INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Ida A. Marx, being duly sworn,
deposes and says: That she is the Principle Clerk of The Idaho
Daily Statesman, a daily newspaper printed and published at
Boise, Ada County, State of Idaho, and having a general circula-
tion therein and which said newspaper has been continuously and
uninterruptedly published in said County during a period of
twelve consecutive months prior to the first publication of the
notice, a copy of which is attached hereto; that said notice was
published in the regular Monday edition of The Idaho Daily
Statesman in conformity with Sec. ⁶⁰~~53~~-108, Idaho Code Annotated

as amended, for Four consecutive weekly

insertions beginning with the issue of October 15,

1951, and ending with the issue of November 5

1951. Ida A. Marx

Subscribed and sworn to before me this 5 day of

November, 1951.

Ruth Yarnall
Notary Public for Idaho, Residing at Boise, Idaho.

**NOTICE OF PROOF APPLICATION
OF WATER TO BENEFICIAL USE**

Notice is hereby given that at 11
A.M. on the 7th day of November,
1951, at Boise City, County of Ada,
State of Idaho, before Fred R. Bagley,
Notary Public, proof will be submitted
of the application to beneficial use of
1.04 cubic feet per second of the
waters of subterranean flow from a
well in accordance with the terms and
conditions of Permit No. 21312 here-
tofore issued by the Department of
Reclamation of the State of Idaho.

The name and postoffice address of
the person or corporation holding said
permit are Boise City, a Municipal
Corporation % Boise City Department
of Public Works, City Hall.

The use to which said water has
been applied is Irrigation.

The amount applied to beneficial use
is 1.04 cubic feet per second.

The place where said water is used
90 acres in the NE $\frac{1}{4}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$,
NW $\frac{1}{4}$ SE $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$, and SE $\frac{1}{4}$ SE $\frac{1}{4}$
Section 10 Township 3 North, Range 2
East, B. M.

The name of the canal or ditch or
other works by which said water is
conducted to such place of use is
Private pipe line.

The right to take water from such
works is based upon Permit No. 21312.

The source of supply from which
such water is diverted is subterranean
waters from a well in the NW $\frac{1}{4}$ SE $\frac{1}{4}$
Section 10, Twp. 3 N., Range 2 E.,
B.M.

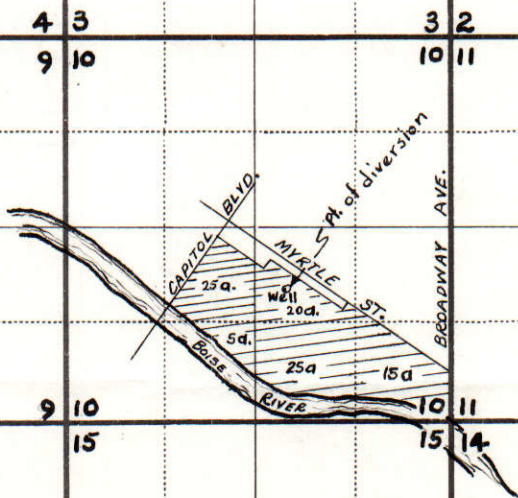

The date of priority which said
user is prepared to establish is De-
cember 17, 1949.

MARK R. KULP,

State Reclamation Engineer

License and Certificate of Water Right

Water License No. 21312 Amount 1.04 second feet
Water District No. Priority December 17, 1949

THIS IS TO CERTIFY that BOISE CITY, A Municipal Corporation
of Boise, Idaho, made application for a permit to appropriate the
public waters of the State of Idaho, dated December 17, 19 49 ; that Permit No. 21312
was issued under said application; that Certificate of Completion of works, with a carrying capacity of
1.04 second feet, was issued thereunder on January 17, 19 51, showing that said works
were completed on the 16th day of January, 19 51 ; and that on the 7th
day of November, 1951 ,
BOISE CITY, A Municipal Corporation,
of Boise, State of Idaho, made proof to the satisfaction of the
State Reclamation Engineer of Idaho, of the right to use the waters of a well
, ~~attributed~~ (subterranean flow) , for the purpose of irrigation of Julia
Davis Park, under Use Permit No. 21312 of the Department of Reclamation
and that said right to the use of said waters has been perfected in accordance with the laws of Idaho,
and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume
8 of Licenses at page 4895, on the 20th day of March, 19 52 ;
The right hereby confirmed dates from December 17, 19 49;
The Point of Diversion is located
in the NW 1/4 SE 1/4, Sec. 10, Tp. 3 N., R. 2 E., B. M. Ada County
That the amount of water to which such right is entitled and hereby confirmed, for the purposes
aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall
not exceed 1.04 cubic feet per second.

Description and location of use:

Twp.	Range	Sec.	Forty-acre Tract	No. Acres Described in Permit	No. Acres Actually Irrigated

APPLICATION FOR PERMIT

To Appropriate the Public Waters of the State of Idaho

63-2792

Boise City Dept. of Public Works
City Hall, Boise, Idaho

APPLICATION No. 28999

PERMIT No. 21212

DISTRICT No.

1. Name of Applicant: Boise City, A municipal corporation

Postoffice address: City Hall, Boise

County: Ada

State: Idaho

I. If applicant is a corporation, give:

(a) Date and place of incorporation: January 11, 1866- State Legislature

(b) Amount of capital stock:

(c) Amount paid in:

(d) Names and addresses of directors: Potter P. Howard, Mayor; Councilmen- O. J. Grim, Theo. Hardy, Carl R. Burt, Norton F. Graham

II. The financial resources of the applicant are:

(a) Cash on hand:

(b) Treasury stock:

(c) Bonds to be issued:

(d) Other resources:

2. Quantity of water claimed: 1.04

cubic feet per second.

3. Source of water supply: Subterranean sources tapped by well which is a tributary of

4. Location of point of diversion: 2070 feet distant from the center

corner of Section 10, T. 3 N., R. 2 E., B.M., and is in the NW $\frac{1}{4}$ SE $\frac{1}{4}$

of Section 10, T. 3 N., R. 2 E., B.M., County of Ada

5. Water is to be used for Irrigation and to supplement water in an artificial lake

6. If for mining, milling, power or manufacturing purposes, give:

(a) Point of use of water: feet distant from corner of Section

T., R., B.M., in the of Section, T., R., B.M.

(b) Amount of power generated: H.P., under feet head.

(c) Water is to be returned to at a point feet

distant from the corner of Section, T., R., B.M., in the of Section, T., R., B.M.

7. Estimated cost of works: \$ 730.10

8. Kind of works; Well, equipped with electric pump- ditches

9. Height of dam feet; length of dam at top feet; length of dam at bottom

feet; material used in dam:

10. Size of headgate: Width feet; height feet.

11. Ditch: Width at bottom feet; width at water line feet; depth of water feet;

dimensions of flume:

Diameter of pipe inches; length of conduit miles.

Average grade per mile feet.

12. The time required for the completion of such work is less than one years.

13. The time required for the complete application of the water to the proposed use is less than one additional years.

14. The land to be irrigated is described in the following tabulation: See remarks.

15. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: 75" from Boise City Canal Co.

16. (a) Is reservoir to be used? No If so, fill in (b) and (c) below:
 (b) Name of Reservoir and number of Storage Permit:
 (c) Date of filing of Application for Storage Permit and Name of Applicant:

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public water of the State of Idaho as herein set forth.

BOISE CITY

Applicant.

TRANSFER NO. 5009
WATER RIGHT NO(S). 63-02792/63-07034/A63-30418

CONDITIONS OF APPROVAL AND REMARKS

1. Approval of this transfer in no way confirms the right(s) claimed.
2. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
3. This right when combined with all other rights shall provide no more than 4.5 afa per acre for the lands above.
4. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
5. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
6. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
- *8. The total instantaneous diversion of water from all points of diversion under Transfer No. 5009 shall not exceed 4.63 cfs, nor total combined annual volume of 619.5 af.
9. Diversion of water from the wells authorized by this water right is subject to delivery of water by the water master of State Water District No. 63; Boise River, pursuant to IDWR's conjunctive management rules.
10. Right Nos. 63-02792, 63-07034 and SRBA Claim No. A63-30418 when combined shall not exceed a total annual diversion volume of 373.5 af for the irrigation of a total of 83.0 acres.
11. Two (2) points of diversion are located within NWSE and three (3) points of diversion are located within SESE, S10, T03N, R02E.
12. Place of use is Julia Davis Park.

