8. What large stream would the water here appropriated finally reach? _____

Remarks: This water is a primary supply. Crops are hay and pasture.

This system was bought second hand and there is more pipe and sprinklers than necessary.

Open air delivery was measured with a bucket and stop watch at 150 gpm. It is probable that the water supply is low at this time of year and also that the pump is worn. This pump and motor has capacity far beyond that called for in these two permits. See permit 22074.
