8. POSSIBLE CONTAMINATION SOURCES:

Is there evidence of Chemigation? ☐ Yes ☒ No

If yes, is there a check-valve present? ☐ Yes ☐ No

Is there a possible source of contamination nearby? ☐ Yes ☒ No

If yes, what Type? _____

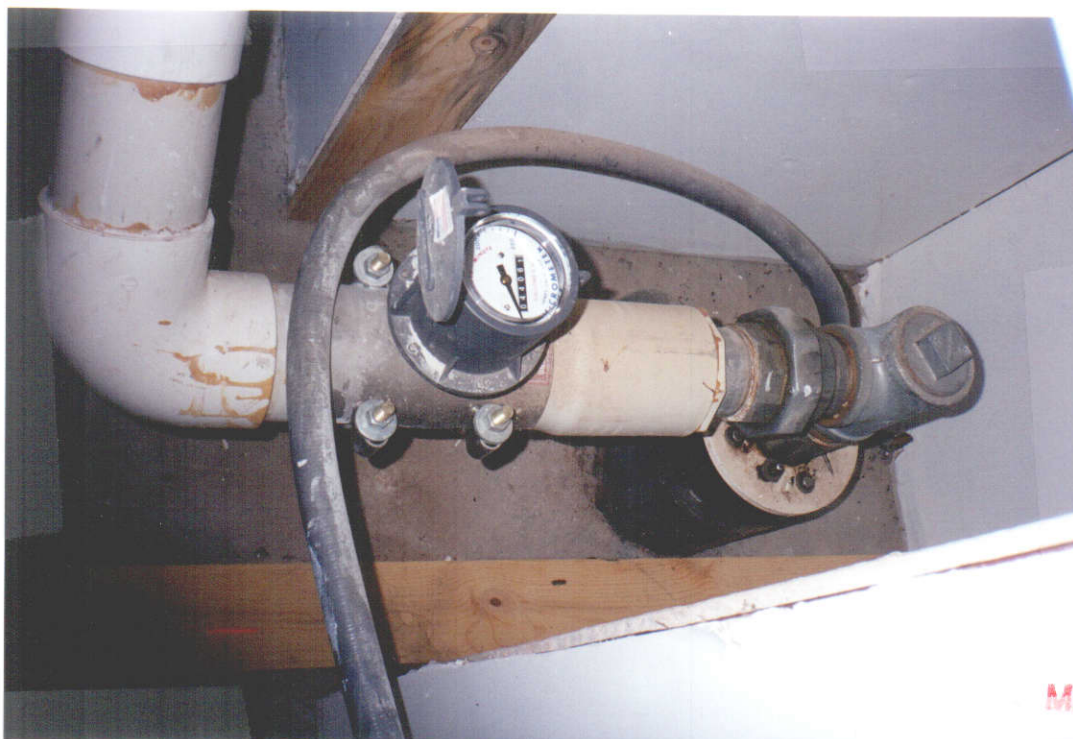

How far away from the well is this source? _____

9. REMARKS: This well is one of two wells that
serve the water system for Sky Ranch
Estates. It was originally just for
WR 63-12374, but now it serves the Plu
for the 4 rights listed, along with well #2.

8. POSSIBLE CONTAMINATION SOURCES:

Is there evidence of Chemigation? ☐ Yes ☒ No

If yes, is there a check-valve present? ☐ Yes ☐ No

Is there a possible source of contamination nearby? ☐ Yes ☒ No

If yes, what Type? _____

How far away from the well is this source? _____

9. REMARKS:

This well, along with well #1, serves the water system for Sky Ranch Estates. The well was originally drilled under WR 63-07778B, which was an irrigation right transferred (A part of the right) to the subdivision. The well, + well #1, now serve the 4 rights listed.