Dated this 12th day of June, 1997.

PART 1

6. General Information:

a. Description of diversion system 5 wells (4 existing), submersible pumps, pipelines, and underground sprinklers. See remarks for additional details.

b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes X No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
No affect. The change in place of use provides a more accurate description of the existing place of use.

d. Remarks:
attached

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. _____

And said application is hereby _____, subject to the following limitations and conditions:

Witness my hand this _____ day of _____, 19 _____.

TRANSFER REMARKS

Summary

This transfer proposes to consolidate and clarify the groundwater rights used at Julia Davis Park for irrigation. Two groundwater licenses and one groundwater beneficial use claim are appurtenant to the property for irrigation use.

The water right transfer includes all three of these groundwater rights. The transfer application proposes to combine the diversion points of the three rights, including the addition of two new diversion points, and redescribe the place of use for all three rights to better reflect the actual historical irrigated park and municipal use (i.e., zoo) areas.

Combining the diversion points reflects the commingled irrigation system. The two new diversion points are East End Wells 2 and 3. The irrigated area for the three rights is changed to better describe the actual irrigated park area. No change in consumptive use will occur as a result of these transfers because the irrigated area at the park will not increase.

The municipal use area described in the transfer includes two 40-acre tracts (NWSE and SWSE Section 10) rather than a single 40-acre tract (NWSW Section 10) described in the license. This change is a clarification of the historical place of use, since the Boise Zoo has occupied lands located in the NWSE and SWSE of Section 10 since before the priority date of the license.

Details of the transfer and the use of the rights are provided in the following sections.

Description of the Water Rights

The three groundwater rights are described below.

63-02792. License 63-02792 has a priority date of December 17, 1949. The license allows irrigation diversion at a rate of 1.04 cfs over 90 acres. The point of diversion is the Julia Davis Yard Well in the NESE of Section 10.

63-07034. License 63-07034 has a priority date of December 13, 1967, and allows diversion of 1.25 cfs (and 373.5 acre feet per annum) for irrigation, and 0.34 cfs (and 246 acre feet per annum) for municipal. The irrigation use is for 83 acres within the park. The municipal use is for the Boise City Zoo.

A63-30418. Claim A63-30418 has a priority date of January 23, 1951 and a diversion rate of 2.00 cfs. The point of diversion is Julia Davis East End Well No. 1. This well is also the point of diversion from license 63-02843. Documents in the IDWR water right file for license 63-02843 state that the well was originally used for both recreation and irrigation, but was licensed only for recreation use. However, it appears that well has been used primarily for irrigation since the late 1950s. Therefore,

ENCLOSURE
JUN 25 1997

beneficial use claim A63-~~30418~~ has been submitted to recognize the historical use of the well for park irrigation, in addition to the recreation use authorized by license 63-02843.

The three groundwater rights have been used to irrigate the park for nearly 30 years. In combination, the rights have historically supplied 4.29 cfs for irrigation of the approximately 90 acre park. The 4.29 cfs maximum diversion rate provides between 2 and 3 miners inches per acre. This high diversion rate allows the City to irrigate primarily at night, and thereby allow recreation use during the day.

Descriptions of the Park Wells

The five points of diversion proposed under the transfer are described below. Four of the diversion points are existing wells. The fifth diversion point is a proposed well.

Yard Well. Documents in the IDWR water right file indicate that the original Yard Well was 60 feet deep. The well was replaced in 1978 with a new well drilled to a total depth of 325 feet. The new well taps aquifers between 235 and 317 feet depth. The well is equipped with a 40 hp submersible pump.

Zoo Well. The Zoo Well was drilled to a total depth of 155 feet, but did not encounter water producing zones below about 65 feet. It is completed with well screen from 50 to 64 feet. The well is equipped with two pumps. The larger pump (50 hp) is used for park irrigation. The smaller pump (10 hp) is used for animal water, cage cleaning, and other municipal uses at the Boise Zoo.

East End Wells. The East End Well No. 1 was originally 250 feet deep, but was reconstructed in 1985 to tap only the shallow aquifer zones above 60 feet. Reconstruction consisted of backfilling the 20-inch casing to about 90 feet, and installing a gravel packed 12-inch casing and screen inside the 20-inch casing. Yield from the recompleated East End Well No. 1 declined significantly by late 1995, requiring drilling of a new well in early 1996. Current yield is approximately 250 gpm, rather than the original yield of 900 gpm. Prior to 1996, the well was equipped with a 75 hp turbine pump. The well is currently equipped with derated 60 hp submersible pump. A 20 hp pump is proposed following the transfer.

East End Well No. 2 was completed to a total depth of 64 feet in April 1996. It was drilled as a replacement well for East End Well No. 1 under drilling permit 63-96-W-0943-200. The well is located about 125 feet west of East End Well No. 1. Testing of East End Well No. 2 found a recommended sustainable yield of less than 300 gpm, rather than the target yield of 600 to 900 gpm. As a result, a third East End Well was recommended. East End Well No. 2 is not currently equipped with a pump, but will be equipped with a 25 hp pump following approval of the transfer.

MICROFILMED

JUN 25 1997

East End Well No. 3 is proposed for a location approximately 200 feet west of East End Well No. 2. Target yield is approximately 350 gpm. If a higher yield can be obtained, East End Well No. 1 might be abandoned.

History of Water Use at the Park

Prior to about 1947, irrigation water for Julia Davis Park was obtained from the Boise City Canal. In about 1947, the first well (Yard Well) was drilled at the park. This well provided supplemental irrigation under water right 63-02792. A second well (East End Well) was drilled in about 1951 for recreation purposes. The East End Well provided water for irrigation and for keeping the pond full.

The park was flood irrigated until the mid 1950s. Between about 1950 and 1962, the park gradually changed from flood irrigation to sprinkler irrigation. During that time, less and less canal water was used, as the City began to rely on wells for irrigation. The conversion from flood to sprinkler included upgrading the East End Well pump from 25 hp to 75 hp in 1956 to provide pressure for sprinkling.

The well at the zoo was added into the system in about 1967 to provide additional irrigation water supply. The Zoo Well added redundancy and also allowed the City to irrigate the park in less hours per day.

Consumptive Use

Consumptive use at the park occurs from landscape and turf evapotranspiration, and from pond evaporation. Pond evaporation in the Boise area is typically about 36 inches per year. This evaporation rate is slightly more than the approximate consumptive use of turf grass (30 inches per year). Therefore, annual consumptive water use by the ponds is slightly greater than consumptive water use by grass. There are approximately 5 acres of ponds at Julia Davis Park.

No significant change in consumptive use has occurred at the park since the 1950's, and no changes are proposed as part of this water right transfer.

