DOUG GULBRANDSEN 841-7106

State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 63-12527

Priority: 02/24/1999

Maximum Diversion Rate: 0.10 CFS

This is to certify, that IRVING J RAY
615 N WINDSOR
MESA AZ 85213

has applied for a permit to appropriate water from:

Source: GROUND WATER

and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/01 to 11/15	0.10 CFS

LOCATION OF POINT(S) OF DIVERSION:

GROUND WATER NW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec. 32, Twp 05N, Rge 01W, B.M. ADA County

PLACE OF USE: IRRIGATION

Twp	Rge	Sec	NE				NW				SW				SE				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
05N	01W	32							1.0					4.0					5.0

Total Acres: 5

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before June 1, 2005.
2. Subject to all prior water rights.
3. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.
4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
5. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
6. The Director retains jurisdiction to require the right holder to provide additional purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.

JUN 1 1999

State of Idaho
Department of Water Resources
Permit to Appropriate Water
NO. 63-12527

CONDITIONS OF APPROVAL

7. As mitigation for the consumptive use of water under this right, the right holder shall annually lease 15.0 acre feet of storage water within Boise River storage facilities for release into the Boise River by the watermaster of Water District 63 throughout the irrigation season. The right holder is not authorized to divert water under this right each irrigation season until storage water is leased.
8. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
9. Water bearing zone to be appropriated is 380 to 430 feet.
10. Point of diversion and place of use is located within Lot 5, Blk. 1, Chukar Point Subdivision.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 23rd day of May, 2002

RE: Water Appropriation Permits 63-12527 through 63-12530

Dear Mr. Ray:

I am responding to your June 13, 2002, request to rearrange the lots on which your water appropriation permits will be developed. As you requested in your May 10, 2002, letter, IDWR issued the following permits in the name of Irving J. Ray.

63-12527	Chukar Point Lot 5, Block 1	5 acres of irrigation
63-12528	Chukar Point Lot 4, Block 1	5 acres of irrigation
63-12529	Chukar Point Lot 1, Block 1	5 acres of irrigation
63-12530	Ray Estates Lot 2	5 acres of irrigation

According to your letter, you wish to rearrange the permits to cover ten acres on Chukar Point Lot 2, Block 1, five acres on Chukar Point Lot 3, Block 1, and five acres on Chukar Point Lot 4, Block 1.

Because you are not contemplating a change to Chukar Point Lot 4, Block 1, no action is necessary on Permit 63-12528.

On 63-12530 you are not contemplating a change other than the name change from Ray Estates Lot 2 to Chukar Point Lot 2, Block 1. I will place of copy of your letter in the water right file to show your intent, and next time IDWR takes official action on 63-12530, such as issuing a water right license, the lot name will be changed on the water right document.

Because the point of diversion and place of use for 63-12529 are in the SW $\frac{1}{4}$ NW $\frac{1}{4}$, S32, T5N, R1W, B.M., an amendment of permit is not required to develop the water use on Chukar Point Lot 2, Block 1. I will place of copy of your letter in the water right file to show your intent, and next time IDWR takes official action on 63-12529, such as issuing a water right license, the lot name will be changed on the water right document.

MICROFILMED

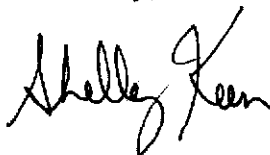

SEP 23 2002

Stan Ray
June 18, 2002
Page 2

As for changing 63-12527 to cover Chukar Point Lot 3, Block 1, an amendment is required if the point of diversion (well) will be within the SW $\frac{1}{4}$ NW $\frac{1}{4}$, S32, T5N, R1W, B.M., which corresponds to the northern half of the lot. Otherwise an amendment of permit is not required. I have enclosed an amendment application form for you.

If you have any questions, please call me at 208-327-7946, or email me at skeen@idwr.state.id.us.

