. THOMAS  
Deputy State Reclamation Engineer

Proof of Completion of Works Made: December 11, 1963

RE: Irrigation-Runoff Filtering System

Dear Mr. Thatcher:

I am responding on behalf of the Director regarding your letter of Nov. 1, 1993, discussing a proposal to construct three small catchment ponds near the existing water storage pond at the Boise National Forest nursery facility. The only concern this office has focuses on water rights.

The nursery is currently covered by two water right licenses. License No. 63-03144 relates to 1.00 cfs of Boise River water to irrigate 78 acres, and License No. 63-03231 covers 1.00 cfs from two wells for irrigation of 60 acres within the previously mentioned 78 acres. The irrigation season for the nursery area is presumed to be from April 1 through October 31 of each year.

It is not entirely clear to me what source(s) of water fills the existing storage pond or will fill the three catchment basins to be constructed. I presume that river and/or well water provided by one or both water rights are the sources of water for any water held or to be held in ponds or basins. If so, such uses are protected by the existing water rights. Additional water right action is not needed under this scenario.

If, however, the water storage pond or the catchment basins will be supplied with water from another source(s), e.g. runoff from snowmelt, the existing rights do not protect use of this other source(s). In this case, another water right would be needed prior to filling the existing or new ponds. This alternative would require that an application for permit for a new right be filed with this office.

Please contact me as soon as possible if another water right must be filed. Due to a drought-related moratorium on approval of new rights in the Boise River Basin, you may face complications in obtaining approval of a new application.

Let me know if I can assist you in this situation.

Sincerely,

A handwritten signature in cursive script that reads "Steve Lester".

RECEIVED

NOV 10 1993

Department of Water Resources

Dear Director:

The Lucky Peak Nursery of the Boise National Forest proposes to construct an irrigation-runoff filtering system adjacent to the existing water storage pond. The filtering system would consist of a series of three shallow water catchment basins. The system would slow water flow which would allow nutrient absorption by aquatic vegetation and promote sediment deposition.

The filtering system would remove nutrients such as nitrates and phosphates from the irrigation runoff. The nutrients originate as fertilizers applied to the Nursery fields during the growing season. An overabundance of nitrates and phosphates entering surface waters contributes to artificially high populations of algae and other aquatic plants. As these plants decompose, they deplete oxygen supplies in the water which may kill fish and other aquatic organisms. This irrigation filtering system would meet the standards set for nitrate and phosphate discharge and comply with State of Idaho water quality standards and pollution control requirements.

Irrigation water from Nursery Fields 1,3, 4 and 5 would flow from the fields to the first catchment basin measuring approximately 25' by 50'. This catchment basin would contain barriers that channel and slow water flow, and trap sediment. It would be planted with aquatic vegetation having high nutrient absorption capabilities. The next two catchment basins, each measuring 25' by 25', would also contain absorptive aquatic plants, but without channeling barriers. Mature plants would be removed approximately every 2-3 years when their nutrient absorption capacity begins to diminish. After the irrigation water filters through the catchments, it would enter the existing water storage pond. Nursery workers use water in the pond to irrigate the Nursery fields when either the groundwater or Lucky Peak Reservoir cannot provide water for the irrigation wells because of low water levels.

Lucky Peak Nursery will prepare an Environmental Assessment (EA) to evaluate the effects of this proposal by January 1994. A 30 day public review period will follow. The nursery manager will consider comments on the EA before making a decision.

Please inform us, in writing, of any issues or concerns you may have pertinent to this proposal by December 10, 1993. If you have any questions or desire more information, please contact Kay Beall or me at the Lucky Peak Nursery, HC 33, Box 1085, Boise, Idaho 83706, or telephone (208) 343-1977.

Sincerely,

*RH Thatcher*

## License and Certificate of Water Right

Water License No. 27706 Priority December 29, 1958 Amount 1.0 c.f.s.

THIS IS TO CERTIFY that UNITED STATES OF AMERICA, FOREST SERVICE

of Boise, Idaho, made application for a permit to appropriate the public waters of the State of Idaho, dated December 29, 1958; that Permit No. 27706 was issued under said application; that Certificate of Completion of Works, with a carrying capacity of 1.0 second feet, was issued thereunder on December 12, 1963, showing that said works were completed on the 11th day of December, 1963; and that on the 23rd day of February, 1965 UNITED STATES OF AMERICA, FOREST SERVICE of Boise, State of Idaho, made proof to the satisfaction of the State Reclamation Engineer of Idaho, of a right to the use of the waters of Boise River

a tributary of SNAKE RIVER for the purpose of irrigation, under Use Permit No. 27706 of the Department of Reclamation, and that said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume 13 of Licenses, at Page 8509, on the 27th day of June, 1966.

