Permit to Appropriate Water

NO. 63-31177

Priority: 03/29/2001

Maximum Diversion Rate: 3.96 CFS

This is to certify, that ROD & MAUREEN FRISBY FAMILY LTD PARTNERSHIP
6208 S E 8TH AVE
CALDWELL ID 83605

has applied for a permit to appropriate water from:

Source: GROUND WATER

and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/01 to 11/15	3.96 CFS

LOCATION OF POINT(S) OF DIVERSION:

GROUND WATER NE $\frac{1}{4}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 24, Twp 06N, Rge 04W, B.M. PAYETTE County

PLACE OF USE: IRRIGATION

Twp Rge Sec	NE				NW				SW				SE				Totals

06N 04W 25					21.0												21.0
06N 04W 26	7.0																7.0

Total Acres: 198

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before July 1, 2007.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
5. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
6. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.

SEP 23 2002

State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 63-31177

CONDITIONS OF APPROVAL

7. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted for irrigation purposes under this right.
8. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
9. Use of water under this right may be affected by an agreement between the protestant and the right holder.
10. This permit is for the use of ground water and is subject to administration as a water right from connected sources in the Snake River Basin in accordance with applicable law.
11. This permit for the use of ground water shall be junior to, and subject to, the water rights of the United States Bureau of Reclamation heretofore appropriated, including, as authorized by applicable law, re-use of water under such water rights.
12. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
13. Water bearing zone to be appropriated is 100 to 150 feet.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 10th day of July, 2002

RE: Water-Bearing Zone for Permit No. 63-31177

Dear Terry:

In response to your request to deviate from the limitations stated in condition no. 13 on Permit 63-31177, IDWR finds that an application to amend the permit is not necessary because the proposed change is not a "substantial change" to the proposed method and or diversion of water. Changing the water-bearing zone to 250 to 500 ft. below ground surface is acceptable. Please note that the well drilling permit may have additional limitations, including limiting the total commingled interval in the well to prevent waste and/or contamination. I discussed your request with Mark Slifka, who recommends that the 150 feet of producing interval be all together in the lower section of the hole.

If you have any questions, please call me at 208-327-7946, or email me at skeen@idwr.state.id.us.

Sincerely,

Shelley Walter Keen
Water Rights Supervisor

Subject: Water-Bearing Zone for Permit No. 63- 31177

Dear Shelley:

On behalf of Rod & Maureen Frisby Family Ltd Partnership, this letter is a request to change the water-bearing zone remark on permit 63-31177. Permit condition No. 13 says "Water bearing zone to be appropriated is 100 to 150 feet". We would like to change the remark to "Water bearing zone to be appropriated is 250 to 500 feet below ground surface".

The reason for the requested change is that the water table at the proposed well location is approximately 150 feet below ground surface. As a result, a well completed from 100 to 150 feet (as currently listed on the permit) would almost certainly be unsuccessful. A properly constructed irrigation well in this area should probably have between 100 and 150 feet of available drawdown (i.e., static water level above the uppermost well screen) to obtain the desired well yield of 3 to 4 cfs. A water-bearing interval of 100 to 150 feet thickness would probably be screened. Therefore, a target well depth of approximately 450 feet (i.e., 150 feet water table + 150 feet drawdown + 150 feet water-bearing interval) is appropriate. A water-bearing zone of 250 to 500 feet is proposed to provide some flexibility to drill slightly beyond 450 feet if necessary.

Please contact me with any questions or comments concerning this request. We look forward to your response.

Sincerely,

Terry M. Scanlan, P.E., P.G.

RE: Permit No. 63-31177

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a 'Proof Due Notice' approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this water right permit were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Ground Water Protection Section located here at this office or our regional office nearest you.

MICROFILMED

SEP 23 2002

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

for 
Shelley W. Keen
Water Rights Supervisor

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

44-03-01-01303
MICROFILMED

SEP 23 2002

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

FROM: Lori Graves 

TO: Gary Spackman

RE: Frisby Applications 63-31176, 63-31177, 63-31178

Applicants filed the above applications as a result of policy changes enacted by BCID regarding water spreading.

The first obstacle the applicants encountered regarding ground water applications 63-31177 and 63-31178 was the fact that they are located in basin 63 and therefore subject to the to the Boise River basin administrative hold. Terry Scanlan submitted supporting documentation that indicated that ground water flow at the existing and proposed well sites is towards the Snake River and Payette River where water is available for appropriation.

