PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner.

1. Permit No. 63-12565 Telephone No. 208-580-2996

2. Name of Permit Holder(s): John McGrew

3. Mailing Address: RR 1, Box 463

City Glenns Ferry State ID Zip 83623

4. Source of Water: Biswell Creek If **GROUNDWATER** (well), Date Drilled: mo. _____ / yr. _____

Well Driller: _____ Drilling Permit Number: _____

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): _____ Stockwater (No. and type of stock): _____

Irrigation (No. of acres): _____ Other: _____

6. Total rate of diversion and/or volume for which proof is submitted: _____ cfs OR .5 acre-feet

7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)

(This question is **not optional**. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required?

Yes ☒ or No _____

Has the measuring device been installed?

Yes ☒ or No _____

8. Fee Enclosed: \$ 50.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: John McGrew Telephone Number: 208-580-2996

Address: RR 1, Box 463, Glenns Ferry, ID 83623

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and water has been diverted. I agree to relinquish any undeveloped portion of the permit to the State of Idaho.

This is to certify, that JOHN MC GREW

RR1 BOX 463

GLENN'S FERRY ID 83623

has applied for a permit to appropriate water from:

BISWELL CREEK

tributary of BIG SPRINGS CREEK

and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
-----------------------	----------------------	--------------------------	----------------------

STOCKWATER STORAGE	01/01 to 12/31		2.3 AF
--------------------	----------------	--	--------

LOCATION OF POINT(S) OF DIVERSION:

NESW , Sec. 34, Township 01N, Range 10E
ELMORE County

PLACE OF USE: STOCKWATER STORAGE

TWN RGE SEC

01N 10E 34

NESW

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of application of water to beneficial use shall be submitted on or before May 1, 2001.
2. Subject to all prior water rights.
3. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
4. Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide the watermaster suitable control of the diversion.
5. The right holder shall install/maintain permanent measuring devices in such a manner that the amount of water entering the reservoir and the amount of water released from the reservoir can be measured.
6. The right holder must provide for 2.3 af of storage water or some other source of water to be released into the Boise River for mitigation purposes and shall annually provide to the department an executed storage lease agreement or other documentation as proof of such release into the Boise River.
7. This approval does not authorize new construction or an expansion of dams or impoundments.
8. Stockwater storage is for 750 range cattle.

RE: Change of Ownership for Water Rights 63-12548, 63-12565, 63-12566

Dear Water Right Holder(s):

The department acknowledges receipt of correspondence changing ownership of the above referenced water rights to you. The department has modified its records to reflect the changes in ownership and has enclosed computer-generated reports for your records.

Please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address of the owner of a water right to the department. Notice of the change must be provided to the department within 120 days of the change. Change reporting forms are available from any office of the department.

Please feel free to contact this office if you have any questions regarding this matter.

Sincerely,

for Jeff Peppersack, Manager

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NOS. 63-12565 & 63-12548

Dear Permit Holder:

The department acknowledges receipt of the proofs of beneficial use forms submitted for the above referenced permits. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Be advised that Section 42-248, Idaho Code, requires you or the owner of these water rights to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions concerning the field examination, please contact the **Western Regional Office** of the department in Boise at (208) 334-2190.

Sincerely,

Deborah J. Gibson
Administrative Assistant
Water Allocation Bureau

PROOF DUE NOTICE

RE: PERMIT NO. 63-12565

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before May 01, 2001. (See last page of your approval permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

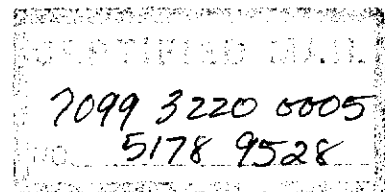

Sincerely,

Deborah J. Gibson, Admin. Assistant
Water Allocation Bureau

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-12565

Dear Permit Holder:

The Department of Water Resources (IDWR) has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a preliminary order issued by IDWR pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by IDWR unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Be sure to note the special condition requiring you to install a lockable device that will provide the watermaster control on your diversion.

Also, please note that water right owners are required to report any change of water right ownership and/or change of mailing address to the department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department or visit the department's homepage on the Internet to obtain the proper reporting form.

If you have any questions, please call me at 208-327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

MICROFILMED
JUN 22 2000

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below.

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have fourteen (14) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

CERTIFICATE OF SERVICE

All documents intended to be part of the Department record in connection with a preliminary order shall be served upon the representatives of each party of record. Every document filed with and intended to be part of the agency record must be attached to or accompanied by proof of service by the following or similar certificate.

I HEREBY CERTIFY (swear or affirm) that I have this day of _____, served the foregoing (name(s) of document(s)) upon all parties of record in this proceeding, (by delivering a copy thereof in person: (list names)) (by mailing a copy thereof, properly addressed with postage prepaid, to: (list names)).

