IRRIGATION DISTRICT)

ORDER

WHEREAS, on February 21, 1984, Reynolds Irrigation District filed an Application for Transfer with the Department of Water Resources to add a point of injection into the Snake River and to add a point of redirection from the Snake River to the above referenced water rights; and,

WHEREAS, the summation of the diversion rates of these three water rights, is 57.56 cubic feet per second; and,

WHEREAS, water diverted under the three water rights has, since their development, been carried across the Snake River by a common pipeline; and,

WHEREAS, the capacity of that pipeline was measured by the Department to be 31.28 cubic feet per second on August 3, 1982; and,

WHEREAS, the total actual development of these three water rights is limited to the capacity of the pipeline; and,

WHEREAS, the transfer will meet the requirements of Section 42-222, Idaho Code if the redirection rate is limited to the pipeline capacity;

IT IS, THEREFORE, HEREBY ORDERED, that the application for transfer of water right numbers 63-0306, 63-0359 and 63-2420 is APPROVED subject to the following conditions:

1. The rate of redirection shall not at any time exceed the rate of injection.

2. The rate of redirection shall be limited to a maximum of 31.28 cubic feet per second.

3. Measuring devices of a type approved by the Department shall be installed and maintained at the points of diversion, injection and redirection. These measuring devices

shall be accessible and subject to control by to the Department,
the Watermaster of Water District No. 63T, and the Watermaster of
Water District 02 at such time as such District may be formed.

C. DESCRIPTION OF RIGHT OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. General Information

- a. Amount of water to be diverted 57.56 c.f.s. &/or _____ acre feet

Description of diverting works:

Headgates and ditches will still divert and carry well, drain ditch and Warm Springs Creek water, but will dump this water into the Snake River on the Canyon County side. The District will then use it's Snake River pumping plant located on the Owyhee County side to divert a like amount of water into it's irrigation system.

Describe the reasons for the proposed changes:

By dumping water and pumping, the District will eliminate a pipeline across the Snake River and thus reduce maintenance costs. The pipeline has a capacity of approximately 34 cfs; the Snake River pumping plant will also pump only the 34 cfs that could be delivered by the pipeline.

c/o Sam Pitman, Director
Star Rt.
Melba, ID 83641

Dear Mr. Pitman:

This correspondence is in reference to an application for transfer of water rights 63-0306, 63-0359, and 63-2420 filed by Reynolds Irrigation District.

The Department is prepared to approve the said transfer application with a limit of 31.28 cfs based upon a measurement of water flow made by the Department on August 3, 1982.

This measurement confirms the statement made on the transfer application that the water flow is restricted by the pipeline to about 34 cfs. The effect of this transfer is to reduce the 57.56 cfs, which is the total of the three above described rights, to 31.28 cfs.

If you do not concur with this, please let us know on or before June 15, 1984.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor

Q Measured vs. Q Recommended on Transfer Application No. 3027

The difference between the Q measured (see measurement made 8/3/82) of 31.28 cfs and the Q determined by computer calculations (see printout in file) of 31.31 cfs is due to rounding of digits recorded to 3 places right of the decimal point.

The computer program calculates velocity to 0.000 accuracy, however, data input is only to 0.00 accuracy, therefore, the rounding to 0.00 accuracy from information calculated to 0.000 is going to be artificially high.

The amount obtained from actual measurements are more accurate than the computer generated amount, therefore, 31.28 cfs should be used.

The $Q = 30.42$ cfs is probably correct. By deducting the corner areas on each side of both ditches (see copy of back side of measurement notes) I can approach this Q from 31.28. At this time, I cannot duplicate exactly my methods, however. Due to the more precise methods of METER (computer) calculations, I suggest⁺ you use 31.33 cfs.

I am concerned that we are proposing to limit the water rights on this transfer from 57.56 cfs to 31.28 cfs based on a one-time measurement made in August, without any indication that the applicant is in accord.

Let's send a letter to the applicant advising of our proposal and allowing ample opportunity for response, considering the Board may meet only once per month.

Also, what is the relationship on Don's field exam between the (over)

31.28 cfs on the measurement notes, 31.33 cfs on the computer printout (probably rounding error?), and 30.42 cfs found as total Q measured ? (We need to know prior to writing the letter)

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

No. 63-0306
63-0359
63-2420

Notice is hereby given that the Reynolds Irrigation District of Star Rt. Melba, ID 83641 has applied to the Department of Water Resources for a change of the point of diversion and to add a point of injection to and rediversion from the Snake River of the water of Warm Springs Creek and wells and drain ditches. The right sought to be changed is evidenced by Decree numbers 63-0306 and 63-0359 and Licensed Water Right 63-2420 and is recorded as follows: Amount: 63-0306 8 cfs, 63-0359 26 cfs, 63-2420 23.56 cfs Priority: 63-0306 4/1/1934, 63-0359 4/1/1950, 63-2420 3/8/1929 Point(s) of Diversion: NWNW and SWNW Sec 10 T1S R2W. The water is used for Irrigation, Domestic and Stockwater purposes from 4/1/ to 11/1 upon lands within the Reynolds Irrigation District boundaries.

TO BE CHANGED AS FOLLOWS

Amount: 57.56 cfs

Point(s) of Diversion: NWNW Sec 10; SWSE, SESE Sec 3; SWNE, NENE Sec 9 T1S R2W and the point of injection to the Snake River is Lot 4 (NENW) Sec 17 T1S R2W and the point of rediversion from the Snake River is Lot 5 (NENW) Sec 17 T1S R2W. The water will be used for Irrigation, Domestic and Stockwater purposes from 4/1 to 11/1 upon lands within the Reynolds Irrigation District boundaries.

Any protest against approval of the proposed change of water right application must be filed with the Department of Water Resources, Statehouse, Boise, ID 83720 on or before April 2, 1984