The second obstacle the applicants encountered was an objection filed by the US Bureau of Reclamation (USBOR). After much negotiation, a stipulation was filed to resolve the protests in which the applicants, USBOR and BCID agreed to inclusion of specific conditions on **any permit or license** that is issued to applicants by the Department in connection with the applications.

Obviously the parties involved were aware that an amendment to application no. 63-31178, new application 63-31505, and new application for transfer on license 63-10785 were in the works. The Department received these three new filings from the applicants May 6, 2002. The new filings were filed to consolidate ground water use from the existing well to lands not irrigated with BCID water. In combination, the three applications propose a total diversion rate of 6.04 cfs from the existing well for 302 acres irrigation.

Amended application no. 63-31178 did not require re-advertising because none of the application components were changed. The acres were consolidated to quarters that were part of the original advertised p/u. No increase in total acres or flow rate was proposed.

Applicants agreed to withdraw wastewater application 63-31176 because USBOR plans to retain control of said wastewater.

Both ground water applications 63-31177 and 63-31178 should be approved as filed and conditioned in accordance with the stipulation. **MICROFILMED**

SEP 23 2002

Application 63-31505 and transfer 69956 have been submitted to advertising. A copy of the stipulation was included in those files. Both these applications should also be conditioned in accordance with the stipulation.

Attorneys for Applicant Frisby Family Limited Partnership

**BEFORE THE DIRECTOR OF THE
IDAHO DEPARTMENT OF WATER RESOURCES**

**IN THE MATTER OF APPLICATION
FOR PERMIT NOS. 63-31177 AND 63-
31178 IN THE NAME OF FRISBY
FAMILY LIMITED PARTNERSHIP**

STIPULATION

Applicant Frisby Family Limited Partnership ("Frisby") through its attorneys Givens Pursley LLP, Protestant United States Bureau of Reclamation, through J. William McDonald, Regional Director, Pacific Northwest Region ("USBOR"), and Intervenor Black Canyon Irrigation District ("BCID"), through its attorneys McDevitt & Miller, LLP (collectively the "Parties") stipulate as follows:

1. Frisby has filed the above-captioned applications for permit ("Applications") to appropriate ground water to supply water for irrigation use. The intended place of use of such water includes lands within the boundaries of the BCID.

2. USBOR delivers water for irrigation of lands within the boundaries of BCID pursuant to contract with BCID.

**MICROFILMED
SEP 23 2002**

3. USBOR has protested ("Protests") the Applications.
4. BCID has intervened in the contested case resulting from the USBOR Protests.
5. To resolve the Protests Frisby, USBOR and BCID agree to inclusion of the following conditions in any permit or license that may be issued to Frisby by the Department in connection with the Applications:
 - a) This [permit/license] is for the use of ground water and is subject to administration as a water right from connected sources in the Snake River Basin in accordance with applicable law.
 - b) This [permit/license] for the use of ground water shall be junior to, and subject to, the water rights of the United States Bureau of Reclamation heretofore appropriated, including, as authorized by applicable law, reuse of water under such water rights.
6. Provided the Department will incorporate the above conditions in the form set forth herein in any permit or license issued in connection with the Applications, USBOR agrees to withdraw its Protests, and USBOR and BCID agree to the Department's further processing of the Applications without a hearing.
7. The Parties understand that the Department may include additional conditions in any permit or license as it deems appropriate, and provided such additional conditions are not inconsistent with the above conditions, they shall not negate the withdrawal of Protests effected by this Stipulation.
8. This Stipulation is the result of negotiations, and these negotiations involved written and oral communications between and among the Parties and their

attorneys. The Parties agree that all preceding and contemporaneous oral and written statements, understandings, representations, warranties, and promises of any kind whether consistent or inconsistent herewith, are agreed to be of no force or effect for any purpose whatsoever except as may be expressly stated in this Stipulation. This Stipulation represents the complete and final agreement of the Parties with respect to the subject matter hereof, and supersedes all prior and contemporaneous consistent and inconsistent statements, representations, warranties, understandings, negotiations, and agreements, if any among the Parties hereto. This Stipulation may not be supplemented, modified or amended by evidence, either oral or written, of any such matters or by course of dealing, but only by the written agreement of the Parties executed with the same formality of this Stipulation. The Parties hereto hereby acknowledge that the provisions contained in this Stipulation were expressly bargained for and that the plain meaning of those provisions memorializes the intent of the Parties hereto.