(Signature)

MICROFILMED

JUN 22 2002

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when (a) the petition for reconsideration is disposed of; or (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

RIGHT TO HEARING

Pursuant to Section 42-1701A(3), Idaho Code, unless the right to a hearing before the Department is otherwise provided by statute, any person aggrieved by any decision, determination, order, or action of the Department or any applicant for any permit, license, certificate, approval, registration, or similar form of permission required by law to be issued by the Department, who is aggrieved by a denial or conditional approval ordered by the Department, and who has not previously been afforded an opportunity for a hearing on the matter shall be entitled to a hearing before the Department to contest the denial or conditional approval upon filing with the Department, within fifteen (15) days after receipt of the denial or conditional approval, a written permission stating the grounds for contesting the action by the director and requesting a hearing.

APPEAL OF FINAL ORDER TO DISTRICT COURT

If a preliminary order becomes final, any party aggrieved by the final order or orders previously issued in the case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which (a) a hearing was held, or (b) the final agency action was taken, or (c) the party seeking review of the order resides, or (d) the real property or personal property that was the subject of the agency action is located. The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal. See Sections 67-5270 through 67-5273, Idaho Code.

FILE PRESENTATION

This application was processed prior to the January 12, 2000 memo "Changes to Water Right Applications." The old technique of making application changes was used.

To avoid additional processing delay, the file is forwarded as "one in the pipeline" with respect to that memo. The regional office anticipates that this will be acceptable for this limited group of applications.

MICROFILMED
JUN 22 2000

Comments: Date: 2/14/2000 User-ID: DNELSON

Subject: ADDITIONAL INFORMATION

APPLICANT: Stockwater is for 750 head of beef cattle. These are existing excavated ponds on fairly flat area. The previous owner constructed the ponds in early 1990's, but did not file on them. The two ponds are connected by Biswell Creek and used together to supply water to the cattle.

IDWR REVIEW: IDWR review showed that an adjudication claim was filed for in stream stockwater use on Biswell Creek. This water right is A63-31030.

MITIGATION: The applicant has proposed to mitigate the consumptive use of this pond by purchasing water from the water bank to cover the volume of the pond. The applicant has supplied a copy of the lease agreement.

Subject: RE: Applications for Permit to Appropriate Water, Nos 65-12566 and 65-12565

Bill,

I wanted to respond to the questions that you had concerning water right 65-12565.

The first question was can this be verified. I visited with Michael Chisel at the State Office and we looked at all of the aerial photography and maps available of the area. These maps and aerial photography were developed before 1990 or the resolution used is not good enough to verify such small ponds. The only other acceptable aerial photography or maps available would be from the US Forest Service and we do not know if they have flown the area after 1990's. I then spoke with Steve Lester and we believe that we can deal with this issue by conditioning the permit to say that the approval of the permit does allow any new construction of the dams or ponds associated with the permit. We feel that this is the best that we can do without actually going out performing a field exam prior to approval of the permit.

The second question that you had was whether or not the proper stream channel alteration process was followed. I spoke with Gene Gibbson on this issue and he said the IDWR Stream Channel Program does not regulate intermittent streams. We both looked at the USGS Topo map and it shows both of these streams as intermittent streams and are not regulated by IDWR stream channel program. Gene said that he will not pursue regulation unless he is given a reason he is not aware of to pursue regulation or if there is evidence that this actually is a perennial stream and the map is incorrect. I am not sure, but I believe that there is a standard condition that does not exclude the applicant from other agency requirements.

I hope that I answered all of your questions. All advertising must be submitted by Tuesday of next week. If you would like me to hold off on the advertising for any reason please contact me before 8:00 am Tuesday 2/22/2000. We have held this application for a long time and would really like to get it going if possible.

Thanks

Dan Nelson

Subject: Applications for Permit to Appropriate Water, Nos 65-12566 and 65-12565

65-12566

This application would result in construction of a small dam on an unnamed tributary to Casey Creek. It appears that Casey Creek flows into the Lime Creek arm of Anderson Ranch Reservoir. If this the case, the South Fork Boise plan would not prohibit construction of the dam and related impoundment.

65-12565

This application would allow the continued use of existing facilities that may have been constructed without the appropriate approvals in the early 1990's. Can this be verified? Was the appropriate stream channel alteration process followed?

MICROFILMED

FEB 22 2000

After adoption of the South Fork Boise River Basin Plan in 1990, all south-side tributaries to Lime Creek are protected as state Recreational Rivers. Under this protection, construction or expansion of dams or impoundments is prohibited. This designation should be referenced in the approval language. Likewise, the permit should be conditioned to prohibit expansion of the existing facilities, and to require a stream channel alteration permit for any additional work in the stream, as this is not a diversion, per se.

FYI - I will FAX the language from the SF Boise plan that pertains to the Lime Creek designations.

2. South Fork Segment - Natural River

The designation of the South Fork Boise River from the mouth of Black Canyon Creek downstream to a point of 250 yards upstream of Neal Bridge as a Natural River. Provision is made, thereby, for the maintenance and future upgrading of Neal Bridge, and the Neal Bridge Float Boat Access site.

3. Lime Creek Drainage - Natural Rivers and Recreational Rivers

That Lime Creek from its mouth to its confluence with the North and Middle Forks and all tributaries on the north side of Lime Creek including the North and Middle Forks and all their tributaries from their mouth to their headwaters, be designated as Natural Rivers.

