CERTIFICATE NO. 243

CHANGE OF POINT OF DIVERSION
OF LICENSED WATER RIGHT NO. 15242

THIS IS TO CERTIFY, that Marie Echevarria and I. N. Kessinger, of Boise, Idaho, are the owners of and using a certain water right for 1.2 cubic feet per second of the waters of an un-named slough, tributary of Boise River, (a drain operated by Drainage District No. 2, Ada County), with a priority of July 19, 1921.

Said water right being obtained by virtue of License No. 15242, issued by the Department of Reclamation of the State of Idaho, dated January 26, 1925 and being appurtenant to the following described lands, to-wit:

SW $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 30,
Township 4 North, Range 2 East, B.M.

That said license has been entered in the records of the Department of Reclamation of the State of Idaho, in Volume No. 6 of Licenses, at Page 3233.

And that now, upon the application of Marie Echevarria and I. N. Kessinger, of Boise, Idaho, for a Certificate of Change of Point of Diversion, made before the State Reclamation Engineer of the State of Idaho, and the said application having been granted, the right to change the point of diversion of 1.2 cubic feet per second of the waters of an un-named slough, considered as being part of the waters of the Boise River, is hereby GRANTED.

That said change of point of diversion shall not modify in effect said licensed water right or place of use.

Said water is to be limited at any given time to an amount actually needed and beneficially used and shall not exceed the following amount, to-wit:

1.2 cubic feet per second, with priority
of July 19, 1921.

That the water right hereby transferred has heretofore been diverted from an un-named slough, a tributary of the Boise River, to the first above described lands through private ditches, with point of diversion in the,

NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 30, Township 4 North,
Range 2 East, B.M.

That the water right hereby transferred will hereafter be diverted from the Boise River to the same lands by the delivery through the Farmers Union Ditch and Boise Valley Ditch, with point of diversion in the

SE $\frac{1}{4}$ of Section 32, Township 4 North,
Range 2 East, B.M.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the official seal of the Department of Reclamation of the State of Idaho to be hereunto affixed, at Boise, Idaho, this ____ day of June, 1958.

That his name is Marie Echevarria and I. N. Kessinger, that he is of lawful age, a citizen of the United States and of the State of Idaho, and that his postoffice address is

5605 State Street, Boise, Idaho

That he is the owner and using a certain water right, bearing date of priority of July 19, 1921, for 1.2 cubic feet per second of the waters of Un-named slough

County of Ada, State of Idaho, decreed to

by decree of Judge of the Judicial District of the State of

Idaho, in and for the county of, in the case of

vs., said decree bearing date of

(or obtained by virtue of License No. 15242, issued by the State Department of Reclamation of

the State of Idaho, dated January 26, 1925, bearing date of July 19, 1921)

for the purpose of irrigating the following described lands situate, lying and being in Water District

No. 12 in the County of Ada and State of Idaho, to-wit:

SW $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 30, Township 4 North, Range 2 East, B. M.

and is the person (or representative of the corporation) to whom such right so issued, or has become the owner thereof in the following manner, i.e. Mesne Conveyance

as per abstract of title of said water right hereto attached and made a part of this statement;

That said waters are now diverted from said stream in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 30, Township 4 N., Range 2 E., B. M., and conducted to the above described lands through Private Ditches

as per map herewith and of this affidavit made a part.

CHANGE IN PLACE OF USE

That affiant and petitioner desires to abandon the use of cubic feet per second of said water upon the above described land, and to convey and use same upon the following tract, situate, lying and being in the County of and State of Idaho, to-wit:

That reasons for desiring to make such transfer are as follows:

That he intends to divert and convey said.....second feet of water to the tract of land last above described in the following manner and as per map accompanying this application:

Note—If this water right has heretofore been carried jointly in a ditch with other water, affiant should secure written consent of other owners or users to removal from its original carrier and file such consent with this affidavit.

