Dear Mr. Taggart:

We acknowledge receipt of the depositions of yourself and two witnesses; also Affidavit of Publication in the Idaho Free Press, all in Proof of Beneficial Use under your Permit No. 20792.

Before final action is taken in the matter, the law requires that a field examination be made by an Engineer from this Department.

We are unable to say just when this examination will be made as this Department has but one Field Engineer who makes examinations all over the State.

However, Mr. Tolson, Field Examiner for this Department, will try and contact you at the time he makes the examination, in order that you may arrange to show him over the grounds.

Very truly yours,

Dear Mr. Taggart:

We enclose Certificate of Completion of Works issued under Permit No. 20792 for the diversion of 1.20 second feet of water from a well in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec. 19, Twp. 2 N., Range 2 W. We have had to change this notice in one particular as the only priority that can be established under a permit is the date the application is filed in the Department, which in your case is December 6, 1948. If for any reason it becomes necessary to establish an earlier right this may be done through the district court by proving continued use over a period of years as the state recognizes a prescriptive of use right as well as a right acquired through the permit method.

About ten days prior to the date set for the proof, we shall send Laureine Rand, Notary Public, the necessary forms of deposition consisting of one for yourself and one for each of two witnesses so that she may have them in ample time for the proof.

At the time set you should appear before the Notary Public together with two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder for the purpose of executing the depositions.