Sincerely,

Shelley Keen
Water Rights Supervisor

RE: APPLICATION FOR PERMIT NOS. 63-12525 THROUGH 63-12531

Dear Mr. Saxton,

This letter is to correct the letter sent to you on May 10, 2002. We are changing the water allocations for the Chukar Point Subdivision. We have been approved for 4 applications at 5 acres irrigated and would like to allocate the water accordingly;

Chukar Point Lot 2, Block 1 - 10 acres irrigation rights - (2 applications of 5 acres each)
Chukar Point Lot 3, Block 1 5 acres irrigation rights
Chukar Point Lot 4 Block 1 5 acres irrigation rights

I hope this does not cause any problems. We have sold Lot 2 and they are requesting the entire 10 acres have the full water rights for that lot.

Please let me know if you have any questions.

Thank you,

Stan Ray/Owner

RE: Permit No. 63-12527

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

The Department will send you a 'Proof Due Notice' approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this water right permit were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Ground Water Protection Section located here at this office or our regional office nearest you.

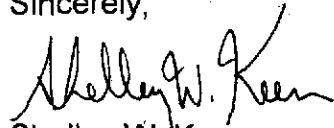

MICROFILMED

MAY 24 2002

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen

Water Rights Supervisor

615 N WINDSOR
MESA AZ 85213**

**Kari Lynn Townsend
Secretary**

**MICROFILMED
SEP 23 2002**

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

MICROFILMED

SEP 2 8 2002

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

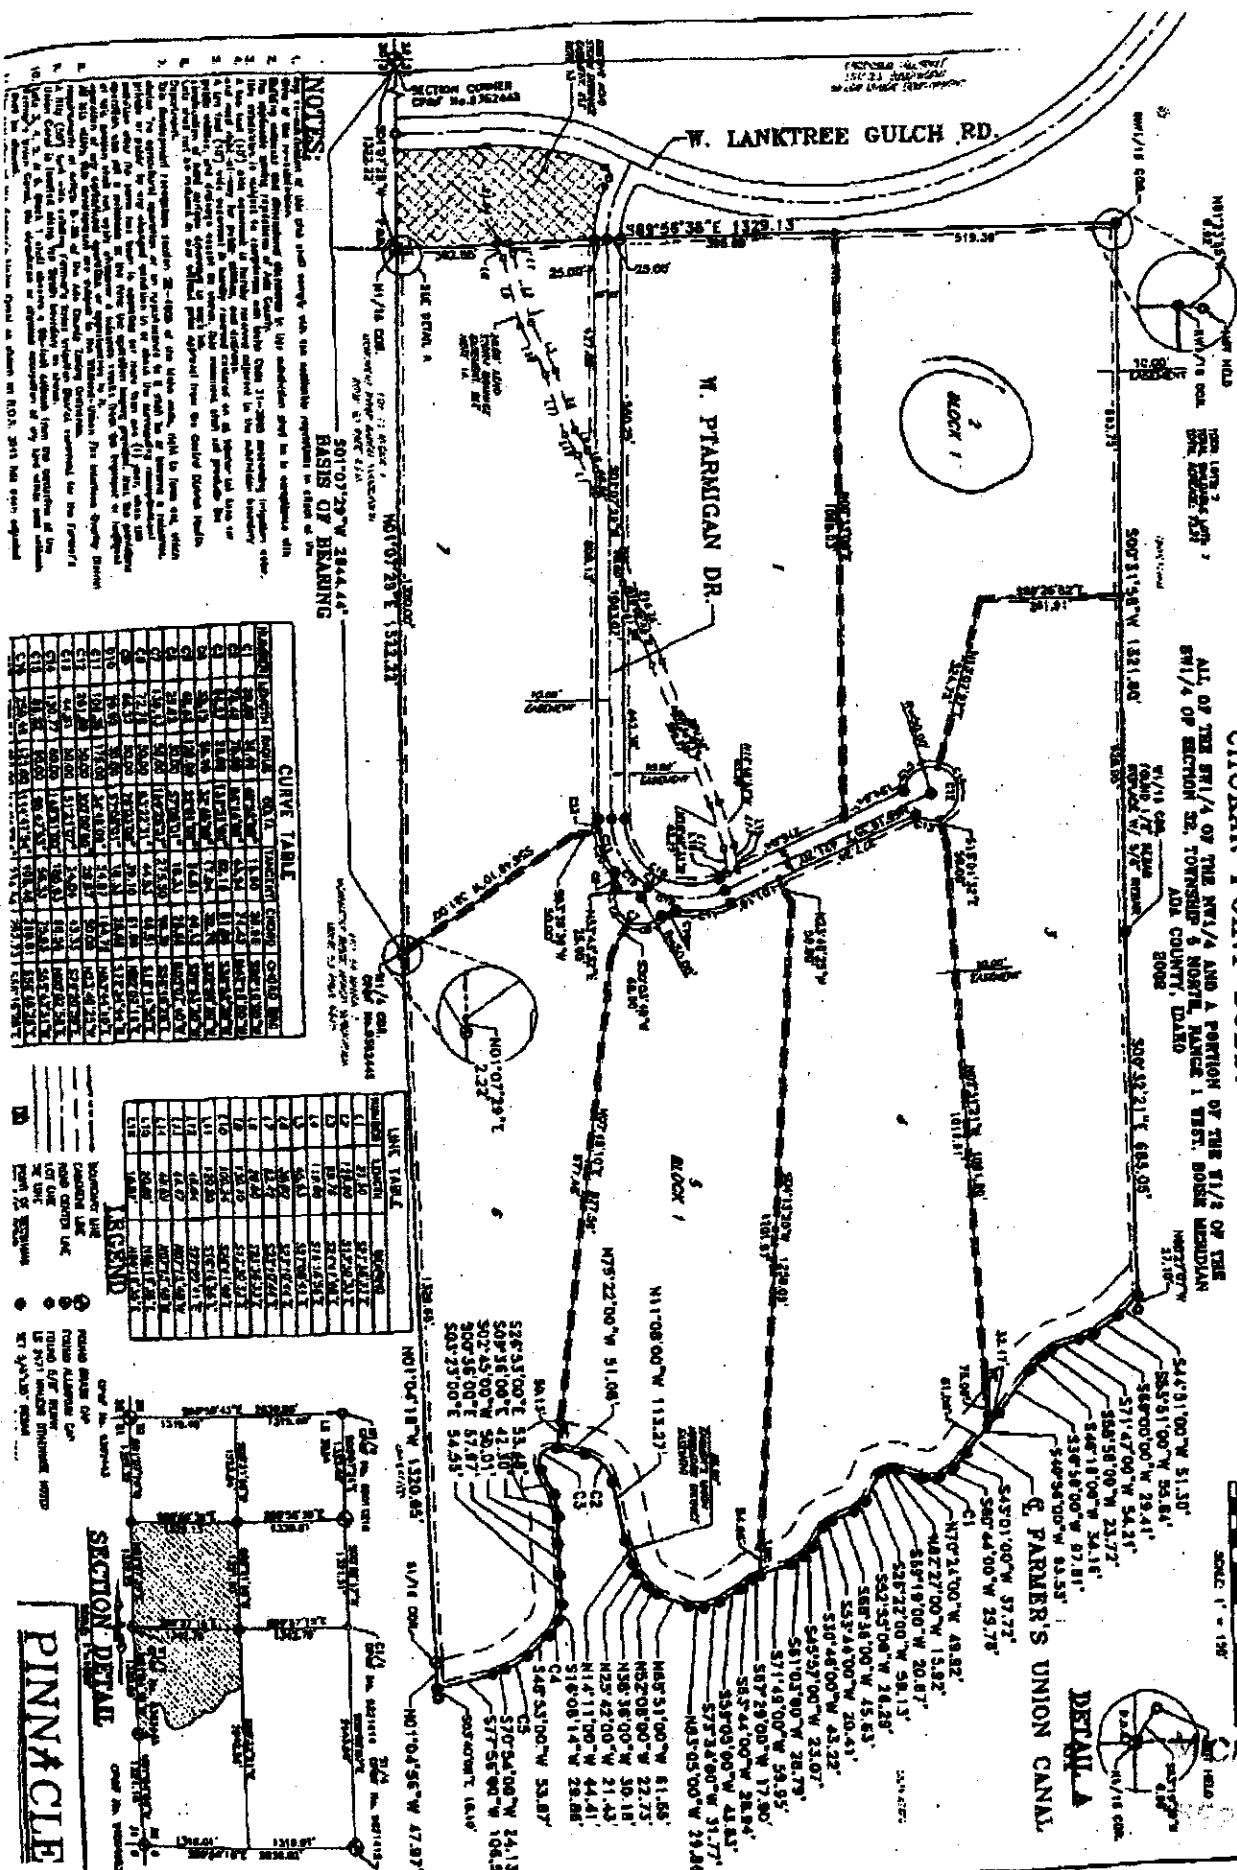

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: APPLICATION FOR PERMIT NOS. 63-12525 THROUGH 63-12531