Hydrology

The groundwater supply for the Julia Davis Park wells is derived from the shallow alluvial aquifer found above 70 feet depth and from deeper confined aquifers between about 235 to 320. Historically, it appears that the shallow aquifer has provided most of the production to the park wells, as it was tapped by the original Yard Well, East End Well No. 1, and the Zoo Well. East End Well No. 1 was completed to a total depth of 250 feet (suggesting production from both shallow and deep aquifers), but actual production appears to have been primarily from the shallow aquifer above 60 feet. The new East End Well No. 2 (drilled in 1996) taps the shallow aquifer, and the proposed East End Well No. 3 also will be completed in the shallow aquifer. The replacement Yard Well (drilled in 1978) taps the deeper aquifer.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This permit is APPROVED

Date: / / 0

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

CONDITIONS OF APPROVAL:

1. This drilling permit is valid for two (2) months from the approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required prior to construction of this well. The local Health Department should be contacted for septic tank/drainfield locations. Domestic wells must not be drilled closer than 100' from any drainfield and 50' from any septic tank. Public Water Supply wells must not be drilled closer than 100' from any drainfield or septic tank.
3. The well shall be constructed by a driller currently licensed in the state of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If the bottom hole temperature of 85 Degrees F (29.44 oC) or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
8. Idaho Code, S 55-2201 - 55-2210 requires the applicant and/or his contractors to contact "Digline" (DigLine is a one-call center for utility notification) not less than 2 working days prior to the start of any excavation for this project. The "Dig Line " Number for your area is 1-800-342-1585.
9. This permit does not constitute an approval of the District Health department, the Idaho Department of Health and Welfare, other local, county, state or federal approvals which may be required prior to construction of this well.
10. The screened, perforated, filterpacked or otherwise open and commingled strata which are to be produced from, shall be of similiar hydraulic head, temperature and quality. If there are notable variations encountered as the well is drilled and/or developed, the Department will be notified for evaluation.
11. If an annular seal of bentonite is to be utilized, it shall be a high solids (>30) bentonite. The bentonite shall not contain chemical polymers which effect long term stability of the seal and are often found in drilling fluid grade bentonites, but rather will be specifically recommended by the manufacturer for use as a seal in the construction or abandonment of water wells.

(Continued)

MICRO-LINED

JUL 18 1987

CONDITIONS OF APPROVAL:

12. If a neat cement grout is to be utilized as a seal material, additives such as the following shall be used to reduce dehydration and shrinkage. Mix water quantity shall strictly follow manufacturer's specifications paying close attention to cement grind and water ratios, (generally between 5 and 6 gallons per sack) eliminating free water. Water quality of the mix water should meet drinking water standards.
13. The use of bentonite added to cement grout to reduce hydraulic conductivity shall not exceed 4% and shall be prehydrated prior to mixing with the neat cement. The bentonite shall not contain chemical polymers which effect long term stability, and are often found in drilling fluid grade bentonites, but will be specifically recommended by the manufacturer for use as a seal material.
14. A well drilled pursuant to this permit must be located at least 500 ft. from any existing well. Well spacing closer than 500 feet must be approved by the Department of Water Resources prior to the commencement of drilling.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is _____ Date _____

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. **READ CAREFULLY!**

GENERAL CONDITIONS:

1. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum of 50 feet and 100 feet respectively from a septic tank.
3. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.

RE: Water Right No. 63-02792/63-07034/A63-30418 (Transfer No. 5009)

Dear Water Right Holder(s):

Enclosed is a copy of your approved Transfer of Water Rights for the above referenced water rights (Transfer No. 5009). Please be sure to thoroughly read the Conditions and Remarks listed on the transfer. Also, please be advised that the accompanying transfer approval should be considered and treated as a **preliminary order** of the department issued pursuant to section 67-5243, Idaho Code. Enclosed are instructions for responding to **Preliminary Orders** if you are in disagreement with the approved transfer.

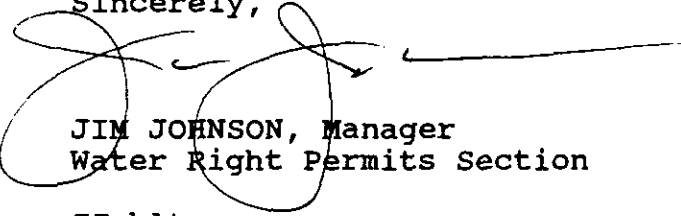

As of July 1, 1996, all water right owners are required to report any change in water right ownership and any change of mailing address to the department.

If you have acquired any other water right or have changed your mailing address **PRIOR TO** July 1, 1996, you have until July 30, 1998, to record the ownership and/or address change with the department.

If you acquired other water rights or changed your mailing address **AFTER** July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes in a timely manner could result in a \$100 late filing fee. You can contact any office of the department for more information. If you have any questions concerning your water right listed above you can contact me at (208) 327-7947.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

Secretary

RECORDED

JUN 25 1997

MEMORANDUM

TO: FILE NOS. 63-02792, 63-07034 & A63-30418

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER NO. 5009

DATE: June 4, 1997

=====

Transfer No. 5009 adds points of diversion and changes the place of use under Right Nos. 63-02792, 63-07034 & A63-30418. The transfer more accurately describes the existing use and the addition of 1 new well. These groundwater rights will be diverted from 5 wells and used to irrigate Julia Davis Park.

Concerns regarding the impact of pumping from a shallow wells that appear to be directly related to the Boise River were discussed by staff, the applicant and their attorney. A condition was agreed upon to address the matter, making the rights subject to the watermaster of Water District No. 63 according to conjunctive management rules.

Season of use and diversion volume were adjusted to current standards. Other recommended conditions include drilling permit requirements, irrigation overlap, non-confirmation of claim, multiple points of diversion/measuring devices, combined right limits and standard transfer conditions.

RE: Application for Transfer No. 5009 Proposing Transfer of Water Rights for Julia Davis Park

FROM: Gary Spackman *Gary*

DATE: May 12, 1997

Application for transfer no. 5009 was filed by Boise Parks and Recreation Dept., proposing to change the point of diversion for several water rights that irrigate Julia Davis Park. The application was filed after a previous aborted attempt that described the ground water rights associated with the park and most notably, a water right for a well located near the Boise River and Broadway Avenue, licensed as water right no. 63-02843 for recreation purposes. The new application for transfer does not refer to license no. 63-02843, but rather describes a beneficial use claim from the same point of diversion, numbered in the adjudication as claim no. A63-03418. The beneficial use claim alleges that the well has been used for irrigation prior to 1963.

Concern was raised by department staff in reviewing the first proposed application for transfer, and again when the second application for transfer was filed, that approval by IDWR would sanction the direct withdrawal of Boise River water from the shallow well located next to the river near Broadway Avenue (east end well no. 1), and from two other wells proposed at the same approximate location and depth (east end wells nos. 2 & 3). There was also some concern that other existing wells, the yard well and zoo well, may not be used if sufficient water could be produced from the three east end wells. Two letters were written to Paul Philbrook of Boise Parks and Recreation, expressing concern about impacts to the Boise River caused by pumping from shallow wells located next to the river. In the last letter dated April 17, 1997, I asked for the submittal of a mitigation plan for water withdrawn from the wells. In response to the letter, Josephine Beeman, the attorney representing the city of Boise, called and a meeting was held at the state office of IDWR on May 2, 1997.

The meeting was attended by Josephine Beeman, Terry Scanlan, an engineer and geologist for the city, Paul Philbrook, Norm Young, Phil Rassier and Gary Spackman.

RECORDED

JUN 25 1997

The parties all agreed that diversion from the east end wells will divert groundwater that is directly connected to the river. There was some discussion about how immediately the river would be affected, but Terry Scanlan acknowledged that the interaction from the river was very close.

Jo Beeman argued that the city had diverted and used water from the alluvial aquifer for the past 30 to 40 years, and that construction of additional wells and diversion of water from those wells would not increase the impact to the Boise River beyond present impact. The parties discussed IDWR's responsibility to protect prior water right holders when reviewing a new application for transfer. The city of Boise felt that it should not be singled out for mitigation or for regulation in conjunctive management when all other possible groundwater users who might also be negatively impacting the flows of the Boise River are not included

After a full discussion of the issues, the parties decided that the following condition should be placed on the water rights that are the subject of this application for transfer:

Diversion of water from the wells authorized by this water right will be subject to delivery of water by the water master of water district 63 pursuant to IDWR's conjunctive management rules.

Other conditions that should be included as part of the application for transfer approval are conditions relating to the drilling permit requirements.

