State Engineer.

Remarks: 50 second feet to be pumped at Pumping Plant No. 1, see remarks "B".

The Pioneer Irrigation District entered into a contract with the United States of America, in which contract the United States of America agrees to expend \$350,000 in digging and constructing drainage systems, known as the Mason Creek Drainage and the Wilson Slough Drainage Systems, and also another named the Dixie Drainage System, within said District, which systems are outlined on the blue prints marked Exhibit "A" and Exhibit "B", annexed hereto and made a part hereof, for the purpose of draining water-soaked lands of the District, on condition that the District return said money, so expended, in twenty installments, as hereinafter stated.

Prior to the execution of said contract by said District, a resolution was adopted by its Board of Directors, on September 14, 1912, in which resolution said Board formulated a general plan of its proposed drainage and increased water supply for said District, in which it declared the necessity of drainage and also the necessity of an increased water supply for irrigation, and stated that in the construction of said Drainage Systems water would be developed, accumulated and waste waters collected, which would be developed, accumulated and waste waters collected, which would be diverted or pumped into the canals of the District and used by the District in increasing its water supply. Copies of the maps, the above mentioned contract, plans and resolution were filed in the office of the State Engineer of the State of Idaho on September 16, 1912, to which reference is hereby made. Said resolution, contract and plans were approved by the said State Engineer, by report to said District, on September 27, 1912, after which the same were approved by vote of the District, by a special election held for that purpose; and that thereafter another contract was prepared and by a special election authorized and entered into by the District, in which the payments to the United States of America may be made as follows: Two per cent each year for the first four years; four per cent each year for the next two years and six per cent each year for the next fourteen years.

On or about November 1, 1913, the Reclamation Service of the United States of America commenced the construction of the said Drainage Systems, the Mason Creek Drainage System being included within said Systems, in which said system there has been expended about \$106,000 and about 26 miles of drainage ditch has been constructed, of about ten feet in depth and from five to eight in width at the base.

The water is being developed by the construction of the Mason Creek Drainage System, which comprises the drainage ditches in the Mason Creek Drainage System, as shown on the map accompanying this application, comprising the Mason Creek Drain, the Purdam Gulch Drainage Ditch, Noble Slough Drainage Ditch and the Solomon Slough Drainage Ditch, which Mason Creek Drain develops 40 second feet; the Purdam Gulch Drainage Ditch 20 second feet; Noble Slough Drainage Ditch 20 second feet; Solomon Slough Drainage Ditch 20 second feet; and a portion thereof, to-wit: 30 second feet, developed by the Mason Creek Drain, and 20 second feet developed by the Purdam Slough Drainage Ditch is to be pumped at pumping plant No. 1, located where the said Mason Creek Drain crosses the Caldwell Highline Canal, at a point 785 feet North, 73° West of the Southeast corner of Section 29, in Township 4, North of Range 2, West of Boise Meridian, in the Southeast quarter of the Southeast quarter of Section 29, Township and Range aforesaid, and to be used in the irrigation of the lands described in "List A", hereto attached.

There are within the Pioneer Irrigation District, this applicant, more than 34,800 acres of land, and the irrigation of said lands requires, in addition to the amount asked in the cases on file in the courts of this State and the amount contracted for with the Government, a copy of which contract is on file in the office of the State Engineer and was approved by said State Engineer September 26, 1912, the amount of water which is being developed by the construction of the drainage systems on the blue print hereto attached and included in the above application and also in application No. 16860 to irrigate 3597.92 acres, as shown by "List "A", under the Caldwell Canal, a portion of which has not yet been reclaimed, and to supply additional water for 26,130 acres, as shown on List "B", about 6,000 acres of which has not been reclaimed. It is the intention of this application to file on the waters to the amount of the application developed by means of the drainage system constructed by the applicant, as in this application set forth.

Instructions to Examiners

1. Examiners will not be permitted to examine any of the receipts in the office pertaining to this permit. They are to furnish a report of the facts and conditions as they exist, from their own observations and inquiries.
2. Always carefully note the location of the point of diversion, and accurately plat same.
3. Find out how many parties own right in the ditch or canal and give their names and amount of right.
4. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
5. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
6. If any unusual conditions are discovered, make a plain statement of them under remarks.
7. Always see the holder, if possible, and go over the whole ground with him, and make your report only upon actual existing facts and conditions.

