Re: Permit No. 16130
Riverside Irrigation District

MR. DALE ROBERTSON, President
R # 3, Parma,
Idaho

Dear Mr. Robertson:

This will acknowledge receipt of the deposition of the holder, depositions of one each for two witnesses and the affidavit of publication from the Parma Review, all in connection with beneficial use proof under the above permit. These papers have been checked and found to be in proper form. However, before any action can be taken by this department the law provides that a field examination be made by an engineer from this office. We are unable to say just when this examination will be made but Mr. Tolman, Field Engineer, will contact Mr. C. C. Case, Secretary of the district, at that time so that he may show him over the grounds.

On October 10, 1934, we received a protest from the Wilder Irrigation District which, no doubt, came as a result of the publication of your intention to offer proof under this permit, wherein they allege the following:

First, That the waters flowing in Arena Lake Drain are waters first diverted from their natural course and distributed upon the lands within the boundaries of the said Wilder Irrigation District and again collected and recovered and distributed for further use in the irrigation of the said land.

Second, That the said Arena Lake Drain is located within the boundaries of the said Wilder Irrigation District and is constructed upon land owned by the protestant and that the land upon which the diversion of water from said Arena Lake Drain is sought to be made by said permit holder is land in the private ownership of said protestant, and of the tax payers within the protestant's boundaries and that said permit holder has never acquired any right to go upon said land for the purpose of diverting these waters.

Third, That the lands described in said Permit No. 16130 are in private ownership and were reclaimed and irrigated from the public waters flowing in Boise River many years prior to the construction of said Arena Lake Drain and that said lands divert sufficient water from said Boise River for the proper irrigation of same.

Fourth, That the granting of a license under Permit No. 16130 would result in the wasting of the public waters of the State of Idaho and in the injury and loss and destruction of the lands and property within the Wilder Irrigation District.

16130

#2. Dale Robertson, Parma, Idaho

10-27-34

Fifth, That the waters sought to be diverted and used by said permit holder are not public waters of the State of Idaho but are waters which have been appropriated for irrigation and domestic purposes by the Wilder Irrigation District and used upon lands within its boundaries, and that said waters, while flowing in said Arena Lake Drain are not subject to appropriation and use by the permit holder, or by the public or any other person.

We wish to advise that no action will be taken on this protest, nor will it be given any consideration until the field engineer's report has been placed on file in this office. At that time the department's action will be based upon your proof, the protest and the actual conditions as reflected by the engineer's report.

Very truly yours,

Remarks:

Re: **PROTEST OF WILDER IRRIGATION DISTRICT** against the ^{Use of the} waters of the **ARENA DRAIN** by the Riverside Irrigation District. The lands of the protestant district are at a higher elevation than those of the Riverside Irrigation District, Ltd., and any surplus waters of the Wilder District tend to flow upon or across the lands of the Riverside District.

The principal contentions of the Wilder Irrigation District are as follows, i. e.:

1. That the drain in question was constructed for the double purpose of drainage of their lands, and the re-distribution of the water thus accumulated.

2. That the point of diversion from the Arena Drain to the Riverside Canal is located upon land in the private ownership of the protestant.

3. That the granting of Permit No. 16130 by the State Department of Reclamation would result in the wasting of the public waters of the State of Idaho; also, that "the waters sought to be diverted are not public waters of the State of Idaho" -- and "that said water, while flowing in said drain, is under and subject to the control of the Wilder Irrigation District."

At the point where the Arena Drain intersects the main Riverside Canal, a concrete syphon has been constructed for the purpose of conducting the drainage waters under and across the said canal and a public roadway adjacent thereto.

This intersection point is at the dividing line between the two districts, at which point the waters in question leave the protestant's lands, and consequently, pass beyond any possibility of beneficial use by them.

The above mentioned syphon structure has a flash board control at the entrance and also a headgate in one wing wall which admits water into a 36-inch pipe of some 35 feet in length, leading direct into the main canal of the Riverside District.

