DEPARTMENT OF RECLAMATION

RE: Permit No. 20299

Date December 10, 1958

Blanche K. & Chas. Verheyen
Caldwell
Idaho

Dear Sir:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 20299 is due not later than February 14, 1959. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a Notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date (allowing for four weeks publication), the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated--by 40-acre legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your Notice is published.

Also enclosed is Form 11, which is the authorization for us to have the Notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public, as advertised in the publication notice.

Very truly yours,

GEO. N. CARTER

Dear Mrs. Verheyen:

Reference is made to your letter of September 12, 1951, in which you state that the electricity will be turned off on your pump on September 24, and wondering if the inspection can be made before that date.

Our field engineer has completed inspections in the Boise Valley for this season, and as he is scheduled for inspection in other parts of the state for all of this week, it will not be possible for him to make your inspection before September 24.

However, he will try to make it early in the spring and we shall appreciate your advising us when the electricity will be turned on.

Dear Mr. Verheyen:

We acknowledge receipt of your Affidavit in Proof of Completion of Works under Permit No. 20299, accompanied by your check for the statutory fee of \$5.00 in connection therewith.

However, the proof is incomplete in several particulars and we return it for correction as follows:

1. Question 2 should give the name of the stream or other source of water supply.
2. Question 3 should give the point of diversion by legal subdivision, Section, Township and Range.
3. Question 6 should state whether the works were or were not completed.
4. Question 8 only describes 40 acres in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 17, Township 3 North, Range 3 West, B.M., whereas the Permit also includes two acres in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of this Section. Did you intend to eliminate these two acres?
5. Under Question 9, describe the well and pump more fully as to depth and diameter of the well, casing, kind and power of the pump.
