Ans. Works consist of concrete diversion works located at above pt. of diversion (SW corner). This is 2' bottom, 3' high and is a double diversion with spillway. This falls out into a gravity ditch and extends through the SE 1/4 SW 1/4, Sec. 23, and enters approx. NE corner of SE 1/4 SW 1/4, Sec. 23. This ditch is some 3/4 mile long and has a carrying capacity of 200". The distribution on the 80 acres is by gravity laterals and I use 60" of water through this ditch.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is for irrigation of E 1/4 SW 1/4, Sec. 23, T 1 S - R 2 W., B.M. 30 acres are irrigated in SE 1/4 SW 1/4 and 30 acres in NE 1/4 SW 1/4. I have spent \$1,500 on this development. There is no natural meadow here and all of this development and the cultivation I have made here is the result of this water used for irrigation.

See G-24032 for assignment.
Deposition of holder should be made by her
and no one else except
her attorney.

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. irrigation only.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. I require at least 1" to the acre on this land. As a matter of fact, some years we could use a little more and my ditching facilities are available to carry it.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am not the person who took this out. Elizabeth McDonough actually applied for the permit and I purchased the land with all the water rights and have furnished a deed to the Dept. of Reclamation.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. I made these works immediately after the permit was taken up in 1955 and have used it every year and raised a crop ever since that time.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. This is the only water appurtenant to this 80 and 60 acres are tilled.

Dear Sir:-

Under the terms of your permit No. 25801 you are required to complete you diversion works on or before July 18, 1958. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