As regards contention No. 1, it is quite possible that the waters in question do originate upon the lands of the protestants as a result of their original diversion from the Boise River and the use thereof upon the lands of the plaintiff, and that they are necessary for re-diversion and re-use upon the Wilder Irrigation District's lands, as stated in their protest. If, however, this district fails to intercept and use these drainage waters upon their project, any objection to beneficial use by others would appear unwarranted.

No. 2: The point of diversion is from the syphon heading built to conduct the Arena Drainage across the right-of-way of the Riverside Canal at the point of intersection of the two waterways, the total distance from the drain to the canal being approximately 35 feet upon the combined rights of way. Such being the case, the trespass, if any, upon the private property of the protestant is very slight.

No. 3: If license upon Permit No. 16130 be denied, any waters reaching its point of diversion will simply pass on down the said drain across lands of the Riverside Canal Company to the Snake River and thus be wasted. On the other hand, if license be granted, any surplus water reaching the diversion point (and the boundary line of the Wilder District) will be diverted to the Riverside lands and beneficially used for the production of farm crops.

MR. WALTER GRIFFITHS
Attorney at Law,
Caldwell, Idaho

Dear Sir:

This will acknowledge receipt of the protest against beneficial use proof under the above permit, which you filed in behalf of the Wilder Irrigation District.

We wish to advise that your protest has been placed in the files and will be considered at such time as the department's field engineer can make an examination to determine the facts on the grounds. As you no doubt know, this examination is required by law. After we are in receipt of the field engineer's report we shall communicate with you in regard to whatever action the department takes in this matter.

Very truly yours,

DEPARTMENT OF RECLAMATION,

STATE OF IDAHO.

In the Matter of the Application
of water to beneficial use and
submission of proof under Permit
No. 16130, proposed for submission
by Riverside Irrigation District,
Ltd. of Wilder, Idaho, Permit
Holder.

)
:
) PROTEST BY
:
) WILDER IRRIGATION DISTRICT
:
)
:
)

Comes now the Wilder Irrigation District, an
irrigation district organized and existing under and by virtue of
the laws of the State of Idaho, located within the County of
Canyon, State of Idaho, and protests and objects to the issuance
of a license under Permit No. 16130, to the holder of said license,
or to any person thereunder, for the use of the waters of
Arena Lake Drain, upon the lands described in said permit, or
upon any portion of said described lands in the amount of
sixteen second-feet, or in any amount or volume, for the
following reasons, to-wit:

The protestant herein, Wilder Irrigation District,
is a duly organized and existing irrigation district duly
organized and existing under and by virtue of the laws of the
State of Idaho, and located within the County of Canyon, State
of Idaho, and is authorized and entitled to, and is engaged
in diverting and distributing water for irrigation purposes
upon all of the lands within the boundaries of said district.
That said Arena Lake Drain is a drain ditch located within the
boundaries of and constructed by, the Wilder Irrigation District,
the protestant herein, for the purpose of draining the lands within
said district, and for the further purpose of recovering the water
distributed upon said lands for irrigation purposes, and thereby

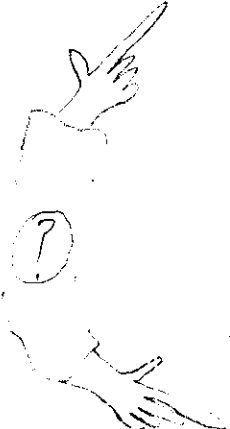

caused to be flowing through said lands for the purpose of redistributing for further use for irrigation upon said lands.

That the lands within the boundaries of the Wilder Irrigation District comprise approximately _____ acres of land, arid in character, and which require the application of water thereon for irrigation to render them productive, and for the proper and practical use of said lands for farming purposes, and that all of the said waters flowing in said Arena Lake Drain are waters first diverted from their natural course and distributed upon the lands within the boundaries of said Wilder Irrigation District for irrigation purposes, and then again collected and recovered and distributed for further use in the irrigation of the said lands, and that said waters are all applied to a beneficial use for irrigation purposes upon said lands and are all necessary and required to be so applied for the practical and successful cultivation and use of said lands.

