

MICROFILMED
SEP 30 1999

DIRECTIONS

From Boise, travel west on I-84 to the Garrity exit. Take this exit and then turn north on U.S. 30 to the intersection with Franklin Road (approximately 1/2 mile). Turn right on Franklin Road and travel east for approximately 3/8 of a mile. The Idaho Center will be located to your left as you travel on Franklin Road. There are two entrances to the Idaho Center off of Franklin Road, you will want to use the east entrance. As you head towards the Idaho Center on the east entrance, you will pass the equestrian center. The proposed well location is just north of the equestrian center and east of the entrance road.

PROOF OF BENEFICIAL USE

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 63-12543 Telephone No. 208 465-2270

2. Name(s) of Permit Holder(s): City of Nampa, Idaho

3. Mailing Address: 411 3rd. Street South Nampa ID 83651

4. Source of Water: Groundwater If **GROUNDWATER** (well), Date Drilled: mo. 11 / yr. 1999

a. Well Driller: Riverside, Inc. Drilling Permit Number: 63 - 99 - W - 0634

b. **OPTIONAL:**
Pump Horsepower: _____ Pressure (psi): _____ Dynamic pumping level (ft): _____

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): see below* Stockwater (No. and type of stock): _____

Irrigation (No. of acres): _____ Other: _____

6. Total rate of diversion and/or volume for which proof is submitted: 4.5 cfs OR _____ acre feet

7. Measuring Device Requirement: **(refer to the approval conditions on your permit and respond accordingly)**

(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required? Yes x or No _____

Has the measuring device been installed? Yes x or No _____

Flow Measurement Port: Is a flow measurement port required? Yes x or No _____

Has the measurement port been installed? Yes x or No _____

8. Fee Enclosed: \$ 200.00 (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: Tony Chavez Telephone Number: 208 465-2209

Address: 24 1st Street South Nampa ID 83651

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

Signature of permit holder: [Signature] Date: 9/20/01
(include your title, if on behalf of company or organization)

*This well is part of the municipal system serving approximate 18,000 households.

DEPARTMENT OF WATER RESOURCES

AUG 14 2000

REQUEST FOR EXTENSION OF TIME

Department of Water Resources

TO PROVIDE ADDITIONAL TIME IN WHICH TO SUBMIT PROOF OF
BENEFICIAL USE FOR A WATER RIGHT PERMIT

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time under the provisions of Section 42-204, Idaho Code in which to complete development of a water right.

Permit No. 63-12543 Well # 13

Name(s) of Permit Holder: City of Nampa, Idaho

Address: 411 Third St. South City Nampa State Id Zip 83651

Telephone No. 465-2270 Date Proof is Due: Oct 1, 2000

Describe what work has been completed toward the development of this water right:

(This must be filled out! If no work has been completed, show "none".)

The well has been drilled and developed.
Design of well ^{equipment and} housing facilities is underway
and will be let for bids in Sept. or Oct.
Construction should start in Oct with completion
approx in June, 2000 upon which time the well will be utilized. Costing \$ 350,000+

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

See the above schedule

Permit holder(s) request an extension to Sept 1, 2001

(Signature)*

*If other than permit holder, Power of Attorney must be supplied.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

IT IS HEREBY ORDERED that the above request for extension of time be

APPROVED and the time within which to submit proof of beneficial use is extended to October 1, 2001.

Signed this 16 day of August, 2000

L. Glen Saxton
L. Glen Saxton, Chief
Water Allocation Bureau

MICROFILMED

OCT 1 2001

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
INSTRUCTIONS FOR EXTENSION OF TIME REQUEST
TO SUBMIT PROOF OF BENEFICIAL USE

If the water right development authorized by your permit is not complete and you need more time to submit proof of beneficial use of water under your permit, please read the following:

Under the provisions of Section 42-204, Idaho Code, the department can extend the proof due date of your permit only once, and then only if you can demonstrate that you have been pursuing development of the permit with due diligence.

The Request for Extension of Time form requires that you indicate the extent of development that has occurred, the cost, and the reason(s) the work has not been completed. This information must be provided in enough detail to show due diligence. Examples of work performed are: well drilled, pump installed, 10 acres now irrigated, fish propagation ponds constructed, sprinkler system purchased, etc.