Re: Application for Permit Nos. 63-31177 and 63-31178 in the Name of Frisby
Family Limited Partnership
Our File No. 6327-1

Dear Kathleen:

I had the opportunity to speak with Karl Dreher and Phil Rassier yesterday concerning the language you forwarded as a "counter offer - Reclamation final language" on May 6, 2002. I hope that the door is not closed to further consideration of this since Mr. Dreher has suggested very minor changes that I have included in redline form near the end of this letter.

Frankly, I feel that the Director's comments are good ones, in that they account for the Department's responsibility to make new appropriations subject to all prior rights, not just those of a particular protestant. They also minimize potential ambiguity involved in, for example, the use of the words "waste" or "return flow," which as you know are legal terms of art that can have different legal significance in different settings. For example, I could argue confidently in the Idaho and U.S. Supreme Courts that the Bureau has no legal right to "waste" water, let alone reuse such "waste." On the other hand, I'll stand up with you at the podium and argue that one can appropriate "waste water," subject to the upstream appropriator's right to cease "wasting" it.

Similarly, the term "return flows" typically applies to that portion of the diverted water that has been placed to beneficial use without waste, that percolates below the root zone (in the irrigation setting) and has returned to the public supply where it is again

MICROFILMED

SEP 23 2002

Kathleen Marion Carr

May 9, 2002

Page 2

subject to appropriation by others (I'm not making this up, the case law bears me out). However, I expect that the Bureau, in drafting its contract with BCID, looked at "return flow" in a different and more limited context, otherwise in the Boise River, the Bureau presumably would be staking claim to all the water in the Boise River below the Star Bridge during the months of July, August and September.

The Director's comments do not preclude reuse, and they do not prejudge the extent to which reuse of various "sources" such as waste, seepage or return flow is permitted or prohibited in any given circumstance. Instead, that is left, as with the Bureau's proposed language, to determination at the appropriate time under "applicable law."

I think that by now we all are revolving in extremely tight orbits around the same point in space. I find the legal issues fascinating, which probably explains why I have been so involved in water law for the past 18 years, and so I could come up with ways to tweak this language a little bit too. But, the expense and significant economic impact that further abstract discussion about the nature and extent of the Bureau's water right will produce in this proceeding concerning the Frisbys' application for an admittedly junior appropriation seems unjustified.

The following incorporates the Director's comments:

1. This [permit/license] is for the use of ground water and is subject to administration as a water right from connected sources in the Snake River Basin in accordance with applicable law.
2. This [permit/license] for the use of ground water shall be junior to, and subject to, all prior water rights including, but not limited to, the water rights of the United States Bureau of Reclamation heretofore appropriated, including, reuse of water under such water rights as authorized may be determined by applicable law ~~the right to reuse project waste, seepage, and return flows.~~

The Bureau's primary concern here seems to be to establish as a condition in the Frisbys' water right permit and license, a description of the Bureau's water rights that becomes precedent on that issue in future administrative proceedings. As we discussed previously, the Frisbys do not have a problem with that provided the Bureau's rights can

MICROFILMED

SEP 23 2002

Kathleen Marion Carr
May 9, 2002
Page 3

be described. But, until the Bureau's rights have been adjudicated in the SRBA, a precise description is not possible. I had proposed to you that since any permit issued in this matter likely would include a five-year period within which to prove up on their beneficial use and obtain a license, the Frisbys could stipulate now to inclusion of a condition in their license making their water right subject to the Bureau's rights as they ultimately are determined in the SRBA. I would go so far as to suggest that we could agree now to attach a copy of the Bureau's partial decree to the license provided the Bureau would agree to allow the permit to be issued.

I would very much appreciate it if you could discuss this with Bill McDonald as soon as possible and get back to me to advise where we are in these discussions.

Sincerely,

Michael C. Creamer

Boise, ID 83705

Re: Bureau of Reclamation Protests of Rod and Maureen Frisby's
Applications Nos. 63-31177 and 63-31178

Dear Mr. Spackman:

We are in receipt of IDWR's counter proposal to the language that Reclamation and the Frisby's worked out to settle Reclamation's protest to the subject water right applications. The purpose of this letter is to share with you an alternative settlement proposal that will, hopefully, alleviate concerns that IDWR may have had with the earlier proposal, and at least explain our rationale for our new proposal.

Thus, our suggested counter to your language is as follows:

1. This ground water [permit/license] will be administered from connected sources of water in the Snake River Basin in accordance with applicable laws and doctrines.