That the said Arena Lake Drain is located within the boundaries of the said Wilder Irrigation District, and is constructed upon land owned by protestant and that the land upon which the diversion of water from said Arena Lake Drain is sought to be made by said Permit Holder, is land in the private ownership of protestant, and of the tax payers within the protestant's boundaries, and that said permit holder has never acquired any right either expressly or otherwise to go upon said land for the purpose of diverting said waters, and that said Permit No. 16130, if issued, was issued without right and without authority and in violation of the provisions of law, and in violation of the rights of this protestant, and the tax payers and land owners within its boundaries, and that said permit is wholly void and of no force or effect, and secures no right to the holder of the same.

16130

That the lands described in said Permit No. 16130, and upon which said waters are sought to be used, are lands which are owned in private ownership and have been reclaimed and irrigated and used for growing crops by the use of waters appropriated from the public waters of the waters flowing in Boise River for many years prior to the construction of said Arena Lake Drain, and that said lands divert each year and have diverted each year for many years, prior to the construction of said drain, waters from the said Boise River in quantities and volume sufficient and adequate for the proper irrigation of said lands and that said lands do not require water to be diverted from said Arena Lake Drain for their proper irrigation and cultivation.

That the granting of a license under said Permit No. 16130, would result in the wasting of the public waters of the State of Idaho and in the injury and loss and destruction of the lands and property within the Wilder Irrigation District, and in the violation and destruction of the rights of protestant, and of the tax payers and land owners within the boundaries of protestant, and in the great and irreparable injury and loss to protestant, and to all of the tax payers and land owners within the boundaries of protestant, Wilder Irrigation District. That the waters sought to be diverted and used by said permit holder, are not public waters of the State of Idaho, but are waters which have been appropriated for irrigation and domestic purposes by the Wilder Irrigation District, the protestant herein, for use upon the lands within its boundaries, and that said waters, while flowing in said drain, are under and subject to the control of the Wilder Irrigation District for use for irrigation purposes upon the lands within its boundaries, and are not subject to appropriation and use by the permit holder herein, or by the public or by any other person.

Wherefore, the Wilder Irrigation District, protestant herein, protests and objects to the granting of the application of the Riverside Irrigation District, Ltd. or to the issuance of a license under said permit No. 16130, and asks that said permit be cancelled and the application of said alleged permit holder, Riverside Irrigation District, Ltd. be denied.

Notice for Publication

Notice is hereby given that at 10:30 A.M., on the 19th day of October,
 1922, at Parma, County of Canyon, State of Idaho,
 before W. E. Kerrick, notary public proof will be submitted of the completion of works
 for the diversion of 18 cubic feet per second of the waters of Arena Lake Drain,
 in accordance with the terms and conditions of a
 certain permit heretofore issued by the Commissioner of Reclamation of the State of Idaho.

1. The name of the person or corporation holding said permit is Riverside Irrigation District, Ltd.
2. The postoffice address of such person or principal place of business of such corporation is Parma, County of Canyon, State of Idaho.
3. The number of such Permit is 16130, and the date set for the completion of such work is October 22, 1929.
4. Said water is to be used for irrigation and domestic purposes.
5. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conducting to the place of intended use, in accordance with the plans accompanying the application for such permit, is 18 cubic feet per second.
6. The amount of lands for which said water is available is 915.68 acres, particularly described as follows:

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Riverside Irrigation Dist. Ltd.
R. F. D.
Parma, Idaho

Boise, Idaho,
July 6, 1929

DEAR SIR:

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 16130

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before Oct. 22, 1929. Upon receipt of the blank properly filled out, notice for publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

GEO. H. CARTER
Commissioner of Reclamation.
