REMARKS:

The original water rights of the Caldwell Irrigation District, being 20 second feet, arose by virtue of a filing on Indian Creek under Permit No. 5515, dated October 15, 1909, and licensed under said permit October 14, 1919. On March 22, 1918, the Caldwell Irrigation District entered into a written agreement with the Pioneer Irrigation District whereby the Caldwell Irrigation District exchanged said water from its filing on Indian Creek for 20 second feet of Mason Creek drain ditch water being diverted by the Pioneer Irrigation District under Permit No. 11897, dated October 8, 1915. The lands of the Caldwell Irrigation District lie within or immediately adjacent to the boundaries of the City of Caldwell and since the original filing hereinabove mentioned have been subdivided into many city lots and small tracts due to the growth in population of that area of the District. By reason of the subdivision of these lands and the growth of population, the original source of water supply under the existing permit of the District became grossly inadequate for the needs of the water users of the District, and the need for a supplemental water supply became imperative. When the State of Idaho began the reconstruction of Highway No. 20 through the District during the summer of 1954, it cut off that portion of the lateral system which formerly irrigated that portion of the District's lands designated hereinabove, and the above mentioned wells were constructed for the purpose of irrigating said lands so cut off by said highway. That by reason of the subdivision of said lands, as aforesaid, the duty of water for the lands of the Caldwell Irrigation District has greatly increased and the use of the wells constructed for the irrigation of said lands in lieu of water furnished under the filings hereinabove mentioned, is essential and necessary for the proper irrigation of said lands, and the water now being diverted under said filings, hereinabove mentioned, since the construction of said wells under said permit and agreement are now being used on the balance of the lands of said Caldwell Irrigation District and the full amount thereof, 20 second feet, is both reasonable and necessary for the proper irrigation of the balance of the lands of the District other than those hereinabove particularly described.

Gentlemen:

This is to notify you that the Caldwell Irrigation District due to Interstate Hiway location by the Department of Hiways, State of Idaho have had to relocate and redrill a new well located approximately 300 feet West of our old existing well in the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 26-4-3, Canyon County, Idaho.

Log of this well is being sent to you by the E. and M. Equipment Company, Caldwell, Idaho. As soon as adequate discharge tables are available, we will notify you.

Is there anything further the District should due in order that our old filing is applicable to this new well. Our existing Permit No. is G 25035 - priority of July, 1954.

Gentlemen:

We have received a log on a well drilled for you in the NW¼NE¼, Sec. 26, T. 4 N., R. 3 W., B.M. The test shows that the well is capable of supplying 780 gallons per minute.

Is this a replacement for your well licensed for 1.9 c.f.s. under Permit No. G-25035, or is it for the purpose of developing additional water? If it is a new well for the later purpose it will be necessary for you to file another application for permit. Idaho Code, 42-229, as amended by the 1963 Session of the Legislature, provides that a permit to divert subterranean water must be obtained from this office in all cases except where less than 13,000 gallons per day will be diverted for domestic purposes.

Idaho Code, 42-237a, provides that the State Reclamation Engineer may commence action to enjoin the illegal opening or excavation of wells, or withdrawal or use of water therefrom.

Form 3, Application for Permit to Appropriate Subterranean Water, and Instructions are enclosed. May we hear from you?

RE: Permit No. G-25035

Messrs. Dunlap & Dunlap
914 Main Street
Caldwell, Idaho

ATTENTION: Mr. Robert B. Dunlap

Dear Mr. Dunlap:

We have your letter of August 27th enclosing depositions of Fred W. Specht and two witnesses, also affidavit of publication in the Caldwell News-Tribune all in proof of Completion of Works and Beneficial Use on Permit No. G-25035, of the Caldwell Irrigation District.

Before final action is taken the law requires that a field examination be made by an engineer from this Department.

We cannot say just when this examination will be made, but our field engineer will contact Mr. Specht or some other representative of the district at the time he makes the examination in order that arrangements may be made to show him over the ground.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

ATTENTION: Mr. Robert B. Dunlap

Dear Mr. Dunlap:

We enclose Permit No. G-25035 of the Caldwell Irrigation District together with departmental receipt No. G-655 for the \$5.50 filing fee.

You will note that we have made one change in the land description, which the application described as 150 acres in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 26, Township 4 North, Range 3 West B.M.

Obviously, the SW $\frac{1}{4}$ NE $\frac{1}{4}$ could not contain 150 acres but the sketch maps seem to indicate that the whole NE $\frac{1}{4}$ was included except the 10 acres in the SW $\frac{1}{4}$ NE $\frac{1}{4}$.

If this is not correct, please advise and we shall amend our records accordingly.

You will note that although the application stated that the works were completed, we have allowed the statutory minimum of two years within which to make the proof of completion of works and beneficial use required to complete the water right. However, these proofs can be made at any earlier date and we shall be glad to send the necessary forms and instructions, upon request.