We recognize that you included *Idaho's prior appropriation doctrine* in the above paragraph in place of the last phrase, but the United States was unable to concur to that language in the SRBA (Basin Wide 5), and for the same reason we cannot agree to it now. We believe if we agreed to your language that a future court may preclude the Bureau of Reclamation from asserting a claim or defense it would have otherwise had under federal law pursuant to the Supreme Court's decision in California v. United States. We believe that the state court would likely interpret our concurrence to your phrase as a waiver of a Congressionally authorized directive, and as such, we have no authority to make that waiver. Therefore, our more general language as provided above protects the status quo of whatever rights Congress has given to Reclamation, and how that claim or defense may or may not be interpreted by a court.

MICROFILMED

SEP 23 2002
A Century of Water for the West
1902-2002

The second provision we are providing for IDWR's consideration is as follows:

2. Use of ground water under this [permit/license] is subject and subordinate to (a) present and future authorized uses of any existing water rights of the United States Bureau of Reclamation, and which authorized uses include recapture and reuse of project waste, seepage and return flows in project facilities and (b) similar authorized uses of any other existing connected water rights.

We have narrowed the project water universe we are protecting to that which is utilized and found within project facilities. However, again, if Congress were to authorize a *future* project use, we need to protect that right. This may or may not occur, but if it did, it is likely that Congress would only do so pursuant to state law.

If you have any concerns, please let me know.

Sincerely,

E. Gail McGarry

**NOTICE OF SECOND
PREHEARING CONFERENCE**

On February 20, 2001, Rod & Maureen Frisby filed with the Idaho Department of Water Resources (IDWR) two applications for permit to appropriate the public waters of the State of Idaho nos. 63-31177 and 63-31178. The applications were protested by the Bureau of Reclamation. The prehearing conference held on March 5, 2002 did not solve the matter of protest.

IDWR has scheduled a second prehearing conference for the protests to be held **at the Western Regional Office of IDWR, 2735 Airport Way, Boise, Idaho on Friday, March 15, 2002, at 9:00 a.m.** Parties can participate by telephone. The conference will be held in accordance with provisions of Chapters 2 and 17, Title 42, and Chapter 52, Title 67, of the Idaho Code, the adopted Rules of Procedure of the Department of Water Resources, and Rules 40 and 45 of the adopted Rules of Water Appropriation of the Department of Water Resources.

Dated this 8th day of March 2002.

Gary Spackman

CERTIFICATE OF MAILING

Re: Application for Permit Nos. 63-31177 and 63-31178

Dear Parties:

The Idaho Department of Water Resources (IDWR) received a petition to intervene from Black Canyon Irrigation District in the above-referenced matter. IDWR records show you received a copy of the petition.

Any objection to the petition to intervene must be filed on or before February 28, 2002.

Please feel free to contact this office if you have questions about the procedure for intervention or other matters related to the application.

Sincerely,

Gary Spackman

PETITION TO INTERVENE

Comes now the Black Canyon Irrigation District by and through its attorney Chas. F. McDevitt of the firm of McDevitt & Miller LLP and petitions to intervene in the captioned proceeding.

The Black Canyon Irrigation District administers the use of the Water Right held in the name of the Bureau of Reclamation of the United States of America.

The Black Canyon Irrigation District's interest is seeing that the administration of the use of the water by the District is equal and fair to all the users within the District—for that reason it desires to represent its interest and the interests of the users of the Black Canyon Irrigation District in this matter.

Respectfully submitted this 24th day of January, 2002.

**NOTICE OF PREHEARING
CONFERENCE**

On February 20, 2001, Rod & Maureen Frisby filed with the Idaho Department of Water Resources (IDWR) two applications for permit to appropriate the public waters of the State of Idaho nos. 63-31177 and 63-31178. The applications were protested by the Bureau of Reclamation.

IDWR has scheduled a prehearing conference for the protests to be held on **Monday, March 5, 2002, at 2:00 p.m. at the Idaho Department of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705.** The conference will be held in accordance with provisions of Chapters 2 and 17, Title 42, and Chapter 52, Title 67, of the Idaho Code, the adopted Rules of Procedure of the Department of Water Resources, and Rules 40 and 45 of the adopted Rules of Water Appropriation of the Department of Water Resources.

The conference will be conducted in a facility that satisfies the accessibility requirements of the Americans with Disabilities Act. If you require special accommodations in order to attend, participate in or understand the conference, please advise IDWR within (10) days prior to the conference.

Dated this 29th day of January, 2002.

