FROM Dave Tuthill

TO Gary Spackman

SUBJECT Transfer Numbering Problem

While assisting some customers today I ran across a transfer numbering problem that Water Allocation Section will be sure to enjoy.

The Boise River Decree entitled Farmers Coop Ditch Co v. Riverside Irr Dist, et al contains two Eureka ditches. Eureka Water Company is described in # 63-0145 and Eureka Ditch Co. No. 2 is described in # 63-0223.

Based on my brief glance it appears that Trans No. 1064, which should have been applied to Eureka Ditch Co. No. 2, was in error applied to Eureka Water Co.
Please check out & correct if needed.

MEMORANDUM

TO: FILE NO. 63-0145 & 63-0223

FROM: TIM LUKE

RE: TRANSFER NUMBERING

DATE: 11-14-89

=====

The water rights data base has several errors in regard to the above numbered rights. These errors were discovered by researching the files and following up to a memo dated 1-22-86 by Dave Tuthill.

Transfer number 1064 has erroneously been assigned to 63-0145 causing a split of the water right number. There should be no split of 63-145. The split should be deleted and the original right re-entered.

The following changes should be made to file no. 63-0223:

1a) 63-0223G: The place of use field should contain the following description: SWNE Sec. 11 T4N, R4W 25 ACRES

b) Line 1 of the remarks section should be deleted and replaced by the following remark:

"TRANS. 289 CHANGED P/D ONLY. TRANS 1064 WAS SUPERCEDED BY TRANS. 289 BUT DESCRIBED P/U.

Lines 2 and 3 should remain as presently entered in data base.

The numbering problem appears to have been the result of the fact the department (formerly Water Reclamation and Water Administration) had a unique system for assigning numbers to transfers whereby one set of numbers was designated for transfers involving points of diversions and a different set of numbers designated for place of use transfers. The transfer filed which resulted in 63-0223G was actually a point of diversion transfer. This transfer though described a specific place of use. The original place of use however was never changed. An order granting transfer no. 1064 (a place of use transfer number) was entered which changed the

point of diversion and appeared to change the place of use. Review of the original transfer application though shows that the applicant, Earl Giles, never intended to change the place of use. The order was prepared and signed but appears to have never been sent out as evidenced by review of the file.

One month after transfer 1064 was prepared, transfer no. 289 was issued. This transfer was issued to change the point of diversion as proposed by the original transfer application. The issuance of transfer 289 was necessitated because of the dual transfer numbering system. Thus, transfer 289 essentially supercedes transfer 1064. Transfer 1064 however does adequately describe the place of use associated with the properly recorded point of diversion.