If no work has been accomplished, the statutes provide that the Request for Extension of Time must be denied. **Lack of financial resources, the state of the economy or personal illness usually cannot be considered adequate reasons to approve a Request for Extension of Time.**

EXCEPTIONS TO ONLY ONE EXTENSION

The proof due date for a permit that has not been developed for one of the following reasons may be granted one or more extensions of time even though no work has been accomplished:

- When there is a lack of a required consent or final approval from a federal government agency (**evidence of delay must be submitted with the request**), i.e. right-of-way easement or land classification such as Desert Land Entry or Carey Act.
- When litigation related to title of the water has prevented development of the permit (**evidence must be submitted with the request**).
- When the water project is of a large scale -- storage of more than 10,000 acre-feet or diversion of more than 25,000 acre-feet in one irrigation season for an irrigation project of at least 5,000 acres.
- When the water right permit is held by the United States of America (**reason for request must be submitted**).

A non-refundable filing fee of \$50.00 must accompany the Request for Extension of Time form.

***NOTE** that in no case should a Proof of Beneficial Use form and a Request for Extension of Time form both be submitted. If your water development project is completed, then the proof of beneficial use form should be completed and returned. If the project is started but not completed, then the Request for Extension of Time form should be completed and returned in compliance with the guidelines above. If the project has not been initiated and does not fit into one of the exceptions listed above, then neither form should be returned and the permit will lapse and become of no further force nor effect.*

Permit To Appropriate Water

NO. 63-12543

Priority: July 30, 1999

Maximum Diversion Rate:

4.00 CFS

This is to certify, that CITY OF NAMPA
411 3RD ST S
NAMPA ID 83651

has applied for a permit to appropriate water from: GROUNDWATER

and a permit is APPROVED for development of water as follows:

BENEFICIAL USE

PERIOD OF USE

RATE OF DIVERSION

MUNICIPAL

01/01 to 12/31

4.00 CFS

LOCATION OF POINT(S) OF DIVERSION:

SESW , Sec. 7, Township 03N, Range 01W
CANYON County

PLACE OF USE: See Remarks

CONDITIONS OF APPROVAL AND REMARKS

1. Proof of application of water to beneficial use shall be submitted on or before October 1, 2000.
2. Subject to all prior water rights.
3. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
4. After specific notification by the department, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
5. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.
6. The right holder shall not provide water diverted under this right for the irrigation of land having appurtenant surface water rights as a primary source of irrigation water except when the surface water rights are not available for use. This condition applies to all land with appurtenant surface water rights, including land converted from irrigated agricultural use to other land uses but still requiring water to irrigate lawns and landscaping.
7. Water bearing zone to be appropriated is from 300 to 500 feet.
8. Place of use is within the City of Nampa service area.
9. Point of diversion is known as Nampa Well #13, located in Lot 2, Blk. 1, Idaho Center.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is _____ Date _____

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. **READ CAREFULLY!**

GENERAL CONDITIONS:

1. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum of 50 feet and 100 feet respectively from a septic tank.
3. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
8. Idaho Code, S 55-2201 - 55-2210 requires the applicant and/or his contractors to contact "Digline" (DigLine is a one-call center for utility notification) not less than 2 working days prior to the start of any excavation for this project. The "DigLine" Number for your area is 1-800-342-1585.

October 10, 2001

CITY OF NAMPA
411 3RD STREET SOUTH
NAMPA ID 83651

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-12543

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. However, you have stated on the proof form that the total rate of diversion is presently 4.5 cfs. That amount exceeds the rate you are presently permitted under this right by .5 cfs. If that increase is not covered by another water right, then the City should apply for this and other future expansions under a separate permit.

The next step in the process of developing a water right is for the department to contact you to schedule a field examination to determine and confirm the use being made of the water, and that it meets the permitted beneficial use.

Be advised that Section 42-248, Idaho Code, requires you or the owner of these water rights to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

If you have questions, please contact the **Western** Regional Office of the department in Boise at (208) 334-2190, or me at (208) 327-7953.

Sincerely,

Deborah J. Gibson

PROOF DUE NOTICE

RE: PERMIT NO. 63-12543

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 01, 2001. (See last page of your approval permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

Sincerely,

Deborah J. Gibson, Admin. Asst.
Water Allocation Bureau

RE: PERMIT NO. 63-12543

Dear Permit Holder:

I have enclosed a copy of the approved request for extension of time submitted in connection with the above referenced permit which extends the time within which to submit proof of beneficial use to **October 1, 2001**. Please note that the department granted the extension based on due diligence. Therefore, it is important that you work diligently towards completion of the project since the department **may not** be able to grant future extension requests based on due diligence.