CONFERENCE AND HEARING PROCEDURE

APPLICATION FOR PERMIT

Section 42-203A, Idaho Code, requires the department to consider the following issues in connection with an application for permit:

- 1) Will the proposed appropriation injure other water rights?
- 2) Is the proposed water supply sufficient for the purpose for which it is sought to be appropriated?
- 3) Was the application made in good faith or for delay or speculative purposes?
- 4) Does the applicant have sufficient financial resources with which to complete the proposed project?
- 5) Is the proposed appropriation in the local public interest, which is defined as the affairs of the people in the area directly affected by the proposed use?
- 6) Is the proposed use contrary to conservation of water resources within the state of Idaho?

BURDEN OF PROOF

The applicant has the initial burden of proof on issues 1, 2, 3, 4, & 6 above and must provide evidence for the department to evaluate these criteria.

The initial burden of proof on issue 5 above lies with both the applicant and protestant as to factors which they are most knowledgeable and cognizant. The applicant has the ultimate burden of persuasion, however, for this issue.

PROCEDURE

The department generally conducts an informal conference with the parties to determine the issues and to try to settle a protested matter before a hearing is scheduled. If a hearing is held, the department will issue a written decision based on the hearing record.

MICROFILMED
SEP 23 2002

CONFERENCE

The purpose of a prehearing conference is to provide the opportunity for the parties and the department to familiarize themselves with a contested matter and to attempt to resolve the matter. At the conference, the department may also formulate and simplify the issues, identify documents to avoid unnecessary proof, exchange proposed exhibits or prepared testimony, limit witnesses, discuss settlement offers, schedule hearings, establish procedure at hearings and address other matters that may expedite orderly conduct and disposition of the proceeding or its settlement.

HEARING

The department will tape record the hearing. Copies of a hearing tape are available upon written request and the payment of the cost of reproducing the tape.

The hearing likely will be conducted by a hearing officer appointed by the Director rather than the Director himself. If so, the hearing officer will prepare a preliminary order for the Director's consideration. Parties can file exceptions to a preliminary order, briefs in support of the exceptions or may request oral argument. Parties may seek judicial review of any final order issued by the Director.

Parties may, by written stipulation, waive their right to a preliminary order, particularly when a shortened decision process is desirable or necessary. Such a waiver does not eliminate any rights of the parties in connection with the final order of the Director and judicial review of the order.

EXHIBITS

A party who plans to offer an exhibit as part of the hearing record must provide a copy of the proposed exhibit to the parties and to the hearing officer prior to any scheduled hearing.

AMERICANS WITH DISABILITIES ACT

Any hearing scheduled will be conducted in a facility that meets the accessibility requirements of the Americans with Disabilities Act. If you require special accommodations in order to attend, participate in or understand the hearing please advise the department within ten (10) days prior to the hearing.

To Whom It May Concern:

We recently had two phone calls from Lori on our answering machine about a meeting on Monday January 7, 2002. I was at work and Rod was out of town. We have not received any notification about this meeting. When we received notification that our well permit was protested, I called Lori to see what the process was. She said that there would be a meeting that Gary would set up. She did not mention that a meeting was set up at that time.

We would like to reschedule the meeting if possible. We are available for these following days:

Jan 14, 24(in a.m.), 25, 31

Feb 1,4,11,14,19,20,21,25,28,

We are sorry that we are so busy. Thanks for your understanding in this.

Re: Application for Permit Nos. 63-31177 and 63-31178

Dear Applicant:

Enclosed is a copy of a protest filed against the issuance of a permit pursuant to the above-referenced applications.

The following are the criteria the department must consider in either approving or denying an application for permit (per Section 42-203A, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?
6. Will the proposed use be contrary to conservation of water resources within the state of Idaho?

Enclosed is a Notice of Prehearing Conference scheduled for January 7, 2002 at the Idaho Department of Water Resources, Western Region. At the conference, the department will review possibilities for resolution of the protest. If the matter cannot be resolved at that time, a formal hearing will be arranged for a future date.

The department suggests you contact the protestant(s) directly in an effort to determine what is in dispute in the application and to attempt to resolve the protest. Direct, sincere conversation between the parties prior to initiation of formal proceedings can often resolve a protest.

Please contact this office if you have questions regarding this procedure.

Sincerely,

Gary Spackman

Dear Protestant:

This office acknowledges receipt of your protests to the issuance of a permit pursuant to the above referenced applications.