The right hereby confirmed dates from December 29, 1958.

The Point of Diversion is located

in the SW 1/4 NE 1/4, Sec. 21, Twp. 3 N, R. 4 E, B.M. Ada County.

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 1.0 cubic feet per second.

Description and location of use:

| Twp. | Range | Section | Forty-Acre Tract                       | No. Acres Described in Permit | No. Acres Actually Irrigated |
|------|-------|---------|----------------------------------------|-------------------------------|------------------------------|

Floyd Iverson  
Regional Forester  
Federal Office Building  
Ogden, Utah

Dear Mr. Iverson:

Our field engineer's report on his inspection of the application of water to beneficial use under the terms of Permit No. 27706 shows the **pump & pipe line** is capable of conveying **50** miner's inches, or **1.0** c.f.s. of water for the irrigation of **78** acres.

Upon receipt of the statutory fee of \$ **8.00** -based at the rate of \$2.00 for each 40-acre subdivision - we will issue the License and Certificate of Water Right, confirming the right with priority of **December 29, 1958** to the use of **1.0** second feet of surface water with the point of diversion in **the SW $\frac{1}{4}$ NE $\frac{1}{4}$ , Sec. 21, T. 3 N., R. 4 E., B.M. from Boise River for irrigation of 78 acres in the W $\frac{1}{2}$ NW $\frac{1}{4}$ , N $\frac{1}{2}$ SW $\frac{1}{4}$ , Sec. 21, T. 3 N., R. 4 E., B.M.**

Very truly yours,

M. Russell Bosch

Regional Forester  
U. S. Forest Service  
Forest Service Bldg.,  
Ogden, Utah

Gentlemen:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the IDAHO EVENING STATESMAN, all submitted in proof of completion of works and beneficial use on Permit No. ~~0-29575~~ & Beneficial Use on 27706.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

GEO. N. CARTER  
State Reclamation Engineer

PROOF OF APPLICATION OF WATER TO BENEFICIAL USE

\* \* \* \* \*

DEPOSITION OF HOLDER

Ques. 1. State your name, residence, occupation and postoffice address: F. LeRoy Sprague,  
901 Wade Circle Dr., Boise, Idaho, Forester, Boise National Forest, 413 Idaho St., Boise, Ida.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf:

United States Forest Service, Ogden, Utah, Forester (Nurseryman), Agent.

Ques. 3. State number, approval date of permit, and date of priority you propose to establish under the permit; # 27706, Approved as amended December 11, 1963. Date of priority 12/29/58.

Ques. 4. State source of water supply: Boise River SW $\frac{1}{4}$  NE $\frac{1}{4}$  Sec. 21, T3N, R4E, B.M.  
Give location of point of diversion, showing subdivision, section, township and range:

Ques. 5. Describe your works of diversion: Pumping Station with 60 h.p. submersible pump  
set in Lucky Peak Reservoir by means of 340 lin. ft. of 15" CMP casing to set pump at minimum  
pool level; state amount of water they are capable of con-  
veying from point of diversion to place of use 400 g.p.m.; Give name of canal or ditch  
or other works by which water is conducted to such place of use: 8" underground transite  
pipe, 1800 lin. ft.; if a well, state depth of well -; depth and size of cas-  
ing: -; depth to water -; if pump is used,  
state discharge of pump: 400 g.p.m.; tell how it was measured or determined: Measured  
g.p.m. delivery and pressure at sprinkler risers; if sprinkler irrigation, give number and size of nozzles and  
operating pressure: Skinner System - 9 lines with 2" risers in each field and 30 p.s.i.

Ques. 6. State for what purpose water is used: Irrigation of tree nursery  
If for irrigation, name each subdivision in which used and number of acres in each  
subdivision that have actually been irrigated with said water: W $\frac{1}{2}$  NW $\frac{1}{4}$  Sec. 21, T3N, R4E,  
B.M., 38 acres, N $\frac{1}{2}$  SW $\frac{1}{4}$  Sec 21, T3N, R4E, B.M. - 22 acres.

State nature of all improvements which have been made as a direct result of said use:

Construction of complete tree nursery facilities including irrigation facilities consisting  
of 7600 lin. ft. underground transite pipe mains and laterals with overhead Skinner type  
sprinkler lines consisting of 13 fields with 9 overhead lines each totaling 47,970 lin. ft.  
of overhead sprinkler lines.

27706

Ques. 6-a: If this is a ground water permit, give name and address of person that drilled the well: Not a ground water permit.