Please type or print clearly

1. Name of Claimant (s) Boise Parks and Recreation Dept. Phone (208) 384-4240

Mailing Address 1104 Royal Boulevard, Boise, ID Zip 83706

2. Date of Priority (Only one (1) per claim) January 23, 1951

3. Source of water supply (a) groundwater
which is tributary to (b) NA

4. a. Location of existing point of diversion is: Township 3N Range 2E Section 10,
1/4 of SE 1/4 of SE 1/4, Govt. Lot, B.M., County of Ada

Additional points of diversion if any: _____

b. If instream flow, beginning point of claimed instream flow is:

Township _____ Range _____ Section _____, 1/4 of _____ 1/4 of _____ 1/4,

Govt. Lot _____ B.M., County of _____

ending point is: Township _____ Range _____ Section _____, 1/4 of _____ 1/4 of _____

1/4, Govt. Lot _____ B.M., County of _____

5. Description of existing diversion works (Dams, Reservoirs, Ditches, Wells, Pumps, Pipelines, Headgates, Etc),
including the dates of any changes or enlargements in use, the dimensions of the diversion works as constructed and as enlarged and the depth of each well. MICROFILMED
JUN 25 1997

The Julia Davis Park East End Well was drilled in 1951 to a total depth of 250 feet, and completed with 20-inch perforated casing to 100 feet and 8-inch perforated casing from 100 to 250 feet. The well was recompleted in 1985 because of sand pumping problems. Recompletion consisted of backfilling the well casing to about 93 feet, and installing 12-inch gravel packed well screen (20 to 50 feet) and casing inside the older 20-inch casing.

The well was initially equipped with a 25 hp vertical turbine pump for 2 cfs flood irrigation and recreation use. In 1956, the 25 hp pump was replaced with a 75 hp vertical turbine pump to provide 2 cfs of pressurized irrigation. The 75 hp pump was used until 1995 when it was replaced (due to well yield decline and sand pumping) with a 60 hp submersible pump. The 60 hp pump is currently in use but will probably be replaced in the future with two or three smaller pumps (in two or three wells) following approval of a transfer application to add new diversion points. Supporting documents are attached.

6. Water is claimed for the following purposes:

(both dates are inclusive) (cfs) (acre feet)

For irrigation purposes from 3-15 to 11-15 amount 2.00 or _____

For _____ purposes from _____ to _____ amount _____ or _____

For _____ purposes from _____ to _____ amount _____ or _____

For _____ purposes from _____ to _____ amount _____ or _____

7. Total quantity claimed (a) 2.00 (cfs) and/or (b) _____ (acre feet)

8. Total consumptive use claimed is _____ acre feet per annum.

9. Non-irrigation uses; describe fully (eg. Domestic: Give number of households served; Stockwater: Type and number of livestock Etc.) _____

10. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

Total number of acres irrigated 83

11. In which county (ies) are lands listed above as place of use located? Ada

12. Do you own the property listed above as place of use? Yes X No _____
If your answer is No, describe in Remarks below the authority you have to claim this water right.

13. Describe any other water rights used at the same place and for the same purposes as described above.
63-02792, 63-07034 or None ()

14. Remarks:

This claim clarifies the historical use of water from the Julia Davis Park East End Well. The well is licensed (63-02843) for recreation use, but has been used primarily for irrigation since the 1950s. License 63-02843 is still valid for recreation use in the pond at the park, but this claim supports the historical beneficial use of the well for irrigation. Both the license examination report and the Proof of Completion of Work (Affidavit of Holder) in the IDWR water right file for 63-02843 state that the water is used for both irrigation and recreation. Supporting documents are attached.

Re: Application for Transfer of Water Rights for Julia Davis Park

Dear Mr. Philbrook:

This letter is a follow-up to my letter dated April 2, 1997. I have reviewed the application for transfer filed by Boise Parks and Recreation Department. As I indicated in my letter of April 2, the application for transfer raises significant concerns about the effect of diversion from East well nos. 1, 2, and 3. Based on the information provided, diversion of water from these wells will impact flows of the Boise River to the detriment of other water users. As a result, this letter asks Boise Parks and Recreation Department to propose a plan to mitigate for declines in river flows that will be caused by withdrawals from East wells nos. 1, 2, and 3.

The most obvious mitigation probably would involve surface water rights that once irrigated Julia Davis Park. I understand water diverted and delivered pursuant to canal shares owned by the city now fills some of the ponds in Julia Davis Park. If the city can show that this water is being returned to the river, or is seeping back into the shallow groundwater table, surface water returns may provide sufficient mitigation for the groundwater withdrawal.

I want to work with you to find a way to continue to irrigate Julia Davis Park and also protect other water right holders as required by law.

Please call if you have any questions.

Sincerely,

Gary Spackman

Re: Request for Expedited Drilling Permit for Julia Davis Park Well

Dear Mr. Philbrook:

I have reviewed an application for transfer of water rights and a water right claim filed by Boise Parks and Recreation Department, proposing to add two new diversion points and correct a description of the place of use irrigated in Julia Davis Park. I have reviewed the application in light of the request for expedited approval of a drilling permit. I have also discussed the application for transfer and the application for drilling permit with Steve Lester of this office.

I believe the application for transfer raises significant issues that must yet be resolved prior to issuing a drilling permit. As a result, I will adhere to rule 7,1,4 of the Well Construction Standards of the Department of Water Resources which states that a drilling permit should not be issued until all related approvals have been obtained.

As I read the application for transfer, it seeks the sanction of the department for the use of groundwater that is derived directly from the Boise River. Wells 1, 2 and 3 identified by the application for transfer all seek diversion of very shallow groundwater for consumptive uses. Well no. 1 was licensed as a point of diversion for a recreational use. Pursuant to the documentation we received, however, the water has been used consumptively for irrigation purposes. The diversion of shallow groundwater probably has depleted river flows directly and almost immediately. Before a drilling permit can be issued, I believe the department must assess what it will require regarding mitigation for these consumptive withdrawals affecting the Boise River.

I am happy to visit with you further regarding this matter. Please call if you have questions.

Respectively,

Gary Spackman

Subject: Julia Davis Park Drilling Permit

Dear Steve:

This week was the deadline for protests for the transfer of water right #63-02843, for this park. I understand the next step in the process is that staff will make the decision to approve or not approve the transfer.

The purpose of my letter is to ask that you expedite the approval our drilling permit submitted on 6/10/96 prior to the transfer decision being made. I understand we would be liable if the driller started and the transfer was not approved, though I am confident the transfer will be approved. Our well driller is ready to move forward and start drilling the new well and I would like to take advantage of his open schedule, at this time, and have him drill the well as soon as possible.

Your sincere consideration of this matter would be appreciated. This would help secure the needed water for this park before the hot summer weather was upon us. Please call me if more information is needed.

Sincerely,

Paul Philbrook, Property Administrator
Boise Parks & Recreation Department

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is Approved

Date 12/20/95

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY!

GENERAL CONDITIONS:

1. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum of 50 feet and 100 feet respectively from a septic tank.
3. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.

A01, A02

SPECIFIC CONDITIONS:

8. Diversion of water from the shallow alluvium as contemplated under this replacement well will be subject to delivery of water rights by the watermaster of Water District 63 under conjunctive management provisions.
9. Pursuant to Section 42-238(4), Idaho Code. All repairs and/or abandonments must meet the requirements of the Department's Rules and Regulations for Well Construction Standards.
10. As this is a replacement well, the well being replaced shall be abandoned by a plan approved by the Dept. which meets State minimum construction standards 3,12,1.

NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO.

Notice is given that Boise Parks and Recreation Department, 1104 Royal Blvd, Boise ID 83706, has applied to the Department of Water Resources to change the place of use and add points of diversion to the following ground water rights pursuant to I.C. §42-222. These rights are diverted from 3 existing wells for irrigation and municipal uses, all in S½ S10, T3N R2E, Ada County.

Water Right No.	Priority	Basis	Amount
63-02792	12/17/1949	License	1.04 cfs
63-07034	12/13/1967	License	1.59 cfs
A63-30418	01/23/1951	Adjudication Claim	2.00 cfs

PROPOSED CHANGE

Two additional wells are proposed. Points of diversion and irrigated acreage will be consolidated for the above water rights in the legal description described above, also known as Julia Davis Park. No increase in irrigated acres is proposed.

Any protest against approval of the proposed changes must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise ID 83705, together with a protest fee of \$25.00, on or before March 10, 1997. The protestant must also send a copy of the protest to the applicant.