The following are the criteria the department must consider in either approving or denying an application for permit (Section 42-203A, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?
6. Will the proposed use be contrary to conservation of water resources within the state of Idaho?

Enclosed is a Notice of Prehearing Conference scheduled for January 7, 2002 at the Idaho Department of Water Resources, Western Region. At the conference, the department will review possibilities for resolution of the protest. If the matter cannot be resolved at that time, a formal hearing will be arranged for a future date.

The department suggests you contact the applicant(s) directly in an effort to determine what is proposed by the application and to attempt to resolve the protest prior to the prehearing conference. Direct, sincere conversation between the parties prior to initiation of formal proceedings can often resolve a protest.

NOTICE OF PROTEST

This form may be used to file a protest with the department under section 42-108B, 42-203A, 42-203C, 42-211, 42-222 and 42-224, Idaho Code. The department will also accept a timely protest not completed on this form if it contains all the necessary information.

1. Matter being protested Application for Permit No. 63-31177 in the name of Rod and Maureen Frisby 6208 Southeast 8th Avenue Caldwell, ID 83605
2. Name of protestant United States Department of Interior acting through the Bureau of Reclamation
3. Protestant's Representative for service (If different than protestant)
E. Gail McGarry, Manager Water Rights and Acquisition, Pacific Northwest Region, Bureau of Reclamation
Kathleen Carr, Attorney, Office of the Boise Field Solicitor, United States Department of Interior
4. Service mailing address
E. Gail McGarry, PN-3100, Bureau of Reclamation, 1150 N. Curtis Road, Suite 100, Boise, ID 83706-1234
Kathleen Carr, Office of the Field Solicitor, Federal Building, Rm 365, 550 West Fort St. Boise, ID 83724
5. Service telephone no. E. Gail McGarry (208) 378-5306; Kathleen Carr (208) 334-1911
6. Basis of protest (including statement of facts and law upon which the protest is based)
Injury to Reclamation project water rights. There is no way to measure or determine whether or not Reclamation project water is being used on non-project lands since the delivery system for both sources is the same. Furthermore, Reclamation project water co-mingled with well water is not permitted without Federal approval.
7. What would resolve your protest? Exclusive system for project and non-project water precluding application of Reclamation project water to non-project lands or comingling of water. Applicant must demonstrate water to be appropriated is not waste seepage or return flows from the Reclamation project.

I hereby, acknowledge that if I, or my designated representative, fails to appear at any regularly scheduled conference or hearing in the matter of which I have been notified at the address above, the department may issue a notice of proposed default against me in this matter for failure to appear. I also verify that I have served a copy of this protest upon the applicant.

Signed this 26th day of Nov., 2001.

Subject: Water Right Applications 63-31177 and 63-31178
(Rod & Maureen Frisby Family Ltd Partnership)

Dear Gary:

On behalf of Rod and Maureen Frisby, I have investigated groundwater flow direction and water availability in relation to water right applications 63-31177 and 63-31178. The water rights are described below.

- Water right application 63-31177 proposes a diversion rate of 3.96 cfs for irrigation of 196 acres located 3 miles north-northwest of Sand Hollow in Payette County. All of the acres proposed for irrigation by this application were irrigated prior to the 2001 irrigation season with water obtained from the Black Canyon Irrigation District (BCID). However, only half of these lands had recorded rights with BCID, and BCID has required that irrigation cease using BCID water on the approximately 100 acres without recorded water rights. Thus, the application is proposing use of groundwater as a primary source on approximately 100 acres, and as a supplemental source on the remaining 96 acres.
- Water right application 63-31178 proposes a diversion rate of 2.42 cfs for irrigation of 121 acres located 3 miles north-northeast of Sand Hollow in Payette County. Approximately 40 acres of new irrigation are proposed. The remaining 81 acres currently are irrigated, with approximately 63 acres irrigated with groundwater under claim A63-10785, and 18 acres irrigated with surface water from BCID. The groundwater use under claim A63-10785 was expanded from the licensed amount under 63-10785. Therefore, application 63-31178 would provide primary irrigation on approximately 40 acres of new land, supplemental irrigation on approximately 18 acres of BCID, and would be an "overfile" on acres claimed in the SRBA under A63-10785.