Section 42-248, Idaho Code requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact this office or any regional office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner.

Please contact the department, if you have any questions regarding this matter.

Sincerely,

Deborah Gibson

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before October 1, 2000.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

DEBORAH DREW-ELLIS
Administrative Assistant

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-12543

Dear Permit Holder:

The Department of Water Resources (IDWR) has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a preliminary order issued by IDWR pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by IDWR unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this right were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Groundwater Protection Section located here at this office or our regional office nearest you.

Also, please note that water right owners are required to report any change of water right ownership and/or change of mailing address to the department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department or visit the department's homepage on the Internet to obtain the proper reporting form.

Responding to Preliminary Orders Issued by the Idaho Department of Water Resources

The Idaho Department of Water Resources (Department) issues water right permits, licenses, and transfers as preliminary orders pursuant to section 67-5243, Idaho Code. A preliminary order can and will become a final order without further action of the department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of the order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from a preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, a preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to a preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review a preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with a preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Dear Sir:

Enclosed are copies of the above-referenced applications for permit which may be of interest to your agency. Please review the applications and submit any comments you may have.

This office normally completes the processing of an application within a six-week period and is required to take final action shortly thereafter, however, if your agency desires to file a formal protest against the approval of this application(s), your written protest along with the \$25.00 protest fee must be received in this office by September 7, 1999.

If you have any questions regarding the applications, please contact this office.

Sincerely,

Gary Spackman

RE: APPLICATION FOR PERMIT REQUEST TO PROCESS FORM PERMIT #63-12543

Dear Applicant:

Enclosed you will find an original copy of the request to process form for you to sign and return to our office. Please sign and fill out this form and return it to my office to replace the Faxed copy you sent on 8/10/1999.

Your application has been turned into advertising and should be advertised in the Idaho Press Tribune on 8/19/1999 and 8/26/1999. It will then be held for 10 days to allow time for possible protests. If this application is not protested, it will then undergo a managerial review and be sent to our State Office for approval. If this application is not protested, it should be approximately 30 days before you know the status of your application.

If you have any questions please contact me at the above address or telephone number.

Respectfully,

A handwritten signature in cursive script that reads 'Daniel A. Nelson'.

Dear Larry:

RE: Public Water System Well Site Evaluation and Design Engineering Report
1999 Municipal Well Project, Well No. 13, City of Nampa, Canyon County, Idaho

C
Included in this submittal are the required review documents for the City of Nampa's new municipal well. If you find that any of the required information is missing, please feel free to contact me (376-7330) so that we can provide you with the necessary information and documentation to complete your review.

O
As required, DEQ was contacted on April 21, 1999, to discuss potential groundwater problems in the proposed well vicinity. On this date, I spoke with Monty Marchus regarding this subject and he indicated that DEQ was not aware of any contamination problems or other environmental hazards that would immediately remove the site from consideration.

P
Directions to the site are included on the attached vicinity map. The potential well site is located in the northeast portion of the City of Nampa in an area that is experiencing continued growth in both the residential and commercial categories. As a result, the water system in this area of the city is experiencing decreased pressures and fire flow capabilities. The City has determined that for this and other reasons, a new well capable of supplementing the existing system by a minimum of 1,000 gpm is needed.

Y
The City of Nampa, via J-U-B, maintains a hydraulic computer model of the system and it was used to identify this area for the potential well in 1994. The City has regulated regional land use since that time.

The proposed well is situated on Lot 2, Block 1 as identified on the plat for the Idaho Center. The entire lot is under the control of the City of Nampa and it is the intention of the City to define the well site with an easement. The easement is shown on the site plan and is sized so that all minimum separation requirements are met.

The included site plan shows the location of the well lot and its relation to the existing improvements associated with the Idaho Center. The site plan shows that all of the minimum separation requirements are met and that no significant sources of potential contamination currently exist in the area immediately surrounding the well site.