MEMORANDUM

TO: FILE

FROM: STEVE LESTER 

DATE: JANUARY 8, 1997

RE: BOISE PARKS TRANSFER APPLICATION (JULIA DAVIS PARK)

Boise Parks & Rec. filed a transfer application on June 10, 1996 to add wells to a ground water license for recreation use, no. 63-02843. At that time the park faced a potential irrigation water shortage, and Paul Philbrook (Parks) with Terry Scanlan (Consultant) sought expedited approval for well drilling and perhaps well usage.

However, the crisis passed due to fortunate weather etc. circumstances. This allowed Parks and Consultant to address the situation in a more comprehensive manner, resulting in a replacement transfer application filed on December 20, 1996. The newer version addresses irrigation licenses nos. 63-02792 and 63-07034 (latter right includes municipal) plus a beneficial use irrigation claim, no. A63-30418.

The new filing seeks to add irrigation diversion points plus correct the land list for historical irrigation from ground water. The new wells are not intended for recreation use (63-02843). Basically, the b.u. claim and transfer application will clarify historical use plus add needed wells to continue to supply the park with adequate irrigation water.

Eventually, the issue of surface water usage via shares from Boise City Canal Co. must be addressed. It appears that irrigation canal shares have been used to fill the park pond(s), which is the recreation use noted in license 63-02843. Surface water use is noted at this time but need not be fully accounted for in the current transfer - mitigation etc. issues are not reared in the new filing as they were in the June filing.

The June application should be withdrawn and a \$100 refund should be issued. These steps were inadvertently overlooked when I received the replacement transfer filing with its own \$100 fee in December.

Note that I relocated the drilling permit application from the June transfer to the December transfer filing.

Subject: Application for Transfer - Add Diversion Points at Julia Davis Park
Application for Drilling Permit - Julia Davis Park East End Well No. 3

Dear Steve:

I am including a note along with these applications asking for your help. I would really appreciate you doing your best to process these applications as fast as they can be processed. Julia Davis Park is in need of this water.

I have also enclosed a letter from Terry Scanlan to me, where he explains the situation involving these permit requests, along with a bit of history. Please refer to his letter for a complete explanation. I would expect that if you need to call him, he would be glad to answer any questions you may have.

Please feel free to call me any time if I can be of any service or if I need to do anything else to have these permits processed.

Sincerely,

Paul Philbrook, Property Administrator
Boise Parks & Recreation Department

Subject: Application for Transfer - Add Diversion Points at Julia Davis Park
Application for Drilling Permit - Julia Davis Park East End Well No. 3

Dear Paul:

Enclosed please find (1) an application for transfer to add two diversion points to water right 63-02843 and (2) an application for drilling permit for proposed Julia Davis Park East End Well No. 3.

The transfer will allow diversion from three wells at the east end of Julia Davis Park. All three wells will be located within the SESE Section 10, T3N, R2E. Two wells are existing, and the third well is proposed. The wells are described below.

- The original well (East End Well No. 1) is located about 40 feet north of the Boise River, on the west side of Broadway Avenue. East End Well No. 1 was completed in 1951 to a total depth of 250 feet, with 20-inch perforated casing to 100 feet and 8-inch perforated casing from 100 to 250 feet. The well was recompleted in 1985 because of sand pumping problems. Recompletion consisted of backfilling the well casing to about 93 feet, and installing 12-inch gravel packed well screen and casing inside the older 20-inch casing. The screen interval is reported to be 20 to 50 feet. At the time of the license examination, Well No. 1 produced 2.0 cfs. Production declined over the past few years to the point that the well can no longer meet park water requirements; testing in November 1995 found a maximum yield of only about 0.56 cfs (250 gpm). Therefore, the Boise Parks and Recreation Department constructed a replacement well (East End Well No. 2) in April 1996 to make up the loss of production. East End Well No. 1 was scheduled to be abandoned if the yield from the new well was more than 1.5 cfs.
- East End Well No. 2 was drilled in April 1996, approximately 150 feet west of East End Well No. 1. The well was completed to a total depth of 64 feet, with stainless steel screen from 39 to 54 feet. Testing found a maximum yield of only about 0.65 cfs instead of the target yield of between 1.5 and 2.0 cfs. Therefore, instead of replacing East End Well No. 1, the new well provides only enough supply to augment Well No. 1. The combined supply from Wells 1 and 2 is insufficient to meet park water needs. A pump has not been installed in Well No. 2 yet because the water right license currently allows diversion from only one well.

MICROFILMED

JUN 25 1997

May 27, 1996

- East End Well No. 3 is proposed as part of this transfer. The well will be located about 300 feet west of Well No. 2, and will be constructed to a similar depth. It is hoped that Well No. 3 will produce enough water to allow abandonment of Well No. 1. However, if the yield is similar to Well No. 2, then all three wells will be used to produce a combined yield of between 1.5 and 2.0 cfs.

You should note that water right license 63-02843 and SRBA claim A63-02843 lists recreation as the use. However, both the license examination report and the Proof of Completion of Work (Affidavit of Holder) state that the water is used for both irrigation and recreation. Also note that a point of diversion (i.e., East End Well No. 1) in the SESE Section 10 was claimed in the SRBA by the Boise Park System as an additional diversion point for two other Julia Davis Park water rights (A63-02792 and A63-07034). These two water rights list irrigation as a use.

The enclosed applications should be signed and submitted to the Idaho Department of Water Resources. The transfer application fee is \$100. The drilling permit application fee is \$200. Checks for those amounts should accompany the applications.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan P.E., P.G.
Engineer/Hydrogeologist

JUL 01 1996

WATER RESOURCES
WESTERN REGION

TO: STEVE LESTER AND GLEN SAXTON

FROM: NORM *NY*

SUBJECT: JULIA DAVIS PARK TRANSFER

DATE: June 29, 1996

I view the additional point(s) of diversion to be under the licenses that allow irrigation. It (or they) is not a replacement for the nearby well licensed to supply water for the lagoon. It might be possible to view this as a change in point of diversion for the canal shares from the river to tributary ground water. Changing the canal shares to ground water could avoid the problem of shallower wells having a larger/quicker impact on the river.

Changing the nature of use of the license for pumping ground water for the lagoon to irrigation is another matter entirely. It can not happen without using the canal shares authorized for irrigation as part of the transaction - perhaps as mitigation or a double transfer. Too bad we don't have the exchange statute.

Does the accomplished transfer statute recognize unrecorded exchanges accomplished prior to the statute being dropped?

Any acquiescence on our part to pumping ground water before an exchange is approved can only occur if the paperwork is filed to properly record the water right uses.

7/2 follow up call from Norm:
Need complete package of filings to be made before can evaluate & see if expedited authorization to drill &/or use.

- 1 xfer - g.w.
- 1 xfer - surf water - which will pull in entire service area of Bussie City Canal Rights.

Sent mail msg. to Glen summarizing this.
Will call park to pass this info on.

MEMORANDUM

TO: GLEN SAXTON & NORM YOUNG

FROM: STEVE LESTER *SL*

DATE: JUNE 28, 1996

RE: WELL DRILLING & WATER USES FOR JULIA DAVIS PARK

Paul Philbrook for Boise Parks & Rec. is looking for advice for water needs at Julia Davis Park. His concern focuses around temporary authorization to use a well(s) for irrigation needs at the park. Currently, the situation is stable, but he fears that peak summer demand will occur prior to receiving a normal approval via the transfer process. He has asked for IDWR's thoughts before submitting the request in writing as part of a revised transfer application re ground water.

This memorandum summarizes the information that I have been able to obtain.

RECORDED WATER RIGHTS

The park has three old wells, each for a separate right. Two of the rights cover park irrigation while the other one provides recreation use to run the pond and lagoon system at the park. A replacement well was drilled in April, 1996, in the SESE S.10 about 50' from the river next to the Broadway Bridge (recreation use).

The park also has 126 shares of Boise City Canal water; Paul thinks a share equals .75", for a total of about 95" of surface water for irrigation.

GROUND WATER

63-02792 irrigation, well log shows water bearing zone from 235 to 317 ft. (screens) -

63-07034 irrigation and municipal, no well log found -

63-02843 recreation, no well log found but consultant's 5/27/96 letter indicates water bearing zone from 20 to 50 ft. (screens) for 93 ft. well; note that replacement well drilled 1996 & new log suggests water bearing zone from 39 to 54 ft. (screens); both old & new wells at this SESE S.10 site are shallow and close to river.