Dear Mr. Saxton,

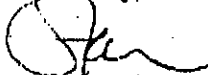

This letter is in response to your letter December 21, 2000. In your correspondence with Mr. Hitchcock you stated that we had the flexibility to obtain approval for 4 applications if we reduced the acreage to be irrigated to 5 acres per application. We have reviewed this matter and we would like to proceed with the applications for the 4 following lots to be irrigated at 5 acres per application.

The lots that we would like to proceed with are:
Chukar Point Lot 1, Block 1
Chukar Point Lot 2, Block 1
Chukar Point Lot 4, Block 1
Chukar Point Lot 5, Block 1
See attached plat map of subdivision

Please let me know of your approval of these lots as soon as possible. We are anxious to resolve this matter.

Thank you for your time and patience concerning this matter.

Sincerely,

Re: Applications for Permit Nos. 63-12525 thru 63-12531

Dear Mr. Hitchcock:

As we discussed on the telephone last week, here is the list of subdivision lots as they were entered into our computer system them under each of the water right applications referenced above.

Application for Permit No.	Lot No.
63-12525	7
63-12526	6
63-12527	5
63-12528	4
63-12529	1
63-12530	2
63-12531	3

I hope this information will be helpful for your future reference.

Application 63-12530 is now being prepared for permit approval for irrigation of 5 acres associated with Lot 2, per the reductions you requested in your letter of March 8. I hope to send the approval document next week.

If I can be of further assistance, please let me know.

Sincerely,

SHELLEY W. KEEN

RE: Water Permit Applications 63-12525, Through 63-12531,

Dear Mr. Saxton:

Thank you for your response dated 22 February. Though we do not have a plan for all of the lots since we have not acquired additional water for mitigation for the remaining five sites, we would like to proceed in the following manner.

We would like to assign the applications to the lots. Application number 63-12525 would be assigned to lot number one (1) and then continue up to application 63-12531 for lot number seven (7).

We would like to proceed with the processing of application number 63-12526 (for lot number two (2)) in the amount sufficient to cover 5 acres instead of the 10 acres requested in the original application. We have identified a buyer for that lot and he has indicated that five acres is the maximum amount of acreage he would be interested in irrigating. Therefore we would like to revise that application to be for that amount.

We would like to defer to the future the processing and the amount to be allocated for the remaining permits. If there is anything additional we need to do or if you require additional information, please let me know. Thank you for your efforts.

Sincerely,

Michael Hitchcock

RE: APPLICATION FOR PERMIT NOS. 63-12525 THROUGH 63-12531

Dear Mr. Hitchcock:

I have reviewed your letter dated December 15, 2001 in connection with the above referenced applications. You have asked about flexibility in the approval process of applications for permit. Reductions to applications in rate, volume or amount of land to be irrigated are generally easy to make, if the applicant advises the department prior to the time a permit is issued and usually do not require an amendment of the application or a new notice as some changes require.

