Dear Ms. Farrar:

I recently received 'Assignment of Permit' forms on the above referenced licensed water rights.

In Idaho, decreed, licensed, and claimed water rights are considered real property; therefore, proof of owning the land is proof of owning the water rights unless extenuating circumstances exist. Water right statute does not provide a means for changing owner of record for licensed water rights; although, I have placed your correspondence in each of the water right files.

Please note that these rights have been claimed in the Snake River Basin Adjudication. I have forwarded a copy of the assignment forms to the Adjudication Bureau for their review.

If you have any questions, please feel free to contact me directly at 327-7944.

Dear Mr. Stickler:

Possibly you do not want 2.08 c.f.s. of water from the well in the NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 5 as shown on the accompanying notice. I believe this well is also used to irrigate the SW $\frac{1}{4}$, Sec. 5 under another permit. As the total water diverted amounts to 2.92 c.f.s., the prorated share for 104 acres out of a total of 260 acres irrigated would be 1.17 c.f.s. for the 104 acres under this permit and 1.75 c.f.s. for about 160 acres in the SW $\frac{1}{4}$, Sec. 5. This is based on 156 acres irrigated in the SW $\frac{1}{4}$, Sec. 5 which may be about correct, or in error.

Kindly indicate your desire when remitting the fees mentioned.
