WATER RIGHT LICENSE

License of Water Right No. 63-2374 Priority August 2, 1922 Amount 88.5 cfs

THIS IS TO CERTIFY, that The Riverside Irrigation District, LTD.
of Parma, Idaho, has complied with the terms and conditions of Permit
No. 63-2374 issued pursuant to Application for Permit dated August 2, 1922,
and has submitted proof to the Department of Water Resources on July 12, 1928,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 250.0 cfs of water from Indian Creek,
tributary to Boise River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>March 15</u> to <u>November 15</u> at <u>88.5</u> cfs and <u>19,903.5</u> acre feet		
	from _____ to _____ at _____ cfs and _____		
	from _____ to _____ at _____ cfs and _____		

(both dates inclusive)

Subject, however, to the condition that no more than 88.5 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confined for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
19,903.5 acre feet per year, said waters to be diverted within the NW $\frac{1}{4}$ NE $\frac{1}{4}$ Section 21,
Twp 4N, Rge 3W in the County of Canyon

This right when combined with all other rights shall provide no more than .02 cfs
per acre nor more than 4.5 afa per acre for the lands above.

NOTE: Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho
Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

The right to the use of the water hereby confirmed is restricted and appurtenant to the lands or place of use
herein described, and is subject to all prior water rights, as provided by the laws of Idaho.

Dear Sir:

The State of Idaho is preparing to issue a water right license to the Riverside Irrigation District, Ltd. The source of water used under said license is Indian Creek which is tributary to the Boise River. The Boise River, in turn, is tributary to the Snake River.

Indian Creek water is used for irrigation of lands within the Riverside Irrigation District, which is located in both Idaho and Oregon.

Our pre-license field examination determined that 4423 acres are irrigated in Oregon and 1135 acres are irrigated in Idaho.

The Department has sent notice to the right holder of the findings. However, prior to license issuance, we want to be sure that the license is compatible with Oregon water laws. I have made a quick review of your statutes and did not see any conflicts. Enclosed is a copy of the proposed license for your review. Please let us know within 30 days concerning your position.

If you have any questions, please let us know.

Sincerely,

JIM JOHNSON

RE: Permit No. 63-2374

The Riverside Irrigation District, LTD.
Parma,
Idaho 83660

Gentlemen:

A representative of this Department made an examination of the works covered by your Permit No. 63-2374 and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 38.5 cfs Source: Indian Creek

The maximum quantity diverted shall not exceed 19,903.5 acre feet
per year.

Point of diversion: 1/4 NE 1/4, Sec. 21, Twp. 4N, Rge. 3W, Canyon County

Beneficial use: Irrigation of 4423 acres within the lands listed on the
attached land list.

Priority date established: August 2, 1922

In order for the Department to issue the above license, it will be necessary for you to amend the permit to correspond with the findings of the field examiner. We are enclosing a partially completed amendment form for your use in this matter.

Please sign the amendment application and return it to this office along with a \$20.00 filing fee within 30 days in order that we might issue your license as set forth above. If you do not concur with these findings or have any questions, please contact us within the 30-day period.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor

SUBJECT

Let's pursue licensing as if the claims did not exist. They may be found to be invalid.

Regarding the lands in Oregon, let's plan to send Oregon a copy of the license. Secs 42-401 et al are careful to say the IDWR may require the permit holder to contact Oregon. I don't see where that would be needed ~~not~~ in this case.

Re: Exam of 63-2279 and 63-2374

Since 63-2374 is limited to a total acreage less than the lands irrigated from the Riverside Irrigation District canal, it is not clear what lands should be covered by this permit. It appears that ~~the~~ ^{this} second filing was made to increase the District's water rights to one inch per acre from Indian Creek, but if the licenses were issued along the lines of the original filings (all lands covered by 63-2279 and part recovered by 63-2374) some lands would have less than one inch per acre. At a meeting with Arlene Abbott and Floyd Cornwell of the Riverside Irrigation District it was decided to have the lands under the lower end of the canal covered by the latter filing and the lands under the upper end of the canal covered by the earlier filing.