Mr. Ray has obtained sufficient mitigation for the approval of 2 of the applications if the acreage of the 2 applications remains at 10 acres. If the acreage to be irrigated is reduced to 5 acres per application, the mitigation is sufficient to approve 4 of the applications and so on.

The department will hold the 7 applications without action until Mr. Ray decides whether he wants to reduce the number of irrigated acres on the applications and in what amounts.

If you have questions, please feel free to contact me.

Sincerely,

L. GLEN SAXTON, P.E.

RE: Water Permit Applications 63-12525, Through 63-12531,

Dear Mr. Saxton:

Thank you for your response dated 16 November. Irving is still actively pursuing additional water for mitigation for the remaining five sites.

I do have some additional questions. As I spoke with Irving about which of the lots to move forward with the applications on, several concerns arose. 1) Is there a way that the processing can continue and we are able to designate the specific lot number at a latter day, possibly even up to the time just prior to drilling the well? Since we do not have specific buyers identified, we do not know which lot our first buyers will want or even if they have any interest in irrigating their lot. 2) If a buyer wants to irrigate only a small portion of their lot, say 1-2 acres, is there a way we can change the application for that lot and then use the water we have secured toward one of the other applications? These lots have beautiful views, but some of the terrain will not easily be irrigated. At this time, we are still not sure how much of their property the owners will want to irrigate. Our original intent was to cover the entire area, but since we are finding it difficult to secure water, we may need to consider alternative plans.

I suppose all this can be summed up by saying I would like to know what type of flexibility there is in processing the applications. Can we alter the existing applications, or would we have to start all over again.

Thank you very much for your indulgence to our learning process. We very much appreciate your patience in working with us.

Sincerely,

Michael Hitchcock

RE: APPLICATION FOR PERMIT NOS. 63-12525 THROUGH 63-12531

Dear Mr. Hitchcock:

I have reviewed your letter dated November 11, 2001 in connection with the above referenced applications together with the attachment showing that you have secured 60 acre feet of stored water to be offered as mitigation each year for a 10-year period. This longer lease period allows the department to further consider approval of 2 of the 7 pending applications.

Mr. Ray visited this office on November 14, 2001 with a copy of your letter and met with me. I told Mr. Ray that he would need to identify which 2 of the 7 applications he wanted to be further considered for approval. Approval will be conditioned that the permit holder retains access to the mitigation water that will be released and used in a manner determined by the Boise River watermaster. Your mitigation plan does not need to show exactly how this water will be used to recharge ground water as I previously indicated to you in my September 18, 2001 letter.

In order for the department to consider action on the other 5 applications, Mr. Ray needs to obtain additional water for mitigation in the amount of about 3 acre feet per acre of land to be irrigated on each application. Mr. Ray said he is actively seeking to find and acquire additional water to be used for mitigation.

If you have questions, please feel free to contact me.

Sincerely,

L. GLEN SAXTON, P.E.

RE: Water Appropriation Applications 63-12525, 63-12526, 63-12527, 63-12528, 63-12529, 63-12530, and 63-12531,

Dear Mr. Saxton:

Thank you for your response relative to the above mentioned applications. Relative to the concerns you have raised, I offer the following response.

1. Sixty acre-feet of storage water is not adequate mitigation for all seven applications. Sixty acre-feet is adequate mitigation for only two of the applications.

Response: Irving Ray and myself are currently in the process of securing the additional water required to address the needs for the five applications not covered. It is our desire that the applications for the two wells proceed at this time and we will provide the necessary documentation for the additional five applications in the near future.

2. How will the acquisition of storage water make up for the depletion of ground water? Most mitigation plans involving surface water offer some means of recharging the ground water through direct injection or seepage. Simply releasing water from storage does little for the conservation of ground water in the Treasure Valley.

Response: In our initial conversations with Mr. Norman Young, it was our understanding that the principle concern for the water usage was to support wildlife in areas downstream from the Treasure Valley area. Having the water seep back into the valley at the point directly south of the area we purpose for the irrigation wells is a very simple matter. The party we have secured the water from owns property adjacent to the proposed well sites and is willing to have the water seep back into the valley at numerous points there. If that is the preferred solution, I will gladly provide you with documentation in whatever format would suit you requirements.