FEMA maps were reviewed to assess the potential for flooding at the site. The site was classified as Zone C by the FEMA studies, which indicates a low potential for flooding. The Zone C classification extends in all directions from the well site for a significant distance. The nearest flood prone area is located approximately one mile to the north of the well site and is associated with Tenmile Creek. Based on this information, the threat of damage or contamination of the well as a result of flooding is not substantial.

RECEIVED
SEP 30 1999

As previously discussed, the well site is located in a growing area. Currently, the land uses on surrounding properties include commercial, agriculture and single-family residential housing. Based on a field review of the site, the current land uses appear to be compatible with the development of a municipal well on the site and does not pose an appreciable threat to water quality.

C The surface soils at the site have been classified by the Soil Conservation Service as Power-Purdam silt loams. These soils typically consist of 60 to 80 percent Power silt loam and 20 to 40 percent Purdam silt loam. However, agricultural practices and other disturbances may have resulted in different distributions. The Power soils commonly have a cemented layer at a depth of 4 to 5 feet, while the Purdam soils often have a weakly cemented layer at a depth of 20 to 40 inches. A review of well logs maintained by IDWR show that below these surface soils there are alternating layers of clays, sands and occasional gravels. Selected well logs (recorded wells within approximately ½ mile of proposed well, representative high yield wells, deep wells, and artesian wells) for the area are included in document 02681 of the technical specifications. Well logs for a much wider area, approximately 1-½ mile, were examined as part of the site evaluation, but because of their number, were not included in the specifications or this document.

O The target yield of the new well is between 1,000 and 1,500 gpm. The target aquifers for this well are anticipated to be between 300 and 500 feet. Details of the well design are shown in the attached figure. As can be seen in the figure, the surface seal is anticipated to extend to a depth of 300 feet. The surface seal will terminate 10 feet into a confining unit near this depth to seal out any overlying aquifers. Based on the review of local well logs, almost all of the surrounding wells are completed at depths of less than 200 feet and few are in excess of 300 feet deep. By extending the surface seal to this depth, the upper aquifers utilized by most wells in the area are isolated from the proposed well target aquifers, reducing the opportunity for cross contamination. This separation of aquifers will also provide the benefit of reducing the impacts to water levels in local wells as a result of pumping.

P
Y The detail of the proposed well also identifies the anticipated casing configuration and sizing. With the shown configuration and assumed static water level, over 250 feet of available drawdown will be created and the casing size of 20 inches provides adequate room for the bowls of a pump that meets the project requirements. The screen casing was sized to reduce head losses to acceptable levels and to provide sufficient open area across the screens to maintain acceptable entrance velocities. Based on these criteria, a 12-inch casing was selected as the most cost-effective option. The criteria and procedures for selecting and designing the slot size for the screens and the filter pack material are detailed in the technical specifications and are controlled by the gradation of the water bearing stratum as discovered during drilling. At the transition from the 20-inch to the 12-inch casing, a minimum overlap of 20 feet is specified. This feature is included in the design to prevent potential heaving material from entering the 12-inch casing. As an additional measure to prevent heaving and to provide an additional seal, packers will be placed at the transition.

Based on discussions with DEQ, there are no known aquifer contaminations in the area and groundwater quality is generally considered acceptable. The upper aquifers in the area are susceptible to contamination from agricultural practices and surface water, but should not pose a significant threat to the target aquifers. The target aquifers for the proposed well are separated from the surface by confining layers that serve as protection from potentially contaminated water table aquifers.

There is one recorded well just over 500 feet from the proposed well. The identified well is an irrigation well that exists within the boundary of the Idaho Center. It is our belief that this well is approximately 175 feet deep. The location of this well is identified on the site plan. There are no other known projects within one mile of the proposed well location that will impact groundwater quantity or quality. There is currently a new gas station that is under construction approximately 1/2 of a mile south and west of the proposed well site. Considering the distance to the gas station, the depth of the surface seal, the anticipated groundwater flow direction, and the construction standards for new gas stations, the threat of contamination from this source is not substantial.

P
Y
The City does not have a well head protection plan and the protection of municipal wells is achieved through siting and design. The previously discussed design was created considering this and contains features to address well protection. Primarily, protection of the well is provided by sealing out the upper aquifers, which are utilized by most other users. This prevents cross contamination between the aquifers. Additional protection features included in the well design include the intermediate seals that separate the filter pack for different screen intervals. This will provide future flexibility in the well if one of the screened aquifers becomes contaminated at a later date. If this occurs, this screened interval can be isolated from the well and the well can continue to serve as an acceptable water source, at a potentially lower production rate.