Re: Permits 11936 and 15599

MR. HARRY G. KENNARD
Watermaster, Malheur County
Vale, Oregon

Dear Sir:

Reference is made to a letter addressed to this department from Lewis A. Stanley of the Oregon State Engineer's office, dated August 18, relative to the above numbered Idaho permits, a copy of which letter I believe you received.

Mr. Stanley states that you are familiar with the Riverside Irrigation Project, which these permits cover, and that you could probably make an inspection of that portion of the project which lies in Oregon to determine the amount of land irrigated in each legal subdivision, in order that a certificate from your state engineer's department may issue in accordance with the requirements of the Idaho Compiled Statutes, Section 5597. This statute states that where water is appropriated in Idaho and not used on lands in Idaho, that before license shall issue, a certificate from the State Engineer of Oregon must be had, showing the amount of land irrigated in Oregon in each legal subdivision, and also a statement that the capacity of the canals and distribution system is adequate to deliver the amount of water appropriated.

In order that our record may be completed and license issue on these permits, I would greatly appreciate it if you would get in touch with Mr. W. H. Kneifel, of Roswell, Idaho, and arrange with him to give you such assistance as you may require for this examination. You should also make arrangements for the payment by him of such fees as your state will require for this examination. When the examination is completed, I take it that the report should be made to your state engineer, in order that he may be in a position to issue the required certificate.

I am sending Mr. Kneifel a copy of this letter in order that he may be prepared to give you such assistance as is necessary.

Very truly yours,

Assistant Commissioner of
Reclamation

Re: Permits 11936 and 15599

MR. W. H. KNEIFEL
Roosevelt, Idaho

Dear Sir:

Reference is made to the above mentioned permits and your application of proof of beneficial use of water under these permits.

Under date of July 21 Mr. Carter wrote you relative to the status of these two permits and suggested that inasmuch as both permits were intended to cover the entire project, it would probably be well for you to amend the land list of Permit 11936 to conform with the land list of Permit 15599, in order that the licenses, when issued, would cover the entire project.

It is also noted, in checking the land list against the maps, that a portion of the lands in Township 4 North, Range 6 West, Idaho, are not included in either permit. If these lands are receiving water, and you so desire, it would probably be well for you to amend both permits to cover these lands.

I have written Mr. Kennard, watermaster for your county, requesting him to make an examination of the lands in Oregon in order that the State Engineer of Oregon may have data to supply this department with the certificate required by Section 5597, Idaho Compiled Statutes.

As soon as this certificate is completed, the proof will be completed and license can issue. Therefore, if it is your desire to make these amendments, they should be completed in the very near future, in order that the license may embrace their provisions.

I am enclosing copy of Mr. Kennard's letter, in which I suggested that he get in touch with you for such assistance as he may need in making the inspection.

Very truly yours,

Commissioner of Reclamation

Re: permits 11936 and 15599

Mr. W. H. Kneifel
Roswell, Idaho

Dear Sir:

Reference is had to the proof of application of water to beneficial use recently made by the Riverside Irrigation District on their permit No. 11936 to appropriate 90 cubic feet per second of the waters of Indian Creek and tributary drains, and likewise to the proof of completion of works and also proof of application of water to beneficial use on permit 15599 for 90 cubic feet per second of the waters of Indian Creek and tributary drains, at the same point of diversion described in permit 11936.

Permit 15599 appears to be a duplicate filing of 11936, with the exception that the lands described extend only from a line along the west side of sections 21 and 28, Twp. 5 N., R. 5 E., to the Oregon state line. It is not understood why this duplicate filing was made, unless the intent is to acquire in all 180 cubic feet per second of the waters of Indian Creek under these two permits.

If the 90 second feet claimed under 11936 is allocated uniformly under the 11849 acres of land described therein and the 90 second feet claimed under permit 15599 is spread over only the 4499 acres described in that permit, then the maximum statutory rate of one miners' inch per acre is exceeded. I think it would be better to make both licenses in blanket form. By such a plan, no particular part of the water claimed under either permit would be attached to specifically described lands.