SURFACE WATER

Canal company rights are solely for irrigation use, portion(s) has been previously transferred to United Water for SE Boise waste water plant.

SRBA/ACTUAL USE SUMMARY

SRBA claims paint a different picture of actual use, which has been confirmed by telephone conversations with Paul.

GROUND WATER

All three old wells have been used to irrigate the park. The wells include two 12", one 93 ft. deep and the other 350 ft. deep. The third well is 16", 155 ft. No additional water bearing zone etc. data can be found so

MICROFILMED
JUN 28 1997

far. The data suggest that shallow and deeper water zones are involved.

SURFACE WATER

The canal company shares are used solely to fill and maintain the pond and lagoon (recreation) use.

CLAIMS

SRBA claims show the three old wells used for irrigation and perhaps "municipal" use but only SSES S.10 well used for recreation. The canal company claims do not include a use for the pond/lagoon except for perhaps A63-20041, which lists multiple uses (dubious?).

Due to unexpected results when drilling the replacement well (fourth well), that well is needed to assist in irrigation. Also, a proposed 12", 70 ft. well (fifth well) is desired - looking at expedited drilling and possible use depending on the circumstances.

All of this is a rather long-winded way of saying that the park uses all of its ground water for irrigation and all of its surface water for recreation despite the authorized uses in the water rights. Paul is interested in making the long-term corrections to the water rights but faces the short term problem of matching water supply to water demand.

Due to his operating constraints (required bidding process, etc.), the park could not use surface water for irrigation without the same amount of lead time that would be required to bring the fourth and fifth wells into production.

He is asking for the following:

1. Temporary irrigation use of the fourth well drilled in 1996; shallow production zone close to river; and
2. Approval of new drilling permit to add and probably use the fifth well near the fourth well and similar in construction to that well.

At a minimum, he will re-submit the pending transfer application to add all wells to the three ground water rights (sometimes ground water has supplemented the pond/lagoon system) as a condition of any expedited/temporary approvals. He is also willing to begin the transfer research etc. to correct the surface water use to authorize a change from irrigation to recreation for the ditch shares. That will, of course, put the entire service area of the ditch company under the spotlight as we have seen in similar Boise River transfers.

It is difficult to see any injury to the ground water resource and users by allowing a temporary arrangement. At least two of the well rights provide complete irrigation coverage (at least on paper) for the park - I am not aware of any nearby wells that might be impacted (see copy of current transfer application map). Have the licensed irrigation wells been developed from the deeper zone, while the old plus new wells in SSES S.10 (map) focus on the shallow zone?

What about injury to senior river rights if the park is irrigated at least in part by 1-3 shallow zone wells next to river - none of which will have irrigation under an approved water right until a transfer can be issued? Is this acceptable during peak irrigation time in a good water year?

- East End Well No. 3 is proposed as part of this transfer. The well will be located about 300 feet west of Well No. 2, and will be constructed to a similar depth. It is hoped that Well No. 3 will produce enough water to allow abandonment of Well No. 1. However, if the yield is similar to Well No. 2, then all three wells will be used to produce a combined yield of between 1.5 and 2.0 cfs.

You should note that water right license 63-02843 and SRBA claim A63-02843 lists recreation as the use. However, both the license examination report and the Proof of Completion of Work (Affidavit of Holder) state that the water is used for both irrigation and recreation. Also note that a point of diversion (i.e., East End Well No. 1) in the SESE Section 10 was claimed in the SRBA by the Boise Park System as an additional diversion point for two other Julia Davis Park water rights (A63-02792 and A63-07034). These two water rights list irrigation as a use.

The enclosed applications should be signed and submitted to the Idaho Department of Water Resources. The transfer application fee is \$100. The drilling permit application fee is \$200. Checks for those amounts should accompany the applications.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan P.E., P.G.
Engineer/Hydrogeologist

NAME OF PARTY Paul Phillips 384-4258EMPLOYEE Steve LattaRE: Tulsa Davis Park

- Has 126 Stans Boise City Canal now, thinks 1 stone = $3/4"$ (?).
- Not used to irrig. , not "plumbed to irrig."
- would take awhile ($\approx$ 1 month?) to get set to irrig. with surf. water (soil constraint, physical changes, etc.).
- will take c 1 month $\pm$ to get new well ready to use & for to begin drill another well (picks, etc.).
- so far, ok, weather has been helpful.
- concerned c late July - August before any work approvals could possibly occur.

Will want to hear from IOWA before take any other steps (revising transfer, preparing/sending bids out, etc.).

I will prepare summary for Glen + Norm, & will let Paul know asap once get response.

Discuss new info
with Ncy, then let
Paul know best
course of action

3 lic, each for separate well = "3 old wells"

2 lic = irr

1 lic = Rec. (pond + lagoon = 1 integrated storage
use)

IN actual practice, recent yrs:

- all 3 wells irr park.
- 1 (or more?) well supplements pond/lagoon for rec.
- most Rec. H₂O via Basin City Canal Co.
(park has ~~25~~¹²⁵ share, uses mostly if not
entirely for rec. (no maybe some irr?).

Request

- pump from new well ("Replacement intent" but now used
as addition) drilled 4/96 (is shallow so ± connect
to River?) to aid in irr use until transfer
approved; ~~might need~~ ^{MIGHT BE FILMED} for supplement rec. use but
probably ^{JUN 25 1997}
- NEED review transfer: add 3 old + 1 new + 1 proposed
wells to all 3 lic.
- maybe need B.C. Canal Co. transfer re: rec use &
pond/lagoon?

[illegible]

63-02843 = Rec. Lic. for J.D. park; well in FCS where "replace" well drilled 4/96

License and Certificate of Water Right

Water License No. 21884

Amount Two second feet

Water District No.

Priority January 23, 1951

THIS IS TO CERTIFY that

BOISE CITY

of Boise, Idaho

, made application for a permit to appropriate the

public waters of the State of Idaho, dated January 23, 1951; that Permit No. 21884

was issued under said application; that Certificate of Completion of works, with a carrying capacity of

two second feet, was issued thereunder on February 28, 1952, showing that said works

were completed on the 18th day of January, 1952; and that on the 19th

day of January, 1952,

BOISE CITY

of Boise

, State of Idaho

, made proof to the satisfaction of the

State Reclamation Engineer

of Idaho, of the right to use the waters of a well

~~subterranean~~ (subterranean flow), for the purpose of recreational use

, under Use Permit No. 21884 of the Department of Reclamation

and that said right to the use of said waters has been perfected in accordance with the laws of Idaho,

and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume

8 of Licenses at page 5072, on the 24th day of April, 1953;

The right hereby confirmed dates from January 23, 1951;

The Point of Diversion is located

in the SE 1/4 SE 1/4, Sec. 10, Tp. 3 N., R. 2 E., B.M. Ada

That the amount of water to which such right is entitled and hereby confirmed, for the purposes

aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall

not exceed two (2) cubic feet per second.

Description and location of use:

Twp.	Range	Sec.	Forty-acre Tract	No. Acres Described in Permit	No. Acres Actually Irrigated
			Julia Lewis Park, Section 10, Twp. 3	in the South Half North, Range 2 East, B.M.	

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, as provided by the laws of Idaho.

WITNESS the seal and signature of the State Reclamation Engineer, affixed at Boise, Idaho, this

24th day of April, 1953.

CERTIFICATE OF COMPLETION OF WORKS

TO ALL WHOM IT MAY CONCERN:

This is to certify that BOISE CITY, A Municipal Corporation of Boise, County of Ada, and State of Idaho, the holder of Permit No. 21884, issued upon Application No. 29609 bearing date of priority of January 23, 1951, authorizing the diversion of Two (2) second feet of the waters of a well (subterranean flow) County of Ada, State of Idaho, for recreational purposes, has fully complied with the provisions of the laws of the State of Idaho relating to the proof of completion of the works of diversion set out and described in said Permit; that said works are adequate for diverting and conveying to the place of intended use Two second feet of the waters of said well; that the point of diversion of said waters is 250 feet distant from the Southeast corner of Section 10, Township 3 North, Range 2 East, B.M., and in the SE $\frac{1}{4}$ SE $\frac{1}{4}$ of ship 3 North, Range 2 East, B.M.