RE: License No. 63-12374 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

Enclosed is a copy of the approved Application for Amendment.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen

Water Rights Supervisor

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

MICROFILMED
JUN 07 2007

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Water Right Permit Nos. 63-12374, 63-12381, 63-12382 and 63-12383

Dear Permit Holders:

The Department of Water Resources is reviewing the permits referenced above prior to issuing water right licenses. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permits have been developed differently than described on the permits. Changes that do not increase the authorized use of water under the permits can be requested and approved in accordance with Section 42-211, Idaho Code. Before licenses can be issued, your permits must be amended to depict your water use as actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permits:

Permit No. 63-12374 – Developed 2 wells instead of one.

Permit Nos. 63-12381 and 63-12382 – Change location of well and add second well.

Permit No. 63-12383 - Developed 2 wells instead of one and add a place of use

The enclosed Application for Amendment forms depict the elements of the water rights as they will appear on the licenses when issued. Please review the amendment forms carefully. If you concur with the information presented, please sign the forms and return them with a **\$50.00 filing fee, per amendment form**, within 14 days.

I have also enclosed four assignment of permit forms with this letter. Please note that the assignment of permit forms should be used if you wish to change the name on these permits before the licenses are issued. If you decide to wait to change the name until after the licenses are issued you should then use the Notice of Change of Water Right Ownership forms that you told me you had received. The fee for submittal of the assignment form is \$25.00 for each permit.

RE: License Review

Date: April 27, 2001

.....

In review of these permits for licensing I had a question about the number of homes to be licensed under Permit 63-12383. The examiner had reported there were 8 homes under this permit but only described 7 lots. I discussed this with the examiner and he was not certain if Lot 15, Block 1, had a home on it or if it had been developed as a park as shown on pre-development map prepared by Steve Lester. I contacted Jim Schelhorn who stated that there was a park on Lot 15, not a home. In light of this, I am licensing these permits for use in 32 homes rather than 33 recommended by the examiner.

Mr. Schelhorn also stated that they were going to assign these rights over to the home owner's association. He said he had requested and received a "Notice of Change of Water Right Ownership" form to accomplish this. I advised him that if the permits were assigned before licenses were issued, we would need to have "Assignment of Permit" forms rather than the forms he had received. I told him I would send assignment forms out with the licensing amendment requests.

Total Acres: 79

Conditions of Approval:

1. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. T17 Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
3. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
5. T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
6. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

Remarks:

1. General Two points of diversion are located within NESE, S14, T02N, R03W within Lots 5 & 28, Blk. 1, Sky Ranch Estates. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the

date of this approval.

Place of use is located within Lots 1-28, Blk. 1; and Lots 1-9, Blk. 2; Sky Ranch Estates.

The total instantaneous diversion of water from all points of diversion under Transfer 5664 shall not exceed 1.01 cfs, nor total combined annual volume of 355.5 af.

F. FLOW CALCULATIONS

Measured Method: None - Theoretical Cal.

Additional Computation Sheets Attached

Pump Curves

$$\text{Well \#1: } Q_1 = \frac{(8.8)(20 \text{ HP})(70.2)}{270' + (65 \text{ PSI}) \left(\frac{34'}{14.7 \text{ PSI}} \right)} = 0.29 \text{ cfs}$$

$$\text{Well \#2: } Q_2 = \frac{(8.8)(60 \text{ HP})(70.2)}{300' + (45') \left(\frac{34'}{14.7} \right)} = 0.91 \text{ cfs}$$

Well #1, TPDH = 420' @ 65 PSI

$$Q_1 = 145 \text{ GPM} = 0.32 \text{ cfs}$$

Well #2, TPDH = 404' @ 45 PSI

$$Q_2 = 425 \text{ GPM} = 0.95 \text{ cfs}$$

Total 1.27 cfs

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) =$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 =$$

$$V = \text{Smaller of } V_{IR} \text{ and } V_{D.R.} =$$

2. Volume Calculations for Other Uses:

Internal Domestic:

$$33 \text{ Homes @ } 0.6 \frac{\text{AFA}}{\text{Home}} = 19.8 \text{ AFA}$$

Div. Rate: 33 Homes

Multiple Domestic rate allowed for 33 Homes = 0.27 cfs.

Total of 4 permits = 0.53 cfs.