MICROFILMED
SEP 23 2002

The places of use and points of diversion proposed by each of these water right applications are shown on Figure 1. The proposed points of diversion are located in Basin 63 (Boise River Basin). As you know, applications for new irrigation water rights from groundwater sources in Basin 63 are subject to IDWR's "administrative hold" until completion of the Treasure Valley Hydrologic

Facsimile (208) 383-4156

Project. However, we understand that IDWR has exempted some applications from the administrative hold if hydrologic conditions suggest that a proposed water right will have no significant detrimental impact to surface water or groundwater in the Boise River Basin. We propose that applications 63-31177 and 63-31178 be exempted from the administrative hold for the following reasons.

- (1) The groundwater flow at the proposed points of diversion is not towards the Boise River. Instead, groundwater flow is toward the Snake River (Basin 03) and Payette River (Basin 65) where water is available for appropriation.
- (2) Nearly all of the lands proposed for irrigation have been irrigated for more than 10 years. Therefore, approval of the applications should not result in a significant increase in the consumptive use within Basin 63.
- (3) The point of diversion proposed by application 63-31178 is on the boundary of the Treasure Valley Hydrologic Project (TVHP) area. The TVHP might not provide meaningful information relative to the groundwater resource at this boundary location.
- (4) There are no reported problems with water-level decline in the aquifers proposed for appropriation. Thus, the groundwater supply is sufficient for the proposed purposes.
- (5) The well sites are not located in areas where depletions to surface water sources are likely to injure senior Boise River water rights.

Supporting information related to the five points described above follows.

Groundwater Flow Direction. As shown on Figures 2 and 3, the proposed well sites are located near the crest of a groundwater "mound" between the Boise, Snake, and Payette Rivers.

- Figure 2 is a water table contour map from USGS Hydrologic Atlas HA-703. Interpretation of the contours suggests that flow direction at the point of diversion for 63-31177 is probably west or northwest toward the Snake River, or north toward the Payette River. Flow direction at the point of diversion for 63-31178 is north, toward the Payette River.
- Figure 3 is a computer generated water table contour map obtained from IDWR staff. This map suggests that groundwater flow directions are north (toward the Payette River) at the diversion points for 63-31177 and 63-31178.

Neither map suggests a southerly flow component toward the Boise River from the proposed diversion points.

Consumptive Use. The approximately 100 acres that are proposed for primary irrigation by application 63-31177 have been irrigated since 1989 or earlier. The source of irrigation water was the BCID. Therefore, the consumptive use proposed by application 63-31177 replaces consumptive use of surface water that has been ongoing since prior to the start of both the original Basin 63 moratorium and the more recent Basin 63 administrative hold.

MICROFILMED

SEP 23 2002

The approximately 96 acres of land with BCID water rights generally do not require significant supplementation from groundwater. BCID water supplies are relatively dependable and are typically deliverable throughout most of the irrigation season. As a result, the annual diversion volume for supplemental irrigation (and associated consumptive use of the supplemental irrigation volume) on the approximately 96 acres with BCID water will be a small percentage of the annual irrigation requirement for the 96 acres.

The irrigation proposed by application 63-31178 will occur on (1) 40 acres of new land, (2) approximately 18 acres irrigated with BCID water, and (3) approximately 63 acres that have been irrigated from groundwater since the 1980s due to expansion under water right 63-10785.

- The increase in consumptive use associated with the 40 new acres will be approximately 100 acre feet per year (40 acres x 2.5 af/ac). The applicants are willing to eliminate these 40 acres from the application if the Department is concerned about the increase in consumptive use associated with new lands.
- There will be only a slight increase in consumptive use for supplemental irrigation of 18 acres irrigated with water from BCID.
- There should be no change in consumptive use associated with the 63 acres currently irrigated with groundwater through expansion of 63-10785.

Thus, although 63-31177 and 63-31178 propose irrigation of 196 acres and 121 acres, respectively, the net increase in consumptive use within Basin 63 associated with the proposed water rights will be relatively small.

Treasure Valley Hydrologic Project Boundary. As shown on Figure 4, the well site proposed for 63-31178 is located on the Treasure Valley Hydrologic Project boundary. Therefore, the TVHP might not be useful in determining the impact of a new groundwater appropriation at that location on the water resources within the Boise River Basin.

Sufficiency of Water Supply. I am not aware of any long-term groundwater-level declines in the project area.

The closest USGS-monitored observation well with a long-term record (7N3W34ABD) is located about four miles northeast of the proposed well site. There has been no significant water level decline at that well site since monitoring began in 1968. Although well 7N3W34ABD is too far away to provide significant data for the proposed well site, the lack of nearby USGS monitoring wells might be an indication that significant water-level decline problems have not occurred in the project vicinity.