PERMIT NO. 11,897

SUPPLEMENTAL TO THE ATTACHED PROOF, of which this is here made a part, the subscriber desires to make the following statement

The Pioneer Irrigation District owns two main canals taking water direct from the Boise River, known as the PHYLLIS CANAL which waters nearly 25,000 acres, and the CALDWELL HIGHLINE CANAL which waters about 10,000 acres, a total acreage of nearly 35,000.

A portion of this land, estimated to amount to about 8000 acres had by reason of seepage become water-logged and ruined, and another portion consisting of about the same amount of acreage, lying principally under the Phyllis Canal, had never been put under cultivation. It was thus clearly apparent that the amount of water decreed to the District from the Boise River (15,400 inches) was wholly inadequate to properly water the lands possible to irrigate within the District.

With the double purpose of reclaiming the lands that had become water-logged, and of developing an additional and supplemental water supply for the District, a contract was entered into in 1913 with the United States Government to construct a drainage system.

Upon the completion of the drainage system it was found that practically enough water could be diverted from the drains known as the Wilson Slough Drain, the Mason Creek Drain, and the Five Mile Creek Drain, into the Caldwell Highline Canal to water the lands lying under said canal, thus making it possible for the District to transfer such amount of water as the Caldwell Highline Canal could at any time rightfully draw direct from the Boise River to the Phyllis Canal and thus water land under the Phyllis Canal which could not otherwise be supplied.

This arrangement, while it permits of watering much land within the District that could not otherwise be supplied, prevents definite answers being given to Questions 6 and 11 of the attached Proof as said water is used both as supplement to and substitute for water of the Caldwell Highline Canal, and is carried to any lands under said canal to which it can be diverted.

With reference to the point of diversion differing from the point mentioned in the permit, will state that the first plans made were changed and instead of installing a pumping proposition as at first planned, the diversion was made further up the drain ditch and a gravity system installed.

Q. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans.

PERMIT NO. 11,897**Proof of Application of Water to Beneficial Use****Deposition of Holder**

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Elmer N Brown--45--Caldwell, Idaho--superintendent Pioneer Irrigation District--Caldwell, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Pioneer Irrigation District--Caldwell, Idaho--Superintendent--
by order of the Board of Directors.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. 11,897--Jan 10, 1916--September 8, 1915.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Mason Creek as enlarged by the Mason Creek Drain constructed by the U. S. Government--point of diversion, SE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 29, T 4 N, R 2 W B M.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use.

Ans. Concrete diversion dam in Mason Creek Drain, Concrete Headgate--
diversion Canal $1\frac{1}{2}$ miles long known as Mason Creek Feeder Canal--
capacity sufficient to carry ^{all water} so far available which has not exceeded
about 40 second feet. Up to this date this Drain has not developed
to exceed about one-half of the amount applied for, viz 86 second feet.

Ques. 6. State for what purport water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivate or natural meadow land and the nature of all improvement which have been made as a direct result of said use.

Ans. To irrigate approximately 4000 acres. Water is carried into the
Caldwell Highline Canal and used to irrigate all land in the Pioneer Irriga-
tion District between the point where it enters said Canal in the SE $\frac{1}{4}$ SE $\frac{1}{4}$
Section 29. T 4 N, R 2 W B M, and the Wilson Slough Drain as covered by
permit No 11897. See statement attached.

Ques. 7. If for other than for irrigation purposes, state how applied, amount of horse power generated, etc.

Ans. _____

Ques. 8. What is the minimum amount of water required for the specified above?

Ans. Will eventually require all that can be developed up to the
amount applied for.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. _____

PROOF OF COMPLETION OF WORKS

Pioneer Irrigation District,
c/o Fred L. Evans, Sec'y
Caldwell, Idah.

Boise, Idaho,
November 18, 1920

DEAR SIR:

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 11897

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before Jan 10, 1921. Upon receipt of the blank, properly filled out, notice for publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

The Pioneer Irrigation District

He is the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho

No. 11897

Under the terms and conditions of said permit, construction work thereunder was required to be completed by Jan. 10, 1917

The Pioneer Irrigation District

That he has heretofore performed the following work described under said permit: its contract with the United States of America, for which the Reclamation Service has expended about \$60,000 in the construction of a drainage ditch.

costing \$

The Pioneer Irrigation District

THAT he is unable to complete the remainder of the work within the required time, for the following reasons, to-wit: The irrigation season is now on and it is impossible to do the work at the present time on account of the scarcity of labor and the high cost of material; that before installing a permanent pumping plant it is necessary to determine the amount of water available; The district installed a small pumping plant run by gasoline but found it too expensive. The District is desirous of determining the feasibility of diverting the water by means of a ditch.