Irrigation Transfer = 1.01 cfs

(63-07778B)

Both Pumps can deliver 1.27 cfs + ; depending on Pressure.

H. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	<u>Domestic (D)</u>	Period of Use	Rate of Diversion	Annual Volume
		From To	Q (cfs)	V (afa)
63-12374	D	01/01 12/31	0.15	5.4 (9 Homes)
63-12381	D	01/01 12/31	0.13	4.8 (8 Homes)
63-12382	D	01/01 12/31	0.13	4.8 (8 Homes)
63-12383	D	01/01 12/31	0.12	4.8 (8 Homes)
Totals:			0.27	19.8 (33 Homes)

Note: 1.01 cfs (I) + 0.27 cfs (D)

2. Recommended Amendments

= 1.28 cfs $\approx$ 1.27 cfs Total of both wells.

E. NARRATIVE/REMARKS/COMMENTS

63-12374, -81, -82, -83

1. This report covers the 4 Permits listed. Originally, development of the Sky Ranch Estates was to have just one well located in well lot 28, now called Well #2. Later, the owners decided to have 2 wells; then they wanted to have 4 wells because they were concerned about the production of wells in this area. As a result, they filed for the 4 water rights covered in this report. They planned to have each of the 4 wells serve 8-9 homes in the estate with separate water systems, as shown on the individual permits.
2. They actually developed the wells for WR 63-12374, Well #1, and WR 63-12383, Well #2, and designed the water system to serve the entire subdivision from these two wells. Proof of Beneficial Use was filed on these two rights on July 2, 1999, and the field exam was conducted on Sept. 21, 1999. At the time of the field exam, the owners said that they did not plan to drill the other 2 wells, and would probably sell the water system to United Water. The well for 63-12381 was to be in well lot 16, Blk 1, and for 63-12382, it was to be in well lot 3, Blk 2.
3. Jim Schelhorn(owner) then came into Western Region Office and filed Proof of Beneficial Use for 63-12381 and 63-12382 on Sept. 24, 1999. He also filed an amendment to change the P/D's for these two rights to the same P/D's as for 63-12374, and 63-12383. Another amendment added the P/U for 63-12381 and 63-12382 to 63-12374 and 63-12383.
4. The as-built water system has Well #1 and Well #2 connected into a single pipe distribution system with 4" PVC mainlines that serve all the lots in the subdivision. All lots have water service, and most lots have completed homes.
5. Irrigation water for the subdivision is provided by Transfer 4645 of WR 63-07778B, with the P/D at Well #2. At the meeting on Sept. 24, 1999, Jim Schelhorn was asked to file another transfer to add Well #1 as a Point of Diversion for the irrigation right. This second transfer has not been completed at this time - see enclosed letter of January 20, 2000.
6. The water system is operated with Well #1 as the primary well, and Well #2 started up as needed. The system has a variable speed pump control and pumps water as needed for internal domestic use and irrigation of yards, and common areas in the subdivision. Well #1 is at a lower elevation, and operates at about 25 psi higher than Well #2. Both wells have installed flow meters, and can be chlorinated as needed.

7. The water system serves Lots 1-4, 6-15, 17-27, Blk 1, and Lots 1-2, 4-9, Blk 2 of the Sky Ranch Estates, for a total of 33 lots, the same total for all four permits. The water bearing zone to be appropriated was 500-700 feet for both wells. Well #1 screens are at 490'-530' and Well #2 screens at 525'-567'.
8. The total diversion rate for the four permits is 0.53 cfs for the 33 homes in the subdivision. The combined allowed diversion rate for Multiple Domestic would be 0.27 cfs for 33 homes. I would recommend that each water right be allowed the diversion rate shown in the permit, with the condition that the maximum diversion rate for all internal domestic use be 0.27 cfs.

The irrigation transfer diversion rate is for 1.01 cfs. I would recommend that the total diversion rate for all five rights be: $1.01 + 0.27 = 1.28$ cfs. The combined diversion rate calculated for both wells, based on the pump curves, was 1.27 cfs. Since the pump curve rates are based on operating pressures of 65 psi at Well #1, and 45 psi at Well #2, the pumps can produce 1.28 cfs at a lower operating pressure.