CHANGE IN POINT OF DIVERSION

That affiant desires to change the point of diversion of said waters from the point above described to a point located in SE 1/4 of 1/4 of Section 32, Township 4 N., Range 2 E. Boise Valley and thereafter conduct same to the above described land through the Farmers Union & ditch, as per map appended.

That his reasons for desiring to make such change are as follows:

That Drainage District No. 2 constructed a drain through said slough and lowered the water level in said drain to where the applicant could not obtain water therefrom.

Petitioner asserts that no one will be injured by such transfer, or change in point of diversion, and that the change will be made at petitioner's own risk.

WHEREFORE, Affiant and Petitioner prays that the State Reclamation Engineer of the State of Idaho issue to him the proper certificate authorizing such change in point of diversion and/or place of use, in accordance with the provisions of Sections 42-108 and 42-222 of the Idaho Code.

RESOLUTION

WHEREAS Drainage District No. 2, Ada County, Idaho, in June, 1956, constructed a drain in and through the property of Henry L. Scheurman, near what is generally known as Collister Station on the Valley Road in Ada County, Idaho, thereby destroying a waste water right which had been used by Mrs. Marie Echevarria and her predecessors for many years prior thereto, and in order to prevent undue hardships the commissioners of said District authorized said drain to be checked on two or ~~three~~ occasions in 1956 and water used therefrom, and

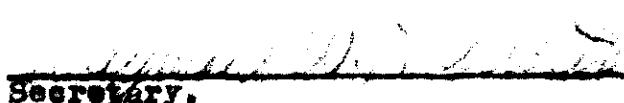

WHEREAS for the year 1957 approximately 75 inches of water was by the Department of Reclamation made available to the Boise Valley Ditch, carried by it and used by Mrs. Echevarria upon her property, and for the purpose of finally disposing of the matter, be IT RESOLVED by the Board of Commissioners of said Drainage District in regular meeting assembled, as follows:

That the Department of Reclamation of the State of Idaho be and it is hereby authorized to permanently allot to the Boise Valley Ditch 75 inches of water from the waters of Boise River and deduct the same from the District's filing by and through its Commissioners of 150 second feet of its developed water right, and the said Boise Valley Ditch be authorized to carry and distribute the same in like manner as other waters allotted to it, and this resolution shall be the Department's authority for so doing.

Adopted and approved February 1, 1958.

Remarks:

Land to be irrigated is what is commonly referred to as alluvial formation, and is part of the original overflow land of the Boise River. The soil is thin - the gravel being in places only a few inches from the surface, for which reason two second feet for each 50 acres is claimed to be necessary to adequately irrigate the same.

July 16, 1957

Hon. Mark R. Kulp
Commissioner of Reclamation

Boise, Idaho

Dear Mr. Kulp:

Drainage District No. 2 about June, 1956, constructed a drain on the south side of the Highway 44 near Collister Station west of Boise, Idaho, which intercepted or lowered a waste water right which had been in use for probably 20 years.

In 1956 after the drain was built the users of the waste water dammed up the ditch which had been recently constructed and took the water out on three or four occasions. The people who used the waste water get some water from the Boise Valley Ditch and use it on land adjacent to what is irrigated by the waste water. Last spring the Drainage Board suggested to the waste water people that they would try to make available 75 inches in the Boise Valley Ditch if it could be carried by the lateral to the North of and along Highway 44. There was some question as to whether or not the lateral will carry it.

The Drainage District made a filing of 500 second feet of developed water from its drains within the district which is supposed to be made available to the respective ditches down the valley in the ratio that their diversions bear to the total amount of this filing. It seems that no great harm could be done if 75 inches of this water could be made available to the Boise Valley Ditch as an experimental test to see whether or not this water could be carried in the lateral, from it to and upon the land formerly irrigated by the waste water. If this could be done it would seem to point to a solution of the problem without material injury to anyone.

I have interviewed at least two members of the Drainage Board and this suggestion is very agreeable to them if it could be brought about.