There are two existing ditches that are located approximately 100' to the east of the proposed well location. Using the groundwater under the Direct Influence (GWUDI) criteria, the well should be evaluated for six months, per procedure II of the GWUDI Evaluation Procedure. However, considering the nature of the surface water, the depth of the surface seal, and the presence of confining layers as noted on nearby well logs, the potential for the target aquifers to be under the direct influence of surface waters is low. We would like to discuss this issue further with you during your field evaluation and determine feasible options.

Based on the review of the pertinent data, site investigations, and information provided by the state, it has been determined and is recommended that the proposed site be utilized for a public water supply well.

Sincerely,

J-U-B ENGINEERS, Inc.

DIRECTIONS

From Boise, travel west on I-84 to the Garrity exit. Take this exit and then turn north on U.S. 30 to the intersection with Franklin Road (approximately 1/2 mile). Turn right on Franklin Road and travel east for approximately 3/8 of a mile. The Idaho Center will be located to your left as you travel on Franklin Road. There are two entrances to the Idaho Center off of Franklin Road, you will want to use the east entrance. As you head towards the Idaho Center on the east entrance, you will pass the equestrian center. The proposed well location is just north of the equestrian center and east of the entrance road.

Idaho Department of Water Resources
2735 Airport Way
Boise, ID 83705

Dear Mr. Whitney:

RE: City of Nampa, Municipal Well No. 13

Enclosed are the drilling permit application, the application to appropriate the public waters of the State of Idaho, and the associated fees for both items. Also included are copies of the materials sent to the Division of Environmental Quality for their review of this project.

As can be seen from the enclosed materials, the well design is such that the screened or filter-packed interval of the well may exceed 25% of the total well depth. The actual depth of the well and the length of the filter pack will be determined during construction.

At this time, we are not aware of any investigations, studies, reports, or other documentation that indicate limiting the filter packed length to 25% of the total well depth will prevent cross-contamination between aquifers. Previous requests to the Idaho Department of Water Resources (IDWR) for this type of information have not resulted in detailed responses.

If you intend to add this condition to the drilling permit, we request that prior to granting the drilling permit, we may hold a meeting with you and other appropriate individuals within IDWR, as well as representatives from the City of Nampa, so that we and the City can obtain a full understanding as to the necessity for such a condition and its technical merits. We feel that it is important for the City to understand the reasoning involved with imposing such a condition because of the potentially significant economic impact it may have on the City.

J-U-B is interested in working with IDWR to resolve this issue to all parties' satisfaction. We would like to start working on this issue now so that it does not interfere with construction, once it begins. Please notify me by mail of your decision and, if necessary, we will make the arrangements for any appropriate meetings. If we can be of any assistance, please contact us at 376-7330.

Sincerely,

J-U-B ENGINEERS, Inc.

Legal Notices Department
Press-Tribune
P.O. Box 9399
Nampa, ID 83652

Dear Legal Dept.:

Enclosed you will find a legal notice which we wish to have published on the dates indicated (once a week for two consecutive weekly issues) in your newspaper. If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Your cooperation is appreciated.

Please send the affidavit of publication and publication billing to this office before SEPTEMBER 7, 1999.

Yours truly,

SUE TAYLOR
Secretary/Office Coordinator

Encl.

CITY OF NAMPA

Diversion Pt: SESW Sec 7 T 03N R 01W in CANYON County.

```

Use: MUNICIPAL ( 4.000 CFS)
      Total Diversion: ( 4.000 CFS)

```

Date Filed: 7/30/1999

T R S00

Applicant agrees to mitigate consumptive use in the future if needed to use water from the 300 to 500 foot water bearing zone for municipal use in the City of Nampa service area.

Permits will be subject to all prior water rights. Protests may be submitted based on the criteria of Sec. 42-203A, Idaho Code. Any protest against the approval of this application must be filed with the Director, Dept. of Water Resources, Western Region, 2735 Airport Way, Boise, Idaho 83705 together with a protest fee of \$25.00 for each application on or before SEPTEMBER 7, 1999. The protestant must also send a copy of the protest to the applicant.