Witness my hand this 28th day of February, A.D. 1952.

MARK R. KULP
State Reclamation Engineer

Proof of completion of works made January 18, 1952.

Certificate of completion of works issued February 28, 1952.

Attention: Mr. Bob Fleenor
Re: Water Right Permit
#21312-Julia Davis Park

Dear Bob:

This letter will confirm our discussion of January 19, 1978 concerning the subject permit. The Boise City Park Department is planning to drill a well to replace the original well for the permit. The location of the new well will be within ± 200 feet of the original well and within the same 40-acre subdivision. Irrigation from the new well will cover the same lands described in the permit and the discharge capacity of the well is planned to be at the same rate as in the permit or 1.04 cubic feet per second.

Sincerely,

ANDERSON & KELLY

Jack E. Kelly

RE: Permit No. 21312

Mr. J. L. Morris, City Engineer
City Hall
Boise, Idaho

Dear Mr. Morris:

We now have on file the report of our field engineer on examination for beneficial use under Permit No. 21312.

Therefore, upon receipt of the statutory fee of \$10.00, a license will be issued for 1.04 second feet of water from a well in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 10, Township 3 North, Range 2 East, B.M., for irrigation of Julia Davis Park.

Very truly yours,

STATE OF IDAHO

DEPARTMENT OF RECLAMATION

BOISE, IDAHO

REPORT OF ENGINEER

Permit No. 21312

This proof is for Beneficial use

In Water District No. _____

1. Name of applicant Boise City- J. L. Morris, City Engineer- City Hall, Boise, Idaho2. Source of water supply: Subterranean from a well3. Location of point of diversion: Is in the NW 1/4 SE 1/4 of Section 10T. 3 N. R. 2 E. County of Ada

4. Describe works as they exist, giving dimensions and capacities of same: Well is 60 ft. deep by 6 in. diameter, cased to the bottom. Static H of water is unknown but thought to be approximately 12 ft. The pump is a Berkeley centrifugal with a 4 in. discharge using 5 h.p. motor at 1750 r.p.m. and is ~~rated~~ at 450 g.p.m. Serial No. 4614439. The motor is Westinghouse, 5 h.p. Single phase 220 volts 1750 r.p.m. Serial No. 6/7 G 1457. The discharge is to the SE through a 4 in. pipe line into a concrete sump into ditches, ~~1 N. 1 S.~~ and a pipe line to the SE. Pump and motor are located in a concrete pit 5 1/2 ft. deep by 5 ft. by 7 ft. long, no floor. Pump house erected over the pit 6 ft. high, V type shingled roof 16 in. with opening around 3 sides of the house for ~~ventilating~~ ^{circulating}. Open sides are to the S., E., and W. Door is in the N. Meter is mounted on a pole approximately 4 ft. to the NW from the house. Meter is Idaho Power, 240 Volt, Serial No. 15931087. The demand is 4.9. The sump for the discharge is concrete, 37 in. deep, 26 in. wide, 4 ft. long on the

5. Water is used for: Irrigation of Julia Davis Park

6. State whether or not water has been turned into works of diversion: _____

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

E 1/2 SW 1/4, W 1/2 SE 1/4, SE 1/4 SE 1/4 Section 10, Twp. 3 North, Range 2 East, B.M.

NE SW = 25a NW SE = 20a
SE " = 10 SW " = 25a Total = 90a
SE " = 10a

4.) N., 30 in. long on the S. Diagonal side is on the E. There is no cover. 12 in. concrete culvert pipe leads into a ditch to the N. A 10 in. concrete pipe line in a ditch to the S. and a 10 in. concrete line buried leads to the SE.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? _____

Remarks: _____

Full 50" can be given without interfering with other wells.

Allow full pump capy or 1 cfs.
" for land as listed in proof.

This examination was made on the 15th day of Feb, 1952(Signed) E. N. Humphrey Examiner.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

RE: Permit No. 21312

Mr. J. L. Morris, City Engineer
City Hall
Boise, Idaho

Dear Mr. Morris:

We acknowledge receipt of your letter of November 20, 1951, enclosing corrected depositions in proof of beneficial use under Permit No. 21312 of the City of Boise.

This completes the proof, but before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot say just when this examination will be made as this department has but one field engineer who makes examinations all over the State.

However, he will try to contact you at the time the examination is made so that arrangements may be made to show him over the grounds.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Gordon S. Bowen, age 36, residence 1804 Broxon St., Boise, Idaho

Occupation, office engineer, Boise City Dept. of Public Works

Ques. 2. Are you acquainted with J. L. Morris, City Engineer for Boise City, the holder of Permit No. 21312? How long have you known him and where does he reside?

Ans. Three years, Boise City

Ques. 3. Have you read or heard read said Permit No. 21312, and are you familiar with its provisions and conditions?

Ans. Yes

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Subterranean waters tapped by well. Point of diversion located 878 ft. from center of Section 10. Water converted by ditches and pipes owned by Boise City and is used in connection with the irrigation of Julia Davis Park.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 2 cu. ft. per second.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. 2 cu. ft. per second.

21312

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation at Julia Davis Park. Land is reclaimed from old river bed. Improvements consist of recreation development and beautification (including planting of lawn, trees and shrubs). Description is - 90 acres in the NE $\frac{1}{4}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$ and SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 10, Township 3 North, Range 2 East, B. M.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. No such use.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Built up river bed. Three acre ft. per year.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. From time to time during summer months in 1950 and 1951 I have seen water applied to lawn areas by irrigation methods.

(Signed) Gordon S. Bowen

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Bowen, County of Ada, State of Idaho, on this 7th day of November, A. D. 1951.

RE: Permit No. 21312

Mr. J. L. Morris, City Engineer
City Hall
Boise, Idaho

Dear Mr. Morris:

We acknowledge receipt of your letter of November 13, 1951, enclosing depositions of yourself and two witnesses, also affidavit of publication in the Idaho Daily Statesman, all in proof of beneficial use under Permit No. 21312 of the City of Boise.

However, Question 7 of the depositions of the witnesses does not give the legal description of the land where the water has been used and we return them herewith for such correction.

Very truly yours,

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 21312

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Boise City, City Hall, 6th and Bannock, Boise, Idaho

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. J. L. Morris, City Engineer for Boise City

Ques. 3 State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit # 21312, date of permit, Dec. 19, 1949, date of priority, Dec. 17, 1949

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Subteranian water tapped by well 150 ft. deep, ²⁵⁰ ft. distant from center of Sec. 10, T. 3 N., R. 2 E., B.M. in a south easterly direction (amended location)

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined.

Ans. Well is equipped with electric pump, 6" casing 50' deep. Depth to water 20 ft. Ditches and pipes are owned by Boise City under jurisdiction of Park Dept. officials in Julia Davis Park.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation for maintenance of recreational facilities in Julia Davis Park. Result of application has been beautification of Park area, lawns, trees, shrubs, etc. Area includes 25 acres in N.E. $\frac{1}{4}$ of S.W. $\frac{1}{4}$, 5 acres in S.E. $\frac{1}{4}$ of S.W. $\frac{1}{4}$, 20 acres in N.W. $\frac{1}{4}$ of S.E. $\frac{1}{4}$, 25 acres in S.W. $\frac{1}{4}$ of S.E. $\frac{1}{4}$, and 15 acres in S.E. $\frac{1}{4}$ of S.E. $\frac{1}{4}$, all in Section 10 T. 3 N. R. 3 E.

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. None

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. 2.00 Sec. ft.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. _____

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Water has ben used since Dec. 1949 in the amount of 1.04 Sec. ft.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. 0.76 Sec. ft. under permit No. 21869 applied to same area for same purpose.