3. The term of the lease for the mitigation water is only two years. What is your plan to mitigate water use after two years? IDWR is concerned that after two years, the new lot owners may be unable to obtain mitigation water and will, therefore, have to cease irrigating.

Response: Again, based upon our initial conversations with Mr. Norman Young, it was our belief that the moratorium on irrigation wells for the Treasure Valley area was of a limited time frame. Since the exact duration is unknown, the lease agreement for the mitigation water is for two years, with the option to renew the lease as needed following that period. We have spoken to the Fullers, and if needed, they are willing to reword the lease agreement to specifically cover a period of ten years and then provide the option to renew as needed. Please advise as to what IDWR requires relative to this concern.

RE: Water Appropriation Applications 63-12525, 63-12526, 63-12527, 63-12528, 63-12529,
63-12530 and 63-12531

Dear Mr. Ray:

The Department of Water Resources is reviewing the seven applications you submitted for new irrigation water rights in the Treasure Valley. Each of the applications proposes the irrigation of a 10-acre parcel from ground water. As you know, IDWR is not currently processing applications for new consumptive uses of ground water in the Treasure Valley unless the applicant provides a plan for mitigating the ground water depletion proposed in the application. Evapotranspiration in the Treasure Valley can result in the consumption of up to 3.5 acre-feet per acre of irrigated pasture. As shown on the enclosed data sheet, the irrigation requirement (evapotranspiration minus effective precipitation) is approximately 887 mm, or 2.9 feet, per season in the Boise area. Approval of each of your 10-acre applications could result in an annual depletion of 29 acre-feet, or 203 acre-feet for all seven applications. So far, you have offered 60 acre-feet of storage water, which you have leased for two years, to mitigate for the depletion of ground water proposed in the seven applications. Therefore, IDWR has the following three concerns about your mitigation proposal.

- Sixty acre-feet of storage water is not adequate mitigation for all seven applications. Sixty acre-feet is adequate mitigation for only two of the applications.
- How will the acquisition of storage water make up for the depletion of ground water? Most mitigation plans involving surface water offer some means for recharging the ground water through direct injection or seepage. Simply releasing water from storage does little for the conservation of ground water in the Treasure Valley.
- The term of the lease for the mitigation water is only two years. What is your plan to mitigate water use after two years? IDWR is concerned that after two years the new lot owners may be unable to obtain mitigation water and will, therefore, have to cease irrigating.

You may wish to consult with an irrigation expert or other qualified professional to further refine your mitigation proposal. Meanwhile, IDWR will hold your applications for 60 days to allow you

Re: *Application for Permit Nos. 63-12525 through 63-12531
for Chukar Point Subdivision*

Dear Mr. Hitchcock:

I am writing to follow up on our telephone conversation of July 2, 2001 regarding the above referenced applications. We discussed additional information necessary for application processing to continue.

You indicated you could supply the information soon. Please note the following items with respect to processing the seven applications for the proposed subdivision.

1. The *water bearing zone to be appropriated* should be identified. This information is required before the applications can be published in the legal notices of the local newspaper.
2. A *current subdivision plat for Chukar Point* should be submitted. The plat can be supplied later in the application process and will not delay publication of the filings in the newspaper. An 8.5 x 11 inch plat would be ideal but other sizes are fine.

Please submit the above requested information within thirty (30) days of the date of this letter. If the information is not timely submitted, the applications will be removed from the records of this agency. Thank you for your attention to these matters, and please call me at 208-334-2190 if I can provide any help.

Sincerely,

Steve Lester
Water Rights Supervisor

Steve,

Application 63-12527 was filed in February for irrigation from groundwater in Basin 63. It showed up in the recent new filings report. Should it have gotten a T flag?