Ques. 7. If for other than irrigation purposes, state purpose and how used:  
Not for other than irrigation purposes.

Ques. 8. What is the minimum amount of water required for the purpose specified above:  
3 acre feet per acre year or total of 200 acre feet per year.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder:

N. A.

Ques. 10. State when and in what amount the water diverted under above mentioned permit has been first used: August 1962 400 g.p.m. Time used since first use:

August and September 1962, May, June, July, August, September, October 1963 and 1964.

Ques. 11. Describe all other water rights appurtenant to same place of use:

Permit G 29575, for use of water from two wells in NE $\frac{1}{4}$  of the SW  $\frac{1}{4}$  of Sec. 21, T3N, R4E, B.M. Also there is water right for 25 miners inches from Jan. 1 to July 1, decreed under name of Wm. Badel (Badel vs. Percy et. al.) Judge Carl A. Davis, dated 8/2/13. This water right does not furnish enough water for long enough season.

(sign) *M. Leroy Inague*

I hereby certify that the foregoing testimony was read to the above subscribed, before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in

Boise, County of Ada  
State of Idaho, on this 23<sup>rd</sup> day of February, A.D. 1965.

My commission expires: July 15, 1966

MAR 9 1965

Department of Reclamation

PERMIT NO. 27706

**Proof of Application of Water to Beneficial Use**  
**Deposition of Witness**

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. William J. Bennetts, 58, Meridian, Idaho, Nursery Worker.

Ques. 2. Are you acquainted with F. LeRoy Sprague, the holder of Permit No. 27706? How long have you known him and where does he reside?

Ans. Yes, 20 years, 901 Wade Circle Dr., Boise, Idaho

Ques. 3. Have you read or heard read said Permit No. 27706, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Boise River, SW $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 21, T3N, R4E, B.M. A pumping station with 60 h.p. submersible pump set in Lucky Peak Reservoir by means of 340 lin. ft. of 15" CMP casing to set pump at minimum pool level.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 450 g.p.m. or 1.0 c.f.c. can be conducted safely but use is at rate of 400 g.p.m. or .89 c.f.s. measured at sprinkler risers.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water used for irrigation purpose on W $\frac{1}{2}$  NW $\frac{1}{4}$ , Sec. 21, T3N, R4E, B.M. approx. 38 acres and N $\frac{1}{2}$  SW $\frac{1}{4}$ , Sec. 21, T3N, R4E, B.M., approx. 22 acres all cultivated land. Nature of improvements - complete tree nursery facilities consisting of irrigation works of 7600 lin. ft. underground transite pipe mains and laterals with overhead Skinner type sprinkler lines consisting of 13 fields with 9 overhead lines each, totaling 47,970 lin. ft. of overhead sprinkler lines.

27706

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. N.A.

Ques. 8. If for irrigation, state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Sandy clay loam, requiring about 200 acre feet of water per year

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No interest in the above described works, water or lands.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. Since August 1962, and during entire irrigation seasons of 1963 and 1964 I have worked with and have seen irrigation water applied through the above described works for irrigation of tree nursery seed beds at the rate of 400 g.p.m. over an area of about 60 acres.

Re: Permit No. 27706

January 13, 1965

Mr. Floyd Iverson, Regional Forester,  
U. S. Forest Service,  
Forest Service Building,  
Ogden, Utah.

Dear Mr. Iverson:

This acknowledges the Notice of Proof of Completion of Works and Application of water to Beneficial Use under Permit No. 27706. The proofs are to be made at 11:00 o'clock A.M., on the 23rd day of February, 1965, before Franklin Jones, 4209 Catalpa Dr., Boise, Idaho, Notary Public.

As of this date, we have mailed the Notice to the Idaho Daily Statesman, Boise, Idaho, with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof then mail the affidavit of publication and statement of costs to you.

It is important that the enclosed depositions be executed by you and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the place, on the date, and at the time and before the Notary, as advertised. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, the Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the AFFIDAVIT OF PUBLICATION.

Very truly yours,

CARL E. TAPPAN  
State Reclamation Engineer

certificate

Application for Amendment

POINT OF DIVERSION

Permit No. 27706

Comes now U. S. Forest Service and  
represents to the State Reclamation Engineer of the State of Idaho:

That he is (are) the owner and holder of Permit to appropriate the Public  
Waters of the State of Idaho, No. 27706.

That the point of diversion is described in said Permit as being located:  
SE 1/4 SW 1/4 of Sec. 21, T3N, R4E, B. M.

That he now requests that the point of diversion be changed to a point  
located: SW 1/4 NE 1/4 of Sec. 21, T3N, R4E, B. M.