(Sign) _____

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Boise, County of Ada, State of Idaho, on this 7th day of November, A. NOTICE TO ACCOMPANY THIS LETTER MUST BE MADE IN DUPLICATE

(Date) October 4, 1951

(P. O.) Boise City Department of Public Works, City Hall, Boise, Idaho

TO THE STATE RECLAMATION ENGINEER:

Boise, Idaho.

Dear Sir:

You are hereby authorized to have the attached notice published at my expense in the
Idaho Daily Statesman of Boise, Idaho published in
the county in which the works are situated.

J. L. Morris
Acty. Commr of Public Works.

(In case of canals or other works designed to divert and carry more than 50 cubic feet of water per second, the following certificate must be signed by a well-known and competent engineer.)

I hereby certify that the facts set forth in the attached notice are true.

not needed.

Engineer.

21312

NOTICE FOR PUBLICATION
**NOTICE OF PROOF APPLICATION OF WATER
 TO BENEFICIAL USE**

Notice is hereby given that at 11 A. M. on the 7th day of November, 1951,
 at Boise City, County of Ada, State of Idaho, before
Fred R. Bagley, Notary Public, proof will be submitted of the
 application to beneficial use of 1.04 cubic feet per second of the waters of subterranean flow
from a well in accordance with the terms and conditions of Permit No. 21312
 heretofore issued by the Department of Reclamation of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are
Boise City, a Municipal Corporation % Boise City Department of Public Works, City Hall

The use to which said water has been applied is Irrigation

The amount applied to beneficial use is 1.04 cubic feet per second

The place where said water is used (if for irrigation, give full and accurate description of the land irrigated)

90 acres in the NW $\frac{1}{4}$, SW $\frac{1}{4}$, NE $\frac{1}{4}$ SE $\frac{1}{4}$, and SE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 10
Township 3 North, Range 2 East, B. M.

The name of the canal or ditch or other works by which said water is conducted to such place of use is

Private pipe line

The right to take water from such works is based upon Permit No. 21312

The source of supply from which such water is diverted is subterranean waters from a well in the
NW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 10, Twp. 3 N., Range 2 E., B.M.

The date of priority which said user is prepared to establish is December 17, 1949

MARK R. KULP

State Reclamation Engineer.

October 1, 1951

Boise City
C/o City Clerk
Boise, Idaho

Dear Sir:

We enclose herewith blank notice for proof of application of water to beneficial use under your Permit No. 21312. This notice should be filled out in duplicate and returned to this office at least 40 days before the date upon which you wish to make this proof, in order to allow time for the four weeks' publication required by law.

This proof must be submitted before a Notary Public or other officer authorized by law to administer oaths.

The date for proof, as set out in your permit, is not later than December 19, 1951, and if proof is submitted later than said date, your priority will be brought down a length of time equal to the time elapsing between the date the proof is due and the date proof is actually made.

Very truly yours,

Re: Permits Nos. 21868, 21869, 21312 and 21884.

Boise City
Department of Public Works
City Hall
Boise, Idaho

Gentlemen:

We enclose herewith Permit No. 21868 for 0.8 of a second foot of water from a well for use at Morris Hill Cemetery, together with Departmental Receipt No. 23090 for the \$5.00 filing fee.

We also enclose Permit No. 21869 for 0.76 of a second foot of water from a well for use in Julia Davis Park.

Also, Certificate of Completion of Works under Permit No. 21312 for the diversion of 1.04 second feet of water from a well, also for use at Julia Davis Park, which with Permit No. 21869, makes a total of 100 inches, or two second feet.

We also enclose Departmental Receipt No. 23091 for \$10.00 which includes filing fee on Permit No. 21869 and the statutory fee of \$5.00 in connection with Completion of Works Proof on Permit No. 21312.

We also enclose Permit No. 21884 for 2 second feet of water from a well for use in the lagoon at Julia Davis Park, together with Departmental Receipt No. 23092 for the \$5.25 filing fee.

Attention is directed to the limitations and conditions of these Permits, as given on the fourth page under approval of the State Reclamation Engineer.

Proof of Completion of Works

AFFIDAVIT OF HOLDER

STATE OF IDAHO

ss.

County of ADA

J. V. Otter, Commissioner of Public

Works, Boise, City

being first duly sworn, upon his oath deposes and says:

First: That he is the holder and owner of Permit to Appropriate the Public Waters of the State of Idaho, No. 21312, and that his postoffice address is Boise City Hall
State of Idaho

Second: That the name of the stream which said water is to be directed is
Subterranean Water tapped by well

Third: That the point of diversion of said water is 2070 Ft. Distant from the
center of Sec. 10, T3N, R2E, B.M.

Fourth: That under the terms and conditions of said permit, construction thereunder was required to be completed by December 19, 19 50

Fifth: That the use for which said water is intended is Irrigation

Sixth: That on the date above mentioned, the works constructed under said permit were (~~nowhere near~~) fully completed and consisted of the following:

I. Kind of works: Well equipped with electric pump-ditches
(Reservoir, dam, ditch, flume, pipe or otherwise)

II. Dimensions of work: 6" Casing - 50 Ft. deep

(a) Height of dam feet, length of dam at top feet, length of dam at bottom feet. Material used in construction Steel casing in

Well

(State whether wood, earth, stone or concrete)

(b) Capacity of reservoir acre feet.

(c) Size of headgate: Width feet, height feet.

(d) Conduit width at bottom feet, width at water line
(State whether ditch, flume or pipe)

feet, depth of water feet; diameter of pipe inches, average grade per mile is feet. Length of conduit is miles.

Seventh: That said works are capable of conducting to the place of intended use
1.04 second feet of water.

Eighth: That water appropriated under said permit is available for 20
acres of land described as follows: 25 Acres in NE $\frac{1}{4}$ of SW $\frac{1}{4}$, 5 acres in SE $\frac{1}{4}$ or the
SW $\frac{1}{4}$, 20 acres in NW $\frac{1}{4}$ of the SE $\frac{1}{4}$, 25 acres in SW $\frac{1}{4}$ of the SE $\frac{1}{4}$, and 15 acres in
SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ all in Section 10, T3N, R2E, B.M., known as Julia Davis Park

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Boise City
C/o City Clerk
Boise, Idaho

Boise, Idaho **October 2, 1950**

Dear Sir:-

Under the terms of your permit No. 21312-----you are required to complete your diversion works on or before December 19, 1950-. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP

State Reclamation Engineer

Chief Clerk

In reply to your letter of October 20, we advise that Question 5 should be amended to include the statement that the water from the well in question will be used, among other things, to supplant water in an artificial lake.

There is enclosed two copies of a form of city voucher covering the filing fee of \$5.25. Would you please return one copy for approval and payment.

Yours very truly

J. V. Otter
Commissioner

Enclosure

21312

October 20, 1949

Mr. J. V. Otter
Commissioner of Public Works
City of Boise
Boise, Idaho

Dear Mr. Otter:

We do not seem to have had a reply to office letter addressed you under date of September 12, 1949, in regard to the application of Boise City to appropriate subterranean water.

In this letter, we inquired as to whether or not the use of the water to supplement water in an artificial lake should not be included under Question 5, describing the use of the water. We also advised you that there was a filing fee of \$5.25 required in connection with the application.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Mr. J. V. Otter
Commissioner of Public Works
City of Boise,
Boise, Idaho

Dear Mr. Otter:

We acknowledge receipt of your letter of September 9, enclosing application of Boise City to appropriate 1.04 second feet of water from a well.

Question 5 describes the use of this water to be for irrigation purposes, but we infer from the remarks that the water is also to be used to supplement the water in an artificial lake. With your permission, we shall include this under Question 5.

There is a filing fee of \$5.25 required in connection with this application, being at the rate of \$5.00 for the first second foot and \$.25 for each additional second foot or fraction thereof. Upon the receipt of this filing fee, the application will be placed on file.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Dear Sir:

There is transmitted with-in the following:

Application for Permit: Form one -
1 copy.

Location drawing: Form zero - 2 copies.

This constitutes an application for permit to
appropriate irrigation water from a subterranean
source tapped by a well.

J. V. Otter
Commissioner