So far as I have examined the record, there appears to be nothing to prevent issuance of license for the full amount of the permit in both cases. Our file here indicates that the total capacity of the Riverside Canal is 240 cubic feet per second, which is in excess of that necessary to carry the full right amount of these two license rights. However, in order that a proportional part of the water claimed under permit 11936 may be legally attached to the lands in Oregon, it is necessary to comply with the reciprocal procedure of that state. I am taking the matter up with proper Oregon authorities, and you may expect to hear from them in regard to the matter.

15599

Mr. W. H. Kneifel

July 21, 1928

A proportional amount of the 90 second feet claimed under permit 11256, when expressed as a ratio of the lands in Oregon to the total lands described under the permit, is 36 cubic feet per second. Under existing laws, Idaho cannot issue a license for these lands unless and until appropriate certificate is made by the State of Oregon regarding capacity of canal, application of the water to beneficial use, etc.

The fee for license covering only Idaho lands will be two hundred dollars (\$200.00), same being computed at the rate of one dollar for each 40-acre legal subdivision covered, whether irrigated in whole or in part. The fee, if any, for the Oregon lands must be determined by that state.

Very truly yours,

Commissioner of Reclamation

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

July 1, 1927.

**Mr. Robert Weir, Jr., Pres.,
Riverside Irrigation District,
Roswell, Idaho.**

Boise, Idaho,

DEAR SIR:

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 15599.

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before Oct. 5, 1927. Upon receipt of the blank properly filled out, notice for publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

GEO. N. CARTER.

Commissioner of Reclamation.

Dear Sir:

We are returning herewith the papers which you mailed to Mr. Mumford to be used in the proof of completion of works for Riverside Irrigation District as the District informs us that they have filed a bond in your office in this matter and extending the time for this proof. We think perhaps you have overlooked the fact that the bond has been filed.

R. H. Thibault
KNOW ALL MEN BY THESE PRESENTS, That Riverside Irrigation Dist. Ltd.,
a corporation,

of Roswell, as principal, and J. H. Lowell
of Caldwell and R. D. Helms
of Caldwell as sureties, are held and firmly bound unto the State of Idaho in the full
and just sum of One Thousand Dollars (\$1.000) Dollars,
lawful money of the United States, to the payment of which sum, well and truly to be made, said principal
and sureties bind themselves, their heirs, administrators, executors and assigns, jointly and severally, un-
der the terms and conditions hereinafter set forth.

The terms of this obligation are such that, whereas the above named principal on the 2nd
day of August, 1922, filed in the office of the State Engineer in Boise, Idaho, a
certain application for permit to appropriate the public waters of the State of Idaho, the said application
being thereupon numbered No. 22133, in accordance with which said application the State Engineer
granted and issued to the said principal herein a certain permit numbered No. 15599, a full, true and
complete copy of which application No. 22133 and permit No. 15599, is of record in the office of
the State Engineer, in Book 55 of Permits, at page 15599.

Now, if the above bounden principal shall faithfully carry to completion the said works of diversion
as specified in said application No. 22133 and permit No. 15599, in the manner and form pre-
scribed therein and within the time therein allowed, then the above obligation to be void otherwise to re-
main in full force and effect.

IN WITNESS WHEREOF, The said principal and sureties have hereunto set their hands and seals,
this 1st day of February, 1923.

Re: Permit No. 15599.

Mr. C. C. Case, Secretary,
Riverside Irrigation Dist., Ltd.,
Parma, Idaho.

Dear Sir:-

In reply to your letter of the 28th inst., received today, would say that, if notice of proof of completion of works is filed within the time required for filing the bond, it will not be necessary to file a bond. In view of the fact that the works are already completed, the proof can be made at any time, allowing, of course, for the required four weeks publication of the notice. Blank notices are herewith enclosed to be filled out and returned to this office. A copy of the notice will then be mailed to the paper designated by you. Later deposition blanks, one for the holder and one each for two witnesses, will be mailed to the notary public before whom proof is to be made.

Very truly yours,

W. G. SWENDSEN,

Commissioner of Reclamation.