The term headwaters, as used in this plan, means a natural water course in perceptible extent with definite beds and banks which confines and conducts continuously and intermittently flowing waters (from Rules and Regulations Pertaining to the Idaho Forest Practices Act, IDL, 1988).

All remaining tributaries of Lime Creek, from their mouths to their headwaters be designated as Recreational Rivers. Pursuant to Idaho Code 42-1734A(6), the following activities are prohibited:

- Construction or expansion of dams or impoundments
- Construction of hydropower projects
- Dredge or placer mining
- Mineral or sand and gravel extraction within the streambed.

Stream channel alterations shall be prohibited except for those necessary to maintain existing access, utilities, and roadways, the placement of fishery enhancement structures, or new access for recreational purposes.

New diversion works shall be limited to pump installations sized to supply water for the standard domestic exemption or of a capacity sufficient for stock water or developed recreational purposes.

4. Big Smoky Creek Drainage - Natural Rivers

That Big Smoky Creek from its confluence with Calf Creek to its headwaters and all tributaries to Big Smoky Creek above and including Calf Creek from their mouth to their headwaters be designated as Natural Rivers.

The term headwaters, as used in this plan, means a natural water course in perceptible extent with definite beds and banks which confines and conducts continuously and intermittently flowing waters (from Rules and Regulations Pertaining to the Idaho Forest Practices Act, IDL, 1988).

**RE: APPLICATIONS FOR PERMIT FOR STORAGE WATER ON
BISWELL CREEK AND UNNAMED STREAM TRIBUTARY TO
CASEY CREEK**

Dear Mr. McGrew,

On 12/27/1999 I contacted you concerning your applications for permit for stockwater storage on Biswell Creek and an Unnamed Stream Tributary to Casey Creek. In this conversation we discussed the volume of these ponds and the amount of storage water you would need to acquire from the Boise River system for your mitigation plan. I have not received a response from you as of the date of this letter. Please let me know if you have purchased the storage water needed to mitigate these rights or if you would like to have these application put on hold.

Currently, we can not process any consumptive use applications in your area unless a mitigation plan has been sent to our office. Please see the letter I wrote you on 12/3/1999 concerning mitigation. **If I do not receive the needed information by 2/28/2000 I will put these two applications on hold until a mitigation plan has been received.**

If you have any questions or concerns please contact me at the above address or telephone number.

Respectfully,

A handwritten signature in cursive script that reads "Daniel A. Nelson".

RE: 3 APPLICATIONS FOR PERMIT FOR STOCKWATER

Dear Mr. McGrew.

Our office received your 3 applications for permit on 11/2/1999. I have reviewed these applications for permit and discovered that all of these applications are in the Upper Boise River Drainage. Currently we cannot process new applications for permit that are consumptive in this area unless they have a mitigation plan. A mitigation plan shows that you will exchange the amount of water needed from an existing water right for the amount of water proposed by the permit.

The application for the unnamed spring that is delivered to a water trough is considered to be non consumptive and can be processed. I will be processing this application and it should be advertised soon.

However, the other two applications for stockwater storage are consumptive uses and we will need to hold these water rights until you submit a mitigation plan or until the current processing limitations are lifted. Many people applying for small stockwater ponds purchase storage water in the Boise River system to mitigate for the ponds. In your case you would need to purchase and retain 3-acre feet of storage for these 2 permits. In order to purchase this water you would need to contact the Boise River Watermaster, Lee Sisco at 6616 Overland Road, Boise, Idaho 83709, telephone number (208) 378-0246. The watermaster generally charges around \$5.00 per acre-foot of water per year. This generally seems like a reasonable alternative to have an application for permit processed.

For the application on Biswell Creek we will also need the estimated pond dimension to verify the volume you have requested. Please submit the length, width, and depth of each pond in feet.

MICROFILMED

JUN 22 2000

Page 2
McGrew

CONCLUSION:

I will begin processing the water right for the unnamed spring delivering water to a water trough as soon as possible. I will hold your 2 applications for permit on Biswell Creek and the unnamed stream until I receive the dimensions of the 2 ponds on Biswell Creek and the mitigation plans for both of these water rights. I will be able to hold these applications in my office for 30 days from the date of this letter so you can send the information requested to the above address C/O Dan Nelson.

If you have any questions or concerns please do not hesitate to contact me.

Respectfully,

A handwritten signature in black ink, appearing to read "Daniel A. Nelson", followed by a horizontal line.

Subject: Applications for permit requiring Planning Bureau Review

Dear Bill and Frank,

I have emailed a copy of 2 water rights to you that will need review from your department. They are 63-12565 and 63-12566, both for John McGrew. The applicant has proposed a mitigation plan of replacing the water being used for stockwater storage by purchasing storage water from Water District 63.

Thank you

Dan Nelson

Subject: Storage applications for permit

John,

I have two storage permits for you to review. They are 63-12565 and 63-12566. They are only small stockwater ponds, but one of the ponds is going to have an extremely high dam. It could be regulated. Both permits are for John McGrew. If you have any questions please let me know.

Thanks

Dan Nelson
