Dear Mr. Johnson:

This acknowledges the depositions of Holder and two Witnesses and the Affidavit of Publication in The Idaho Free Press in proof of completion of works and beneficial use under Permit No. G-24237.

Before license is issued, the law requires that a field examination be made by an engineer from this department. At this time we cannot say just when this will be made but our field engineer will contact you prior to the time he is to make the inspection so that you can arrange to accompany him.

We enclose Application for Amendment to Permit No. G-24237 as approved by the State Reclamation Engineer and recorded in the Department of Reclamation in Book 86 of Permits at Page 24237 amending the list of land as described on record to read: "SE¹/₄NE¹/₄(12a), SE¹/₄NE¹/₄(14a), NE¹/₄NE¹/₄(20a), NE¹/₄NE¹/₄(15a), making a total of 87 acres." Mr. Sumner M. Johnson, P. E.
City Engineer,
No. 1022 12th Avenue South,
Nampa, Idaho

Dear Mr. Johnson:

We acknowledge receipt of your letter of September 16th, enclosing depositions of yourself and two witnesses, also affidavit of publication in the Idaho Free Press, all submitted in proof of completion of works and beneficial use under Permit No. G-24237 in the name of the City of Nampa.

We do not quite understand the land description in these depositions. The permit, as well as the published notice, only describe land in the NE $\frac{1}{4}$ Section 21, Twp. 3 North, Range 2 West, B.M.; but the depositions also include "NW $\frac{1}{4}$ Section 21, and 15 acres in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 21".

If other land has been irrigated in addition to the land described in the permit, in the NE $\frac{1}{4}$ of the section, it will be necessary to apply for an amendment to the land list. We enclose a form of application for such amendment herewith.

This should be executed and returned promptly to this department for approval and record.

Dear Sir:

The date for proofs of completion of works and application of water to beneficial use, as set out under the terms of Permit No. G-24237 are due not later than June 27, 1958.

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list which has been recorded in this department. If changes have been made on no amendments are on record, we advise that you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the above mentioned date, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point or points of diversion; and the location of use or the lands which are irrigated--all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with Form 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.