RE: Permits No. 63-12374, -81, -82, -83.
Transfer No. 4645; 63-07778B.

Dear Mr. Schelhorn:

The four Water Right Permits listed are for internal domestic use in the Sky Ranch Estates subdivision. The Transfer is for irrigation of the subdivision.

On Sept. 24, 1999, you met in our office with me and Dan Nelson to file Proof of Beneficial Use for 63-12381, -82, and to amend all four permits to have the same Points of Diversions(wells), and the same Place of Use(the entire subdivision). At this meeting you were asked to file another transfer for the irrigation right to include the second well(well #1) as a Point of Diversion, along with Well #2. Since the irrigation transfer only identified one well(well #2) as the Point of Diversion, it is necessary to also include Well #1 as a Point of Diversion. Both wells need to be shown on the irrigation right because they pump water into a single water system that serves the entire subdivision for both internal domestic and irrigation uses.

Please call me at 334-2190 to schedule a time to meet with us on this second transfer of the irrigation right.

Sincerely

Dan Tomich
Water Rights Examiner

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 63-12374

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit.

Your proof statement indicates a domestic use for 16 homes, irrigation of 40 acres with a rate of diversion of 1.01 cfs. This permit authorizes a maximum rate of diversion of 0.15 cfs for domestic use for 9 homes, however you do have additional water rights which cover the additional usage. This permit however, will not be licensed for more than 0.15 cfs.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water. If you have questions concerning the field examination, you may contact the **WESTERN** Regional Office of the department in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH, Administrative Assistant
Water Allocation Bureau

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 63-12374

Dear Permit Holder:

The Department of Water Resources (IDWR) has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a preliminary order issued by IDWR pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by IDWR unless a party petitions for reconsideration or files an exception and/or brief as described in the enclosed information sheet.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed.

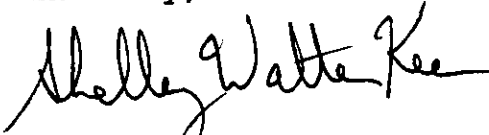

The Department will send you a "Proof Due Notice" approximately 60 days prior to the above referenced date requesting you to file either a Proof of Beneficial Use form or a Request for Extension of Time form.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address PRIOR TO July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address AFTER July 1, 1996, you must notify the department within 120 days of the change.

APR 2 1997

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

Sincerely,

A handwritten signature in cursive script, reading "Shelley W. Keen". The signature is written in dark ink and is positioned above the typed name.

ACTION OF THE DEPARTMENT OF WATER RESOURCES
APPROVED

This Permit is _____

Date 3/24/97

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY:

GENERAL CONDITIONS:

1. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
- ② This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply wells must be drilled a minimum of 50 feet and 100 feet respectively from a septic tank.
3. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If a bottom hole temperature of 85° or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.

SPECIFIC CONDITIONS:

- The open and/or production interval in this well must be between 500 - 700 Feet.
- This well is not authorized for use as a public water supply without an endorsement from the appropriate DEQ and/or district health office. (See cond #2 Above)
- This well is not authorized for use pending action on the water right application # 63-12374
- Applicant acknowledges that he accepts all risk associated with the expedited approval of this drilling permit. (See Attached request)

ACTION OF THE DEPARTMENT OF WATER RESOURCESThis permit is **APPROVED**Date: **3/24/1997**

If approved, this permit authorizes the construction or modification of a well subject to the following conditions. **READ CAREFULLY!**

CONDITIONS OF APPROVAL:

1. This drilling permit is valid for two (2) months from the approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless an extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required prior to construction of this well. The local Health Department should be contacted for septic tank/drainfield locations. Domestic wells must not be drilled closer than 100' from any drainfield and 50' from any septic tank. Public Water Supply wells must not be drilled closer than 100' from any drainfield or septic tank.
3. The well shall be constructed by a driller currently licensed in the state of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If the bottom hole temperature of 85 Degrees F (29.44 oC) or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.
8. Idaho Code, S 55-2201 - 55-2210 requires the applicant and/or his contractors to contact "Digline" (DigLine is a one-call center for utility notification) not less than 2 working days prior to the start of any excavation for this project. The "Dig Line " Number for your area is 1-800-342-1585.
9. The open and/or production interval in this well must be between 500 and 700 feet.
10. This well is not authorized for use as a public water supply without an endorsement from the appropriate DEQ and/or District Health office. (see condition #2 above).
11. This well is not authorized for use pending action on the water right application #63-12374.
12. Applicant acknowledges that he accepts all risk associated with the expedited approval of this drilling permit. (see attached request).

MEMORANDUM

TO: GARY SPACKMAN & ROB WHITNEY

FROM: STEVE LESTER *SL*

DATE: MARCH 19, 1997

RE: SKY RANCH INC. (JIM SCHELHORN)

Jim Schelhorn has requested additional consideration for an existing drilling permit plus expediting of another drilling permit application for part of his overall Sky Ranch Estates development. His request is via letter dated March 13, 1997 (attached).

From previous discussion with him and per IDWR files, the following requests appear to be involved:

1. Extension of time to complete development approved by T. 4645 for license 63-07778B, the irrigation well to be drilled for the entire subdivision. That well will also serve as the domestic P/D (7 homes) for pending application 63-12383, which is now being advertised. The transfer was approved October 2, 1995 and work was to be completed by October, 1996.

2. Extension of time for drilling permit 63-96-W-0693 for above well. The drilling permit was approved on September 13, 1996 but no drilling has occurred per conversation with Rob.

3. Expedited approval of d.p. application 63-96-W-0914 for the domestic well in pending application 63-12374 (reduced from 10 to 9 homes recently).

Per DEQ's letters and per telecon yesterday with Guy Manley of SW District Health, the water quality aspect of well construction and use will focus on at least two areas: is the well at least 100' from septic systems, and will the well use be limited to less than 25 people per year? A well for 25+ people per year must be regulated as a public water supply per DEQ.

It appears we have adequate comments in application 63-12374 to make a regional office decision about that filing and its related drilling permit application.

To address an extension for the irrigation well drilling permit, the S.O. must approve more time to complete T. 4645. Otherwise, there does not appear to be a basis to grant a well drilling extension of time or issue a new drilling permit, whichever course is more appropriate.

Most likely, more time can be allowed for T. 4645, thus allowing the irrigation well drilling approval to move forward. There does not appear to be a compelling reason to deny the expedited drilling permit for 63-12374. Any drilling approval for that domestic well, plus any other wells for the entire subdivision proposals, must include water bearing zone language consistent with related water right applications (500-700' zone).

RE: Irrigation Well for SkyRanch Subdivision

Dear Steve,

Concerning the well with water rite#63-0777 8B and drilling permit#63-96-W-0693. We would like to request an extension in order to complete the well.

We have been unable to start drilling and construction because of our drilling technique. We require water in a pond in order to drill. That is a good volume of water and the department requires potable water at that.

Our plan is to drill the well directly north of this well as a driven well in order to get the volume of potable water to fill our pond so the reverse well can be constructed.

We would like to request the water rite and drilling permit be extended for one year considering the construction costs and subdivision development and drilling time and costs.

Respectfully yours,

Jim Schelhorn

63-07778B Discussed need to obtain more time to complete work per T4645 - should have finished by 10/96. Otherwise, can't proceed with drilling Lot 28 irrig. well. Advised him to send letter to Regm, to be forwarded to S.O.

63-12374 Intended to show well lot 5 as only Dom. well - Lot 28 well will not provide Dom. H₂O to homes in N. end of development.

Overall -

would like to have 1 good production well for entire 4-phase div₂ & meet public H₂O supply guidelines. But not sure any well will come in that good when completed.

So has proposed separate wells for separate phases, limited to < 25 people/well. Also, not sure how long it will take to get everything sold so heretofore to solely pursue single well for all.