That the reason for desiring to make such change is as follows:

The type of pumping installation could not feasibly be placed in the original location.

That irrigation pumping is now being done under a water rental agreement with Bureau of  
(BUREAU OF RECLAMATION)

That no one will be injured by such change, and that such change will be made  
at Permit holder's own risk.

Signed at Boise, Idaho, this 11 day of December  
19 63.

Date of Receipt at Department of Reclamation December 11, 1963

APPROVAL OF STATE RECLAMATION ENGINEER

DAVID A. THOMAS, Deputy  
I, DAVID A. THOMAS, State Reclamation Engineer of the State of Idaho, HEREBY APPROVE  
the above and foregoing application for amendment to Permit to appropriate the Public  
waters of the State of Idaho, No. 27706. This approval constitutes a new permit  
and is issued as an amendment to the original permit, to which it refers and of which  
it becomes a part, and said application is approved only insofar as the rights of others  
will not be adversely affected thereby.

Recorded in Book 28 of  
Permits, at Page 2706  
December 11, 1963

David A. Thomas  
Deputy  
State Reclamation Engineer

NR  
27706

Reason - desiring to make change;

Reclamation and the location of such pumping installation is covered by U. S. Corps of Engineers' permit to use their land and that any water used under the subject permit No. 27706 with State of Idaho would have to be diverted through our present pumping installation since it is not now intended by the Forest Service to build additional pumping facilities to serve the area now being irrigated.

Permit No. 27706

STATE OF IDAHO  
Department of Reclamation

## Proof of Completion of Works

## AFFIDAVIT OF HOLDER

STATE OF IDAHO

County of Ada

ss.

F. LeRoy Sprague, Acting Forest Supervisor  
U. S. Forest Service, being first duly sworn, upon his oath deposes and says:

First: That he is the holder and owner of Permit to appropriate the Public Waters of the State of Idaho, No. 27706, and that his postoffice address is 413 Idaho Street, Boise, State of Idaho.

Second: That the name of the stream from which said water is to be diverted is Boise River.

Third: That the point of diversion of said water is SW  $\frac{1}{4}$  NE  $\frac{1}{4}$  Sec. 21, T3N, R4E.

Fourth: That under the terms and conditions of said permit, construction thereunder was required to be completed by January 9, 1964.

Fifth: That the use for which said water is intended is irrigation.

Sixth: That on the date above mentioned, the works constructed under said permit were (or were not) fully completed and consisted of the following:

I. Kind of Works: Pumping Station - 60 h.p. submersible pump in Lucky Peak Reservoir at (RESERVOIR, DAM, DITCH, FLUME, PIPE OR OTHERWISE) minimum pool level.

II. Dimensions of work: 340 ft. length of 15" CMP casing to set pump in.

(a) Height of dam \_\_\_\_\_ feet, length of dam at top \_\_\_\_\_ feet, length of dam at bottom \_\_\_\_\_ feet. Material used in construction \_\_\_\_\_

(STATE WHETHER WOOD, EARTH STONE OR CONCRETE)

(b) Capacity of reservoir \_\_\_\_\_ acre feet.

(c) Size of headgate: Width \_\_\_\_\_ feet, height \_\_\_\_\_ feet.

(d) Conduit \_\_\_\_\_ width at bottom \_\_\_\_\_ feet, width at water line \_\_\_\_\_

(STATE WHETHER DITCH, FLUME OR PIPE)

feet, depth of water \_\_\_\_\_ feet; diameter of pipe \_\_\_\_\_ inches, average grade per mile is \_\_\_\_\_ feet. Length of conduit is \_\_\_\_\_ miles.

Seventh: That said works are capable of conducting to the place of intended use one \_\_\_\_\_ second feet of water.

Eighth: That water appropriated under said permit is available for sixty \_\_\_\_\_ acres of land described as follows: W  $\frac{1}{2}$  NW  $\frac{1}{4}$  Sec. 21, N  $\frac{1}{2}$  SW  $\frac{1}{4}$  Sec. 21, T3N, R4E, B. M.

Ninth: Remarks:—That the above described works have been in operation since August 1962 and cost approximately \$40,000.

Subscribed and sworn to before me this 11 day of December, 1963

INSTRUCTIONS  
PROOF OF COMPLETION OF WORKS

Boise, Idaho

Re: Permit No. 27706

Nov. 1, 1963

U. S. Forest Service  
210 Main St  
Boise, Idaho

Dear Sirs:

Under the terms of your Permit No. 27706 you are required to complete your diversion works on or before Jan. 9, 1964. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public, or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

CARL E. TAPPAN

State Reclamation Engineer