The TVHP has been monitoring wells in the area. Their monitoring does not indicate any problems with water-level decline. Data are provided as Attachment 1.

Impact on Boise River Water Rights. As discussed previously, groundwater flow directions at the proposed points of diversion are toward the Snake and Payette Rivers. Therefore, the potential for pumping under the proposed water rights to deplete flows in the Boise River is low.

MICROFILMED

SEP 23 2002

However, even if there were some depletion, is unlikely that senior Boise River water rights would be injured for two reasons.

- First, the effected river reach would probably be below Notus Bridge. The Boise River Watermaster's Annual Report (1993 edition) states, "This section of the river is operated without any regulation what so ever, but it is measured and recorded the same as Section 1 [above Star] and 2 [Star to Notus]. The return flow to Section 3 [below Notus] was sufficient to take care of all rights in this section during most of the season, and therefore no regulations were required. In fact, during all the years on record on the distribution of the water of the Boise River, beginning with 1914, there has been only one year -1931- during which it was necessary to regulate diversion from this section of the river, and during that year it was not necessary to run water past the Notus Bridge to supply the rights below."
- Second, Sand Hollow Creek is the surface water drain in the vicinity of the proposed water right applications. Sand Hollow Creek flows into the Snake River, below the mouth of the Boise River. Any depletion to Sand Hollow Creek would be unlikely to significantly effect flow in the Boise River.

Based on the information discussed above, I believe that there is sufficient reason to determine that water right applications 63-31177 and 63-31178 should be exempt from the administrative hold on processing of new groundwater applications in the Boise River Basin.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan, P.E., P.G.

Hello, Terry. Here are some hydrographs for wells nearest the sections you requested.

I have also attached an image of all the wells in our database in T6N R3W and 4W. If you would like hydrographs for any other wells, just let us know and we can provide them to you.

Helen Harrington
327-7950

Subject: Hydrograph Request

Could you send me one or more hydrographs for any observation wells nearest to the following locations T6N, R4W, Section 24 and T6N, R3W, Section 20? I

am trying to determine if there is any evidence of significant groundwater declines in that area. Thanks in advance.

Terry Scanlan

Re: Application for Permit Nos. 63-31177 and 63-31178 to Appropriate Ground Water

Dear Mr. & Ms. Frisby:

You filed two applications to appropriate ground water for irrigation purposes with the Idaho Department of Water Resources (IDWR). IDWR understands that you filed the applications to irrigate lands that have been irrigated in the past with surface water delivered by Black Canyon Irrigation District. IDWR also understands that you may not be able to irrigate these lands with surface water in the future, and that you are seeking an alternate supply of irrigation water.

I had hoped initially that when these applications were filed, I could promote the review and approval of these applications. It now appears, because of drought conditions and because of the ongoing suspension of processing of water rights in the Boise River Basin, that IDWR will not approve your applications without the submittal of a plan proposing mitigation for your ground water withdrawal. This office would be happy to visit with you about possible mitigation plans. A typical mitigation plan contributes surface water to the Boise River as compensation for your ground water withdrawal.

Should you have any questions regarding this letter, please Dan Nelson or Lori Graves of this office.

Sincerely,

Gary Spackman

REQUEST TO PROCESS

COMPLETE REQUEST IF YOU WANT YOUR APPLICATION TO BE PROCESSED USING ONE OF THE
THREE ALTERNATIVES BELOW

Name of Applicant

ROD + MAUREEN FRISBY

Mailing Address

6208 S East 8th Ave
Caldwell ID 83605

Application No.
(if known)

 IN LOCAL PUBLIC INTEREST

Yes, I want my application processed and before it is advertised, I will amend my application to demonstrate that the proposed appropriation is in the local public interest including the need to preserve flows in the Snake River during the migration periods of anadromous fish.

 PROPOSE MITIGATION NOW

Yes, I want my application processed and before it is advertised, I will amend my application to include proposed mitigation to offset anticipated depletions in the Snake River during periods of anadromous fish migration.

 / WILL AGREE TO MITIGATION IN THE FUTURE IF NECESSARY

Yes, I want my application processed at this time, and I will accept a condition of approval that will require mitigation should the Director of the Idaho Department of Water Resources determine that mitigation is necessary to offset depletions from this appropriation to flows in the Snake River during periods of anadromous fish migration. I understand that mitigation is not required now but may be needed in the future. I also understand that the Director will not require mitigation until I have an opportunity to review the process by which the need for mitigation is established and the amount of water required is quantified.