RE: Sky Ranch, Inc.
Application for Permit to Appropriate Public Waters; Identification No. 63-12374
Letter from DEQ to IDWR dated February 11, 1997

Dear Mr. Spackman:

We understand that the applicant has modified his application so that no more than nine houses will be served by a well. If less than 25 people will be served by each well, the well and distribution system will not be considered a public water system, and therefore will be unregulated. We advise that if it is found that 25 or more people are served, the applicant will be required to bring the system up to state public water system standards. We may require the owner to install additional equipment, or uncover pipelines to show that construction meets these standards. We will also need to review legal documents that show legal and financial arrangements to assure construction, operation, and maintenance of the system according to the *Idaho Rules for Public Drinking Water Systems*. In addition, extensive water testing and monitoring at regular intervals will be required.

I talked today with Guy Manley of the Southwest District Health Department. He may request the applicant to submit plans to DEQ for review and comment. Our review will be advisory only; the plans need not be prepared by a registered professional engineer.

Please call me at 373-0166 if you have questions regarding these comments.

Sincerely,

Bill Freeman
Water Quality Engineering Specialist

RE: Sky Ranch Subdivision

Dear Gary:

We have made arrangements with Adamson Pump & Well Drilling to drill a domestic well at Sky Ranch Subdivision and have been waiting patiently to get into their drilling schedule. So time is of the essence. We are requesting from you any assistance you might be able to give us in obtaining our permit so that we may start drilling as soon as possible.

This water is seriously need for the road development, compaction, dust control and the general continuance in the development of the Subdivision. Your cooperation in this matter would be greatly appreciated. Please don't hesitate to contact me at the above number for any inquiries you might have.

Thank You,

Jim Schelhorn

RE: Sky Ranch, Inc.
Application for Permit to Appropriate Public Waters
Identification No. 63-12374

Dear Mr. Spackman:

The applicant proposes to construct a well to serve 10 homes. The well will be considered part of a public water system; therefore, the project must be designed and constructed under the supervision of an Idaho registered professional engineer. DEQ's review process is as follows:

1. The applicant's consultant must submit a thorough site evaluation, including our *Well Siting Checklist*, showing the location of potential sources of pollution. We will transmit the *Well Siting Checklist* to the applicant or consultant, on request. We will review the well site assessment, conduct a site inspection, and issue written site approval, if warranted.
2. The applicant's consultant must provide this office with a drilling program and well specifications. The plans and specifications should be accompanied by DEQ's *General Checklist* and the appropriate section of the *Water System Checklist*, available on request. We will conduct a joint review with IDWR, request revisions as required, and issue written approval. We request that no drilling permit be issued until we have had an opportunity to review the drilling program and well specifications.
3. The applicant's consultant must provide this office with detailed plans and specifications for the well house, piping and valves, and distribution system, along with the appropriate section of the *Water System Checklist*.
4. We advise that arsenic is known to occur in groundwater several miles to the northwest of the well site. We have also received reports of arsenic in private wells close to the south shore of Lake Lowell. The standard for arsenic in drinking water is 0.05 mg/L.

5. A 1994 study by Timothy L. Mosko, *Overview of Hydrogeologic Conditions in the Knighton Hills Subdivision and Surrounding Area*, documents the declining water level in the Knighton Hills Subdivision (Section 6, T2N, R3W). The writer argues that because sands are interconnected, deep wells could contribute to local water level declines. If Mosko's hypothesis is correct, then shallow wells near the Sky Ranch well could be affected in the same manner.

Please call me at 373-0166 if you have questions regarding these comments.

Sincerely,

Bill Freeman

Re: Application for Permit No. 63-12374 in the Name of Sky Ranch, Inc.

Dear Sir:

Enclosed is a copy of the above-referenced application for permit which may be of interest to your agency. Please review the application and submit any comments you may have.

This office normally completes the processing of an application within a six-week period and is required to take final action shortly thereafter, however, if your agency desires to file a formal protest against the approval of this application(s), your written protest along with the \$25.00 protest fee must be received in this office by February 24, 1997.

If you have any questions regarding the application, please contact this office.

Sincerely,

Gary Spackman