RE: SEVEN APPLICATIONS FOR PERMIT

Dear Mr. Ray:

You recently replaced one application for permit to appropriate ground water for a consumptive use with seven similar applications. The similar filings involve separate wells to irrigate ten acres per well, all in Ada County. Application processing must be delayed.

Due to continued drought and to protect existing water rights and water supplies, the Director of this agency declared a moratorium on May 15, 1992 concerning water right applications proposing new consumptive uses of public water, regardless of source. The moratorium was lifted in May 1995, but application processing was subsequently suspended until technical data are available from the Treasure Valley Hydrologic Study now underway.

This office will hold your application and will resume processing as soon as possible based on the above considerations. Applications received will be processed in priority order. Delays related to department actions do not affect the date of priority or seniority of an application.

You paid \$360 in filing fees for this situation. The fee for this situation is \$350. A \$10 refund will be sent to you under separate cover sometime soon.

Please contact me at 334-2190 if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Steve Lester'.

Lori Grace
Water Resources
2735 Airport Way
Boise, ID 83705

Dear Lori,

I am enclosing a plat of 7 lots in a subdivision just north of Star, Idaho. I had talked to Jan in your office several times and made an application for one large pump. This transpired in the early Fall.

In trying to formulate covenants and regulations for the lots and water delivery, I realized that a simpler water saving and delivery system was necessary. This would be solved by drilling a smaller well at each site to supply the lot with both irrigation and house water.

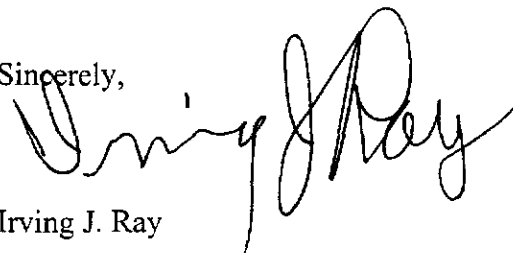

With this system it would allow each person to choose the time and place they want to sprinkle or run their drip systems. The 70 acre ft. allotted to the subdivision would be divided by the 7 lots. This would equal about 100 gpm to each lot. Each person could sprinkle 5-8 acres with their own lines laid in the size and shape they want.

The house site would be marked on the plot plan. The well will be drilled close to each house so that a fire water line, with connector, will act as a fire hydrant for each house. This will allow a fire truck to have water available in an emergency.

The advantages of individual pumps are: it will cost less to irrigate, it is more convenient to irrigate when they desire, it will use less water, and offer added safety. It will also greatly decrease any problems with water use among the subdivision.

I hope you will be able to see this change from 1 large well to 7 smaller individual wells as a positive one.

Sincerely,

Irving J. Ray

P.S. I have marked in red, possible sites for wells. The round circles are possible home sites.

REQUEST TO PROCESS

COMPLETE REQUEST IF YOU WANT YOUR APPLICATION TO BE PROCESSED USING ONE OF THE
THREE ALTERNATIVES BELOW

Name of Applicant IRVING J. RAY
Mailing Address 615 N WINDSOR
MESA, AZ 85213
Application No. ~~63-12472~~
(if known)

☐ IN LOCAL PUBLIC INTEREST

Yes, I want my application processed and before it is advertised, I will amend my application to demonstrate that the proposed appropriation is in the local public interest including the need to preserve flows in the Snake River during the migration periods of anadromous fish.

☐ PROPOSE MITIGATION NOW

Yes, I want my application processed and before it is advertised, I will amend my application to include proposed mitigation to offset anticipated depletions in the Snake River during periods of anadromous fish migration.

☒ WILL AGREE TO MITIGATION IN THE FUTURE IF NECESSARY

Yes, I want my application processed at this time, and I will accept a condition of approval that will require mitigation should the Director of the Idaho Department of Water Resources determine that mitigation is necessary to offset depletions from this appropriation to flows in the Snake River during periods of anadromous fish migration. I understand that mitigation is not required now but may be needed in the future. I also understand that the Director will not require mitigation until I have an opportunity to review the process by which the need for mitigation is established and the amount of water required is quantified.