Mr. John Barrutia living west of town is the party who is using the waste water and he will likely be ready for irrigation again within the next three or four days and if this arrangement could be made within this time and he notified it could soon be determined whether or not the lateral will carry the needed water.

Appreciating anything you might do in the premises, I am

Very truly yours,

Charles F. Reddoch

Instructions to Examiners

1. Examiners will not be permitted to examine any of the receipts in the office pertaining to this permit. They are to furnish a report of the facts and conditions as they exist, from their own observations and inquiries.
2. Always carefully note the location of the point of diversion, and accurately plat same.
3. Find out how many parties own right in the ditch or canal and give their names and amount of right.
4. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
5. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
6. If any unusual conditions are discovered, make a plain statement of them under remarks.
7. Always see the holder, if possible, and go over the whole ground with him, and make your report only upon actual existing facts and conditions.

Re: Permit 15242.

Mr. I. N. Kessinger,
Boise, Idaho.

Dear Sir:

Referring to the Proof of beneficial use of water under the above numbered Permit, which has just been filed, would say that no action will be taken in regard to this proof until the report of our examining engineer has been made.

A protest has been filed in this office against issuing license under this Permit for the reason that the lands are included in the Boise River decree and that application should be made through the courts for additional water for the lands. After the report of our examining engineer has been filed, we will set a date for hearing on this protest, at which time you will be further notified.

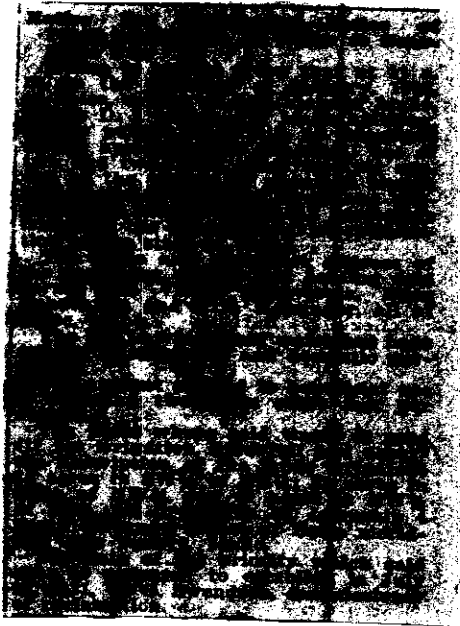

Very truly yours,

I, A. V. Tallmah, Water Master of Boise River, do hereby enter a protest against the issuance of a license for the proof of beneficial use of water covered by Permit No. 15242, for 2.4 second feet of water from an unnamed stream which is tributary to the Boise River, from which proof is to be made, January 25, 1922, and for the following reasons:-

That said permit does not set out entire ownership of lands owned by applicants:

That said applicants are the owners of $82\frac{1}{2}$ shares of water covered by Boise River Decree and decreed to the Boise Valley Ditch Company, said $82\frac{1}{2}$ shares of stock in above Company, representing approximately 0.9 inches per share or a total of 74.25 inches of water:

That the letter from the Secretary of the Boise Valley Ditch Company, attached to this affidavit, should be sufficient proof of applicants' water rights:

That said unnamed stream is a tributary to the Boise River and as said River is already over appropriated a license issued for the diversion of the waters covered by said permit would only be of value during the flood water period of the said Boise River:

That a decree was rendered by the Court of the Seventh Judicial District of the State of Idaho, stating that all tributary waters of the Boise River were a part of the Boise River waters and as such should be so administered:

That any lands included in said Boise River Decree which were originally decreed insufficient water to properly irrigate any of the lands included in said decree

still have an opportunity to appear before the above mentioned court and present evidence to substantiate their claims as said final decree of Boise River waters is now being held in obedience for further evidence as to the duty of water.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Mr. Victor Scheraga,
Boise, Idaho

Boise, Idaho,

October 1, 1921.

Dear Sir:—

Under the terms of your permit No. *15242*.....you are required to complete your diversion works on or before *Jan. 29, 1922*. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

W. G. JOHNSON
Commissioner of Reclamation.
